Rowse-in, is the drawing in of a Cable to make it streight when it lieth slack in the water. **Rowse in the Cable or Hawser**, but it is not used to the haling in of any other Rope.

Rumidge, is to remove any Goods or Luggage out of a place, as from between Decks, or in the Howld; **Running the Howld**, is to clear it.

Sail, at Sea they call a Ship a Sail, as when they descry a ship, they say a sail, a full.

Save, is to put any thing, as Synnet, Thrum, Raggs, about a Rope to keep it from Galling.

Scarfe, is to let one end of Timber into another, as the making of a Keel from 3 or 4 pieces, which is called **scarfing**; so the stem is fastned into the Keel, which is called the scarfe of the Keel.

Sease, or **sealing**, is to bind or make fast any Ropes together, with some small Rope Yarn, Marling or Line.

Seete, or **seeling**, is a sudden turning aside of a ship, forced by the motion of the Sea and fearful Winds.

Settle a Deck, is to make it lower.

Sew, or **sewing**, is when the Water is gone from the ship, so that it lies on dry land. The ship is sewed a-head, is when the Water is gone but from the head.

Shear, is when a ship goes in and out under sail, and is not steered steady. **Shear a-ground**, is strike a-ground in this unsteady course.

Sheath-

*

Sheathing, is casing of a Ship with thin Boards, and Tar and Hair laid between; it is to keep the Worms from eating through the Planks.

Sheep shanks, is two Poles set a cross near the top where a Block is hung; some call them a **pair of sheers**. by them they take a Mast out, and put it in, and hoise Goods in and out the ship.

Shoars, are pieces of Timber set under the side of a ship to support it from falling aside. Shoars shoaring her up.

Shore, is the Land near the Sea; Banks of the Sea; the **Lee-shoar** is that whereon the Wind Blows; **Weather shoar**, is that from whence the Wind comes.

Shot of Cable, two Cables spliced together makes a shot.

Showle, or **shallow**, is when the Water grows deeper by degrees, and not suddenly.

Slatch, is when a part of the middle of a Rope or Cable hangs slack without the ship, then they say hale up the slatch of the Cable. A Slatch of fair or foul weather, is a little time of fair or foul.

Sound, is a great in-draught of the Sea between two Head-lands, where there is no passage through, is called a Sound; also to try and find out the depth of Water, is termed **sounding**, and that is with the lead and line; **sound the Pump**, is to know what water is in the Well of the Pump; And instead of bidding one sound, they often say, **heave the Lead**, that is cast it overboard.

Spell, is a working by turns at the Pump or Rowing; a fresh spell, is others to come to work; he will give him a spell, is to Row or Pump in his place. To **spell the Hisslen**, is to let the Wind out of a Sail for fear of wringing the Mast. **Spell the sail**, turn it out of the Wind.

Spent, as spent their Mast or Yard, is that the same is broke in foul Weather; but if it come by Fight, they say the **Mast is shot by the Board**, or carried away with a shot.

Splice or **splice**, is to make fast the ends of Ropes one into the other; this is the round splice. the **count-splice**, is when the ends of either Ropes are spliced into other Ropes some distance from the ends.

Split, is the breaking of a Sail or Mast; as the sail is split, the Carriage of a Gun is split; also when Sheevers break, they say it is split.

Spoon, or **spooning afore**, is to put a Ship right before the Wind and Sea without any sail. **Spooning** with the Fore-sail, is to open the same as such a time as the Ship is in danger.

Spring, or **sprung**, is a crack in any part of the Mast; they spring the Mast with bearing a Sail; that is, they crack it; but to **spring ones Loaf**, is to clap the ship close by a wind when she is going at large. The **Spring**, or **Spring-Tide**, is when the Water riseth after a dead Neap.

Stocks, is the Timber and Posts which supports the Hull of the Ship while it is in Building; a **Ship in the Stocks**, is a ship in Building, not yet finished.

Spun-Yarn, is Rope-yarn, the ends scraped thin, and so spun one end to another with a wrench, to make it long.

Standing parts of running Ropes, are those

parts of the Rope which are made fast to the ship sides or elsewhere.

Standing Ropes, are those Ropes which are not removed (as the shrouds) or to run in any Blocks.

Stay, or **Bying a ship a-stay**, is to make it stand before it Tack, or turn about.

Steer, is to govern the ship with the Helm. **Steer by Land**, is to observe any mark on the Land, and so to keep the ship even to that. **To Steer by Compass**, is to keep the ship on the point of the Compass. **To Steer by Direction**, that is to guide her according as the Channel or River runneth. This is to **Command** a ship.

Steve, or **steveing**, is when the Bolt-sprit or Bunk head stands too upright. **Steveing of Cotton**, is when a Deck is thrust full of it.

Stoaked, is when any thing is gotten about the bottom of the Pump, as Water cannot get to it, it is said the ship is stoaked, the Pump is stoaked, or the Limber holes are stoaked.

Stow, is to put any Goods into the Howld, or between Decks; and to **stow the Top-sail**, is to lay or place it on the top.

Strake, is a seam between two Planks.

Stretch, as stretch forward the Billiards or Sheats, is to deliver that part as they must hale by into the hands of others, that they may be ready to Hoyle or Hale.

Strike, is to pull down the Sails; as **strike the sails**, **strike the Top-Mast**, and to strike down into the Howld, is to lower or put any thing from the Tackles into it.

Surge, a Wave or Billow of the Sea; the **Cable surges**, is when they heave at the Cap stain, and the Cable slips back again.

Swifling, is to ease and strengthen the Masts, when a ship is brought aground.

Tack a ship, is to bring her head about to ly the other way. **Tack about**, is to turn her about.

Tallee aft the sheats, is to hale off the sheats of the Main, or Fore-sail.

Tar-pawling, is a Canvas Tarred all over to lash upon a Deck or Grating to keep the Rain from soaking through.

Taunt Mast, is when it is too high for the ship.

Taught, is to set a Rope stiff and fast when they are slack.

Tempest, is when it blows so exceedingly, that it is not possible to bear any sail; it is a degree above a Storm.

Tight, a Ship is Tight when she is staunch, and makes but little water; when the water stinks the ship is found.

Tide, is the Ebbing and Flowing of the water. A **Wind-ward Tide**, when the Tide runs against the Wind. A **Lee-ward Tide**, when the Water and Wind go both one way. A **Tide-gate**, is where the Tide runs strong. **To Tide it**, is to go up with the Tide.

Tire of Ordinance, is when the Decks have them fore and aft; some ships have two or three Tire of Guns, that is two or three Stories or Rooms one above another.

Tow, as **Tow the Boat**, is to drag it (or any thing) in the Water, at the stern of the ship.

Traverse, is the way and angles which the ship makes in going to and again. The **Traversing of a great Gun**, is to lay it itright upon the Mark.

Tripe, is to hale or draw up any thing with a dead Rope by hands, not in any Pulleys or Blocks.

Trim of a ship, is her good swimming.

Trough of the sea, is the hollow between two Waves.

Tuck, is the gathering up of the ships quarter under the Water.

Ueer, or Ueer out a Rope, is to let a Rope run out by hand when it may be stoppt.

Waft, is to guard any Ship or Fleet at Sea; Wafts are used for signs to call in the Boat, or to shew the Ship is in some extremity or distress, and this is a Coat or Gown, or the like hung up in the throwds.

Wake, is the smooth Water which the Ship doth make a stern her.

Walt, a ship is Walt when she wants Ballast.

Watch, a whole Watch is four hours, then others do relieve them.

Water-born, is when a ship is just off the ground, that she floats.

Weather, to go the Wind-ward of a place, is to Weather.

Wharfe, is the Sea shoar, or the place of Landing, the Sands by the River side.

Wawe, or Pawning, is when a ship is not steered steady, but goes in and out with her head.

LXVIII. He beareth Argent, a Beggat or a **Poor Man**, in a ragged, patched, and torn suit, of divers colours, with a **flouching Hat**, **Hose** and **shoes** of an Earthy colour; holding a **Staff** in his right hand, and a **Pitcher** or **Earthen Pot** in his left, proper. See here the only Man for Prowels in his time, **Bellizarius** by name, who (to the amazement of greatness) by Fortunes Wheeling, now stands by the High way side, and Begs, *Da Obulum Bellizario, Give a Half-penny to Bellizarius.*

O. a Beggat with a **Satchel** by his side, head uncovered, **Knees bare**, **staprons** on his legs, with a **dish** in one hand, and a **Staff** in the other, all proper, is the **Coat of Beutler Van Herderen, of Switzerland.**

He beareth Argent, a **Cripple**, or a **Man Lame** of one of his **Legs**, **Cloathed** (and **half Naked**) with **Tattered Rags** of divers colours; supporting himself with (or having **two Crutches**) or two **Crutch staves** under his **Arms**, all proper. After this manner **Cripples** or **Hained persons** are thus described, some lame of their **Hands**, others of their **Legs**, others **Blind**; some with one **Crutch**, others with two, some again are drawn standing, others sitting or lying, with their **Crutches** by them; **Begging** and **Craving** for an **Alms**, or the **Charity** of Good People.

And seeing we are entred into the row of Rogues, Vagabonds, and wandring Beggars (for generally they are such) give me leave to give you the names (as in their Canting Language they call themselves) of all (or most of such) as follow the Vagabond Trade, according to their Regiments or Divisions, as

1. **Curstons**, or Vagabonds.
2. **Faytors**,
3. **Robardesmen**.
4. **Draw Latches**.
5. **Sturdy Beggars**.

These were all above 300 years now last past; but since they are called upon their farther increase

Counterfeit Crankers, Rogues that are able, yet make themselves lame and sore.

Dommerats.

Glymmerers, Firers of Houses, thereby to Steal in Confusions.

Bawdy Baskets, such as prostrate themselves to any person.

Autem Horts, Wives that follow Rogues and Thieves.

Dories, Whores and Bawds.

Dells, Trulls, dirty Drabs.

Kitchin Horts, little young Queans.

Abiam Coves, lusty strong Rogues, Bedlams.

Ben-fakers, Counterfeiters of Passes and Seals.

Ruffelers, Rogues in the highest degree.

Upright Ben, the same as Ruffelers.

Hookers or **Anglers**, such as draw Cloaths out of Houses with hook staffs.

Rogues, common Beggars that will not Work though they be able.

Wild Rogues, Mad Men, Bedlams, called also Mad Toms.

Piggrers of **Prancers**, Horse, Mare, or Beast Stealers.

Pallyards, poor Beggars.

Faytors, or **Fraters**.

Piggs, Thieves, Night-stealers.

Swadlers.

Curtals.

Irish Coyles.

Stwighmen, cheaters by changing of wears.

Jackmen, Counterfeiters.

Patri-coes,

Kitching-coes, little Rogues that first enter the Society.

Whip-Jacks.

Canting Terms used by Beggars, Vagabonds, Cheaters, Cripples and Bedlams.

Avile, a Town.

Autem, a Church.

Autem Hорт, a Married Woman.

Abiam Cove, a lusty Rogue.

Bien, brave.

Woung,

- Bounge, a Purse.
 Borde, a shilling.
 Balf a Borde, six pence.
 Bugher, a Cur Dog.
 Bleating Cheat, a Sheep.
 Ben Fakers, counterfeiters of Passes and Seals. Good makers.
 Belly Cheat, an Apron.
 Bolse, Drink.
 Bowling Ken, an Ale-house.
 Bene, good. Benar, better.
 Beneship, very good fellowship.
 Buse, a Dog. Buffar, Dog-like.
 Bing a waff, get you hence.
 Bing, go or come.
 Crash, eat. Crashing cheat, Teeth.
 Cuffin Quier, a Justice of Peace.
 Cackling cheat, a Cock, Hen, or Capon.
 Cheat, a stolen thing; but the word Cheat joined to others, hath then a variable signification, a Nab cheat, a Hat, or Cap, &c.
 Canke, a Dumb Man.
 Crackmans, Hedges.
 Clapperdogion, a Beggar born.
 Clovers, Thieves, Purloyners.
 Cannikin, the Plague.
 Cleyms, sores on the body.
 Cassan, Cheese.
 Cove, or Cose, Coffin or Cuffin, a Man, a Fellow.
 Coves, Fellows, Regues.
 Caster, a Cloak.
 A Commission, a Shirt.
 Chates, the Gallows.
 To cly the Jerk, to be Whipt.
 To Cut, to speak.
 To Cut bene, to speak gently.
 To Cut bene Whiddes, to speak good words.
 To Cut quier Whiddes, to give evil Language.
 To Cant, to speak.
 To Couch a Hoghead, to lye down asleep.
 Cly, Haunt, Molest.
 Cramp-ring, Shackles, Bolts.
 Confeck, Counterfeit.
 Cackling, Prating, Talking.
 Dimber Damber, a pretty Rascal.
 Dommerer, a Madman, a Bedlam.
 Drawers, Hosen.
 Dudes, Cloaths.
 Darkmans, the Night.
 Deusea vile, the Country.
 Dub the Giger, open the Door.
 Dell, a Trull, a Drab.
 Dine, Spite, Malice.
 Dorte, Sweet-heart, Chuck, Whore.
 Dock agen, do it again.
 Fambles, Hands.
 Fambling cheat, a Ring.
 Ferme, Hole, Cave, or hiding place.
 Flagg, a Groat.
 Filch, Steal or Rob, a Staff.
 Filchers, Stealers.
 Faker, maker.
 Glassers, Eyes.
 Gan, a Mouth.
 Sage, a Quart Pot.
 Grannam, Corn.
 Gybe, a Writing.
 Gimmer, Fire.
 Gigger, a Door.
 Gentry Host, a Gentlewoman.
 Gentry Cofes Ken, a Noble Mans House.
 Guntling cheat, a Pig. Gunters, Pigs.
 Harman-Beck, a Constable.
 Harmans, the Stocks.
 Heave a Bough, rob a Booth.
 Hearing cheats, the Ears.
 Jerke, a Seal. Jerkt, Sealed.
 Jybe, a License.
 Jague, a Ditch.
 Jocky, a Mans Yard.
 Ken, a House.
 Kinchin, little, or Kitchin-coes, little Rogues.
 Lage of Duds, a Buck of Cloaths.
 Libberdye, a Bed.
 Lowre, Money.
 Lap, Butter-Milk or Whay.
 Libkin, a Houle to ly in. Lodging.
 Lage, Water.
 Light-mans, the day.
 Long lib, long lying, last end.
 Lib, ly, lye down.
 Mynt, Gold.
 A Nake, an half-penny.
 Margery Prater, a Hen.
 Mawnding, Asking. Mawnd, Beg.
 To Mill, to Steal.
 Mill a Ken, Rob a House.
 Host, a Woman, a Punk.
 Mawnders, Rogues, Beggars.
 Buffeling Cheat, a Napkin.
 Nolegent, a Nun.
 Nigging, accompanying with a Woman.
 Nip, cut.
 Nab, head.
 Nab cheat, a Hat.
 Nase Nabs, Red Noses, Drunkards.
 Prat, a Buttock, Thighs.
 Peck, Meat.
 Poplar, Pottage.
 Prancer, an Horse.
 Pig, to Ride. pigging, riding.
 Patrico, a Priest.
 Piggers, Robbers, Stealers, High-way Men.
 Pad, a way.
 Pannam, Bread.
 Pallvards, Beggars.
 Prating cheat, the Tongue.
 Quaromes, a body. Quarrons.
 Quier cuffing, a Justice of Peace, a naughty Fellow, a Churl.
 Ruper Ken, the Jayl, a Naughty House.
 Quier, cruel, naught.
 Quacking cheat, a Duck, a Calf, or Sheep.
 Red Hanks, Mallards, Drakes.
 Ruff-peck, Bacon.
 Roger, or Tib of the Buttry, a Goose.
 Rome-bill,

Rome-vile, London.
 Rome howse, Wine.
 Rome Mart, the Queen.
 Ruffe-Hans, the Woods or Bushes.
 Ruffian, or Ruffin, the Devil.
 Rome-cobes.
 Rome-pad, High way.
 Rumm Haunder, a Beggar Fool, flavering Fool.
 Ruffeler, a brave strong Rogue.
 Scowre, wear, put on.
 Shove the Flogging Tumbler, to be whipt at
 the Carts Arse.
 Stamps, Leggs.
 Stampers, Shooes.
 Slate, a Sheet.
 Skew, a Cup or Dish. Scue,
 Solomon, the Maf.
 Stalling Ken, a House to receive Goods stolen, or
 to buy them.
 Skipper, a Barn.
 Strommell, Straw.
 Smelling Cheat, an Orchard, or a Garden, a Nose.
 To scour the Cramp Ring, to wear Bolts.
 Stalling, making or ordaining.
 Stom you, hold your peace.
 Strawling, Brokers, Buyers of Goods.
 Tatterdemallion, a Ragged Rogue.
 Trine, Hang.
 Trining, Hanging. Trind, Hanged.
 To Towre, to see.
 Tib a thy Buttery, a Goose.
 Togmans, a Gown or Cloak.
 Upright, highest.
 Wpn, a Penny.
 Whiddes, Words, Language.
 Wap well, Kiss well.
 Wloune, stolne.
 Parrume, Milk.

LXIX. He beareth Argent, two **Horice Dancers**
 in their Leaping, Dancing, or Fantastick postures,
 variously cloathed, with Handkerchers in their
 hands, and Bells at their Caps, Shoulders, Knees
 Elbows, Or. Now some hold that to name **Horice-**
Dancers, is as much as to name all that I have before
 said, because they are ever drawn and set forth in such
 antick Drestes and Postures.

In the Base of this quarter is another kind of **Fools**
head, cloathed, Gules; the **Cap** with a scapular, or
shoulder cover, Argent. Such a Monkish Fools head
 to the Sinister, is the crest of *Schopper of Brunswick*. This
 may fitly be termed so, because the Cap resembles the
 Mooks Coule, see numb. 53.

The Art of **Dancing**, (though here set forth in its
 rustick and antick postures) yet oppertunely and civilly
 used, is a commendable and rare quality, fit for young
 Gentlemen and Gentlewomen; and hath formerly been

honoured in the Courts of Princes, and it is much com-
 mended to be excellent for recreation after much Study,
 making the Body active and strong, graceful in deport-
 ment, and is a quality very much becomming a Gentle-
 man.

The severall Terms used in Dances.

An **Honour**, it is in a Man to Bow the Body, setting
 the heel of one foot to the side of the other; and the
 Woman to bend or bow the Knees.

A **Salute**, a **Kiss**, or Kiss of the hand with a bow
 of the Body.

A **Double**, that is four steps forward and backward,
 closing both Feet; and in Dancing Books is thus mark-
 ed D.

A **Single**, is two steps forward, closing both Feet;
 the single is thus marked S.

A **Set**, is all that Dance to make a stand.

A **Turn single**, is two steps to one hand, and two
 steps to the other.

A **Strain**, it is thus marked when but once to be
 Played —

A **double Strain**, when twice Played, and is thus
 marked —

A **Back strain**.

The **Characters** in Dances for Men is thus O; for
 Women this J or this We; for a single Woman thus
 Wo:

A **Couple** is thus marked, Cu:

A **Contrary** is thus marked, Co:

The **second, third, fourth, &c.** are thus Figured
 2, 3, 4, &c.

Rounds, or a **Round**, is when all that Dance take
 hands in hands, and so go round too and again.

Cast off, is for Men and Women to loose hands, and
 stand off one another, each facing his partner; or to cast
 off from the leading, to the lower part or last.

Lead forwards and backwards.

Sides all.

Arms all, is to take hands, or by the Arms, and
 so to turn about and change places; or else go in a sin-
 gle, &c.

Set and Turn single.

The **single Pay**, is turning too and again between
 each person.

Change.

A **Slip to the left**, or to the right.

A **double Back**, is four Steps backwards.

Turn off, or **Fall off**, or **Fall Back**, is when
 the Men and Women loose hands, and step back 3 or
 4 steps off one another.

Longways, are Dances for 6, 8, 10, or more, by
 couples following one another.

Cross over, is an exchange of places from one side
 to the other.

A **Caper**, or leap up.

Whoever desires farther knowledg in this matter, let them pe-
 ruse these Books.

The **Dancing Master**, set forth by J. P.

Apollo's Banquet, in which you may have variety of Corants
 Sarabands, Jigs and Horn-Pipes. Y To

TO

GEORGE TWISLETON of Llyer,
in the County of CAERNARVON Esquire.

SIR,

Having Perused the Papers sent You, I can safely Avouch them Genuine, and not in the least Spurious: So that they need not fear to be brought to the publick Test, and look the Sun in the Face, though at first they were but short, and designed for the Satisfaction of some Private Friends: Yet now are sent on a little further Embassie for the common good, for which Travel You have shewed your self an Earnest Promoter, which is acknowledged by him who is,

Your most Ready and Devoted Servant

Randle Holme

CHAP. IV.

AS amongst Men there are manifold Degrees and Callings as to Temporal Employments, so it is decent and necessary that each should be habited as it is fitting for that Estate, Call-in and Employment: as the King in His Robes and Throne of Majesty, a Noble Man in his Vestments of Honor, a Shouldier in his Military Habit either on Foot or Horseback, the Artificer about his employ with such eloathing as is requisite for such Manual Arts or Sciences: so shall all Degrees and Societies be distinguished that thereby they receive such Reverence as is answerable both to their Persons and Qualities, all which as to the Laity concern I have in the foregoing Chapter set forth.

We shall now in this give an account of the Habit and Vestments of Spiritual Persons, and how far such are born or used in Coats of Arms, Crests, Cognizens, Supporters, or other devices.

I. He beareth Saphir, **Dur Blessed Lady** (or the **Virgin Mary**) with **her Son** (or **Dur Saviour**) in her right Hand, and a **Scepter** in her left, all Topaz. The Coat doth pertain to the Bishoprick of *Salisbury*.

He beareth Ruby, two **Lions passant gardant**

[]

Topaz, on a **Chief Saphir**; on a **Tomb Stone** **Dur Lady sitting Crowned** with her **Babe** on her right **Arm**, and a **Scepter** in her left **Hand**, of the **second**. This Coat belongs to the Bishoprick of *Lincolne*.

Mr. Morgan Blazons it, **Dur Lady sitting with her Babe**, which doth import as much as it they were sitting by the side one of the other: therefore he is too short for the true description of the Arms.

Here note that if these Robes and Vestments were of contrary colours, then they ought to be mentioned; as **Habited in a long Robe**, and **Circled about the middle** **Argent**: **Crestment** (or **her Cresture**) **Or**. &c.

II. He beareth **Luna**, **Dur Saviour sitting on a humet Sapeir**, **Habited in a long Robe close** **Sit Mercury**; **holding up his right Hand**, and with his left **Supporting a Hound** of the **second**, **Circled and Crossed**, **Sol**: in Chief behind his Head a **long Cross lying longways** of the last: see *lib. 2. chap. 1. numb. 12.* as the former is the Emblem of **Christs Birth** of the **Virgin Mary**: so this is the most certain Figure and lively description of his **Humanity**, and being in the **Flesh**: which is manifested by his **Living in**, and **Preaching to the World**.

H. He

III. He beareth Mars, Our Saviour in a Naked or *Polome Estate*, with a Towel about his Middle, *Luna*, Supporting of a long Cross in his left Arm, Sol: and his right on his Breast. This is a third Figure of Christs being in the World in his Humanity, and signifieth to us the Pains, Travels, and Crosses which he underwent in the World for our sakes: for he was poor that we might be made rich. For the Foxes have Holes, and Birds have their Nests, but the Son of Man hath not where to lay his Head. *Matt. 8. 20.*

IV. He beareth Saturn, Our Saviour in his Agony wherein his sweat was Drops of Blood trickling down from all parts of his Body, proper: having only a Towel or Linnen Cloath about his Loins. This is an Emblem of his satisfying the Justice of God for the Sin of the World; and his Pain and suffering in the Flesh to preserve us from eternal Miseries. For he was despised and rejected of Men, a Man of Sorrows and acquainted with Grief: He was oppressed and afflicted when his Soul was made an offering for Sin. *Isa. 53. 3. 4. 7.*

V. He beareth Saturn, a long Cross, Sol: with Our Saviour Bowed upon it by his Hands and Feet, with a Towel or Linnen Cloath about his middle (or Loins) Luna: and an Escutivel over his Head, wherein is Written these four Roman Letter, I. N. R. I. which Letters do signifie these Words: *Jesus Nazareth Rex Judæorum*: being the cause of his Accusation and Condemnation, for that he made himself a King, and the King of the Jews.

This is more briefly blazoned a Crucifix, or Christ upon the Cross: and fully represents to us the Death and Passion of our Lord and Saviour Jesus Christ, God and Man, who for our sakes suffered the bitter Death of the Cross, and was made a Curse for us, that we might be freed from the Justice and Curse of the Law, and Eternal Damnation, wherein was that Prophecy of *Isaiah* fulfilled: *He was wounded for our Transgressions, he was bruised for our Iniquities: the chastisement of our Peace was upon him, and with his stripes we are healed.* *Isa. 53. 5.*

VI. A Crucifix fixed in Base, between two Whisk Rods: is the Emperors Coat of the Indians.

VII. He beareth Jupiter, on a Comb-stone in base, Sol: our Saviour in a long Cesture, holding up his right Hand, and a long Cross pometed, in his left about with Clouds, and the Glory of the Sun about his Head, all proper. This is more briefly blazoned the Resurrection of Christ; and so our Faith: others use to set it forth: shewing thereby the Resurrection of the Christian Faith, viz. that Christ truly died, and then rose again from the dead, for he was not able to be held of Death: Death having no more power over him, then while he was satisfying Justice for the Sin of the World. For he Died for our Sins, and rose again for our Justification, as saith the Apostle *Roma. 8. 35. 6. 9. 10. 1. Cor. 15. 3. 4.*

VIII. He beareth Sol, a Mount in Base Venus; Christ habited in a Robe close Firt, and his Cesture cast about his Neck, with his Arm spread a

broad, a Glory about his Head, and involved (or wrapt up) in the Clouds, proper. This is the Emblem of our Saviours ascension into Heaven, as the ancients have set it forth; and for brevity may be termed, Christs Ascension into Heaven from the Mount Olivet. For after he had shewed himself alive, by many Infallible Proofs for the space of Forty Days, he led them out as far as Bethany, and left his Hands and Blessed his Apostles, and while he Blessed them, he was taken up into Heaven, and a Cloud received him out of their sight: Where he sitteth at the right Hand of God, and will there personally appear, till he come again to judge both the quick, and the dead. *Act. 1. 9. 11. & 3. 21. & 10. 42. Rom. 8. 34.*

VIII. He beareth Jupiter, Jesus Christ habited in a Robe with his Cestment cast about his Shoulders. Luna: holding up his right Hand, and in his left a Mount, and a Glory about his Head, all proper. This is the Emblem of our Saviour in his Glory, for though it be said of him that he hath ascended above all Principalities and Powers, and is set down on the right Hand of Majesty on high: Yet when the Protho-Martyr St. Stephen (was ready to suffer for the Testimony of him) saw the Heavens opened, and the Son of Man standing at the right Hand of God, as being in a ready posture to receive the Spirits of his Servants: from whence our Ancestors did in thus manner describe Christ Jesus in his Glory. *Act. 7. 55.*

IX. He beareth Pearl, the High Priest of the Jews in all his Priestly Robes with an Incense Pot in his Hands, all proper. This is also termed Aaron in his Priestly Garments, proper: which Garments are fully described, *Exod. 28.* to be these, a Miter, an Ephod, a Robe, a Coat and a Girdle, and Sandals for his Feet: Now the description of these take as followeth.

The Miter, it was made of Linnen fine woven after the manner of a Turbot, having two points like horns standing up upon the top of it; in the fore part or front of it, is a Plate of pure Gold with these words engraven upon it, *HOLYNES TO THE LORD*: which is fixed to the Miter with blue silk Lace. This Plate of Gold is termed an Holy Crown, *Exod. 29. 6.* see the High Priests Consecration.

The Ephod or upmost Coat, was a short straight Coat without Sleeves, and was put upmost upon his Garment, and was girded about to keep them close to his Body; the Ephod was made like Cloth of Gold: of Gold, blue Silk, Purple and Scarlet: the shoulders were joyned together by the two edges, having an embroidered gard about it, wrought of the same stuff, viz. Gold, blue Silk, Purple, Scarlet, and fine twisted Linnen. It for length did reach below the Girdle to the breadth of a Mans deep skirts.

The Best Plate of Judgment, was a four square piece of Brautered work made like the Imbratery of the Gard of the Ephod; in which breast Plate was (in twelve sockets of Gold) fixed twelve precious Stones, viz. in the first row, the Ruby, the Topaz; the second row, the Emerald, the Saphire, the Diamond: in the third row, the Turkeis, the Carbuncle, the

Enamellist: and in the fourth row, the Chrysolite, the Onyx, and the Jasper. This Breast Plate was set, or hung on the fore part of the Ephod, on the Breast of the Priest, by Chains of Gold of wrothen work fastned to Rings of Gold which are placed in the corners of the Breast Plate, and on the fore part of the said Ephod at the Shoulders, and near the girdling place.

The **Stones of Remembrance** on the Shoulders of the Ephod, are two Onix Stones having the names of the Children of Israel Graven upon them, six names on one stone, and six on the other, as they were in age: these stones were set and embossed in Gold and set on the Shoulders.

The **Urim** and the **Thummin** of the Breast Plate, which shall be on the High Priests Heart; that is, **Urim** Light, and **Thummin** Perfection; declaring that the flocks of the Breast Plate were most clear, and of perfect Beauty: so by **Urim** is ment also Knowledge, and **Thummin** Holyness, shewing what Virtues are required in Priests.

The **Robe under the Ephod**, it was a long Garment with sleeves, and the hole for the head was in the middle of it. It had an edge or collar of woven work, like the collar of an Habergion that it rent not: the Robe was made of blue silk, and reached as far as to the Knees: at the skirt whereof was placed Pomgranates made of blue Silk, and Purple, and Scarlet round about, and Bells of Gold between them.

The **Coat or under Garment**, of some termed a **Tunicle**; it was under the Robe, and longer then it, reaching down to the Feet: it was without Sleeves, and made of fine Linnen richly Imbrauthered.

The **Girdle** as compassed the Ephod was a Girdle made of Needle work.

The **Linnen Breeches** of the High Priest were worn by all orders of Priests, and they reached from the Loyns to the Thighs to cover their Privities, that no nakedness, or filthiness appear in them by not covering themselves.

The **Sandals**, were soles of Wood or strong Leather with Lachets or Tyes and Buckles fastned to them, to make them sit close to the Feet, and to keep them slipping off.

The rest of the **Priests** and **Levites** in their Orders were clothed in Linnen Coats down to the Feet, and Girdles about their middles; Bonnets on their Heads, and Sandals or Slippers on their Feet; which were richly Imbrauthered, both for Glory and Comeliness.

The High Priests manner of Consecration.

The **Priest** to be **Consecrated** is brought to the Door of the Tabernacle or Temple, where he is washed with the Water in the Laver set before the entrance.

Then is put upon him, by the Hands of the Prince or King, the Tunicle, then the Robe, then the Ephod, then the Breast Plate; closing all together with the broidered Gird of the Ephod.

Then is the **Miter** set upon his Head, and then is the

Holy Crown put upon the **Miter**, and gird with a Girdle: after that the **Anointing Oyle** shall be poured on his Head, and he therewith annointed on the Breast, Shoulders, and Arms. This **Oyntment** or **Anointing Oyle of Consecration**, was compounded of Myrrh, sweet Cinamon, sweet Calamus, Cassia, Galbanum, all mixed together with Oyle Olive according to the Art of the Apothecary.

Then shall the **Priest** take a **Calf** and two **Ramms** without blemish, and unleavened Bread, and Cakes unleavened tempered with Oyle, and Wafers unleavened annointed with Oyle, all made of fine Wheat Flower, and put them in a Basket and present them as a Sacrifice before the Lord: that is the Priest shall severally lay his Hand upon their Heads then shall they be slain, to be Sacrificed according to the Law: *Exod. 29. 10. &c.* The Calf for a Sin offering, one Ramm for a burnt offering of a sweet Savour: and the other Ramm for the offering of Consecration: and the Bread, and Cake, and Wafer, for a heave offering unto the Lord, with the Blood of this last Sacrifice shall the lapp of the High Priests right Ear, the Thumb of the right Hand, and the great Toe of the right Foot be touched, the rest of the blood cast about the Alter, and upon it: the Flesh of the Consecration is Seeth and Eaten with the heave Bread by the Priests; what remaineth is in the Morning burnt with Fire.

This for seven Days is performed, before the Consecration be accomplished.

All the Priests must be without blemish, all must be presented before the Lord in the Temple, all must be washed, all must be consecrated by offering certain Sacrifices: all must have the blood of the Ramm put on the tip of the right Ear, the Thumb of the right Hand, and the great Toe of the right Foot: only the High Priest was admitted to enter into the Sanctuary, and that but once a Year: and to Marry none but a Maid, the other Priests might Marry a Widdow. The High Priest was not to mourn for the Death of his Kindred; the other Priests might.

Terms used in the Jewish Religion Explained.

Jewisme, the Jews Religion or way of Worshipping of God: or a Worship under a three fold Law, viz. Mosaiscal, Ceremonial, and Judicial.

Mosaiscal, is that Law which *Moses* prescribed to the Children of Israel distinguished into the

Moral Law, a Law of Manners and Civility, the sum of which is the Decalogue or ten Commandements, an unchangable rule of Worship or precept of Holiness, Righteousness and Temperance.

Ceremonial Law, is the Law for their outward Worship, consisting of many Typs and Ceremonies, shadowing out the truth to come.

Judicial Law, a Law of Penalty, and was such as kept under a refractory People, wherein capital punishments were inflicted according to the merit of the fact.

Decalogue, the Ten Commandments or Words of God.

Revelation or **Inspiration**, is an extraordinary way of discovering some truth, which no human industry could of it self attain unto.

Redemption, a Deliverance, a Rescue or Ransom, is a freeing from a condition of slavery and servitude.

Patriarch, before the Law were the chief Administrators of Religious Services, or such as were extraordinarily called and gifted to foretell future things.

Prophet, or **Seer**, a Divine Predictor of Plagues and Judgments to come.

Priests, such as were appointed for the principal work of Divine Service.

Levites, such as in the time of the Law were subordinated and assistance to the Priests.

Psalm, **Hymns**, **Anthems**; is our thanks to God, or returning our acknowledgment of the good things we do enjoy, by Songs of Praise.

Consecration, is to Dedicate or Devote things, or Places for Holy uses, separating them from common use.

Ordination, is the separating of Persons to Holy and Divine Services.

Censure, is the regulating of abuses in Ecclesiastical Matters.

Suspension, is a Temporary privation of Church Privileges.

Anathema, Excommunication, Cutting off, or separating a Person from all Church Communion and Privileges.

Ordinances or **Institutions**, are such kind of things or Duties, set down for our Instruction and Learning.

Oblations, **Offerings**, is the giving things to God for his Service.

Sacrifice, are the offering of such thing by fire as were for food.

Incense, **Censur**, an offering made by Perfume.

Circumcision, the cutting of the Fore-skin in Male Children, and was a sign of Confirmation of them in the Jewish Religion.

Passover, **Paschal Lamb**, a Feast of the *Jews* kept Yearly in remembrance of their safety in the Land of *Egypt*, and the slaying of the *Egyptians* first born: called the Feast of unleavened Bread.

Vow, is the making of Solemn and Religious promises to God.

Divorce, is a dissolving of the State of Marriage and Wedlock.

Traditions, are unwritten Rules for Instructions in Religion, and sometimes written.

Purim, the Feast of *Lot*, in the remembrance of the *Jews* deliverance, and *Hamon* their great Adversary hanged.

Publicans, were gatherers of the *Roman* publick payments or Tribute from the *Jews*.

Chief Publican, the chief receiver.

Proselyte, are Heathen People who disclaimed Paganism, and joyned themselves to the Church of the *Jews*.

Nethinims, were the *Gibeonites*, who were made

[]

Hewers of Wood, and Drawers of Water for the service of the Temple.

Uisemen, a Title attributed to all Doctors and Teachers of the Law.

Scribes, were the Scriveners or publick Notaries, employed for Writing of Deeds and Contracts, but such as belongs to the Clergy, were expounders of the Law, and did Write, Read, and open the Law of *Moses* to the People: it was a Name of Office, not of a Sect. *Ezra* 7. 6.

Disputer, the most profoundest Interpreters of the Law, such as insisted on Allegories and Musical Interpretations of the Text.

Rab, **Rabbi**, **Rabban**, is as much as a Master or Doctor.

Nazarite, was a kind of Votarie, that separated himself from three things, Wine, cutting his Hair, and pollution by the Dead.

Rachabites, such as would drink no Wine.

Pharisees, a Sect amongst the *Jews* which had no Commerce with other People; nor the Apparel and Habit of other Men; and followed not the Customs and Manners of the World.

Phylacteries, or **Frontlers** for the Fore-head, and reached from one Ear to the other, and were tied behind with a Thong: and those for the Hands, were tied on the Palm of the Hand, or above the Elbow; and were Scrolles of Parchment, on which was Written the Ten Commandments: the making of them broad, was to make them appear more Holy then others: the *Rabbins* call them Prayer Ornaments.

Long Borders or **Fringes** on their Garments, which was to put them in minde of the commands.

Temple, the House of Prayer, and place to offer Sacrifices: the Holy of Holies, is the inner part of it; the Sanctuary, the body of the Temple, and the Court, the place of Sacrifice.

Synagogues, were the Schools or Houses of Prayer, for them as dwelt remote from the Temple.

Grove and **High Places**, were consecrated Woods, and Hills, for Idolatrous Worship: from whence their Idols many times took their Names.

Pentecost, was a Feast at the ending of their Harvest, being fifty days after the second day of the Passover, then they offered two wave Loaves in token that the Harvest was finished.

Feast of Tabernacles, or dwelling in Booth made of Boughs and Branches, after the manner of Arbors and Bowers, a Feast of seven Days kept in remembrance of the *Israelites* livyng in Booths in the Wilderness.

Feast of Trumpets, was the first day of their first Month or New Years-day, which they kept Holy: it was also called the Feast of the New Moon.

Feast of Expiation, so called because then the High Priest did then confess to God both his own and the People sins, and by performing certain Rights and Ceremonies Expiate them, and make an atonement to God for them.

Jubilee, a Feast celebrated every fiftieth Year, in which all Servants were made free, all bought or Morgaged Lands returned to their owners.

Stoning, a punishment amongst the *Jews*, where the Witnesses cast the first stone, and then all the People after till he was dead.

Cru-

Crucifixing, hanging on a Cross, being nailed to it by the Hands and Feet, and there remain in Torture till the body be dead.

Cythes, was the tenth of all their increase, both of Cattle and Fruit which was given to the Priest for their maintenance.

Concubines, are secondary Wives, or half Wives, one kept in the House besides the Wife, else the general appellation denotes an infamous Strumpet, a common Harlot, in the best sense it is a Lords Mils or Whore.

Calimud or **Chalmud**, a Superstitious and Blasphe- mous Book containing the Body of the Jewish Law and Traditions of the Elders, composed by their Rabbins, and of great Authority among them.

Orders of the Officers in the Jewish Church.

The **High Priest**, the chief over all other Priests, who entered into the Holy of Holies once a Year.

The **Sagan** or **Suffragan**, who in case of the High Priests pollution, performed his Office: in this sense they interpret *Annas* and *Caiaphas* to be High Priests the same Year, *Luk. 3. 2.*

The **Chief Priest** of every one of the twenty four Ranks or Orders of Priests, was called *Summus Sacerdos* *quintus Classis*, Chief Priest of that Rank: hence it is that we read of many High or Chief Priest assembled together, *Mar. 14. 1.*

The **Priests**, they did their Service in their Orders, being twenty four in Number, which in their Ranks or courtes, served VWeekly in the Temple: and by lot they determined each particular Priests Service, who should burn Incense, who should slay the Beasts, who should lay them on the Alter, who should dress the Lamps, &c.

The **Levites**, in their journey to the promised Land, were to set up, take down and bear the Tabernacle, and the Vessels thereof: but being seated in the Land, *David* divided them into three Orders, one to have the charge of the Treasures of the Temple: the second to be Porters, and the third Singers.

The **Singers** in time of singing were clad in Linnen Robes or Surplices, they were divided into four and twenty Orders.

The **Porters** waited at the Gates of the Temple, and were also divided into four and twenty Orders that they might supply weekly their turns by lott.

The **Hagnamad** or **Uiri Stationaris**, the heads of all the People, or chief of the Families; and they were divided into four and twenty Ranks and Orders. Hence when an offering was made for all the People, because they could not all stand by, certain Select Persons chosen by the People for that purpose, supplied the stead of all the People, weekly to Minister in the Temple: every Rank had one Foreman chief above the rest, termed *Stationum Princeps*, the Chief or Prince of that Station.

The **Kethinims Office**, was to hew Wood, and draw Water for the Sacrifices and use of the Sanctuary.

X. He beareth Saphir, a Bishop seated in his Chair, habited in his Pontificals, extending (or holding forth) his right hand to the Dexter chief; sustaining his Crozier in his left Arm, stayed upon the Chair, all Pearl. This was the Coat Armour of *Eberhard*, Bishop of *Lubrick* in *Saxony*. If you desire a more shorter blazon, say a Bishop seated in his Cathedral Chair, extending his right hand, and holding his Crozier in his left: We generally say a Man is a Man let him be covered with Cloths; but I am sure in Heraldry a Bishop is not a Bishop except he be in all his Pontifical Vestments: If so then Mr. *Guillims* had not needed to have used such a long prose, as is aforelaid, seeing the bearing was all of one Mettle, or of one colour: in which respect the shorter blazon is sufficient. But if the charge be of various colours or mettels then it is necessary to use a longer blazon: as,

He beareth Ruby, a Bishop habited in his Pontifical Vestment Amethysts, Imbrauthered Pearl; Mittered seated in his Chair, sustaining his Crozier in his left hand, Topaz: holding up his right, proper. Born by the name of *Bishopworth*.

A Morroco Bishops Head, couped below the Shoulders Mittered A. is the Crest of *Kirchberg* of *Bavaria*.

A Bishop is an office of Dignity, not of Order; under which are comprehended, Popes, Patriarches, Primats, Metropolitans, Archbishops, and Bishops: which have nine privileges above Priests namely, of Ordination, Benediction of Nuns, Consecration, Dedication, Degradation, Holding of Synods, Blessing of Chrism, Hallowing of Cloaths, Vessels, Water, &c.

A Bishops Vestments, or Pontifical Symbols of Ecclesiastical Regencie.

Caligae, which are long Hose or Stockins.

Sandalia, a kind of Shoes or Slippers.

Succinctorium, a kind of Girdle.

Tunica, a long Coat down to the Heels: called also **Talaris**.

Dalmatica, a Garment with long and large Sleeves representing the Cross: so called from *Dalmatia* the Country where it was first Woven.

Orate, a Linnen Vail to cast over his head.

Chirothecae, a pair of white Gloves of Kinds skins.

Mitra, is the Miter or Ornament for the head.

Annulus, is a Ring which the Bishop wears to shew he is betrothed to Christ.

Viculus pastoralis, is the Bishops Crozier Staff.

Pallium, or the **Pall**; it is the Ornament of Archbishops and Patriarchs: the Pall is not to be worn but in Church, yet Pope *Gregory* permitted it to be worn in Solemn Ceremonies out of the Church; upon it are four Crosses signifying the four Cardinal Virtues: as Justice, Prudence, Fortitude, Temperance. There are also in the Pall three

three Pinns or Bodkins, signifying the three Christian Virtues of Faith, Hope, and Chariry.

Of the Election and Consecration of Romish Bishops.

The Election was anciently in the Laity and Clergy, all the Clergy shooke off the Laity. And the Pope excluded the Emperour, from him both the Pope himself and other Bishops were wont to receive their Investitures by delivering to them a Ring, crozier Staff, and Miter: not in reference to their spiritual Function, but to their temporal means which they enjoy by the munificence of Princes: but their Ordination is only from the Clergy.

The Bishop thus elect by the Pope and Clergy, is on the Saturday in the evening examined concerning his former Life, and the Trinity is three times called upon for a Blessing: the next morning he is conducted to the Church in way of Procession: First are borne Banners with Croffes in them; then follow lighted Tabers borne by so many Acolyths; then the Deacons; then the Priors in their Orders; then three Acolyths with Censers of Incense: after them a Sub Deacon carrying the Gospel; then follows the Elect Bishop; after him followeth the Bishops that are to consecrate him; after whom followeth the Porters, Readers, Croziers and Singers, in their Orders.

The Bishop Elect and the other Bishops as they ascend the Alter, Bow to the Ground and Confesseth: then is he Examined concerning his Conversation, and Faith; then is his Head (after some Prayers made) Anointed with Chrism, that is Oyle and Balsome; then are his Hands Anointed; then is he Married by the Ring put on his Finger to Christ; the Crozier Staff put into his Hand, to shew he hath taken upon him the charge and care of Christ Flock; and last of all is the Miter set upon his Head. After the Bishops had first laid their Hands upon his Head, and one of them poured out the Benediction, saying, *Receive the Holy Ghost; whose Sins you forgive they are forgiven, &c.* during which Blessing two hold the Bible over his Head, to signifie that he exceed in knowledg and good works. After all these Ceremonies and Mass ended they return home as they came, where the rest of the day is spent in Feasting.

Because the Bishop is a Superintendent and Overseer, therefore he hath the highest Seat in the Church: they are Consecrated ever on the Lords day, and at the third hour, because at that time the Holy Ghost descended on the Apostles, to whom Bishops have succeeded: and at their Consecration there must be present more, but no less then three Bishops.

XI. He beareth Diamond, a Bishop holding his Crozier in his left hand bendwise (or Cross his Body) and his right upon his Breast, Topaz. This

[]

is the true shape and depiction of a Bishop in his Pontificals, as they have in former times been delineated, and set forth in Brass Sculptures, and Monuments of the dead: this is also the habit of the Mitred Abbot, who exerciseth Pontifical, or Episcopal Jurisdictions; as many Abbies formerly had such Priviledges, for their Abbots and Priors.

XII. He beareth Vert, a Mitred Parson habited in a Tunicke, or long Robe, and Surcoat over it with a round Cape, all proper. This cannot be termed a Bishop, because he wants some of his Pontifical Accoutrements, as the Pall and Crozier, and Crozier Staff: without which there is no pastoral Power or Authority in Ecclesiastick Affairs. So that I may well term such a Parson an Haly, or a Nominal Bishop, or an Unconsecrated Bishop; and the reason is because his Pall is not yet sent him from Rome (the place of Approbation, and Confirmation, in former times of all such as were made Bishops) till which come, and a great summe paid for it; it may suffice to blazon (a Parson thus Vested) but a Bishop Elect; or an Abbot Mitred, extending forth his hands, &c.

XIII. He beareth Azure, a Dean in his Canonical Habit, proper: This was the Ornaments of the Church used by Deans of Cathedrals, about the beginning of H. 8. Reign, but since the Reformation it much varieth, as you will afterwards see. This Figure hath only a Gown and Surplice, with a kind of Collar (but of what) I understand not, except some kind of Imbrautery, to distinguish him from inferior Clergy, as Canons and Regular Canons, which I have seen in old Monuments in such kind of habits. see numb. 15.

XIV. He beareth Gules, a Mass Priest, or a Priest in his Canonical Vestments, proper: extending his Hands each side. The mark of a Priest, or a Mass Priest in his Vestures: are the Tunicke, or Under Coat, or Gown, his Surplice, and his Cape, which is generally Velvet, either Red, Purple, or Crimson, Imbrautered with Silver, Gold, and coloured Silks, very rich.

Or. a Priest, or Master of Art, Gown and Cap, Sable: with a Linnen Albe or Vestment cast over his Shoulders, (or a Surplice sans Sleeves) holding a Book in both Hands proper. Is the Coat and Crest of Pfaffen of Swizerland.

XV. He beareth Azure, a Doctor of Law in his Tunicke, with wide Sleeves, Girded about the middle, with a Mantle over his Shoulders, Imbrautered down before, Or. This I find also to be the habit of Doctors of Law and Chancellors, and Deans also, in and about the Reign of H. 6. as the Sculptures of their Tombs to this day doth manifest.

XVI. He beareth Argent, a Benedictan Monk in the Habit of his Order, Sable. The Monks of the Order of St. Bennet, or Benedict, are clothed in a round Coat, and Hood called Cuculla or a Cooke, which covered the Shoulders, in the Winter their Hoods are lined; they wear no Breeches but when they travelled into

the Country. The colour of their upper Garment is Black, under it they wear a White Wollen Coat with such cloth, and they go Booted: they were also by their rules tied to lie in their Hoods and Coats, that they might be the sooner ready for Prayer at the ringing of the Bell. Their Dyet was both simple and sparse, as St. Bennet prescribed them, but now it is much changed, for they Eat Flesh, and Drink Wine Pleasurably: this order of Monks came first into England about the Year 596.

Orders, and Rules of the Benedictine Monks.

First that the Abbot be careful of his charge, to be Holy, Just, Wise, and Charitable, Powerful in his Words to Correct, Exhort, Reprove without partiality: to be free of Dissimulation, Pride, Covetousness, and not to do any thing without advice of the Convent; that he use strangers with all Reverence, and Salute them with an holy Kiss.

That the Monks be obedient, silent, humble, and be Watchful to Prayer: that they should Praise God with David seven times a Day, to wit in the Morning at the first, third, sixth, ninth, hours, in the Evening, and complatory, and at mid - night: that they must Pray with all reverence, that obstinate Persons be expelled the Convent.

That every one Serve in the Kitchen when his turn is, that they Eat and Drink sparingly: that from Easter to Pentecost the Brothers have their Refection or Meal at the sixth hour, and Supper in the Evening: that they fast in Summer every fourth and sixth day in the Week, to the ninth hour: that all Lent time they Eat not, till the Evening.

That every Monk have his one Bed, and a Candle to burn by him all Night: if any come short to Prayers or his Meat, he is to stand apart by himself, and to be left served and shortned in his Viſuals: if any for some great offence be Excommunicated out of the Oratory, he shall make satisfaction by prostrating before the Oratory, who upon Repentance may be received three times, but never after the third offence.

That no Novice be admitted into the Monastery without sufficient trial of his constancy and piety: and that he shall not be shaved, or have a Monk's Garment, till his time of probation be expired, and promise made by him of obedience: that no Noble Men shall put their Children into the Convent, but shall first swear to give them no part of their Estate, but to bestow the same on the Monastery.

That he shall be Abbot or Prior which the whole Convent or the greater or better part shall Choose: That the Provost or Prepositus be chosen by the Abbot to whom he must be subject.

That the Porter be an ancient and discreet Man, who may receive and give answers, and that the Monastery be provided with Water and a Mill, and other Necessaries, that the Brothers should wander abroad. There with a room more Fobberies and Footstoves are furnished down by Risse in his view of all Religions, to which I refer the Reader.

Officers in a Monastery.

- The Abbot.
- The Prior, three in Number.
- The Dean.
- The Priest or Deacon.
- The Steward.
- The Confessor.
- The Overseer of the Church.
- The Sexton to keep the Church clean.
- The Library Keeper.
- The Reader chosen Weekly to Read all the time of the Refection.
- The Provost, or Prapostus.
- The Porter.
- The Admonitor.
- The Sacrist or Keeper of the Vestments, or Sub-prior.
- The Visiter of the Sick, or Overseer of the Sick.
- The Almoner, or giver of Alms.
- The Butler, Sellar keeper, or under Butler, or Drawer.
- The Cooks in number three, Overseers of the Kitchen.
- The Refector, or Usher of the Dining Room.
- The Controller.
- The Monks or Friars to such a Number.
- The Brewer.
- The Baker.
- The Miller.
- The Keeper of the Wardrobe.
- The Instructor, or Mr. of the Novices.
- The Skulion of the Kitchen to make Fires, and wash Dishes, three in number.
- The Overseer of the Works.
- The Chamberlain to see the Chambers kept clean.
- The Carcer, or Purveyor: that buyeth and provides Meat.
- The Novices or Scholars, such as largely come into the Abbey.
- The Coadjutor, or fellow helper, either in Spiritual, or Temporal things.

The Order of Receiving and Consecrating of a Monk.

In most Places anciently none were admitted into the Monastery till they were first tried by waiting on days together without the Gate, and patiently enduring all the speeches that might be directed against them, then open the Abbot receive them with a long Exhortation, admonishing them to their Duties, and chiefly exhorting them to Mortification, Humility, Silence, Obedience, Meekness, Patience, Sobriety, Submission, Concession of their Infirmities, and such like Duties. Then are these Probationers stripped of their own Garments, and clothed in Monks Habit, and are tried one whole Year under strict Discipline: if there be fault on either side, they receive their own clothes again.

again from the Steward, and are dismissed the Monastery.

If they like the Rules and Discipline of the Monastery and will abide in the same, then are these **Novices** or **young Monks** to promise obedience, &c. Whereupon they are (after Prayer made for them, and Exhortation made by a Priest) each Monk to be received, is signed with the sign of the Cross, then is he shaved, or polled rather; then his old Garments are taken off, and he is clothed in a Monastical habit, according to the order of the House, and then with other Holy Men present, is made partaker of the Divine Mysteries of the Eucharist.

The Election and Consecration of an Abbot or Prior.

In ancient times none was to be set over Monks, to be either their Abbot or Prior, but such as were Monks: and they were chosen by the Major part of the Votes of the Monks in the Abby or Monastery, or Friery: yet if the Covent chose an unfit Man for their Abbot, the Bishop of the Diocess with the Neighbouring Abbots, or the Prince of the place may depose him, and choose another. But now a days Princes do ordinarily choose such as they please, and impose them upon the Monks: when he is chosen, he is Consecrated by the Bishop of the Diocess, who hath power to visit the Monasteries within his Jurisdiction and to correct what is amiss.

On the Consecration day which is either a Festival or the Lords day, the Bishop and the Elect Abbot fast the day before, then the high Alter is set with a Cross, and four Candlesticks, the foot of the Alter is covered with Turkey Carpets or Tapestry: also a Table is placed for the Bishop on which is clean Linnen, two Candlesticks, Basins, Towels, the holy Water Pot, with the Aspersory, the Censer with the Bishops Mals Ornaments: there are also three Chairs, one for the Elect Abbot, and the other for his two assistant Abbots.

The Bishop with his Mitre on his Head ascends to the Alter and having Prayed, ascends his Chair of State, the Elect Abbot between his assistants sits in his ordinary Cloaths; then he riseth and boweth to the Bishop, who puts off his Mitre and Prayeth and Blesseth the Elects new cloaths, and sprinkleth them with Holy Water, then sits down, puts on his Mitre, uncloaths the Elect saying, the Lord take off from thee the old Man, and then cloaths him with a Monastical habit, saying, the Lord cloath thee with the new Man: then he kneeleth before the Bishop who Prayeth over him; the Elect promising Canonical obedience: after this the Elect withdraweth and is Habited like a Priest, and so brought between the two Abbots to the Bishop, who is desired to ordaine him Abbot of such a place, then the Popes Mandate is read, then the Elect Abbot sweareth on the Gospel, the Bishop asking if he will be Faithful over the Flock committed to him, if he will be subject and obedient to the Pope, &c. to which if he answers I will; then he Kisseth the Bishops Hand, the Alter and Gospel: after this he withdraweth, and is trimmed in the Abbots Ornaments, and so brought again before the Bishop, to whom he boweth himself, and then

the Musick begins; then the Bishop takes the Pastoral Staff, Blesseth it, and sprinkleth it with Holy Water, and delivers it unto him, the Elect kneeling (the Bishop first having laid both his Hands upon his Head using the Prayer of Consecration, and given him the orders of the Abby whereof he is to be head) after he Blesseth the Ring and putteth it on the Ring Finger of the right Hand; then he receiveth the kisse of Peace.

This done, he retireth again, and returneth with his two assistants, and presents the Bishop with two burning Tapers, two Breads, two Vessels of Wine, and Kisseth his hand: then Mals is said, the Sacraments are Administred, and the Abbot is Solemnly Blessed.

Then the Mitre is Blessed, and sprinkled with Holy Water, and put on his Head by the Bishop, saying, Lord we put on the head of this thy Servant, the Helmet of Salvation, that he having his head armed, may with the horns of both Testaments appear terrible to the adversaries of the Truth, &c.

And lastly the Gloves are Blessed and done with Holy Water, and put on the Abbots hands, who with the Mitre on his head, and Staff in his hand, is brought by the Bishop to the Quire, and seated in his Predecessors Chair, whence he riseth, and Blesseth the People present, and thanks the Bishop: so returns to the Monastery, where the rest of the day is spent in Hospitality and good Cheer.

The Consecration of an Abbatesse and Nuns, are much after this Manner.

The Names of all the Places in a Monastery or Abby.

- The Lodge, or Porters Chamber.
- The Hall, called the Refectory: because it is their Dining Place.
- The Kitchen.
- The Pantry.
- The Skullery.
- The Buttery.
- The Paragrove.
- The Chambers.
- The Dourry or Dormitory, the place where the Monks sleep.
- The Vestry or Wardrobe, where their cloaths were kept.
- The Mill.
- The Bake-House.
- The Brew-House.
- The Sellars.

- The Gardens, and Orchards.

After this Order of St. Bennet had flourished about 400 Years, out of this Root sprung up new Branches, who being offended at the looseness of the **Benedictine** which followed not their Rules and Orders; resolved to

retaine

retaine the old, and so by adding some new Statutes, began more Order of Monks, as:

The **Cluniacenses**, or **Monks of Cluniacum**, or **Clugny**; so called from the place where *Berno* first built them a Monastery: they were not called **Benedictines**, but **Cluniacenses**; by their Rules the Abbots is to Eat with the Brothers, and not always with Strangers: that a revolting Monk, may be received again after three times, they had the Custom of dipping the Consecrated Bread in the Cup, to these Monks *William* Surnamed the Godly, gave a Village in his Dukedom of *Aquitain*, called *Mastick*: Anno 916.

The **Camaldulensians**, or **Camaldulenses**, or the **Monks of Camaldulum**; founded by *Romualdus* of *Assenna*, who Dreamed that he saw a Ladder reaching from that place to Heaven, on which he saw Mortals clothed in white, mounting upwards: these Monks wear white Hoods, and sit bare footed.

The Order of **Uallis Ambrosia**, or the **Uallis Ambrosenses**, or the **Monks of the shadowy Valley**: instituted about 1050. by one *John Gualbert* a *Florentine*, who followed *St. Bennets* Rule, which he enlarged by causing Lights to burn still in the Night both in their Chappels and Dormitories: and that they should wear no other cloaths, but what they made of the Wool of their own Sheep: their habit was of a purple, or as others write of an Ash colour.

The **Sylvestrinians**, or **Monks of Sylvestrin**: so named from *Sylvester* who instituted this order after the rule and habit of the **Monks of Uallis Ambrosia**: This Order began in the *Marquasate of Ancona* in *Italy*.

The Order of the **Grandimontensians**, founded by one *Peter* a Disciple and Successor of *Stephen*, who in the Year 1076. erected this Order in *Gascony* on the Hill *Moretum*, they were called **Grandimontenses**, from a voice which he hard saying three times *Grandi Monte*: that is in the great Hill: he prescribed his followers a rule patched up of *St. Bennet*, and the *Canons Regular* of *St. Austin*: they were first governed by a Prior, after the Pope gave them an Abbot: their habit was a Coat of Mail, with a black Cloak thereon.

St. Antonies Monks of Cienna, set up about 1095. by *Gastho* and *Gerondus* two Noble Men of that place, and were to live according to the Rule of *St. Austin*.

The Order of **Præmonstratensians**, or **Monks of Præmonstratum**: Erected by one *Robert* of *Lorraine*, Archbishop of *Magdenburge* in *Germany*, about the Year 1119. being fore shew'd of the same by *St. Austin* in a Vision; they are Titled *Canons Regular*: their Abbot is not to wear a Mitre, Gloves, or a Ring as other Bishops and Abbots do. These came into *England* Anno 1145. and seated in *Lincolnshire*.

The **Gilbertines**, so called from *Gilbert* of *Lincolnshire*, who in the Year 1148. instituted this Order, his chief Cloysters was at *Sempringham* in *Lincolnshire* []

where he was born, in which were 700 Friars, and 1100 Nuns, who observed Statutes collected out of the Rules of *St. Austin* and *Bennet*.

The **Monks, or Hospitalers of the Holy Ghost**; had their begining at *Rome*, about 1201. they had the same Rules and Priviledges of other Monks: their chief Officer was to take care of Sick, and to burie them being dead.

The **Trinitarians**, or **Monks of the Order of the Trinity**, begun Anno 1211, by *John Matta*, and *Felix Anachoreta*: they wear a white Cloak with a red and sky colour Cross on the Breast of it: they were called Brothers of the Holy Trinity, and Monks of the redemption of captives, for their charge was to gather Money for Redeeming of captive Christians from the Infidels. They came into *England* 1357. two parts of all their Revenues was for their own Maintenance, the third was for Captives. Their Governor or Procurator was termed Minister, who was chosen by common consent of the Brothers, and none to be admitted into their Orders till he were past twenty years of age: they must be shaven, but the lay Brothers may permit their Beards to grow. And at certain times in the Year they absolved the faithfull that were dead in the Church yard.

The **Bethlemites**, or **Monks of Bethlem**; these had their first residence in *Cambridge* in the Year 1357. they were apparelled like the *Dominicans* or *Predicants*, but on their Breasts they wore a red Star like a Comet, in Memory of that Star which appeared at Christs Nativity.

The Order of the **Scopetinians**, instituted by *Stephen* and *James* of *Sena*, and Confirmed by Pope *Gregory* the eleventh, about the Year 1408. These Professed to live after the Rule of *St. Austin*.

The Order of the **Frislonarians**, called also **Monks Lateranenses**: these sprung up in the Territory of *Luca*, which *Eugenius* the fourth ratified. They also followed the Rule of *St. Austin*.

The Order of **St. George of Alga**, Instituted at *Venice* by *Laurentius Iustinianus*, Anno 1407. and Confirmed by Pope *John* the 22. these wear a blue Habit, yet professeth to follow the Rules of *St. Austin*: To these may be added the Brotherhood of the **Bigidiens**; the Servants of the Blessed Virgin Mary; the **Cruciferians**, or **Cross-bearing Monks**; the Brothers of *St. Peter the Confessor*; **Eremites** or **Hermits** of *St. Paul*; with diverse others, which followed the Rules and Statutes of *St. Austin*.

The **Monte-livetenses** Order was set up by *Barnard Ptolomus* at *Sienna* in *Tuscany*, Anno 1047. They wore all white Garments.

The **Bernardines**, so called from *St. Bernard* who was made Abbot of *Clarevallia*, Anno 1058. whose Monks were all of the *Cistercian* Order, yet were from him titled **Bernardines**. They wore a black Gown over a white Coat.

The **Celestini**, so called from *Celestinus* the fifth, their founder whose former name was *Peter Moroneus*: This Order was Confirmed by *Gregory* the tenth, in the Council of *Lyons*. Their Habit was of a sky colour, without a Hood: they lived after the Rule of *St. Bennet*. These Monks came into *England*, Anno 1414.

The Monks called **Gerundinenses**, were after the Order of *St. Bennet*, instituted by *John* Bishop of *Gerundinenses* in *Portugal*, about the Year 610. who built them an Abby: he gave them a white Garment to wear, with his own Coat of Arms on the Breast thereof: they were ordered to wear four Ribbons, to wit, two Red, and two Green. This Order was erected under *Boniface* the fourth, Pope of *Rome*.

The Monks of **Cassinum**, are a Monastery of *Benedictins* where diverse rites were observed, which are not in *St. Bennet's* Rules: the chief are these. Fourteen days before *Easter* all the **Altars** are stript of their Ornaments, and covered with black: the **Images** are Vailed: *Gloria Patri* is not Sung. Three Nights before *Easter*, the Night Service continueth till Morning, and is joynted to the *Mattins*: no **Bells Ring**, the **Candles** are put out.

On *Easter* - *Even* in the Night **Tapers** are kindled, and on *Easter* - Day before *Mass*, there is a **Procession** with burning Tapers and Holy Water, the Priests Singing and Praying. The two next days after, **Crosses**, **Holy Water**, and **Reliques** are carried about with the **Gospel** and **Burning Tapers**, with Singing and Saluting each other with Holy Kisses, the Priests being in their Rich Copes.

On the *Evens* they fast, they work not: nor kneel at Prayer: at other lesser Festival when they fast not, they work. Their Meat is given them by measure, at the Abbots discretion. When they receive New Garments, they march Singing with Tapers burning in their Hands into the Vestery or Wardrobe, where the Gospel is read to them: Be not careful what ye Eat, nor what you shall Drink; nor for your Bodies what you shall put on, &c. then having Prayed, they lay down their old Garments, and receive new.

They must not walk without the Convent with a **Staff**, except they be weak: they are shaven altogether on certain Days.

The Monks of **Uallis Scholarium**, begun 1217. by one *William Richardus* a Scholar in *Paris*, who betook him to the *Desarts* of *Champanie*, where he set up a new Order, but after the Rule of *St. Austin*, borrowing some things from the *Cisterians*.

The Monks of the Order or Congregation of **St. Marks**, Canon Regulars begun in *Mantua*, Anno 1231.

The **Ermites** of *St. Paul* in *Hungaria*, were instituted 1215. after the Rule of *St. Austin*, by one *Eusebius* of *Strigonia*: these came into *England* and seated themselves in *Colechester*, Anno 1310.

The Order of **Boni Homines** or **Boni Viri**, that

is good Men: these Monks good Men were instituted by *Edmund* Son of *Richard* Earl of *Cornwal*, who had been elected Emperour. These did follow *St. Austin's* Rule, and did wear a sky coloured Garment.

The Monks or **Friers** called *St. Maries Servants*, they follow the Rule of *St. Austin*, they wear a short black Coat, and over that a long one, pleated about the Shoulders, it was instituted, 1282.

The Monks called **Jesuati**, begun at *Sene* by *John Columbus* and others, 1365. They were so called from using the word *Jesus* often in their Mouths: they were afterwards called **Apostolici**: they wear a white Garment, and cover for their Heads, a Leather Girdle, and to go bare footed, using only wooden soles. They were permitted to carry a Satchel or Bag to put the Alms in, which they begged.

The **Ermites** of *St. Jerome* in *Spain*, lived under *St. Austin's* Rule, and were instituted 1366. They differ in their Habit, and other things little or nothing from the Monks of *St. Hierome*.

The **Canons** of **Saint Saviour** were instituted in *Italy*, Anno 1366. at a place called *Scopetum*, whence they were named **Scopetini**: these followed *St. Austin's* Rule, and wear a white Cloak, with a white Hood, above a white Linnen Gown.

The Monks called **Albati**, so called from their wearing of white Linnen, these made profession of Sorrow for the Sins and Calamities of the times; they Eat together in the High ways, and slept all promiscuously together like Beasts.

The Monks of **Mount Olivet**, called **Montolivetenses**: this Order begun, Anno 1407. when the Church was divided between three Popes. These professed *St. Bennet's* Rule, and clothed themselves all in white. There were others of the same name long before these, whose Author wore a Linnen cloath about his waite only, the rest of his Body naked.

The **Canons Regular** of *St. George*, called also **Apostolici**: instituted by *Laurence Justinian* Archbishop of *Venice*, Anno 1407. They wear a Linnen Surplice over their Garments, and a black Hood, but out of the Cloysters they wear a black Cloak, with a black Hat.

There be two Orders more of this name, the one wears white, and the other blue: they abstain from Flesh, except in Sicknes, and are not tied by vow to their Profession.

The Monks called **Mendicants** of *St. Jerome*, these were instituted Anno 1407. They Professed *St. Austin's* Rule, they wear dark coloured cloaths. and over their Coat a pleated Cloak divided, they use a Leather Girdle, and Wooden Shoes.

The **Canons** of **Lateran**, makes *St. Austin* their Author: their Cloaks, Scapulars, and Hoods black.

The

The **Monks** of the **Order of the Holy Ghost** were instituted near *Venice*, Anno 1407. they use the same Habit which the **Canons Regular** do wear.

The **Monks** or **Brothers** of **St. Ambrose ad Re-**
mus, were instituted at *Milan*, and confirmed Anno 1433. they wear dark cloaths, and profess **St. Austines** Rule.

The **Monks** called **Minimi** of **Jesu Maria**, were instituted by one **Francis Paula**, a *Cicilian*, Anno 1471. he made 3 Rules, one for the **Brothers**, another for the **Sisters**, and the third for both Sexes called **Certiarii**. He called the **Brothers Minimi**, and the **Sisters Minime**, to teach them **Humility**; they abstained altogether from **Flesh**, they wore only coarse **Linnen**, and wander up and down bare headed and bare footed.

The **Order of Poor Pilgrims**, these came out of *Italy* into *Germany* bare foot and bare headed, some covered their bodies with **Linnen**, others with grey cloth, carrying every one in his hand a **Wooden Cross**, but without **Scrip** or **Bag**, **Staff** or **Money**; drinking nothing but **Water**; feeding all the **Week** on **Herbs** and **Roots**, they abstained altogether from **Eggs**, **Butter**, **Cheese**, **Milk**, **Fish** and **Flesh**: In the **Church** they stretch out their **Arms** in manner of a **Cross**, and **Praying** fall flat on the ground; they stay not 24 hours in a place, and go by couples a **Begging** from door to door. These begun 1500.

The **Monks** of the **Order of the Indians**, so called because they took upon them the **Conversion** of the *Indians*; they wore black **Coats**, and over them white **Gowns**; these begun 1506.

The **Monks** of the **Order of the Society of Divine Love**, these were devout people who met in retired places, remote from the vulgar, where they **Prayed**, **Sung**, **Administred** the **Sacraments**, with other **Acts** of **Devotion**. They were called also **Cheatini**, from *Theatinum*, they were much in esteem in the year 1537.

The **Monks** or **Friers** called the **Society of Jesus**, or more briefly **Jesuites**, so called because they took upon them to advance the **Name**, **Doctrine** and **Honour** of **Jesus** more than other **Orders** heretofore. It was instituted in the year 1540. they wear a long black **Philosophical Cloak** instead of a **Hood**; their **Cap** resembles a **Cross**, which is called **Bareta**; but this they do not wear abroad; their **Cassocks** they call **Solanias**, which they tie with **Silk Stridles**.

This **Order** differs from all others, for besides the three **Ordinary Vows** of **Poverty**, **Chastity** and **Obedience**, they tie themselves to the **Pope** to undertake cheerfully, readily, and without charging him, any **Journey** he shall command, for the **propagating** of the **Roman Faith**.

Their **Rules** and **Constitutions** is to shew the end of their **Society**, which is to do good to their own **Souls** and the **Souls** of others, and that therefore they are bound to **Travel** too and fro in the **World**, which **Constitutions** ought to be heard and read every **Month**.

*

Their **General** and **Provincials**, are to rule diligently and faithfully, with **Mildness** tempered with **Severity**, not to alter any thing in the **Rules** and **Customs** of the **Province** without **Consent**.

The **Sub-Provincial**, is to act the same things in the **Absence**, and in **Case** of **Sickness**, as the **Provincial**.

The **Counsellors** are to advise with the **Provincial** in matters of weight, and not be rash in giving of **Sentence**.

The **Provosts** Office is to see that the **Rules** and **Constitutions** of the **House** be observed, that **Confession** be made at the appointed times, to impose **Ordinary Penance** on **Offenders**, as publick **Reproof**, eating under the **Table**, to **Kiss** the **Feet** of others, &c.

The **Rectors** of **Colledges** have the same **Rules** in a manner as the **Provost**, he must examine the fitness of such as desire admission into the **Society**.

The **Walter of the Novices** is to help, comfort, and instruct them upon all occasions; he hath power in some cases to enjoin **Penance** on them, and also to **Absolve** them.

The **Minister** or **Controller** of the **House** is to assist the **Provost** and **Rector**, that all the **Rules** and **Constitutions** be duly observed; to visit every other day all the **Offices** and **Chambers** of the **House**, to see that all things be in good **Order**.

The **Admonitor** is tied by his **Rule** to put them in mind wherein any of them hath failed in their **Office** and **Duty**, and admonish them to be more careful.

The **Overseer** of the **Church** is to acquaint the **Provost** every **Saturday**, what **Fest** or **Fast** days are the **Week** following, that **Notice** may be given, and to set down what **Ceremonies** are to be used the next **Week** at the **High Altar**; he must have a care that **Masses** and **Prayers** be carefully performed for their deceased **Founders** and **Benefactors**: he must have an especial care of the **Host**, the **Holy Oil**, **Crosses**, **Chalices**, **Reliques**, and all the **Church Moveables**.

The **Priest** is to be devout, holy and reverent in the exercise of his **Function**, to observe all the **Roman Rites**, **Uniformity** and **Customs**; and to be diligent in hearing **Confessions** and **Visiting** of the **Sick**.

The **Preacher** is to Teach sound and wholesome **Doctrine**, not tending to **Curiosity** but to **Edification**; also they are to **Confer**, **Catechise**, **Pray**, **Administer** the **Sacraments**, **Visit** the **Sick**, **Resolve** **Doubts** of **Conscience**, **Compose** **Differences**, and be exemplary in their **Lives**.

The **General Proctor** is to entertain no **Suits** in **Law** if he can avoid them, to keep a **List** of all **Church Benefices** united to their **Colledge**; to have a great care of all the **Writings**, **Popes Bulls**, **Records**, and other **Paper** committed to his **Charge**.

The **Proctor of the House**, is to have a care of the **Houses** **Records** and **Money**, and to give an account how it is spent.

The **Proctor of the Colledge and House of Probation**, is likewise to be careful of their **Records** and **Money**, and to keep a good account of what is received and laid out.

The **Readers Office** is to Read at **Table** distinctly, those **Lessons** which by the **Rules** of the **Colledge** are set

set

set down to be daily Read, as Chapters in the Bible, *Ignatius* his Epistle of Obedience, the *Matriology* of the next day, *Eusebius* History, and the like Books.

The **Overseer**, or **Looker too of the Sick**, called *Infirmarius*, he is to see to their Diet, that they have a Physician, and that they want nothing that concerns them; and that if the Sick party die, he be decently interred.

The **Library Keeper**, is to keep the place Locked, except to those who are admitted, to keep the Books clean, to lend none forth, and to have a Catalogue of them.

The **under Minister** or **Officer of the House**, is to look to the Chambers, Refectory, Kitchen, Buttery, and other places, that all things be fit, and in good Order.

The **Sexton** is to Ring the Bell to Mass, and Passing Bell when any of the Society dieth, keep the Church clean, Light the Wax Candle and Tapers, have a care of the Sacred Vestments, Linnens, Host and Wine, and never be wanting of Holy Water, and shut and open the Church Doors.

The **Porter** is to have a List of the Domesticks, and suffer none to go out without leave; none that returns from the Countrey are to be let in, till the Superiour know it: The Keys of the Gates are every Night to be delivered to the Provost.

The **Keeper of the Wardrobe**, is to have a List of all the Cloaths in the House and Linnen, and must every Week furnish each Chamber with clean Linnen, as Shirts, Towels, Napkins, and every three Weeks sheets for the Beds.

The **Steward of the House** must be careful of the Wine and Water and Diet of the Society, and to have the Wine Cask kept clean.

The **Usher of the Hall**, he hath Charge of the Hall, which they term the *Refectory* (from their refreshing of themselves by Dining and Supping in it) he is to see that there be no want of Water Towels, Napkins, Table Cloaths; that due hours of Refection be observed by the Ringing of a Bell; that he have a List of the Names of them in Commons.

The **Cook** must keep a List of all things belonging to the Kitchen, dress his Meat cleanly, frugally and diligently, not to be wasteful of the Fuel.

The **Excitator**, who wakneth the Jesuites in the Morning, must sleep before the others because he must rise before the rest, Ring the Bell, and carry Lights to every Chamber; and at Night Ring to Bed, and see that every one be in Bed, and the Candles put out, if not to acquaint the Superiour.

The **Caterer** or Provider for the House or Colledge is to Buy all things necessary, imploying that Money delivered to him to the best advantage, giving an account of the same.

Jesuites Priviledges.

Pope Paul the Third gave them power to make what and how many Rules and Constitutions they pleased towards the advance of the Society; and to take as many into their

*

Order as their General would, when as in the beginning they were stitted to 60 only; he gave them power to Preach, Administer the Sacraments, hear Confession, and give Absolution.

That they should have their Coadjutors or Fellow Helpers, both Spiritual as Priests, and Temporal, as Cooks, Bakers, Butlers and Caterers.

They are exempted from all Secular Power, and from all Taxes and Tyths; and may disguise themselves into any Habit when they Travel; and to Exercise all Episcopal and Ecclesiastical Functions, Excommunicate and Imprison Delinquents, give Indulgences, Ordain, Anoint, Exorcise, Confirm, Consecrate and Dispence with Fastings and Prohibited Meats.

They have a Priviledge to Erect Universities where they please, to read publicly in any University they come to without leave, and none to hinder them; they have power to have Conservators, Judges and Advocates of their own, to Correct, Change, Expunge and Burn such Books as they dislike, to be the Popes Library Keepers, and are exempted from being necessarily present at Processions or Funerals.

By reason of these and other Priviledges granted, this Order besides their own Industry, they have grown so numerous in the space of 75 years, that in that time there were 293 Colledges, besides 123 Houses of them; so that of their Society were reckoned 10581; out of their Colledges they raise a Revenue of Twenty Hundred Thousand Crowns yearly.

The **Monks** of the Order called *Capuchins*, whose beginning was about the year 1530. they were confirmed by Pope *Clement* the seventh, by the term *Capucini*.

There are divers more but of less note, as The **Ambrosiani**, Monk of *St. Ambrose*, Ambrosian Friars, who wear red Cloaks over white Coats.

The **Capellanians**, whose Garments are partly black and partly blew.

The **Chalomerians** wear a White Cross on a white Cloak.

The **Cellarj**, from their living in Cells.

The **Brothers of Mercy**, so called from Visiting the Sick, and carrying the dead to the Grave; in the inside they wear Black Linnen, on the outside a sooty coloured Garment.

The **Clavigerans**, from *Clavigeri*, who wear on a black Cowle two Keys, intimating by this that they had power to open and shut Heaven; they make *St. Peter* Author of this Order. The **Forsiciferi**, or **Sheet-bearers**, or **Sheet Brothers**, so called from wearing a pair of sheets on their Cloak, by which they shew that they clip off all carnal Lusts; they wear a black Cloak and Hood.

The

The **Brothers of St. Hellen**, they brag that they were instituted by *Hellen*, Mother of *Constantine* the Great, after she had found out the Cross; they wear white Garments with a yellow Cross on it.

The **Brothers of St. James**, wear a sandy coloured Garment, and Cockle or Escallop shells hanging at it, they make *St. James* their Patron.

The **Brothers of the Johannites**, is an Order differing from the former, for they wear a red Garment to represent Christs Blood, and on the Breast thereof is Woven a Chalice or Cup; to shew that in his Blood our Sins are washed away; they also hold a Book still in their hand.

The **Brothers of the Order of the Valley of Jehosaphat**, go in a Purple Garment; these appoint Judges to decide Controversies of Marriage.

The **Brothers of Joseph**, an Order erected in Honour of *Maries* supposed Husband; these wear Ash-coloured Garments and a white Hood.

The **Brothers of St. Egedius**, or **St. Lazarus**, of some called **St. Giles**. This Order wears a green Cross on a black Cloak with a Hood. There be two sorts of them, some contemplative, who wear black within and white without, using ordinary food; the others wear Tawny colour or Brown, and are Active, their Food is only Herbs and Roots.

The **Order or Brotherhood of St. Rufus**, these go like the **Canons Regular** wearing a scapular over a Linnen Surplice, and a black Hood.

The **Brothers of the Looking Glass**, called **Specularij**, because they always carry them; their inward Garment is black, and the outward white, and on their Breast a black Cross.

The **Brothers of the Stars** called **Stellati**, some of them wear black Gowns and Hoods with Stars on; others have Cloaks without Hoods.

The **Orders or Brotherhoods of St. Anns, St. Arulas, St. Georges, and St. Johns of Jerusalem**, and others that were small petty Fraternities, I find to be seated within our City of *Chester*, but whether their Rules tied them to any peculiar Habit I have not much sought after.

The **Brotherhood or Order of Ignorance**; these Men think it Mans greatest Happiness to know nothing; this is the Ancientest and now the greatest Order in the World, and is like to swallow up all the other Orders and degrees of Learning; and the more happy will it be when it is fed with Tithes and Colledges, and Bishops Lands; but I hope God will send Wise *Josephs* to prevent and suppress its overgrowth.

XVII. He beareth Or, a Monk of the Order of the **Minorites**. These are termed **Friers minors**, **Begging Friers**, or **Gray Friers**; because their first beginning was to live on the Charity of others, as we see those beyond the Seas do at this day, going by couples with Wallets on their shoulders to receive Alms. This is the Order of **St. Francis**, whose Habit was a Hair shirt, and a plain single Wool Coat, girt about with a Cord; they wore a Coull and went bare footed; they first came into *England* about 8 H. 3. Anno 1224. and were called **Franciscans**, or **Franciscan Friers**.

Orders or Rules of the Gray Friers, or Frier-Minorites of St. Francis.

First, they were not to have **Garnaries**, nor two Coats, that they meddle not with Money, nor appropriate any thing to themselves; that they shall be Chaste, Poor and Obedient to Christ, the Pope and their Superiours; to give themselves to Prayer, Modesty, Temperance, and other Virtues.

That the **Governors** of the Fraternity should not be called **Masters**, but **Ministers**, to put them in mind of their Humble Condition, and to follow Christs advice to his Disciples, *Whoever will be great among you, let him be your Servant*: That they hold publick Meetings or Chapters; and that they choose their Provincial Ministers, and these chuse a general Minister over the whole Fraternity.

That the **Clergy** in their Divine Service, follow the Order of the *Roman Church*; and the Lay Brothers say 24 *Pater Nosters* for their Mattens, &c. That they Fast from *All Saints* till *Christmas*; not to enter into any House, but to say *Peace be to this House*, and then they may Eat of what is set before them.

That none be **Admitted** into their Order till they be duly examined and proved, and that Penance be imposed on such who Sin; that they shall not be called **Franciscans** from the name of the Author of this Order, but **Minors** or **Frier Minorites**.

This Order was divided into three **Classes** or **Ranks**, the first was **Friers Minorites**, who are to have nothing either in Common or in Property.

The second was **Monks Clarissans**, from *St. Clara* their Founder, which were Ladies and poor Virgins, that spent their time in Contemplation only; their Order was not so strict as the former, for they had all things in common.

The third was of **Penitents**, instituted for Married Folks, who desired to do Penance, these are called **Friers Penitentes** of *Jesus Christ*; and **Saccis**, from the Sack Cloth which they wore; the Women are called **Sisters Penitents**.

XVIII. He beareth Vert, a Monk of the Order of **St. Basil**, (because they first followed his Rules, though generally they are termed) **Frier Carmelites**, or **White Friars**. At first they wore a Mantle parti-coloured white and red, but Pope *Honorius* changed it to all white, calling them the **Family of the Blessed Mary**. This Order came first into *England* about the year 1240. Some write that they did wear a White Cloak and a White Hood; and under, a Coat with a scapulary of hair colour, which was confirmed to them by Pope *Nicholas* the fourth.

The Rules and Orders of the White Friars or Frier Carmelites.

They were to enjoy no Possessions or Revenues, but to Beg from Door to Door; they were tyed to Fast-ing, Silence, and Canonical hours, much after the Rule of *St. Basil*.

The Lay Brothers were tyed to the Orders of *Peter the Eremit*, as *Bedes*, *Prayers*, and *The Ladies Psalter*; they had no other Vow but that of Obedience to their Superior, the which was called *Prior* or *Master*.

That what was in their *Cloysters*, is to be enjoyed among them both in Common and in Property; but only such as Necessity required for Food and Rayment; and this is the Poverty both of these **White Friars** and **Augustinians**.

This Order was divided into two Sects, the first were called **Friers Carmelites Observantes**, because they lived according to the Rules prescribed them. This Order is held Meritorious, and three years Indulgence is promised to him that shall at any time call them **Brothers of St. Mary**:

The second are called **Friers Carmelites non Observantes**, because they live not according to the strictness of their Rules, but live in Riot and Voluptu-ousness; these have changed their Hair coloured Coat in- to Black.

XIX. He beareth in a Field Gules, a **Carthusian Monk**, in the Habit and Cowl of that Order, Argent. This Order lived a most severe Life, they wore a white loose Coat with a Cowl or Hood of the same; but when they went out a case of Black stuff was cast over them, they had hair shirts, and were shaved or shorn, or polled, just as the *Benedictines* are.

They were first brought into *England* by *K. H. 2.* Anno 1181. The Lay Brothers of the Convent, which were to bring the Meat to the **Hermites** in their Cells, were not shaven, but their hair on the head is cut round and short, their Habit being the same with the Monks,

*

saving the scapular, which reacheth a little below the middle, and is girt close to them: They were called **Carthusian Monks** from the place *Cartusia*, in the Province of *Dolphine*, where this Order first began.

Such an head couped below the shoulders, habited or clothed A. is the crest of *Brunichsen*.

The like to the sinister, hood and clothed G. is the crest of *Walrus*, and also of *Zu Hantendorf* of *Bavaria*.

The like clothed O. cowl or hood over his head and shoulders B. is the crest of *Helgenstein* of *Alsacia*.

The Orders and Rules of the Carthu- sian Monks.

Bruno the first Author of this Order, Anno 1080. in- stituted these Rules for himself and his Convent.

That they should Eat no flesh at all; and that on Fridays they should eat nothing but Bread and Wa- ter.

That they should live apart in Cells, and there to have their Diet singly brought them, except on certain Festivals when they Dined together.

That they should not Converse with each other, but at certain times.

That none shall go out of the Monastery but the Su- perior and Procurator, and they only but about the affairs of the Convent.

That at the hours of Publick Prayer they are to men in the Quire: The diurnal and nocturnal Offices like the *Benedictines*.

That no Women are to come within the Precincts of the Monastery, nor they to speak with any of them, without special Licence given by the Superior.

That the Cells shall be Ground Rooms, and low Built, each having a Garden behind it, invironed with a high Wall.

They are limited to enjoy a certain quantity of Land, a certain number of Sheep, Goats, Mares, which they must not exceed.

There were to be in one Convent but 12 Religious Men, besides the *Prior*, and 18 Converts or lay Brothers with a few Servants.

The Monks of this Order have a Meeting or Chap- ter yearly at *Cartusia*, about their own affairs; whither two Monks out of every Cloyster do repair, where they stay 14 days.

XX. He beareth Azure, a **Cistercian Monk** in the Habit of his Order. The Monks of this Order wear no Leather nor Linnen, nor indeed any fine Woollen cloth; except it be in a Journey do they put on any Breeches, and then upon their return deliver them fair washed: They have two Coats with a Cowl in the Winter time, which they are not to augment; but in the Summer if they please may lessen them; in which habit they are to sleep, and after Mattens not to re- turn to their Beds; their Coats are white, nothing differing

differing from the fashion of the *Benedictine* Rule, except a Girdle, which these wear about their middle: they came first into *England* about 1132; or 26 H. 1. they are called *Cistercians*, from *Cillectum*, a place in *Burgundy*, where they first entered into the Order, to make close to the Rules of *St. Benner*. In the beginning they were named *Grisei*, from their wearing of Grey.

Rules and Orders of the Cistercian Monks.

They were very abstemious in their Talk and Diet, not having above two Dishes, in which the Abbot allowed no more liberty to himself than the Convent; neither do they eat of Fat or Flesh, except in time of Sickness.

From the Ides of September till Easter, they Eat but once a Day, no not on Festivals, except on Sundays.

That they should keep strictly the Rules of their Order, and cut off all the superfluities of Apparel and Diet introduced by the loose Monks of the Order of *St. Benedict*.

They were to possess no Churches, Altars, Oblations, Tythes, nor Sepulchres, neither Mills, farms, or to suffer Women to come into their Convent; but were to abandon all things, and to profess Poverty with Christ.

That the Monastery was to consist of 12 Monks and an Abbot; that they were to keep silent, except to the Abbot or Prior; if any Monk run away, he was not to be received after the third time.

They must be contented with two Coats and two hoods, they must Work with their hands, and observe strictly their Fasts; they must salute Strangers by bowing their head and body; and in imitation of Christ walk with their feet.

The Abbots Table must be furnished for Strangers.

From this Order proceeded the *Bernardines*, or Monks of the Order of *St. Bernard*; but they wore a Black Cloak or Gown over a white Coat; yet on Festivals they wear the *Cistercians* Habit to shew from whence they came.

Also the Order of Monks called *Humiliati*, they gave themselves to Prayer, Fasting, Meditation, and making of Cloth, they wear a plain Coat, a Scapular, and a white Cloak over it, and follow *St. Bennets* Rule in some part.

XXI. He beareth Or, a Canon Regular, of the Order of *St. Augustin* in his Habit, proper. These are also termed the Monks of *St. Augustin*, or the Black Canons, or *Augustine* Hermits. Their Habit is a white Coat next to their Body, having under it a Doublet and Breeches, white Hose, and Shoes or Slippers; upon the said Coat is a Linen Surplice, with narrow sleeves, which is girt about the middle, over which is worn a black Cloak, with a hood covering

*

the Head and Neck; which reacheth to the shoulders: When they walk out, they cast the Hood behind their Necks, and wear on their heads a Black cornered Cap, or a Broad Hat, and have their Crowns shaven, but not so much as other Monks: their first appearing in *England*, was in the year 1252. These were first called *Guile-helmites*, from *William*, Duke of *Aquitain*, who first erected them a Monastery: But Pope *Innocent* gave them the name of *Eremites of St. Augustine*.

The Rules of the Canons of St. Augustine or Black Friars.

St. Augustine living in *Hippo*, instituted a Convent of Clerks, which he caused to live according to the Rules Instituted and Preached by the Holy Apostles; instructing them in the Evangelical Profession, *Viz. Love of Poverty, Obedience and Chastity*; that they should be subject to one General Prior.

That they should Live in Cities to Instruct and Teach the People, and should wear a Black Coat, with a Hood of the same; and under a short White Coat, with a Leather Girdle and Horn Buckles. That they should have nothing in Property, but all things in Common: That they should not be Sollicitous what they should Eat, Drink, or wherewith they should be Cloathed.

That none be admitted without Trial; that secret Faults be reprov'd; if not repented, then punished; to observe the Time and Manner of Praying and Singing; the time of Working, Reading and Refreshing, with their Behaviour both at Home and Abroad: That there be no strife, envy, or evil words among them.

That the Superiour use not harsh words in reprov'ing, but shew a good example to his Brothers; that he be Humble, Wise, and careful of his Charge.

These Rules are followed and observed not only by all Canon Regulars and *Eremites* of *St. Augustin* Order; but also by the *Friers Mendicants, Dominicans, Canons Regular of St. George, Eremites of St. Jerome, Hospitallars, St. John of Jerusalem, Gilbertines*; with many more, who notwithstanding differ in their Habits, Exercises, and manner of Living.

XXII. He beareth Vert, a Canon Secular in the Vestment pertaining to his function. These were a sort of Priests called secular Priests or Canons, in regard they performed the Offices of such as served in the World, by Administring to Lay People upon all occasions, whereas those that lived Regularly did not so, neither had they their Diet and Lodging in common like Monks, Friers, and Regular Canons, but had Habitations apart, and their Maintenance several, by distinct shares called *Prebendaries*, and *Ancaridg*.

A a

es,

es, &c. as those in Collegiate and Cathedral Churches use to have.

For their Habit it was antiently the same to our **Canons** now, viz. a **Black Gown** reaching to the feet, and a **Surplice** extending to the Knees with wide sleeves, as may appear from divers Monuments of former Ages; about their Necks they wore a kind of a deep Ruff band, and have their Crowns shaven.

Of these kind of **Canons secular**, were those that in **King Edgars** time had got footing into diverse of our **Monasteries**; but through the advice of **St. Dunstan**, and the power of that devout Monarch, they were ejected, and the Monks again restored, according to the minds of their Pious Founders.

These **Ecclesiastical Canons**, instead of an Abbot, had the **Bishop** for their Governour, and were seated as I said before near **Cathedral Churches**, which formerly were called **Monasteries**, but now corruptly **Minsters**. These Canons while they lived strictly according to their Rule, were named **Canons Regular**; but when they fell off from their strict way of Living, and meddled with Worldly business, they received a new name of **Canons Secular**.

Degrees of Ecclesiastical Persons in the Romish Cathedrals.

They divide their **Church Officers** into three Ranks or Orders: As first Offices of Dignity which are these, the **Pope**, **Patriarch**, **Primate**, **Arch-Bishop** or **Metropolitan**, **Bishop**, **Arch-Presbyter**, **Arch-Deacon** and **Provost** or **Prepositus**; of some of which I have spoken before in *numb. 10. 11.*

Those of less dignity are such as belong to the Quire and Chapter, as the **Dean**, the **Sub-Dean**, **Precentor**, **Succentor**, **Treasurer**, **Organist**, **Singers** or **Queristers**, &c. of which some are Secular others Regular.

The second are Orders Sacred, which are the **Deacon**, **Sub-Deacon** and **Priest**.

Those of the lesser Order which are not Sacred, are the **Dow-keepers**, **Readers**, **Eroxcists**, **Acolyths** or **Caper-bearers**; of all which Order I shall give you a brief description of their Charge in Holy things, and the manner of their Habits and Ordinations.

Of the Vestments and Consecrations of the several Orders of Persons in the Romish Cathedrals.

The **Dow-keeper** or **Porter**, is instructed in his Office by the **Arch-Deacon**, who presents him to the **Bishop**, and he Ordains him, by delivering to him from the Altar, the Keys of the Church; saying, *So do and so live, as thou were to give Account to God of the thing Locked up by these Keys.*

The **Reader** or **Lecturers** Office is to pronounce and read clearly the Lessons appointed to be read in the Church; none must exercise this Function but he who is Ordained by the **Bishop**; which said person is presented to the **Bishop** in his Gown and Surplice or Alba, to whom after some Prayers said, in the presence of all the people, is delivered unto him the Book in which he is to read; saying, *Take and Read the Word of God; if thou art faithful in thine Office, thou shalt have a share with them who dispenze the same Word.*

The **Eroxcist**, is he who calling on the name of **Jesus**, doth by that name Adjure the Unclean Spirit to depart out of the Possessed, on whom he layeth his Hands; when the **Eroxcist** is Ordained, he receiveth the Book of Adjuration from the **Bishop**, saying, *Take and Learn these by Heart, and receive power to lay thy Hands on the Possessed, whether he be Baptized, or a Catechumenus as yet.*

The **Acolyths**, or **Caper Bearers**, whose Office it is to Light the Tapers, and hold them while the Gospel is read, to provide Wine for the Chalice, and Vessels for the Eucharist; also his Office is to make the **Agnus Dei** of Consecrated Wax and Chrisme, which is distributed by the **Pope** in the Church; they are presented to the **Bishop** in White Garments, who doth instruct them in their Office and Function (using certain words) then doth the **Arch-Deacon** deliver them a Candlestick with a Wax Light in it, and an empty Tankard, to shew their Office is to provide Lights and Vessels for Divine Service.

The **Sub-Deacon**, whose Office it is to read the Epistle, to receive the Peoples Oblations, and to bring them to the Deacon; to carry also the **Patin** and **Chalice** to the Altar; to hold the **Walon** whilst the **Bishop**, **Priest** and **Deacon** wash their Hands before the Altar; to wash also the Altar Linnen: When the **Bishop** Ordains him, he is Presented to him in a Black Coat girt to him, over which is a Surplice and a Belt; to whom the **Bishop** delivers into his Hand the empty Patin and Chalice; saying, *See whose Ministracion this is which is delivered to thee;* from the **Arch-Deacon** he receives then the Tankard with Wine and Water and the Towel.

The **Deacon** or **Minister**, whose Office it is to Preach to the People, and to serve or assist the **Priest** at the Sacraments; to cover the Altar, to lay the Oblation thereon, to read the Gospel and the Epistle also in the **Sub-Deacons** absence; in Processions to carry the Cross, to say the Letanies; to rehearse the names of those who are to be Ordained and Baptized, and to name the Holy-days, &c. they must not Administer the Sacraments but in case of Necessity, and by permission of the **Bishop** or **Priest**; nor must they without leave sit in the presence of a **Priest**. The Habit of a **Deacon** is his Coat girt to him, over it a Surplice of fine Linnen; thus being presented to the **Bishop** before the Altar, after some Prayers said, the **Bishop** alone layeth his Hands on him and Blesseth him; after that delivers to him (using certain

tain Words) the Book of the Gospel, and the Stola which he puts over his Shoulders, and so after the Blessing departeth.

The **Priest** is the highest Sacred Order, whose Office it is to Pray and Preach, to Administer the Sacraments, to say Mass, and offer Sacrifices for the Quick and the Dead: When he is to be Ordained, he is presented to the Bishop before the Altar in the Habit of a Deacon, where after some Prayers are said, the Bishop with some other Priests lay their Hands on his Head, then Anoint his Hands with Oyl; after that delivers into his Hands the Chalice with the Wine, and the Patin with the Host upon it, saying, *Receive Power to say Mass for the Quick and Dead, and to Offer Sacrifice to God in the Name of the Lord.* Then the Bishop Kisseth the Priest, to shew he is his equal in respect of Order; whereas the Deacon and Sub-Deacon Kifs the Bishops hand, to shew they are of an inferior Order. The Priest must not say Mass till he have first Washed and Confessed his Sins, and have also Cloathed himself in his Priestly Garment, which are these following.

First, the **Amicus**, or **Superhumerales**, which like the Ephod of the Priests and Levites, or Vail covers the Head and Shoulders of the Priest.

The **Alba** or **Calaris** called also **Camisia**, which is a Surplice of White Linnen, reaching almost to the Heels.

The **Girdle** or **Belt**, with which the Priests Loynes are girt.

The **Stola** or **Diarium**, is a thing worn in form of a Chain about the Priests Neck, it covereth both his sides hanging cross way on the Breast down to the Knees; they habite **Orators** with this kind of Robe that Preach, or Pray for the People.

The **Manipulus** or **Sudarium**, called also **Mappa** or **Phanion** (for all these names it hath) is a Towel or Handkerchief carried by the Minister or Priest in his left Hand, or on his left Arm.

The **Casula** or **Cappa**, or **Planon**, is an upper Garment which covereth all the Body, as it were a little Cottage which in Latine is called **Casa**.

Before the Priest be suffered to Preach, he is examined whether he be apt to Teach, and be well reported off by them who are without; then he must subscribe to the Articles and Confession of Faith, and Discipline of the Church, &c.

XXIII. He beareth Or, a **Canon Regular** of St. Sepulcher in his **Canonical Habit**. The Coat belonging to this Order of Priests is an under Robe of White, overcast with a Cloak or Mantle (not altogether so wide as his Robe) upon the left shoulder whereof is fixed a Patriarchal Cross.

On their Heads they wear a **Corned Cap** of the same colour to the Cloak, viz. Black; they are called **The Brothers of the Lords Sepulcher**.

The **Thabenneses** are a kind of **Eremites**, so called from **Thabenna**, an Island in the Province of The-

*

baia; they wear Goats Skins which they must never put off, but when they Communicate, then they come only in their Hoods; they sleep not in Beds, but sitting in Chairs.

They live together in one House distinguished into divers Cell, and in each Cell 3 Monks, yet all eat in one Hall with their Faces covered, that they seem not to Eat; none of them is forbid to Eat or Fast.

That no Stranger must be admitted to their Order under 3 years Trial; they must Pray twelve times in the day, likewise in the Evening and in the Night, a Psalm preceeding each Prayer.

The **Dieronymians**, or **Monks** of the Order and Rule of St. **Jerome**, whose Garments were of a swart or brown colour; over their Coat they wore a plaited Cloak divided and girt about with a Leather Girdle, and wear Wooden Shooes: They spend their time in Devotion, Writing, Meditation, and Educating of Noble Youths.

The **Gregorian Monks**, erected by Pope **Gregory** the great, to whom he prescribed the Rules of St. **Benedict**; they do wear a red Cross on the Breast, these did not have their Beards, like other Monks.

XXIV. He beareth Or, a **Dominican Frier** in the Habit of his Order. These are also called **Black Friers**, or **Preaching Friers**, and **Frier Mendicants** or **Begging Friers**. This Order first begun by St. **Dominick** a **Spaniard**, in the time of Pope **Leo** the Third, who being at first a Canon, with a few that he chose to be his Companions, instituted a new Rule of Strict and Holy Living; and lest they should grow sluggish in the Service of God by staying at home, in imitation of our Blessed Saviour, he appointed them to Travel far and wide to Preach the Gospel; they came first into **England** in the year 1221. the 2 H. 3. by the name of **Frier Mendicants**.

Their Habit was a White Coat down to the Heels, girded about the middle, having a Black Cloak cast over it; on their Heads they wore a Cowl or Hood, which came down below the shoulders; under it was a White Linnen Cap compassing the Face about.

Rules of the Dominican Monks, or Black-Friers.

These Monks or Friers had a **Prior** to their Governor, who followed the Rules and Orders prescribed by St. **Austin**, to which **Dominick** added some things; as to reject all kind of **Wealth**, **Money** and **Possessions**, to hold every year a **General Chapter**, to Fast 7 Months together from **Rood Day** in **September** to **Easter**; on **Fridays** to abstain from **Flesh**; to lye in Blankets, not in Sheets or on Feather Beds; to disperse themselves through the World to Preach the Gospel: they were subject to no Ordinary or Bishop, but to the Pope; had liberty

A a 2

liberty to Preach in any Mans Pulpit, they were exempt from all Ecclesiastical Censures.

XXV. He beareth Azure, a Frier, (or Prior or Abbot) of the Order of the Holy Trinity, for the Redemption of Captives. A Crinitarian Monk, or a Monk of the Order of the Trinity, as some call them: Their Habit was all white, viz. a Robe, a Cloak and a Cowl, with a Red and Blew Cross on the breast of the Robe, and on the left shoulder of the Cloak, that is, the traverse of the Cross Blew, and the ascent of it Red.

This Order was first instituted under Pope Innocent the third, who appointed, that all the Possessions which they should enjoy, might be equally divided into three parts, one for the entertainment and reception of Religious persons, another to relieve the Poor, and the third to redeem Christians kept in Captivity by the Infidels.

The Monks of St. Bridget, this Order was instituted about 1360, by one Bridget a Princess of Sweden, who had the Order as she said immediately from Christ himself; their number consisted of 13 Priests, according to the number of the Apostles, whereof St. Paul was one; four Preachers representing the four Evangelists, and eight Lay Men, the Priests Garments was courle grey, on which was a red Cross, on the middle whereof was a round piece of white Cloth, to resemble the Host which they daily Offer; the Preachers carry on their Cloaks a white Circle, within the same are red pieces of Cloth like Cloven Tongues, to shew the incomprehensible Wisdom of the Evangelists which they represent, with their Learning and Eloquence. The Lay Brothers wear a White Cross on their Cloaks, on which is fixed five pieces of red Cloth, in token of Christs Innocency, and memory of his five Wounds.

The Monks of the Order of St. Justina, was Instituted by Ludovicus Barbus a Venetian, Anno 1409. after the antient discipline of Benedict. This Rule was enlarged by Pope Eugenius the fourth, and the Monks are very careful in washing the feet of Strangers, and do not eat out of their Convent with Secular Persons.

XXVI. He beareth Gules, a Knight Templar in the Habilliments of his Order, proper. They are called Knights Templars, because at the first institution of their Order, they lived and had residence in certain Rooms adjoining to the Temple sometime Built by King Solomon.

As for their Habit it was thus, on their heads they wore Linnen Coifs (like to the Serjeants at Law) and red Caps with turn ups over them; on their Bodies they wear Shirts of Mail both on Arms, Hands, Legs and Feet, over which they wore a short sleeved Coat to the Knees, which was girded to them with a broad Belt and a Sword, over all which they had a White

*

Cloak or Mantle reaching to the ground, with a red Cross on the left shoulder; they wear their Beards long, whereas most of the other Religious Orders do shave.

Their first settling in England, was in that Street called Holbourn in the Suburbs of London, but there they rested not long, for in King H. 2. time, that House which still retaineth the name of the Temple in Fleetstreet, was erected by them, and the Church Built according to the form of the Temple at Jerusalem, in the year 1185.

The Orders and Rules of the Templars.

As touching their first Profession, they were in Order to the remission of their Sins, to their utmost power,

First to defend Pilgrims and Strangers from Spoil and Robbery by Thieves, in their passage to and from Jerusalem.

They had the same Rule prescribed to them as other Monks had, to wit Obedience, Poverty, Chastity, Gravity, Piety, Charity, Patience, Vigilance, Fortitude, Devotion, and such like, so that they lived in a manner after the Canons Regular, possessing nothing in propriety, but were sustained by the bounty of the Patriarch and Christian Pilgrims.

These for their Valour and Care of Pilgrims were exempted from the Jurisdiction of Bishops by Pope Calixtus the second, and from paying of Tithes by Alexander the Third; it was Excommunication to lay violent hands on any Templar.

This Order in the space of 200 years grew so rich and numerous, that in publick meetings 300 Knights have been together, besides infinite numbers of Brothers; they had above 5000 Manners in Christendom, where as the Hospitallers had but nineteen.

XXVII. He beareth Argent, a Knight Hospitaller in his Habilliments of that Order, proper. This Order of the Hospitallers had its first beginning as the Holy Land began to grow famous by the Expedition of the Christian Princes thither, whose chief seat at first was in the Hospital of St. John Baptist in Jerusalem, from whence they were stiled Hospitallers, and afterwards Knights of Rhodes, and Knights of Malta, from their inhabiting in those places.

Their Habit was to be Armed in Mail, or otherwise, over which was a sleeved Coat reaching to the Knees, with a Sword girded about them, with a Broad Belt; and over all they wore a long Mantle down to the ground, all black, with a white Cross fixed upon the left shoulder.

Their first beginning in Jerusalem was 1092, and in the year 1100 they were settled in England, by having a House Built for them in Smithfield in London, which was afterwards called the Hospital of St. John of Jerusalem, from whence they were named Knights of St. John of Jerusalem, but of old they were termed Johnnites.

The

The Orders and Rules of the Knights Hospitalars, or St. John of Jerusalem.

The first Profession of this Order, was by a Religious Vow to **Entertain Pilgrims** coming to the Holy Land, and to defend them in their journey from Insurrection of Robbers.

They followed the Rule of St. **Austin**, but instead of Canonical hours say so many **Pater Nosters**.

They have a **Master** over them which they choose themselves; and in every Province they have a **Prior**.

Every one that enters into this Order voweth to **God**, the Virgin **Mary**, and St. **John Baptist**; **Obedience**, **Poverty**, and **Chastity**: they are tied threetimes in the Year to receive the **Eucharist**. They must not use Merchandizes, be **Usurpers**, nor make **Wills**, or make any their **Heirs** or **Alienate** any thing without the consent of the great **Master**.

None born of **Infidels**, or **Jews**, or **Turks**, were to be admitted into this order: nor **Murtherers** nor **Barred Men**, nor **Bastards**, except of **Earls** or **Princes**. They admit only such as are sound and strong of Body, Nobly descended, and at least eighteen Years old.

They were not to side with one Christian Prince against another, but stand **Neutrals**, and endeavours to reconcile them.

They were distinguished into three Ranks, viz. **Priests**, or **Chaplains**, secondly **Serving-Men**, thirdly **Knights**, which last must be of a Noble extraction. Pope **Hadrian** the fourth exempted them from paying of **Tithes** to the Patriarch of **Jerusalem** who claimed them as his due. Pope **Alexander** the third for their brave exploits against the **Infidels** exempted them also from **Tithes**, and the **Jurisdictions** of **Bishops**.

Religious Orders of Knighthood.

The **Teutonic Knights of St. Mary**, were a mixt Order of **Johannites**, or **Hospitalars** and **Templars**; they were called **Teutonic** from their Country, for they were **Germans** that first undertook this Order, who living in **Jerusalem** bestowed all their **Wealth in Hospitality** to Pilgrims, and defending them in **High-ways** from Robbers: and from our **Ladies Chappel** which was given them, they were named **Mariant**.

Their Habit was a **White Cloak** with a black Cross, and their **Targets** white with a black Cross, they wear their **Beards** long.

None were admitted into this Order, except he were a **Teutonic** born, and Nobly descended. Their charge was to be ready on all occasions, to oppose the **Enemies** of the Cross; and were to say 200 **Pater Nosters**, **Greds**, and **Ave-Maries**, in four and twenty hours. They set up three **Great Masters**, the one in **Germany**,

the other in **Livonia**, and the third in **Prussia**; this was over the other two.

The **Knights of the Holy Sepulcher**, had their being **Anno 1103**, these with a **Guardian** who was their **Governor** had the charge to keep the **Sepulcher**. Their cloaths were all **White**, and on their **Breasts** hung in a black **Ribbon** the **Jerusalem Cross**.

The **Knights of Calatrava**, and Order so called from that Province in **Spain**, they were instituted about 1121. or as some say 1160. they followed the **Cistercian** Order, they wear a black Garment, with a red Cross; they had a **Master** over them, whose **Revenue** was forty thousand **Crowns** Yearly.

The **Knights Gladiators**, so called from carrying on their Cloaks 2 **Red Swords** across, or **Brothers of the Sword**; this Order begun in **Livonia** about the Year 1204. their habit was white: the Rule that they professed was that of the **Templars**: but by the Popes perswasion, they and the **Cuciferi** incorporated themselves into the **Teutonic** Order.

The **Knights of St. James** in **Spain**; these were instituted in the time of Pope **Alexander** the third, they were to follow St. **Austins** Rule: they are Governed by a **Great Master**, whose Yearly **Revenue** was an hundred and fifty thousand **Crowns**: he is next to the **King** in **Power** and **State**, they wear both in **Peace** and in **War**, a **Purple Cross** before their **Breast**, resembling the **Hilt** of a two-handed **Sword**, called **Spatha**: therefore these **Knights** are called, **Milites St. Jacobi de Spatha**.

The **Knights of St. Mary of Mercede**, or of the **Redemption**: because their charge was to redeem **Captives**, instituted by **James** King of **Arragon**, **Anno 1232**. They followed the **Cistercian** Order, and wear a white Garment with a black Cross on it.

The **Knights of Montefia**, so called from that place in the Kingdom of **Valentia**: they were instituted much about the time of the aforesaid **Knights** of St. **Mary** by the same King **James**: they follow the **Cistercian** Order, and wear a red Cross.

The **Knights of St. Julian**, or of the **Pear-Tree**; they were instituted in the Kingdom of **Leon**, **Anno 1179**. These **Knights** have the **Pear-tree** for their **Arms**: But after **Alphonso** the ninth King of **Leon** had taken the City **Alcantara** from the **Moors**, he bestowed it on the great **Master**, from whence they stiled themselves **Knights of Alcantara** and forsook their former **Arms**, and wore a green Cross Flower de lis on their **Breasts**: they lived under the Rule of St. **Benedict**, they first professed **Chastity**, but Pope **Paul** the first permitted them to **Marry**.

The **Knights of Saint Saviour of Montreal**, called the **Order of Arragon**; was instituted **Anno 1120**. by **Alphonso** King of **Navarre**, and first of **Aragon**. These **Knights** wore a white **Robe**, and on the **Breast** an **Anchored**

Anchored red Crosse, their Rule was like that of the templars to whom they succeeded in *Montreal*, but only that they had power to Marry.

The **Knights of the Order of Iesus Christ**, instituted by Pope *John* the 22. at *Avignon*, Anno 1320. They did wear a Crosse of Gold, Enamelled with red, and inclosed with another Crosse.

The **Knights of St. Stephen**, or the **Order of Florence**; instituted by *Cosmo de Medicis* first Duke of *Florence* 1561. in honor of Pope *Stephen* the ninth, Patron of *Florence*: they follow *St. Bennets* Rule, and have the same privileges to the **Knights of Malta**. They wear a white Gown of Camblet, with a red Crosse on the Breast, like that of *Malta*.

There are many Orders of Knighthood in Christendom, as the **Knights of St. Lazarus** of *Savoy*, *St. George* of *England*, *St. Andrew* of *Scotland*, *St. Michael* in *France*, of the *Lilly* in *Navarre*, &c. which are rather Secular then Religious Orders, therefore shall pass such over here, having given you a brief Catalogue of them in the Degrees of Knighthood, chap. 3. numb. 7. and more fully shall in lib. 4. chap. 10.

The manner of Installing Knights of Religious Orders.

The **Commentator**, or great Master of the Order; placeth him that is to be Knighted in the midst of the Knights, then asketh every one of them if they find any exceptions against him, either for his Body, Mind or Parentage.

Then the same is demanded of the party to be Knighted, and withal if he be skilful in any useful Art, if in Debt, if Married, or if he have any Bodily Infirmitie, which if he hath he must not enter into that Order.

Then he is commanded to **Kneel down** and lay his Hand on the Gospel, and Rules of the Order, he voweth and promiseth **Obedience, Chastity, Poverty, Care of the Sick**, and perpetual War with the **Infidels**: which done the Master promiseth him sufficient Bread, Water, and course cloath for his Life time: then he riseth and kisseth his Master and each one of the Brothers, so sitteth down in the place appointed for him.

Then the Master exhorts all the Brothers to observe their **Rule carefully**: after which he is inaugurated in manner following.

He is conducted to the Church with his kindred attending on him, having a **Burning Taper** before him, in which are fastned thirty pieces of Silver, and a Gold Ring: then he kneels before the Alter, and rising again, hath a **Sword, Target, Spurs**, and a **Cloak** delivered to him, (which were all consecrated before) then the Commendator draweth his Sword, with which he is Girt, and with it strikes his Target twice, saying, Knighthood is better then Service; and with the same Sword sticking him on the Back, saying, take this blow patiently, but no more hereafter. []

Then the **Responsory** being Sung, and some **Prayers** said, they return from Church, where the rest of the day is spent in Feasting and Drinking.

In the Sinister side of this square numb. 27. I have caused to be set the figure of a **Demy old Man** with a **Bald Fore-head**, and a **Forked Beard** down to his Girdle, taking hold of each side of it, in the middle with both Hands: **Clothed Azure**, **Sleeves Gules**: which is the Crest of *Reffen* of *Aljulia*.

XXVIII. He beareth Or, a **Frier Heremite** of the **Order of St. Augustine**, as others call him, an **Heremite of St. Augustine**, or only **Heremite** from their single living at first in the Desarts or Solitary places: they were **Mendicants** by their Order and Rules.

As for their Habit, their did wear in their Cloyster a **White Garment** down to the Feet, close Gird to them, and when they went out they had a **Black wide Robe**, with wide Sleeves cast over it, with a broad **Leathern Sirdle** buckled about them, with a **Cowl** behind their Neck, full low down past the shoulders, being shorn or shaven on the Head, as the *Dominican* Friars are, but have very long Beards, and a corner Cap on their Head, black.

These **Begging Heremits** first began to propagate here in *England* about the Year 1250. as did the **Friers Carmelites**.

The **Monks of St. Basil**, were an Order set up by *St. Basil Presbyter* of *Cæsaria* in *Cappadocia*; which most of the **Eastern Monks** imbraced, following his Rule. Their apparel is plain simple, and homely, wearing a **Sirdle** after the example of *John Baptist* and the Apostles. The **Novices** were to be instructed, and no Man debarred for entering into their Convent upon Trial and withal to give none offence. They wore **Sack-cloath** for Humiliation, and other **Garments** for necessity, which was **White** that they were by Order tied to wear.

The **Monks of St. Basil** in *Moscovia*, wear a **White Flannel Shirt**, over it is a long Garment, girded with a broad **Leather Belt**, the upper Garment is of Say of a footy colours: his Crown is shorn, and on his Head he wears a **Cowl** or **Hood**.

XXIX. He beareth Vert, a **Frier** in his **Ruffet Coat**, Gird about the middle with a **Leather Sirdle** and his **Beads** hanging thereat: his **Cowl** on his Back, and a **Shaven Crown**, with a **Birch Rod** in his right Hand, and the other on his Belly, all proper.

Though I have here mentioned every thing as the figure doth expresse in the drawing, yet for brevity sake, to say, a Frier in such or such a coloured Garment, is sufficient: for Friars are thus depicted.

A. a Frier to the Sinister, a Staff in his Hand, and his Beads hanging therefrom S. is the Coat and Crest of *Monchsberg* of *Smithzerland*. This is a Frier standing sideways.

A. a Frier in full aspect (or standing direct) with his Hands conjoynd; and elevated to his Breast, habited S. is both the Coat and Crest of *Monchen zu Ramspaur* of *Bavaria*.

A Demy Morocco King, sans Arms: habited in a Monk or Friers Weed, his Cowl hanging backwards A. is the Crest of *Blanchell of Alsatia*.

On a Torce of his colours a Demy Monk, or Frier in full aspect holding up a Whip, the handle O. the other on his Breast: habited S. is the Crest of the Lord *Sturton*.

XXX. He beareth Gules, a Frier, or Father Confessor in his Robe or Garment, close Girt about; standing in full aspect, with his Arms extended, having a Towel (after the manner of a Sall) turned over his Head, and the two ends in his Hands, all proper. This is born by the name of *Van Scheternang* a Family among the *Silicians* in *Germany*.

O. the like to this habited S. the Towel A. is born by *Van Weissen*.

XXXI. He beareth Or, a Frier at his Devotion, habited S. with a Book (or Mass Book) in both Hands, and his Beads hanging therefrom proper: or of fume he is termed, a Frier kneeling, &c. This is born by the name of *Frier*.

A. a Frier to the Sinister kneeling on his right Knee, holding a Book open between both Hands, upon his left: Habited S. Is the Coat of *Fronheimer zu Malching* of *Bavaria*.

A. a Frier to the Sinister, Habited S. holding a Book in both Hands. Is the Coat and Crest of *Minchen van Munchenstein*.

A. the like Frier to the Sinister Praying, (or Hands conjoynd and lifted up) with his Beads pendant therefrom S. is born by *Schlegell van Munchsterg*.

A Demy Frier to the Sinister praying, Habited S. is the Crest of *Oschorven*.

XXXII. He beareth Gules, a Crucched Frier, a Frier (or Father Confessor) in his Procession, bearing a long Cross, or Christs Cross on his shoulder with his right Hand, all proper. Some term it thus, a Frier carrying of Christs Cross on his right Shoulder, holding or supporting it with the Hand: this more properly may be termed, a Monk or Frier of the Order of Cross bearers, which was confirmed 1197. by *Celstinus* the third Pope of that name; who called them *Cruciferians*, from *Cruciferi*, or *Crucigeri*, but of the vulgar called, *Crucched Friers*. They came into *England* in the Year 1244. they wear a sky coloured Habit: and alway carry a Cross in their Hands.

The *Crucigerans* of *Polidor*, is taken to be another Order of them, because they wear a black Cloak, and carried not in their Hands, but on their Breasts, a white and red Cross, and observed *St. Austins* Rules.

In the Sinister side of this square, is a Monks Head couped at the Shoulders, sharp pointed Beard, and his Cowl or Hood on his Head, with the Top hanging down, Argent. Is the Crest of *Marschalck* of *Switzerland*.

[]

XXXIII. He beareth Azure, a Mass Priest, or a Romish Priest in his Preaching Vesture, standing in full aspect holding up both his Hands, the Arms to the Elbow proceeding out of the middle of his Gown Sleeves, Sable; with an Albe or Vest, cast over the same hanging down before and behind, Argent. The Albe in Latin *Pedoris*, is a kind of long Garment almost down to the Feet, which Popish Priests use in their Offices and Devotion, it hangs down plain, and without Pleats or wrinkles: such formerly Souldiers used to wear in War over their Armour.

A. a Man in such a Posture with a wide Sleeve Gown S. Cape, turnings up before, and the Sleeves O. in his left Hand a Book, and a Bonnet on his Head G. is the States Arms of *Munchen*.

XXXIV. He beareth Argent, a Palmer in his Palmers Weed, with a Staff in his right Hand, and a Book under his left Arm, all proper. These are called either Palmers or Pilgrims, of which I find two sorts used in Coats of Arms, or Crests; whereof this example is one which may simply be termed either a Pilgrim or Palmer, or an Hermite; because of his Gown: and is the Crest of *Somerford* of *Somerford* in the County of *Chester*.

O. a Frier Pilgrim with his shaven Crown, Gown A. Cope S. passing to the Sinister, with a Staff in his left, and a Lanthorn in his right Hand. Is both the Coat and Crest of *van Munch-hausen* of *Brundswick*. This might very well have been termed *Diogones* in his Travels, (that is when he went through *Athens* with a Lanthorn and Candle at Noone day, to find an honest Man) had he not had a shaven Crown, but a Cap on: and also without Cope, which shews him absolutely to be a Priest or Frier, on such a like Pilgrimage: to see if he can find an honest Man amongst their whole Gange of Orders.

XXXV. He beareth Argent, a Pilgrim of *St. James*, that is to say, a Pilgrim, or Palmer, or Traveller having a short Cloak; his hat turned up, with an Escallop thereon, and a Staff in his right Hand: which is the Habit of all such Travellers, and Escallop shell fixed on the Hat Brim, being turned up; is the Badge and Cognizence of such who have visited the Sepulcher of *St. James*: like them that go the great Voyage to *Jerusalem*, who at their return bring Palms with them: therefore called *Palmers*. This is born by the name of *Pilgrim*.

G. the like Pilgrim A. Staff O. I find in a *Dutch* Book (of the Coats of Arms belonging to their several Cities, and Towns) to belong to *Glaris*.

An ancient Pilgrim of *St. James* in a short Coat, gird about the middle, Knees bare, Hose turned down, with a Staff and Beads in his right Hand, and left upon his side: is the Crest of *Nagal von Diernstein*, in *Rhine* Palatinate.

A Demy Pilgrim to the Sinister holding his Staff by the middle up to his shoulder with his left Hand. Hat S. Scapular A. Coat Girt V. Is the Crest of *Bilgrim* of *Alsatia*.

XXXVI.

XXXVI. He beareth Argent, a Demy Pilgrim of St. James, sans Arms, proper. Others blazon it, the Head of a St. James Pilgrim couped below the Shoulders. This is born by the name of *Kelbner of Smyt*.

The like A. with his left Hand from under his Cloak holding his Staff by the middle bendways. Is the Crest of *Kelbin of Alfatia*.

XXXVII. He beareth Azure, a Demy St. Laurence, proper. It is the Cognizance of St. Laurence to Hold, or Support, or have a Grid Iron by him; because it is said of him, that he was Fried on such a thing, rather then deny the Faith of Jesus Christ. But if you desire a more fuller blazon thereby to describe all the parts and things contained in this Figure, as it is delineated, then take it thus: St. Laurence issuing out of the Base, Holding a Grid Iron in his right Hand, and a Book in the left, upon his Breast Or Habited or Cloathed in a Long Robe or Garment, close girded, Argent: Garmished and Turning up of the Second. Born by the name of St. *Lawren*.

The like cloathed in an Azure Garment, is the Crest of the Company of *Girdlers* of the City of *London*.

The like to the Sinister, supporting of a Grid Iron the Handle erected A. Habited G. the right Hand turned behind him. Is the Crest of *Ellerboyn*.

XXXVIII. He beareth Argent, St. Sebastiane in his Bartridome, proper; or more fuller, St. Sebastiane tied to the Body of a Tree Naked, with a Towel or Linnen Cloath to cover his Privy, Shot into with several Arrows, all proper. Thus it is said that this Holy Man died by the Hands of Infidels. St. *Fabian* had also the like end.

This was the ancient Crest belonging to the Company of *Fletchers* or *Arrow-Makers* within the City of *Chester*, Anno 1579. But of late time they use that belonging to *London*.

Now seeing we are fallen into the discourse of Saints, I think it is not much amiss, if I give you a brief description of some of the Principal *Papish Saints*, who died either as Martyrs, or were through their Sanctity and Holiness of Life, otherwise translated to Heavenly bliss.

For note this, that in the Description of Saints, if Martyred they have by them in some certaine posture or other, the Instruments of Cruelty by which they died; or else in such an action as in their lives they were very remarkable in, or Canonized for.

The Description of Men Canonized.

St. *Martyn*, he is drawn on a Horse with a Sword or Knife in his Hand cutting off a part of his Coat, and giving it to a poor naked Cripple.

St. *Jerome*, is drawn naked with a long Beard, and short curled Hair, and bald Fore-head, with a Mantle cast about him with a Pen in his Hand, and a Book before him, with a Cross or Crucifix by him, and a Lion Couchant at his Feet. []

St. *Thomas Aquinas*, is drawn in Bishops Habit with a Pen in his Hand, and a Chalice or covered Cup in his left, a Dove flying to his Ear.

St. *John of Batta*, the first founder of the Order of the Holy Trinity for the Redemption of Captives, he is drawn in a Friars Habit, with a Book in his Hand, with a Slave in Fetters and Chains at his Feet.

St. *Francis*, is drawn in a long Robe, tied about with a Rope: his Beads by his side, bare Footed with a Crucifix in his hand.

St. *Sabinian*, is drawn in his Cope and Vest, Celebrating Mass before an Alter, having a Fauchion or Sword struck into the Crown of his head.

St. *Bernard*, in a white Surplice with a Pen in his hand, and several Books before him, with a Dove descending upon him.

St. *Peter Martyr*, is drawn in a Monks habit, with a Rapier run into his Breast, and a Fauchion struck into his head, having a Palm branch in one hand, and a Crucifix in the other.

St. *Roch*, is the habit of a Pilgrim, with a little Boy in his hand, and a Grey-hound by him.

St. *Bennet* or *Benedict*, in a Monks habit, with a Crosier in one hand, and a Book with a Cup standing on it, the Wine running out of it on the other hand.

St. *Edward the Confessor*, all in Kingly Robes, with Crown and Scepter.

St. *Anthony*, in a Monks habit tied about the middle with a Rope, a Book and Beads in his hands, with a Swine by his side.

St. *Augustine*, in a Bishops habit, Mitre and Crosier, with a Burning Heart in his hand.

St. *William*, an old grave Man, a with long Beard, a Helmet on his head, Arms all of Maile, yet bound with chains: clad in a long Robe with an Albe over it, bare footed, a long Staff with a round head in his right hand, and his Beads in the left: Sword, Spear, Shield, and other Warlike Weapons cast at his Feet.

St. *Ambrose*, an old Man no Beard, a Mitre on his head, and Pontifical Robes, his Crosier in his hand, and a Bee-hive by him: with many more too tedious to relate, which you may find in full in the *Romish Golden Legion of Saints*.

Country Saints, or Patrons.

St. *George* of *Capadocia*, the Patron Saint of *England*, he is drawn on Horseback, Armed Cap-a-pie, on his Shield a Red cross in a white Field, running his Lance through a great Dragon.

St. *Andrew* of *Burgundie*, the Patron Saint of *Scotland*.

St. *Dennis*, the Patron of *France*.

St. *James*, the Patron of *Spain*.

St. *Anthony*, the Patron of *Italy*.

St. *Patrick*, the Patron of *Ireland*.

St. *David*, or *Davie* for *Wales*.

St. *Peter*, the Patron Saint of *Rome*.

St. *Mark* with his Lion, the Patron of *Venice*.

Tradsmen

Tradsmens Patron Saints.

St. Luke the Patron of *Painters*, he is drawn at his
 Eile working, with his Bull couched at his side.
 St. Euloge, the Patron of *Smiths*.
 St. Loy, the Patron of *Farriers* and *Black-Smiths*.
 St. Stephen, the *Weavers* Patron.
 St. Arnold, the Patron of *Millers*.
 St. Goodman, the Patron of *Tailors*.
 St. Crispin and *Crispianus*, the Patron of *Som-*
ers, Cordwiners and *Shoe-makers* Journey - Men.
 St. Martin, Patron of the Masters *Cordwiners* or
Shoe-makers.
 St. Oze with the Devil on his Shoulder, and a Pot
 in his Hand, is the Patron of the *Potters*.
 St. Dunstan, Patron of the *Goldsmiths*.
 St. George, Patron of the *Clothiers*.
 St. Francis, Patron of the *Butchers*.
 St. Wilfride, Patron of the *Bakers*.
 St. Philip and *Jacob*, Patrons of the *Brick-layers*.
 St. Andrew, Patron of the *Carpenters*.
 St. Clemence, Patron of the *Tanners*.
 St. Leodegar, Patron of the *Drapers*.
 St. Peter, Patron of the *Fishmongers*.
 St. Billarie, Patron of the *Copers*.
 St. Florianus, Patron of the *Mercers*.
 St. William, Patron of the *Hat-makers*.
 St. Alindeline, is the *Shepherds* Saint.
 St. Gallus, the Patron of *Giffards*, or Keepers of
 Cose.
 St. Romane, an excellent Saint for curing of mad
 Men, and those possessed with Devils: with many
 more to the like purpose.
 St. Blaise Patron of & Wooll-Comby.

XXXIX. He beareth Argent, a Demy St. John
 Baptist, or else blazon it St. John Baptist issuant
 out of Base in full aspect, habited in a Hair Coat,
 and Girded about the middle with a Leather, on his
 right Hand a Bible (or Book) with an Holy Lamb
 Couchant thereon: and his left Hand upon his Breast,
 all proper. This Holy Man is ever drawn in an Hair
 Coat, to his Elbows and Knees, the rest of his Body be-
 ing naked, according to the saying of St. Matthew cap.
 24. This John had his Garment of Camels Hair, and
 a Girdle of a skin about his Loyns; and because he was
 the fore runner of the *Messias*, he is desciphered with a
 Book and the Lamb upon it.

This was the last of the Divine Prophets, and the great-
 est: as our Saviour himself testifieth of him, Luke 7. 28.
 whose Garment was rough according to the ancient use of
 the Prophets of old, as we may see Zach. 13. 4. which
 many false Prophets did Imitate, that thereby they
 might deceive: being Wolves in Sheeps cloathing.

A Demy Angel out of a Cloud with Wings
 Displayed, holding of a Platter or Pewter Dish,
 with a Head in it, (is termed the Head of St. John
 Baptist in a Dish, or Platter) and is the Crest be-

[]

longing to the Worshipful Company of *Tallow-Chandlers*.

The four Evangelists Described.

St. Matthew, is ever drawn in a long Robe close
 girt to his Loyns, with a Mantle cast over it, turning and
 foulding according to the posture the Man is drawn in,
 whether standing, sitting, &c. with an Angel by him.

St. Mark, is drawn in the same kind of Robe and
 Mantle, but is known to be one of the Evangelists by hav-
 ing a Lion standing by him.

St. Luke, is the third Evangelist whose cognizance or
 token by which he is distinguished from the other, is by
 having a Bull drawn by him.

St. John, is delineated Writing, or with a Pen in his
 hand, and a Book in the other, or set before him, (as all
 the other Evangelists have Books) and an Eagle with open
 Wings by him: sometime the Eagle holdeth a Writers
 penner and Ink-horn in her Beak, by the strings of it.

XL. He beareth Azure, a Saint, or Holy Man,
 habited in a long Robe, Argent; with an Albe cast
 over it, Or: holding up his right Hand, and in his left
 a Palm Branch resting on his Shoulder, Vert. By the
 name of *Innocence*.

XLI. He beareth Argent, St. Peter the Apostle
 holding the Key of Heaven Gates, habited in a
 long Robe and Mantle, all proper. Some term him
 only St. Peter having a Key in his hand, and a Book
 in the other, or under his Arm (which Book all the
 Apostles are drawn with) from that saying of our Saviour
 to him; Upon this Rock will I build my Church, (viz.
 that Confession which he made of Christ to be the Son of
 God) which the Gates of Hell should not prevail against.
 And I will give thee the Keys of the Kingdom of Heaven,
 that whatsoever thou shalt bind upon Earth, shall be bound
 in Heaven, &c. Mat. 16. 16. 18. 19. This is the Arms
 of the City of Trier in Germany.

The Description of the twelve Apostles.

St. Peter, beside his Key, is sometimes drawn with a
 long Cross by him, because he was Crucified on such a like
 Cross as Christ died on; yet was not Crucified in the
 like manner, but with his Head downwards, as he himself
 desired, not counting himself worthy to die after the same
 manner as our Saviour did, with his Head upwards.

St. Andrew, hath drawn by him, or Supporting it, a
 Salter cross, being an Instrument of Wood made to Tor-
 ment, and Rack the joynts, and tear the Body to pieces,
 upon which this Holy Apostle died.

St. James the greater, for there were two James and
 so they were distinguished by Major and Minor: this
 St. James is drawn with a Sword in one Hand, and a Book
 (as I said before) in the other: as being slain thereby, in
 having his head severed from his Body.

B b

He

He is sometime drawn in a Pilgrims posture, with a broad brimmed Hat, a Bottle by his left side, and a Pilgrims staff in his Hand.

O. *St. James* the *Major* issuant in Base in his right hand a Sword erected to his Shoulder, and in his left a Book proper: habited in a long Coat and Mantle G. Is the Arms of the Town of *Hemersharsen* in the *Low Countreys*.

St. John, called also *St. John the Divine*, or the *Beloved Apostle of Christ*: he is drawn, fresh and young, because the Disciples thought he should never dye; as it is mentioned *John 21, 23*, for being cast into a Furnace or Caldron of hot boiling Oyl he came out again and was never touched: and had deadly Poison given him to Drink, and it wrought not upon him. So that he is made either to stand by a Caldron; or more generally holding of a Cup in his left hand, with a Cockatrice or Adder appearing out of it, holding up of his right hand as if he were Blessing it before he Drank thereof.

B. *St. John* naked, half out of a Caldron Gules, set on a Brandered with Fire under it, is the Coat of the Town of *Each* in *Holland*.

St. Philip, is drawn with a Spear in his hand: some with a long Cross pometted at the ends, because he was Crucified.

St. Bartholomew, is drawn with a Knife in his hand, because he died by the Infidels through their fleeing him alive.

St. Matthew, is drawn with a Spear: sometime with a Carpenters square in his hand.

St. Thomas Surnamed *Didimus*; he is drawn with a Dart, it being the Instrument of his Martyrdom for the name of Christ.

St. James the lesser, or *St. Jacobus Minor*; his cognizance is a great Club, being that whereby he was slew by having his head broken to pieces, as he was Preaching to the People.

St. Mathias, is drawn with an Ax, or Heading - Ax, or Hatchet; by which his head was severed from his Body.

St. Simon, was sawed in two, and therefore is drawn with a long Saw in his hand, or Supporting it.

St. Jude, or *Judas Thadeus*; is set forth with an Halbert.

St. Paul the last of the Apostles, yet not least; is ever drawn like the other Apostles, in a long Robe, and and Vesture, or Mantle; with a Sword in his hand, or holding it by the Pommel, or handle, the Point resting on the Ground; by which Instrument he died, having his head severed from his shoulders.

XLII. He beareth Gules, a Penitent, or a Man doing his Penance; having his Body Naked to his middle, which is wrapt about with a Linnen Cloath; his Arms a cross, with a Whip of three Lashes in his right hand, and a Rod of Birch in the left, all proper. This is born by the name of *Penant*.

In the Dexter base of this square, is cut the form of an old Mans Face, side Hair, with a long forked

[]

Beard, his Head covered with a Cloud, from whence proceeds the Sun Beams, all proper. Such a Crest I find to be born by Sir *William Hulton* an Alderman in *London* in the time of Queen *Elizabeth*.

The like Face sans Cloud, having only three Beams proceeding from each side the head: It was born as the Crest for the Lord *Hilton*.

XLIII. He beareth Or, a Bishop of the Reformed Church, in the Habit according to his Function, all proper. Some term him a Bishop in his Gown, and Lawn Sleeves, and Cornered Cap: Some say no more, but a Protestant Bishop in his Habit.

The Habit of a Protestant, or Reformed Church Bishop.

A Cassock, in Latin *Saga*, of some termed *Cassula*, a Casule or Planet, a Priests Garment, or one of those attires wherewith he is invest ordinarily.

A Sash, *Zona*, or *Cingulus* in Latin; a Canonical Girdle made of Silk, with Buttons and Tassels at the end of it: with this he tieth his Cassock or open Coat close to to his Loyns.

A Rochet, in Latin *Rocus*, and *Rochetum*, a Surplice or white Linnen Garment with wide Sleeves tied close about the Sleeve hands; anciently it was one whole entire Garment, but now they are two distinct things: for that as comes before his Breast and reacheth to his Feet, is called an Albe of Alba. And the white Sleeves are of themselves, which are properly termed, *Lawn Sleeves*.

A Ring, by which he is Married to the Church.

A Gown, or Vest without Sleeves, which is his outward Habit, being open down before, this is generally of black Satin.

An Hat with a flat Crown and broad Brim, and twisted band of Silk: of some called a Cathedral or Bishops Hat. Doctor *John Bridgman* late Bishop of Chester in time of King *Charles* the first, wore his Bishops Hat all covered in pleats with Taffaty, from whence he was vulgarly termed *John with the Taffaty Hat*. Some wear their four cornered caps as they use in the University.

The Order of Election, and Consecration of the foresaid Bishops.

When the Bishops See is become vacant, the Dean and Chapter of that Cathedral gives notice to the King, who is Patron of all Bishopricks in *England*, requesting leave from him, to choose another: the King then grants to the Dean his *Conge de Esire*: a Writing in French, which signifieth leave to elect, then the Dean summons a Chapter or Assembly of the Prebendaries, who either elect the Person recommended by the Kings Letters, or shew cause to the contrary.

Next the Election is certified to the party elected, who doth modestly refuse it the first and second time, if he refuse it the third time, the King is certified thereof and another is recommended: but if accepted, then the King gives

gives his assent under the Great Seal of England, which is exhibited to the Archbishop of that Province, which command to Confirm and Consecrate him, wherunto the Archbishop subscribes his *Fiat Confirmatio*, and gives Commission under his Archiepiscopal Seal to his Vicar-General to perform all the Acts required for the perfecting of his Confirmation.

Then the **Vicar-General** sends forth his Citation summoning all in who oppose the Election, which is put on the Church Door. The day set, and no appearance of opposers, they are publickly called three times: then a Proctor exhibits the Election with the Royal assent, with the elected Bishops assent, desiring a Term presently to be assigned to hear final Sentence which the Vicar-General decrees.

Then the **Proctor** desires again all opposers to be called, which is done thrice, and none appearing or opposing, they are pronounced contumacious and a decree made to proceed to Sentence. Then the elect Person takes the Oath of Supremacy, Simony and Canonical obedience; which is no sooner done, but Sentence is subscribed: after which usually there is an Entertainment made for the Officers and others there present.

After the **Confirmation**, is the Kings Mandate for his Solemn Consecration, which is done by the Archbishop with the assistance of two other Bishops in manner following.

Upon some *Sunday* or *Holy-day* after Morning Service, the Archbishop begins the Communion Service, and after a certain Prayer appointed for this occasion, one of the Bishops reads the Epistle, 1. *Tim.* 3. and the other reads the Gospel, *John* 21. Then the Nicene Creed and Sermon, the elect Bishop vested in his **Rochet** or **Linen Garment**, is by two Bishops presented to the Archbishop or some other Bishop commissioned by him, sitting in his Chair, who commands the Kings Mandate for the Consecration, and causeth it to be read.

Then the **Elect Bishop** takes his Oath of Supremacy and Canonical Obedience to the Archbishop; and after diverse Prayers, and several interrogatories put to the Bishop and his answers, the rest of the Episcopal Habit is put upon him, and after more Prayers, the elect Bishop kneeleth down, and the Archbishop and Bishops there present lay their hands on his head, and by a certain Pious, Grave form of Words, they Consecrate him: afterwards the Archbishop doth deliver to him a Bible, with other set form of Words, and so all proceed to the Communion Service, and having received the Sacrament and the Blessing, to repair homewards in a decent and comely order, as they came to Church.

Coming home, there is a Dinner prepared at the charge of the Bishop Elect, which is usually very splendid, and magnificent; the greatest of the Nobility, Clergy, Judges, Privy Counsellors, &c. Honoring it with their presence, the Expence hereof with Fees of Consecration, amounting to Six, or commonly Seven Hundred Pounds.

The next thing is **Instalment**, which is performed by a Mandate from the Archbishop to the Archdeacon of his Province to Instal the Bishop elect, which is almost the same in all Cathedral, the manner is usually thus.

Upon any day between the hours of nine and eleven in the presence of a **Publick Notary**, the Bishop him-

self, (or his **Proxy**, which is usual) is introduced into the Cathedral with the **Singing Boys**, **Petty Canons**, and **Canons**, **Prebends**, **Dean**, going before him up to the Quire, and there place him in a seat prepared for him, where the Dean, or Sub-Dean, or Archdeacon, as Commissioned from the Archbishop pronounceth these words in Latin: *Ego Autoritate mihi commissa Induco & Inthronizo Reverendum in Christo Patrem Dominum N. N. Episcopum & Dominus custodiat suum Introitum & Exitum ex hoc nunc & in seculum, &c.*

Then the **Sub-Dean** and **Petty Canons** sing the *Te Deum*: in the mean while the Bishop is **Conducted** from his own place to the **Deans** seat, and there in token of his taking real Possession, and stands till the *Te Deum* is ended, together with other Prayers, the Archdeacon reading some Versicles, as *The Lord save this thy Servant, N. our Bishop*: the People answering, *And send him Health from thy Holy Place, &c.* Then the Archdeacon reads a short Collect for the Bishop by name, and so concludes with a Sermon.

Now this new Bishop compounds with the King for the first Fruits of his Bishoprick, that is, agrees for his first Years Profits to be paid to the King, within two Years or more, as the King pleaseth.

After this the Bishop is brought into the **Chapter-house** and seated in an high seat where the **Dean**, **Arch-Deacon**, and all the **Prebends** and **Officers** of the Church come before the Bishop, and acknowledge **Canonical Obedience** to him; which is all noted down by a publick Notary in an Instrument of writing made for that purpose.

The Translation of a Bishop from one Bishoprick to another, differs only in this, from the manner of making a Bishop, that there is no Consecration. And the Translation of a Bishop to an Archbishop, differs only in the Commission, which is directed by the King to four or more Bishops to confirm him.

Where note that the difference between an **Archbishop** and a **Bishop** is, that the **Archbishop** with other **Bishops** doth Consecrate a **Bishop**, as a **Bishop** with other **Priests** doth Ordain a **Priest**: the **Archbishop** visits the whole Province, the **Bishop** only his Diocess; the **Archbishop** can convocate a **Provincial Synod**, the **Bishop** only a **Diocesan Synod**. The **Archbishop** is ordinary too, and hath Canonical Authority over all the Bishops of his Province, the **Bishop** over all the **Priests** of his Diocess.

They are all **Barons of the Land**, and as **Peers of the Realm** have a place in the upper House of **Parliament**, and the upper House of **Convocation**: these are **Lords Spiritual**. Several of them having Diocess of a large extent, that it was provided by a Statute 26. *H.* 8. that they should have a power to nominate some to the King, to be with his approbation, **Suffragan** or **Subsidiary Bishops**; but of these there are none at present in the Church of England.

Bishops Revenues.

Besides the **Income by Lands and Houses** which as **Grave Lands** are given and established to each Bishoprick, whereof some hath the Yearly Revenue of 600.

800. or 1000. *l. per Annum*: yet others have 6. 7. 8. and 10 Thousand Pounds *per Annum*, all which Lands they hold of the King, for which temporal Barony, they do him Homage; by kneeling down and putting his hands between the Kings hands, sitting in a Chair of State, and taking of a Solomn Oath to be faithful to his Majesty, and that he holds his Temporalities of him.

Donations, or Presentations of Benefices; such as belong to his Bishoprick, which thought it be simony to sell and against which they are sworn, yet they will not be against that Person which can satisfy them who was the Father and Mother of *Melchisedek*.

Deanary Rents, paid Yearly from the Parson of each Parish Church in the Deanaries, a certain Rent according to the valuation of it in the Kings Book.

Pensions, are Yearly allowances from each Parson in the Diocess for the sustenance of his Hospitality.

Procurations, Monies gathered from each Parsonage, as a Tenth: due and payable to the Bishop from the Priest, as the Easter Roll. is due from the People to the Priest.

Synodals, Synod Money; Money raised for the Bishop to Maintain him at an Assembly or General Council: this is Yearly with the former, and is termed the Yearly dues for Procurations and Synodals.

Triennial Procurations, Monies allowed the Bishop by every Parson for his maintenance in travel while he is making his third Years Visitation through his Diocess.

Instatutions and Inductions, are certain writings made by the Bishops, wherein he Confirms the presentation of the Patrons to the Parsons appointed to such and such Churches: which is a considerable benefit to him when it comes, but it is not certain yearly as others Incomes are.

Fees of the Privileges, of which there are certain peculiarly belonging to the Bishop, as Lord of the Court.

The several Officers in a Cathedral, and Collegiate Church.

Next after the Lords Spiritual follow the Commons Spiritual consisting of these particular Members: the next to the Bishop is,

The **Suffragan Bishop, or Surrogates**; these are such as on the Bishops behalf and in his name exercise spiritual Jurisdiction in the Bishops absence: a Bishops Vicegerent, one that exerciseth the Function of a Bishop, but hath not the Title. The Statute 26. H. 8. enables every Diocesan at his pleasure to elect two sufficient Men, &c.

A Dean.

The **Dean** is now next to the Bishop, called **Dean and Chapter**, which are assistants to the Bishop, upon his Summons in Matters of **Ordination, Deposition, Condemnation, Excommunication**, and in

such like weighty affairs of the Church. The **Dean** is usually a **Doctor of Divinity**, whose Habit is a - - - a **Gown** and **Scarfe** about his Neck extending to the skirt of the Gown: But in his Ecclesiastical Function, the **Gown** is covered with a **Surplice** of fine Linnen, with a **Scarlet Hood** lined with - - - Silk hanging on his Back. **Deans of the old Foundations** before the destruction of Monasteries, are brought to their dignity much like Bishops, the King first sending his **Comge de Eglise** to the Chapter, they elect, the King grants his Royal Assent, the Bishop confirms him, and gives his Mandate to Install him.

But **Deans of the New Foundations**, upon the suppression of Abbies and Priories, transforming them into Dean and Chapter: are by a shorter course installed; that is, by virtue of the Kings Letters Patents, without either Election or Confirmation.

Sub - Dean.

He is equal in Power with the **Dean** as to Ecclesiastical Affairs, and in his absence exerciseth his place, being ever a **Doctor of Divinity**, and habited in all respects according to the Dean.

The Arch - Deacon.

The next in the Government of the Church is the **Arch - Deacon**, whose office is to enquire of reprobations and movables belonging to Churches, to reform abuses in Ecclesiastical Matters, and to bring the more weighty Affairs before the Bishop: they make their Visitations two Years in three, many of them having by prescription their Courts and Officials, as Bishops have.

The Dean Rural.

The next is **Dean Rural**, called in Latin *Archipbyterius*; so stiled perhaps from his oversight of some ten Parish Priests, their Office is now upon Orders to convocate Clergy, and to signify to them the Bishops will and pleasure. He also gives Probats of Wills not exceeding Forty Shillings, and keeps his Rural Court for all small and petty Matters, and Church - Wardens Presentments.

The Prebend.

Among the **Prebendaries** in the old Foundation, there were two kinds of them, **Prebends in Act**, and **Prebends in Words**; the first were such as had Prebends seats in the Quire, and give their Votes in the Chapter, or Assembly: the other having a right to the next Prebendry that shall come void, and have already a stall in the Quire, but no Vote in the Chapter. Their Habit answereth the Dean, viz. a - - - **Gown** and **Scarfe**: and in the Church a **Surplice** and **hood** of black Cloath, lined with the same coloured Silk.

The

The **Dean** and **Chapter**, which are a certain number of **Prebends**, more or less according to the Revenue of the Cathedral whose Office is upon all Festival and Holy-days, to read **Divinity Lectures** in their turns, which is now turned into **Sermons**, or **Set Speeches** in the Pulpit, at due times to administer the Lords Supper, &c.

The Canon, and Petty Canon.

These are the next Order in the Church, and appertain to **Collegiate** and **Cathedral Churches**, only: they are of the Consecrated Deacons, and for their Office is partly Humane, partly Divine, following exercises in the World, and officiating in Holy things: as to Ecclesiastical affairs, they are to take care off the Poor, read in the Church, Baptize, and assist the Priest at the Lords Supper; by giving the Cup only: their Habite is according to them of the Laity, there being nothing to distinguish them; save in the Administration of their charge in the Church, they wear a Linnen Surplice.

Other Members in the Collegiate and Cathedral Churches.

The **Chorister**, or **Singing Men**, or **Boyes**; who sing the Psalms and Anthems of the Church, with the Versicles and Responses, as they are set down in our English Liturgy.

The **Præcentor**, or **Chanter**; he that teacheth and instructs the other Choristers, that begins first the Tune.

The **Organist**, or him that playeth on the Organs, who is assisted by another in blowing the Bellows, which is called a **Blower of the Bellows**.

The **Clerger**, is a Man in a Gown with loose Sleeves, whose Office it is to conduct the Reader to his place, bearing before him a **Silver Cerge**; also before the **Dean** within the Liberties of the Church: they are also to look to the Goods, and Books, and to keep the Church clean and handsome.

XLIV. He beareth Argent, a **Doctor of Divinity** in his **Doctors Habit**; or as some term him, a **Doctor of Divinity** in his **University Robes**, proper. This is the Badge or Cognizance of a Doctor, and is born by the name of *van Dacken*.

XLV. He beareth Argent, a **Minister, Pastor, or Preacher of the Gospel** in his **Gown**, with a **Walking or Rectors Staff** in his right Hand, and a **Book** under his left Arm, Sable. Some call such, an **English Priest**, or a **Parson**, or **Rector**, or **Curate**: whose Habits according to their Function being all one and the same.

[]

Such a **Priest** belongs to every peculiar Parish Church, who are commonly called **Rectors**, unless the Tithes are Impropriated, and then they are called **Vicars**; but if they serve under a Parson for an Yearly Salary, then stiled **Curates**; if to a Chappel, then a **Chaplain**.

Their Office is to take care of all their Parishoners Souls, and like good Shephards to look to their Flock, and handle every particular Person apart, to Preach, Teach, and Exhort with all diligence, &c.

The Habit and Vestments of a Parson, English Minister, or Divine.

A **Cassock**, or a loose Coat; which is bound about the Parsons middle with a Girdle; this Coat generally reach to the Knees, and is wrapped double over the Breast.

A **Sash**, or **Canonical Girdle** tied about his middle with Buttons and Tassels at the ends of it.

A **Gown**, of black Cloath or Stuff extending from his shoulders to his Feet, with his Arms at the Elbows coming out of the middle of the Sleeves: But most wear them tied about the Sleeve hands:

A **Surplice**, a white Linnen Garment cast over his Gown, when he goeth to Celebrate Divine Service.

A **Hood**, which hangeth over his Shoulders and down the middle of his Back upon the Surplice, and is of various colours according to the degrees the Parson or Rector hath taken in the University.

The Ordination of a Deacon, and a Priest.

They are by the Rules & Canons of the Church not to be admitted into the said Orders till they be of sufficient Years, viz. a **Deacon** to be three and twenty Years old, a **Priest** to be compleat four and twenty, and none to be **Bishop** till he be full thirty Years old, unless they have **Dispensations** to be admitted younger.

The Ordination of **Priests** and **Deacons** is four times in the Year, upon four several Sundays in the Ember Weeks first introduced by the Holy Martyr *Calixtus* Bishop of Rome, about the Year, 220. It is performed by a Bishop in a Solemn grave and devout manner, thus for Deacons.

After Morning Prayer, there is a Sermon declaring the Duty and Office of Priests and Deacons; then they being decently Habited, are presented to the Bishop by the Arch-Deacon or his Deputy, whom the Bishop asketh if he hath made due inquiry of them, and then askes the People, if they know any notable Impediment or Crime in any of them: after followeth certain godly Prayers, after which they take the Oath of Supremacy: so the Collect, Epistle and Gospel being read, they all kneel down, and the Bishop doth lay his Hands upon their Heads severally saying, *Take thou Authority to Execute the Office of a Deacon in the Church of God committed unto thee; In the name of the Father, &c.*

Then

Then delivers to every of them the New Testament, and gives them authority to read the same in the Church, then one by the appointment of the Bishop reads the Gospel, then all with the Bishop receives the Communion, and so are dismissed with a Blessing pronounced by the Bishop.

The Ordination of **Priests**, is partly in the same manner, for after the questions and answers made, the Bishop puts up a peculiar Prayer for them, that ended, he desires the Congregation to recommend them to God secretly in their Prayers; for the doing of which there is a competent time of general silence.

Then follows *Veni Creator Spiritus* in meeter to be sung, then after another Prayer, they all kneeling, the Bishop with one or two of the grave Priests there present, lay their Hand upon the Head of every one of them severally saying, *Receive the Holy Ghost for the Office and Work of a Priest in the Church of God now committed unto thee by the Imposition of our Hands, &c. And be thou a faithful Dispenser of the Word of God and Sacrament: In the name of the Father, and of the Son, and of the Holy Ghost.*

The rest following is, as it is set down in the Ordination of Deacons.

The Patron of a Church.

After this brief account of **Ecclesiastical Persons**, somewhat may here not unfitly be spoken touching those Persons, who though not in Holy Orders, yet have a peculiar relation to the Church, as **Patrons of Churches**, such who first built Churches and endowed them with Lands, have obtained for them and their Heirs a right of **Advowson** or **Patronage**, whose Office and Duty it is, to impose a fit Clerk (when the Church is void) to the Bishop, to be by him Canonically Instituted, and to Protect the Church as far as he can from all wrong, and in case the Clerk prove unfit for the place, to give notice thereof to the Bishop.

The Church - Wardens, and Sides - Men.

The next are the **Guardians** of the Church, called **Church - Wardens**, anciently **Church - Reeves**: whose Office it is to see the the Church be in good Repairs, fitly Adorned, and nothing wanting for Divine Service, Sacraments and Sermons; that the Churchyard be sufficiently bounded or inclosed: to observe that all Parishioners come duely to Divine Service, to prevent scandalous Livers; these are Officers elected every Week after *Easter* usually by the Parson and the Parishioners, if they so agree, if not, then one by the Parson, and one by the Parish, except the custome of the place be to the contrary.

The **Sides - Men**, they were anciently called **Synods - Men**, now corruptly **Sides - Men** who are to assist

[]

the Church - Wardens in great Parishes to gather Assessments, inquire into the Lives of Inordinate Livers, and to present Men at the Visitations.

The Collectors and Overseers.

The **Collectors for the Poor**, are Officers which gather Money for the Poor of the Parish, and distribute the same amongst them according to their necessities. These are chosen with the Church - Wardens Yearly.

The **Overseers of the Ways**, are Men chosen Yearly for to see, and put in repair all decayed Highways for Carts, Wagons and Horses, within the Bounds of the Parish.

The Clerk and Sexton.

The **Parish Clerk**, is a kind of Holy Order, though he be a Lay - Man; whose Office it is to help the People in the responses or answers, to those Versicles uttered by the Priest in Divine Service, to say Amen, and to Read Tune the Psalm; to Write the Parish accounts, &c.

The **Sexton**, anciently called the **Sacristan**; whose Office was to serve at Church the Priest and Church - Wardens, and therefore ought to be twenty Years old, or above, of good Life, and that can Read, Write, and Sing. But this Office is now swallowed up in the Clerk, the Sextons Office being at this present only to Ring the Bells, clean the Church, and make Graves for the Dead, and to provide Water for the Font: and such like several things.

XLVI. He beareth Azure, a Minister, or Master of Arts in his Surplice, and Hood according to his Degree, proper. Some term this a Master of Arts, or a Bachelor of Arts, or of Divinity, in his Ordination Habit, or Offertory Vestments, as being now ready to Celebrate the Offices of the Church. This Coat pertaineth to the name of Minister.

The several degrees of persons in the University Colledges.

1. **Servitors**, such as Study, yet wait at the Table, and on some Gentlemen Commoners.
2. **Bachelors or Fresh Men**, such as are new comers to the University; and these two degrees have Gowns with square Caps and hanging sleeves made of Black Cloth, Stuff or Crape; their Caps Black and round like Bonnets.
3. **Commoners**, are such as are at the University Commons, which till they come to some Degree or Preferment

ment there, are distinguished according to their time of being there; as 1. **Fresh Men.** 2. **Sophy Novices.**

3. **Junior Sophy,** or **Sophister.** And lastly **Senior Sophy.** These have Gowns of the same shape as above- said, with an addition of six Buttons and Loops with Tufts set upon the hanging sleeves; the Gowns of Prunella, with round Caps of the same Stuff.

4. **Fellow Commoners,** or **Gentlemen Commoners;** these have Gowns like Commoners, with the addition of Tufts on the sides, bottom behind, and the top and bottom of the sleeves; a round Silk Cap of the Commoners fashion.

5. **Scholars,** they have the same Gowns as Bachelors, only the Border of their wide sleeves is on the outside, they have square Caps without tufts.

6. **Bachelors,** or **Bachelors of Art,** after they have been Students for 7 years, then they have a full Gown with wide sleeves open at the hands Surplice like, faced down before with any sort of Stuff, Silk, Prunella or the like; their Caps four cornered, with a Tuft on the top. But **Bachelors of Divinity** have Scarlet Gowns and Black Silk Hoods lined with stuff of the same colour.

7. **Bachelors of Civil Law,** have the same Gowns as Gentle-men Commoners, but with more Buttons and Tufts and larger, the same Caps, their Hoods Prunella Silk faced with white Furr.

8. **Bachelors of Physick** have much alike the same Gowns and Caps.

9. **Masters of Art** have their Gowns faced down before, and the Sleeves reaching to the Elbow, and from thence as long as to the Skirt of the Gown; the Hood is red Silk lined with Black; the Cap is four square of Black Cloth with a tuft on the top.

10. **Doctors of Divinity** have Scarlet Gowns, the sleeves faced and down before with Black Velvet; Hood Scarlet lined with Black Silk.

11. **Doctors of the Civil Law,** and **Doctors of Physick,** have their Gowns of Scarlet lined and faced with Red Silk and Hoods of the same; their Caps are Black Velvet and round Bonnets.

The common Servants to each Hall or Colledge in the University are these; the Porter, Scrape Trencher, Cook and his under Servants, Butler, Gardener, Brewer, Baker, Sweepers of the Hall, Bed-makers and Chamberlains, &c.

Officers of the University for its Government.

Junior Fellows, such as have Fellowships bestowed upon them, some of 20, 30, or 40 l. by the year.

Senior Fellows, such as have Fellowships, and are of a more Ancient standing in the University, and are instructors of others that are Commoners, &c.

The Dean.

Junior Butler, or **Boursier,** the younger Treasurer or Purse Keeper of the Colledge.

Senior Butler, the head or chief Treasurer or

Cash keeper of the University or Colledge.

Vice Principle, the second person in the Colledge, which in some particular Halls or Colledges are termed **Vice-Basters, Sub-Wardens, Sub-Rector, Vice-Provost, Vice-President** and **Sub-Dean.**

Principle, the chief Ruler of the Colledge or Hall, which as I said before are in some called **Principles,** as in *Jesui Colledge; Master* in *University Colledge, Balliol Colledge* and *Pembroke Colledge.* **Warden** in *All-Souls* and *Merton Colledge,* and *Wadham Hall.* **Rector** in *Exeter* and *Lincoln Colledges.* **Provost** in *Oriell* and *Queens Colledges.* **President** in *Magdalen, Corpus Christi, Trinity* and *St. Johns Colledges.* And **Dean** in *Christ-Church Colledge,* in which they have two other persons in Office, called the **two Censors.**

The Officers over the whole University.

The **Chancellor,** who is generally one of the Noble Men of the Land, and is made by the King.

The **Vice Chancellor,** he always weareth a Doctors Gown; Cap, and Hood, and hath the Rule, Care and Charge of the University.

The **two Proctors,** Junior and Senior; they wore Black Gowns faced with Velvet, the wide sleeves with the same, Masters of Arts Caps, and a Tippet on the left shoulder.

The **four Praepositors,** wear Masters of Arts Gowns, sometimes with Tippets, whose Office it is to walk about in the Night, to see that the Scholars keep good Orders, and are not abroad in the Night, &c.

XLVII. He beareth Vert, a **Martyr in Flames,** tyed to a **Stake** or Body of a Tree, holding a **Trumpet** to his Mouth with his right Hand, and the left extended, proper. This is born by the name of **Marter.**

This is the Emblem of the Church Militant, who is here said to rejoice and sound the Trumpet of Gods Praise though it be in the midst of the Flames; no Affliction can alter his Affection, but in the same a Holy Man will be mindful of setting forth Gods Glory. *Though I be smitten into the place of Dragons faith David, yet will I not forget thy name, Psal. 44. 19. 20.*

XLVIII. He beareth Or, a **Martyr in his Triumph,** kneeling on a Cloud clothed all in Light, and Crowned, with a **Palm** in his right hand, and a **Trumpet** held to his Mouth by his left, all proper. This is born by the name of **Triumph.** Here is the end and the Reward of all Christs faithful Servants and Soldiers, which is after the Victory of Sin, the World and Satan, they are received into the Clouds, are Crowned with Glory, and have Palms of Triumph put into their hands, and with Trumpets Royal Voice, for ever Sing *Hallelujah,* Praises and Joy beyond all thoughts or utterance.

XLIX. He

XLIX. He beareth Argent, a Minister in a Pulpit, with a Purple Cloth Fringed before him. Ministers of all Men are to be skilled in those two Noble Sciences, Rhetorick and Logick; the first teacheth to speak well, like an Orator, whose words come with a Grace; the second the Art of Reason and Disputation.

Rhetorick described.

This Noble Science, and one of the Liberal Arts, is set forth either by Man or Woman, or both; crowned with Bays, with a Caduceus Winged in one of their hands, and a Book and Scrolls by them.

Certain Terms used in the Liberal Science of Rhetorick.

Rhetorick and **Oratory** or **Eloquence**, is a quick and ready way of speaking well; wherein Words are adorned with Tropes, Sentences with Figures, and pronunciation or utterance with Gestures.

1. **Adornments of Speech**, are to set it out with these things.

Apologies or **Prologisms**, a defence or excuse, a speech or written Answer made in Justification of any thing.

Prologue, a Preface or fore-speech, and is that as either opens the state of a Comedy or Fable, or commends it; or else refutes the Objections and Cavils of Adversaries.

Sentences, Phrases, are concise and pithy pieces of Wit, containing much matter in few words.

Proverbs, Old sayings, an Adage or Wise saying.

Parables, Mysteries, dark sayings, a resemblance, similitude, or a comparison.

Fables, Tales of Untruth, yet have a likelihood of Truth.

2. **Apothegme**, a brief and pithy Speech of some renowned personages.

Comparisons, are setting things together, to see the likeness or difference of them.

Similes, things like, or of the very same fashion, the similitude, likeness, or resemblance of kinds.

Examples, a Prefident, Pattern, or Copy; a thing brought in for proof or declaration.

Hyperoglyphicks, Mystical Images, Letters or Cyphers, signifying Holy Sentences, or Predictions of things to come.

Demonstratives, are certain states in Oratory, wherein praises and dispraises of things are made evident and plain.

Deliberatives, are ways wherein persuasions and dissuasions are handled.

Juridicall, is the way whereby Accusations and Defences are managed.

Apologues, an apology, defence or excuse of a thing, the conclusion or ending of a Fable, Tale or Story.

Gesture, or becoming Actions to set forth Elocution, are in the Look or Countenance, Voice, and motion of the body; the first being as occasion requires, either erect or looking up, or submits held down, cheerful or sad, with a forehead neither wrinkled or smooth: The Voice is also used Mournfull and Broken in the stirring up of Pity, sharp and fierce in Anger; merry and pleasant in Joy; and for bodily motion is used the foulding of his hands to beseech; a decent and handsom clapping of them together upon occasions of Mirth; and at unworthy Passions stamping of his Foot.

3. **Figures** in a Speech or Sentence, are words or phrases contrived from a plain to a neat way of speaking, which are termed Figures of a Sentence.

Exclamation, is that whereby the Speech is heightened by Exclaiming, as *O Times! O Manners.*

Interrogation, is that whereby by Asking, we stir up the Hearers to Attention, as *Ought it to be so done? What doth let you in the Race?*

Reticence, whereby the Speech is made more sharp by the very breaking of it off; as, *But for this cause I will say no more. As concerning these things I will hold my Peace.*

Correction, whereby I call back something already said, that that which is to be said may be entertained more attentively; as *Shall I hold my Tongue, Nay I will speak.*

Preoccupation, is that whereby the interruption of the Hearer is fore-spald; as *Some one may say, &c. But I Answer.*

Concession, is a granting of that which might be suggested, that the Hearer may be compelled to grant another thing; as, *Let him be Poor, let him be of a low Parentage, yet he is Just or Honest; so contrary, Though he be Rich, he is a Knave.*

Apostrophe or **Aversion**, is whereby the Speech is turned from the Heavens to some other thing, as, *Hear O Heavens, ye shall be my Witnesses.*

Prosopopeia, or **Disimulation**, is the dissembling of a person speaking, as, *I Sun shine not for this, that you being drowsie, should snore soundly.* All these figurative speakings are to stir up attention, and are noted Figures. But among the Figures of Speech there are these which do much excel, as

4. **Epizeuxis**, is the repeating of a thing over again in the same words, as, *we have won the day, we have won the day.*

Anaphora, a repeating in the beginning of a Sentence, as, *that proves to our Comfort, to our Honour, to our Profit.*

Epistrophe, a doubling of the same words in the end of a sentence, as, *we will go on, we will Fight on, we will Triumph on.*

Epanalepsis, a doubling of the same words in the beginning and ending, as, *much you promise, you will be bound to perform much.*

A **Clinar**, a gradual connection of several things, as,

Let a Good Cause put Courage in us, Courage Industry, and Industry Valour.

Epanodos, a redoubling of words backwards, as, *I do not live to eat, but I eat to live.*

Poronomasia, an illusion of sound to sound, or thing to thing, as, *Destructions are Instructions.*

Polyptoton, repeating the same words, only varying the Case, as, *he maketh one that is mindful un-mindful, who minds him of that which he hath in his mind.*

Tropes, are Sentences or Words translated from their own signification, to signifie some other thing like, or contrary, or at least different; that is, in speaking mean one thing, and the words another.

Metaphor, is when we call one like natured, by the name of another thing like it, as, to call a *Dunce*, a *Block*, or *Ass*, signifies the thing so called, is like natured.

Ironie, is when a thing is set forth by the name of a contrary thing, as when I say *O Good Sir*, for *O Rogue*; hereby is a thing set forth sportingly or in Jest, by the name of a contrary thing.

Metonymie, when the cause of a thing is set for the effect; as to say, *Man is Clay*, or on the contrary, *Man is Mortal*.

Synecdoche, is when a part is taken for the whole, or contrary wise, the whole for a part: Now to these fore-said Tropes belongs these following terms.

Allegory, is that in which a Trope being once put, is continued, as, *an evil Crow hath an evil Egg*, that is, a *Wicked Father hath a Wicked Son*.

Hyperbole, is that by which the Trope is raised to a thing beyond Truth, as to say, *a Man to Man is a God*, an excess in advancing or repressing.

Hypophora, is that by which the thing is shunk and lessened below the Truth, as to say, *Man is a Shadow*. But to the more simple adorning of words belongs these terms.

Epithets, are when words be added to a Sentence for Ornament sake, as, *an Eloquent Orator speaketh powerfully.*

Antithetaes, wherein we seem to say something more than we do say, as, *he doth not speak, but Thunders*; or, *he doth not move but throws down.*

Synonymaes, are diverse words made use of being of one, or near the same in signification, that with a double stroke (as it were) the same thing may be set home more strongly, and stick more fast; as to say, *he solliciteth, Adviseeth, Perswadeth, Captivateth and Leads whither he will.*

Periphrasis, is that wherein we do not name the thing, but speak it about, as to say, *the Parent of Roman Eloquence*, meaning thereby *Cicero*.

Maxims, or Proverbs.

Emphasis, is to speak with earnestness, thereby to express the signification of a Mans intention.

Hyperallage, is a Figure when words are understood contrary.

Style, is a certain way of speaking or writing according to the Subject spoken of, and this is threecfold; a low Style in speaking of ordinary and mean matters; in-

different, in things of a mean nature; and an high style in high, great, and lofty things.

Attick style, are words fitted accurately to the subject spoken of.

Asiatick, is a copious and large style.

Laconick, is a short and witty style, words spoken to the purpose.

Poetry described.

It is a Branch of the Liberal Sciences, having witty Inventions and Sayings from them all; it is confined to no Rule, but hath liberty (like the Kings Jester) to say what it will, to ly by Authority so it come off with a good Fancy and none to contradict. A Poet then is described sitting at a Table, or standing thereby, looking into the Sky, with the Finger of the right hand pointing to them of the left; and before him laid several Books, and all sorts of Instruments, Mechanick, Domestick, Military and Agriculture; as raising matter from all things that are seen, or heard, or understood.

Terms used in Poetry.

A **Poet**, is one that speaketh and writeth all in Rythm and Meeter.

Rythm, is the foundation of Poetry, or Rudiments of a Poet; where the number only of the Syllables, with the like cadence of the last is looked upon to make it Rythm.

Cadence, the ending words of the Verses which makes the Meeter.

Rudiments, the grounds or foundation of Poetry.

Meeter, is where all the Syllables are numbred or brought into feet, that they may run more pleasant in the Cadence; words set in measure.

Hypermeter, a Verse having one Syllable above measure, called by some a **Feminine Verse**.

Feet, or **Poetical Feet**, they are made of Syllables, each Syllable being a foot.

Acetes, are made of Poetical Feet, or Syllables ending alike in the last words.

Odes, Songs Tuned to the Lute, or other Instrument.

Odelet, a small or short Song.

Poems, Verses made from Prose.

A **Spondee**, is two long Syllables together in a Verse, as *constans*.

A **Iambick**, is a short and long Syllable together, as *Boni*.

A **Trochee**, is a long and short Syllable together, as *semper*.

A **Dactyl**, is of one long and two short Syllables, as *stetere*.

Hemistichie, is half a Verse.

Hexastichie, is six Verses.

Epithalamium, is a Nuptial or Wedding Song.

Epicetium, a Dirge or Funeral Song.

Epitaph, is an Inscription upon the Tomb.

Propempticum, or *Persey*, a farewell or going away.

Epigram, merry jesting Verses on the Letters of ones name.

Satyr, or **Satyrical Verses**, are such as give sharp rebuking words.

Elegyes, lamentable Verses, Verses on persons departed or dead.

Iambique Verses, a measure or foot in Verse, having the first Syllable short, the second long; also a Verse consisting of 4 or 6 feet.

Poets Laureat, are such who for their Wit, are had in great esteem, and were crowned with Laurel by Kings.

Poetize, or **Verse**, is to turn Poet, to make Verses.

Polemicks, Verses treating of War, or Treatises of War, Strifes or Disputations.

Epique Poem, is a Narrative of Heroick Actions.

Drammatique Poem, is Heroick Verse of Fights and Tragedies.

Scominatick Narrative, is harsh biting Verse.

Drammatick, is a Comedy or merry pleasant Verses.

Bucolique, is a Pastoral Narrative, or Verse pronounced by two or many persons.

Lyrique Verses, Verses made of diverse matters, variety of Verses sung to the Harp.

Euphonia, a Song sung by one.

Symphonia, a Consort, or a Song sung by many.

Logick described.

It is one of the seven Liberal Sciences, and is that Art by which is taught the way and method of Reason and Disputation; and is described by a Man or Woman, or both, in the antientest way of Habit, with long Coats, Vests, Mantles and Scarfs with Books before them, and putting the fore-finger of the right hand to the end of any finger of the left, as if they were scanning of Verses, or numbring the feet in a Verse.

Terms of Art used in Logick.

Logick, is the Art of Reasoning or speaking well, by clearing things that are dark, confuting mistakes, and ordering things out of Order.

Logician, is one that can reason and speak well.

Proposition, is the question or thing proposed, or put forth to be argued and disputed on; the first part of a Syllogisme.

Syllogisme, is a most perfect kind of arguing, which gathers a necessary conclusion out of two Premises; as thus, *Every Vice is odious, Drunkenness is a Vice; ergo, Drunkenness is odious.*

Major, is the first part of a Syllogisme; the Proposition or Major is one and the same in Termino, the ground of reasoning.

Assumption or **Minor**, is the second part in the Syllogisme, or the lesser part in the proposition, from whence the conclusion or final determination is drawn. See **Minor**.

Conclusion, the third part or determination of the Syllogisme.

Subiectum, or the Subject of a Proposition, is the thing principally meant, as *Peter is a Man*; the subject is *Peter*.

Predicatum, or the Predicate of the proposition, or the Attribute, is the word *Man*.

Copula, or the coupling together of the Proposition is the Verb (*is*) which tyeth the Sentence together.

Position or **Sentences in Logick**, are for the affirming of a thing, or the denying of it; in which there must of necessity follow these adjuncts, else it is not rightly stated.

Sense, meaning or understanding of Sentence or matter; the judgment or reason of any Writing.

Reason, Purpose or Design of a matter; the cause or state of a thing proposed or written.

Circumstance, going about and about a thing, or standing about, or a delaying of a matter by impertinent Words or Acts.

Cause and Effect, is a thing made or procured; a work done or finished, from such a Cause, Suit, or Controversie, or matter in question; as *Hereje is the Cause, Controversie the Effect*; the first being the forerunner of the latter.

Adjunct, is a quality joined to another thing of the same nature, as Heat to Fire, Day to Light, Weight to Lead, &c. a thing joined or added unto another.

Definition, or declaration of a matter in few words the signification or nature of a thing plainly.

Description, Narration or explaining of a thing, a distribution into several parts or portions.

Division into parts, is to take every word of a Sentence by it self, and to Comment or Paraphrase upon it.

Distinction, or putting a difference between word and word, or thing and thing; a distinguishing, dividing or separating one from another.

Distribution, a dividing or parting; it is a Figure in Logick, wherein we give to single things their due propriety, or right.

Genus or kind, a Gender, a term in Logick, and the first of the five **predicables**, containing only a part of the question, the other being comprehended, it is called a Genus.

Species or sort; is when the predicate comprehends the full answer to the question.

Thesis, is a general or indefinite question, argument or position; see **position or sentences**.

Sentences, are concise and pithy pieces of Wit, containing much matter in few words. See **Position**.

Coherence, an agreement, or hanging together of one Sentence or Text with another, a joyning together.

Axiome, a Maxim or general ground in any Art, a short Sentence or Proposition generally allowed to be true, as in saying *the whole is greater than its parts*.

Maxime, a Rule that may not be denied in any Art.

Axiomisme, a Proposition or Principle in an Art not to be gain said.

Subject, is a matter treated of; also in Logick is that which supports qualities belonging to it; as, *The Body is the subject in which is Health or Sickness; and the Mind Virtue or Vice*.

Minor of the **Syllogism**, or lesser part of the proposition from whence the conclusion is drawn, as *Whatsoever is due by the Law of Nature cannot be altered: But Allegiance and Obedience of Subjects to the King, is due by the Law of Nature; Ergo, Allegiance and Obedience cannot be altered*. The first part of this Syllogisme is called the **Major**, the second beginning at *But*, is the **Minor**; and *Ergo* makes the Conclusion, that *Allegiance and Obedience cannot be nullified or made void*, Mark 7, 11. &c.

Term, or **Termination**, is the finishing, bounding or ending of a matter or thing, the limiting or defining of a cause.

Transposition, a removing from one place to another; to alter the order of a Sentence, Speech, or Thing.

Premised or granted.

Controverted, or disputed, debated *Pro* and *Con*; a disputing of a point in controversy, strife, variance, contention.

Argument, is the Theme, Matter, Summ or substance to speak or write upon.

Affirmative, the affirming, avouching, or standing to the certainty of a thing, to maintain a Truth against any opposer.

Negative, is to deny or gain say a thing: Two Negatives make an Affirmative, as, *he did not give nothing*, which implies that he did give something.

Method, is the bringing of things into Order, into generals and particulars; a well disposing of things into their proper places.

Propitious, clear Words or Sentences.

Ambiguous, doubtful words, not clearly demonstrated.

Sophism, **Quirks**, things hidden, or an obscure matter in a Sentence. **Sophister**, a Quibler, a Disputant that wrests or argues crattily; an eloquent and cunning speaking, whereby to make a false matter seem true.

Synthesis, is the composing or winding up of a matter; it is a Figure in a Sentence, wherein a Noun Collective Singular, is joined with a Verb Plural.

Analysis, the resolution or unfolding of an intricate matter, or a resolving or distribution of the whole into parts.

Syncretism, a collating or comparing of one thing with another.

Synecesis or **synetize**, is a contraction of two into one, as two Vowels into a Diphthong. æ æ.

Paraphrasis, is an Exposition or Interpretation of the same thing by other words, to give the sense of an Author plainly, and according to the true meaning; a **Paraphrase**.

*

XLIX.*He beareth Argent, a Lady Abbess in the Habit of her Order; with a Crozier on her left Arm in Bend, with her hands conjoined and elevated upon her Breast, proper. Some pronounce her an Abbateſs, and a Lady Nun. This is born by the name of *Abbes*, or *Abbs*.

L. He beareth Or, a Nun in her Nuns Weed, or Habit, with a Book between her hands: Others make a farther addition and term her Vailed; because she hath her Hood or Vail on, but that is needless; for such Cloistered Dames are never seen abroad, but they are ever Vailed.

Nuns do profess Chastity, Contempt of the World, having an earnest desire of Heavenly things, and for that end are Cloystered up in Nunneries to live retired lives. It is by the Church of Rome held to be a Capital Sin either to Marry or Solicit a Nun; such are Excommunicated, or perpetually Imprisoned, or put to Death.

Nuns are also enjoined to be modest and frugal in their Cloaths and Diet, not to converse with Men, nor to walk alone, nor to Bath except their Hands and Feet, to Fast and Pray often, to be Vailed, abstain from Wine, wash the Saints Feet, not to be Idle, but either Sing, Pray, Hear, or be working with the Needle, or Spinning.

LI. He beareth Argent, a Religious Woman, of a Gild or Fraternity of Brothers and Sisters, which are a kind of Religious Laity that Societ together, yet follow Worldly or secular Employments. Some term her a Religious Woman of Antwerp, or a Holy Sister of St. Georges Gild. This is born by the name of *Sister*.

LII. He beareth Or, a Vailed Virgin or Maid; This is one that we may suppose is weary of the World as of her Virginitie, and therefore to part with both, she is preparing her self for the Nunnery; for old Father Lasber is not so ancient, but he is both ready and willing to Confess and Shwive a young Girl, and Absolve her too from all her Offences of that kind.

The Nuns of St. Benedicts Order were first set up by *Scholastica* the Sister of St. Benedikt or Bennet: They were by their Rule not permitted to be God-Mothers, or to go abroad, but in case of great necessity, and that with some Ancient Woman; they must give themselves to Prayer, Meditation, and observe the Canonical hours; they must not speak with any Man except in publick before Witnesses; if any be found unchast after 3 Whippings, she is fed with Bread and Water for a whole year in Prison.

The Abbateſs must be no young Woman, but above 60 years of Age, and to be discreet, grave, religious, careful and vigilant over her Charge; not to go abroad without the Bishops leave and upon urgent occasion, and to leave in the mean time a Deputy to look to her Charge; and not to go abroad but to have some Nuns accompany her.

C c 2

The

The **Nuns** of **St. Clara**; This Order of Nuns was instituted *Anno* 1225, by *Clare* the Daughter of *Ortolana*, who undertook Pilgrimage both to *Rome* and the *Holy Sepulcher* in her Childhood, and would never hear of Marriage. At the Church of *St. Damianus*, she set up the Order of **Dev. Ladies**, called from her name *Clarisse*, **Nuns Clarissans**; and from the place the **Nuns of St. Damian**; their Rule was that of the *Franciscans*.

The **Nuns of St. Bridget**, this Order was instituted by one *Bridget* a Princess in *Sweden*, about the year 1360. This Order came into *England*, *Anno* 1414, they were to have nothing in propriety, touch no Money, must lie upon Straw; they wore grey Coats and Cloaks with a red Cross thereon, and on their Vail they wear a white Linnen Crown, on which are sowed pieces of red Cloth representing drops of Blood, and so placed that they may resemble a Cross.

The **Nuns** of **St. Katherine**; this Order begun *Anno* 1372; others say *Anno* 1455. the Nuns wore a white Garment, and over it a Black Vail, with a head covering of the same colour. *Katherine*, born at *Sene* in *Tuscany*, was the Founder thereof, who in her Childhood Vowed Virginity, and in a Dream saw *Dominick* with a Lilly in his hand, and other Religion-Founders, wishing her to profess some of their Orders; she embraced that of *Dominick*, in which she was so strict, that she abhorred the smell of Flesh, eat only Bread and Herbs, and drank Water; she lay in her Cloaths on Boards.

The **Nuns** of the Order of **St. Mary de Decem Virtutibus**, that is, of the Ten Vertues; it consists only in repeating the *Ave Maria* ten times; they wear a black Vail, a white Coat, a red Scapular, and an Ash coloured Cloak. There be two other Orders of **St. Mary**, the one wears a white Coat and a Black Cloak like **Carmelites**; the others are all White. There is also an Order of Nuns of **St. Maries Conception**.

The Admittance and Consecration of a Nun.

None is to be received into the Nunnery without one years probation at the least, then she must be Examined and Consecrated by the Bishop after this manner. First, in her passage to the Church are carried two burning Tapers, after followeth one bearing of a Cross, with the Crucifix on one side, and the Virgins Image on the other; then followeth the Nun with other of her Fellow Nuns, so she is presented to the Bishop where she testifieth her constant resolution to that kind of life; she is with a consecrated Ring put on her Finger by the Bishop Married to Christ; then goes to the Altar and Offers, and so returns to her place; after a while she is called to come to the Altar bare-footed, where the Bishop Consecrateth her Nuns Cloaths, then puts on her the Coat of her Profession, her Shoes, Hood and

Cloak, which he tieth with a Wooden Button; the Bishop at every Action Praying.

Being thus in her Nuns Habit the Musick Playing, the Bishop saith thus (having her Vail in his hands) *Behold Daughter, and forget thy People and thy Fathers House, that the King may take pleasure in thy Beauty*, to this the people Cry *Amen*: And so the Vail is cast over her, then all the Religious Matrons and Nuns do Kiss her, after the Priest hath Prayed for, and Blessed her.

So returning to her place, she is again called to the Altar, where she falls on her face, the Bishop and Priests read the Letany, Absolve her, and give her the Eucharist; then her Coffin, which during the time of the Mass stood there, is by four Sisters carried into the Convent sprinkling it with Dust: At the Gate stands the Abbates with her Nuns to receive her, where she is brought by the Bishop having two Tapers carried before him, the Priests Singing, who recommends her to the care of the Abbates, which she receives, shuts the Gate and brings her into the Chapter.

The Nuns were of old either Consecrated by the Bishop or Priest when they were 25 years of Age, but now they do it at 12 or before; the days for receiving of the Vail and Consecration, are the *Epiphany*, *Easter Eve*, and the Festival days of the Apostles, except in case of Death. The new Nun for the first eight days is tied to no Discipline; at Table and in the Quire she sits last.

LIII. He beareth Verr, a Nun of the **Carthusian Order**, in the **Habit** and **Tail** prescribed them. The Monks and Friars of this Order I have set down *numb.* 18. the Nuns or Sisters of that Order and Fellowship were in a manner tied to the same Austerity of Life and Habit as this Figure doth express. This Coat thus Blazoned, is born by the name of *Monksbo*, a *Spanish Family*.

G. a demy Carthusian Nun proper, holding an open Book in her right hand, is the Crest of *Don Pango*.

LIV. He beareth Gules, a Nuns head couped below the Shoulders, and **Tailed**, proper. This may also be termed a **Lady Abbess**, or **Lady Nuns head**; and three such is the Coat Armour of *Wagley*.

LV. He beareth Azure, the **Virgin Maries head couped** at the Shoulders, **Tailed** Argent; with the **Gloze** about her Head, Or. Some term this a **Virgin Saints head**.

¶ Where it is to be noted, that all **Saints**, whether Holy Men or Holy Women, are ever Drawn with a **Circle** about their heads; but few or none save the **Virgin Mary** and her **Son** with **Glozes** about theirs.

LVI. He beareth Argent, **St. Katherine** sitting with a **Palm Branch** in the right hand, and supporting a **Wheel** with her left. This is the crest (being clothed in Purple) of the Family of *St. Katherine* in *Italy*.

The like St. Katherine habited in red, and a furcoat of Ermine cast over it; and her Hair pendant, Or; holding up the right hand, is the crest of the Company of Wax Chandlers of Chester.

The Description and Cognizance of several Women Saints.

St. Cecily is Painted with a Stop of Organ Pipes in her left Arm, with a Palm Branch in her right hand.

St. Catherine of Sen, in the habit of a Nun, a Crown of Thorns on her head, a Crucifix in one hand, and a Lilly with a long stalk leaved in the other.

St. Mary the Virgin, is Drawn in Robes and Mantles with the Angel *Gabriel* standing before her, she is in a Praying posture with a Book before her on a Desk or Table. She is also Drawn with a little Child in her Arms, and a Crown on her head.

St. Christian hath a Palm Branch in her hand, and a Book under her Arm, with a Sword and a Mill-stone at her feet.

St. Anne is an Old Woman Embracing the Virgin Mary.

St. Mary Magdalen is weeping and clasping her hands, her Hair loose hanging down, a Cup by her and a Crucifix before her.

St. Agatha carrieth a Palm and a pair of cutting Tongs.

St. Victoria is Drawn Embracing a Sword and a Palm.

St. Julian with a Palm and a Lilly.

St. Joan with an Imperial Crown on her head, and a Crucifix in her hand.

St. Veronica holdeth a Cloth like a Handkerchief, on which is our Saviours Head Crowned with Thorns.

St. Barbara, is drawn resting her hand on the cross Bar or Hilt of a Sword, and a Palm in the other hand, and a Crown on her head, and hair hanging down.

St. Margaret is leading of a great Serpent or Dragon in a Chain, and a Palm in the other hand.

St. Agnes clipping of a Lamb, with a Palm in her hand.

St. Dorothy with a Basket of Flowers and Fruit, and a Palm in her hand.

Having given some examples of Saints both Male and Female; I shall in the next place give you some Instruction whereby you may upon sight know the several Emblems of Virtue and Vice, as Faith, Hope, Charity, Prudence, &c. Sloth, Envy, Wrath, &c. which things are very oft born in Shields and Escutcheons, and are depicted under the form of Men and Women either in whole or to the middle.

Coat Purple, ~~Clasped~~ and hanging behind her, holding of a long Cross in her right hand, Or. By the name of Faithful.

The Description of the seven Cardinal Vertues.

Faith, is Painted in white Garments in one hand a Cross, and in the other hand a Golden Cup or Chalice, and sometimes a Book.

Hope is a Woman in Blew Garments, with Mantle or Vail red, holding or supporting of a Silver Anchor.

Charity, a person in Yellow or Crimson Robes and Vail with a Child in her Arms, and one in her hand by her side; or an enflamed heart in the other hand, with a tyre of Gold and Precious Stones on her head.

Prudence is drawn with a Looking Glass in one hand; and in the other a Serpent by the Neck, with the Tail lapt about her Arm; or two Serpents in one hand, and her Finger at her Mouth with the other. Some have drawn her with two Faces, one looking in a Mirror, to see things past; and in the other hand a Prospective Glass to see things before her, and to come.

Fortitude, is a Woman in Robes, with her right Arm embracing of a Stone Pillar or Collum; and with the other supports a Shield.

Temperance hath a Cup in the one hand, and a Bottle Urn in the other, pouring Wine thereout into the Cup; with loose Garments, Naked Arms and Feet, else clad with Sandals.

Justice, hath a Sword in one Hand, and a pair of Ballances in the other; some Paint her Blindfolded: Or after others with a Silver Coronett on her head, white Robe and Mantle and Buskins.

LVIII. He beareth Or, a Woman clothed in a long Robe close girt, Head Attired, Gules, Enamelled, supporting with her right hand a Shield, Or, the other on her Belly. This may be termed the Emblem of Safety and Protection, as *saith David, Thou shalt defend me as with a Shield.*

After this manner our fore-fathers used to describe or represent the Graces, by Women in long Robes or loose Garments, after the old fashion, with Mantles and Vails foulding about, and flying aloft, according to the pleasure of the Painter; I shall give examples of some.

The Graces described.

Humility is described by a Woman holding up her Hands together to her Breast, having a grave and modest Countenance, eyes half shut, in a loose Garment slit up the Thighs, Naked Breast, Arms and Legs; having her foot upon a Sword and Shield, with other Worldly Vanities at her feet.

Penitence, a Woman in a vile, ragged and base attire,

attire, wringing her hands, weeping, deploring and bemoaning her Condition.

Chastity, by a Woman between two Men enticing her two Impurity; but more properly this Grace is described by the Story of *Susanna* and the two Elders, which when they could not allure to Unchastity, accused her for the same. Or else by chaste *Lucretia*, who stabbed her self with a Dagger, rather than to live infamous, being robbed of her Chastity by *Tarquinius*.

Liberality, emblemed by a Woman with a Purse in one hand; and the other hand stretched out with another Purse, giving it to a poor Body, shewing thereby that to give all is Profuseness and Prodigality; but so to give, as not to be a receiver ones self.

Love, as a Passion of the Mind I have described it before; but as a Vertue, it is by one very well Emblemed by a Woman with Wings flying upwards to Heaven, but she is Chained by the Leg to the Globe of the Earth; shewing that the Heart and Affections were on high though the Body was confined to the Earth.

Innocency, is described by a Woman all in white, or two Naked Children playing with a Lamb or Doves.

Religion, is drawn all in white, with a Silver Vail, a Censer or Dish for Sacrifice in one hand, and a Book in the other, to shew that we must not use any other Offerings than what is prescribed; she usually hath a Stork by her side.

Piety, is drawn like a Lady kneeling before an Altar with a flame upon it, holding up her hands; or she is depicted holding in her right hand a Sword stretched over an Altar, at her left side a Stork or an Elephant.

Truth, is represented by a Woman with the Sun on her right hand, and a Ballance in the other, or a Touchstone, signifying that Verity is not ashamed of the Light, nor afraid to come to the touch.

Equity, or **Equality**, is Emblemed by a Lady lighting of two Torches in a Fire at one time.

Vertue is Drawn like a Pilgrim Woman, grave and austere, sitting on a four square stone, melancholy, and leaning her head on her hand upon her Knee.

Industry or **Diligence**, is depicted in a plain Dress or Garb with a Hat on, and a Sickle in one hand and a Rake in the other.

Opportunity, is drawn in loose Robes with a Bushy Forehead and Bald behind, and hath Wings to shew that let her slip, she soon flies away.

Labour, is depicted by a Man working at a Smiths Anvil, with a Forge by him and several sorts of working Instruments at his feet or set about him.

Watchfulness, is depicted with a Lamp in one hand, and a Bell in the other; or by a Man in complete Armour standing on his Guard, with a Sword in one hand, and a Shield with a Cross on it in the other.

Patience, is drawn in a Praying posture, or sitting on the ground with her hands together, looking up towards Heaven; it is best set forth by the Troubles of *Job*.

Peace, is painted in the shape of a young Woman, holding between her Arms the Infant *Pluto*, the God of Riches, and Ruler of this lower Region: Or after others, a Lady holding a Rod downwards over a hide-

ous Serpent of sundry colours, and with her other hand covering her Face with a Vail, as loth to behold Strife and War. In the Medals of *Trajan* it is set forth by a Lady, in her right hand an Olive Branch, and in her left a *Cornucopia*. In the Medals of *Titus*, Peace is emblemed by a Lady having in one hand an Olive Branch, the other leading a Lamb and Wolf coupled together by the Necks in one Yoke. Peace is also drawn like a Woman richly deckt, sitting or standing with an Olive Branch in one hand, and a Scepter, and Bracelets and Jewels in the other, Robes white, Mantle carnation, Fringed gold, Vail white, Buskins green.

Concord or **Ananimity**, is a Lady sitting in a sky coloured Robe, and a yellow Mantle with a Chapter of blue Lillies, with a Palm in her hand: or sitting with a Charger in one hand for Sacrifice, and a *Cornucopia* in the left: or a fair Virgin, holding in one hand a Pomegranate, and in the other a Mirtle Branch.

The Palm, Olive and Mirtle, are ever Emblems of Concord, Peace, and Agreement.

Mercy is depicted in shape of a Lady sitting on a Lion, holding in one hand a Spear and the other an Arrow. In the Medals of *Vitellius* she sits with a Sprig of Bays in her hand, and a Staff lying by her.

Works of Mercy described.

Giving Bread to the Hungry, by one giving a Loaf to a poor Creature. **Almes**.

Giving Drink to the Dry and Thirsty, by one giving Drink out of a Bottle or Jugg to a poor Naked person, who holds a Dish to receive it.

Cloathing the Naked, by a Woman putting a Shirt or Coat on a Naked Child; or one giving a Garment to a poor and half naked person. **Tender hearted**.

Visiting the Prisoner, by giving of a Fellow in the Stocks, Money; or a Man lying in Chains at the feet of one that stretcheth out his hand to relieve and help him; the taking off of the Prisoners Bonds. **Love**.

Entertaining Strangers, Hospitality, shewed by the bringing in of a Palmer or Pilgrim into the house, or emblemed by washing of the feet of another person.

Burying the Dead, which is the last Office, and is set forth by two Men laying of a dead Corps in the Grave.

The description of Vices and Wickednesses.

Envy, is Emblemed by an Old Man or Woman with a Mans heart in their hand, putting it to their Teeth as if they would eat it; at whose feet is a snarling Cur Dog, or *Medusa's* snaky head.

Wrath, is set forth by a Man drawing his Sword, and a Bear robbed of her Whelps, and Armies Fighting.

Sloth,

Sloth, by a Man lapped in his Cloak, and an Ass lying under his Burthen.

Guttony and Drunkenness, by a Fat Man, a Bottle by his side, a Cup in his hand, and a Swine at his feet, or by a Man Vomiting, and a Swine eating it up.

Avarice or Covetousness, is a Man with Bags and Chests of Money; and a Wolf with his foot on a Lamb and a Goose by the Neck in his mouth.

Lust, by a Man looking at a Picture of a Naked Woman, and an He-Goat standing by him.

Pride, Emblemed by a Man or Woman in rich Attire, and by a Peacock in his Pride, having his rail lifted up.

Atheism, by a Man void of fear, running into all manner of Wickedness, because he thinks there is neither God nor Devil; and may well be depicted, a Man with an open Breast treading upon the mouth of Hell, as if he feared it not, and spitting against Heaven, as in defiance of the Almighty.

Disobedience or Rebellion, is set forth by *Pharaohs* drowning in the Red Sea. And *Abshaloms* hanging by his Hair in a Tree, his Mule running from under him.

Idolatry, by any manner of person doing reverence to any Image, as the *Israelites* worshipping the Golden Calf.

Blasphemy or Swearing, by a Man foaming out of his mouth Fire and Smoak, and Fiends and Devils in the same, with a Sword in one hand, and a Rope in the other, with Stocks, Gibbet and Shackles by him.

Murther, emblemed by *Joab* friendly embracing of *Amaja*, and running him into the Belly with his Sword. Or by one killing of another.

Adultery, Whoredom or Fornication represented by *Zimri* the *Israelite*, and *Cozbi* the *Midianitish* Woman lying together in a Tent, whom *Phinehas* slew, by thrusting them both through with a Javelin.

Incest, by *Lots* being made drunk by his Daughters and lying with them.

Theft, or Robbery, by *Achans* hiding the *Babylonish* Robe, and Wedge of Gold in his Tent.

Forswearing, Bearing False Witness, or Lying, is Emblemed by a Woman shaddowing or hiding the Light of a Candle, and sitting in darkness, the Moon in the Sky clouded, signifying by extinguishing the Light (which is Truth) the Intention is by false words to deceive and pervert the right.

Sin, Wickedness, or Iniquity, is described by *David* very well, by the Giants carrying and laying one Mountain upon another, to come to Heaven, and by their making War with the Gods.

Corruptions of the Flesh, or the deeds of the *Old Man*, is described by an old grave Man with a Pestilence in his hand, Fiends flying out of his mouth, and a Lustful Maid with Wings in his Breast.

Worldly Vanities, represented by a Woman in a Harlots Habit, offering to all Crowns, Scepters, Treasures, nay all that the VWorld can or doth possess.

Temptation or Satan, (the chief Captain of all this Hellish Train,) is drawn with a Dragons head and VVings, to the middle like a Man with flouch hanging Breasts, and the lower parts of a Goat, with a Serpentine tail, his right hand casting fiery Darts.

LIX. He beareth Argent, a demy Sibylla Europa issuant out of Bale, a Book in the right hand open, and a Branch of Laurell in the left, a Hat on her head, the Hair pendant, all proper. These Sybils were VVomen Prophetesses which in several parts of the VWorld did foretell the coming of Christ into the VWorld; they are said to be Ten in number, who gave forth 600 Oracles, diverse of which Verses are rehearsed by *Lactantius Firmianus*, without making any particular mention who they are to be specially referred unto; notwithstanding it seems they are reputed to proceed from *Sibylla Samberta*; who wrote 24 Books in Verse, of the Coming, Miracles, and Life of Christ; whereunto the saying of all the other Sibylls are conformable.

Sibylla Persica, called *Samberta*, which among other Prophetesses said, *That the Womb of a Virgin shall be the Salvation of the Gentiles.*

Sibylla Lybica, or Sybil of *Lybia*, one of her Prophetesses were, *That the day shall come, that Men shall see the King of all Living Things.*

Sibylla Delphica or Sybil of *Delphos*, called *Themis*, the Prophetess, *That a Prophet should be Born of a Virgin.*

Sibylla Erythrea, born at *Babylon*; who especially Prophesied a great part of Christian Religion in certain Verses recited by *Eusebius*; the first Letter of every of which Verses being put together, makes these words, *Jesus Christ, Son of God, Saviour.* These Verses are Translated into Latine by *St. Augustine* in libro *Civitatis Dei* lib. 18. cap. 25. where they may be read at large.

Sibylla Samia, or Sybil of *Samos*, which said in the Isle of *Samos* where she was Born, *That he who was Rich should be Born of a Poor Virgin; that the Creatures of the Earth should Adore and Praise him for ever.*

Sibylla Hellepontica, or *Hellepontica*, she was born at *Marmise* in the Territory of *Troy*, who said, *That a Woman should descend of the Jews, called Mary, and of her shall be Born the Son of God, and that his Kingdom shall remain for ever.*

Sibylla Tyburtina, or *Phrygiaca*; or the Sybil of *Phrygia*, she Prophesied in the Town of *Acire*; one of her sayings was, *That the Highest should come from Heaven, and confirm the Council in Heaven, and a Virgin shall be shewed in the Vallies of the Desarts.*

Sibylla Albunea, surnamed *Tiburtina*, because she was born at *Tybur*, 15 Miles from *Rome*; she said, *That the Invisible Word shall be Born of a Virgin; he shall*

shall converse among Sinners, and shall of them be despised.

Sibylla Cumæa so called, she was born at *Campa-*
nia in Italy, who Prophesied, That God should be Born
of a Virgin, and converse among Sinners.

Sibylla Cumana, so named from the place where
she Prophesied, That Christ Jesus should come from Hea-
ven, and Live and Reign here on Earth in Poverty.

LX. He beareth Or, a Pauper or Poor Woman
in Beggars weeds, with her Staff in the left hand
all proper. This is born by the name of Pauper.

And here I shall conclude this Chapter with the Ex-
hortation of Solomon, (*Prov.* 28. 27. and 19. 17.) to

*

them that are Rich in the World, That when they see
the like Objects to this set before their Eyes, that they
turn not their Pity away, but give to them that need,
and help them in distress, the Fatherless and Widows,
for he that giveth to the Poor lendeth to the Lord, and lay-
eth up for himself a Treasure in Heaven, neither shall he
lack; but the Churl, the Miser, and Hard hearted,
that turns away his Eyes, shall have many Curses, Cur-
ses upon Curses shall be his portion; and to add to their
Calamities, When they shall cry themselves, the Lord will
stop his Ear against them, and mock when their Desolati-
on cometh, for the Merciless shall find no Mercy, James 2.
13. Therefore

Remember the Poor,
Shut not thy Door,
In Almes be free,
Gods Pity's on Thee.

TO

TO
EDWARD WILLIAMS of Mullionidd,
IN THE
County of CAERNARVON, Esquire.

SIR,

Your Worth in Promoting of so Laborious a Design like the Filings and Fragments of Gold ought not to be lost, but most Thankfully to be Owned, and Highly Esteemed, with Pity that the World is not Stored with many such Genius Persons, for the further Promoting of so General a Good, which will keep Your Name in Memory when time shall Cease with You, which is the Endeavour of

Your Oblidged Servant and Indebted Friend,
Randle Holme.

CHAP. V.

Having now Finished the two former Chapters which concern Temporal and Ecclesiastical promotions of Men, both for Church and State. I shall next proceed to give you some examples of Countrey fashions of both Men and Women, not of the Gallantry of those Countreys I shall treat upon (for that were endless as it is boundless, never continuing with such in one stay) but of the commonalty of such places, which are the only preservers both of the ancient Habits, and Languages, thereunto belonging.

Now these kind of Persons, I shall give a brief description of them, and their manner of Live, and such as I have found, either in whole, or in part, born in Coats of Arms, I shall unfold them to the Reader.

I. He beareth Argent, a **Green-lander** with a **Dart** in his right hand, with the **Head erected** (or upwards) proper. The **Greenlands** and **Freezlands** are cold Countreys lying in the North *Fridged Zone*, which makes the People there to be clad all in Furrs from Head to Foot. So this may be termed either a **Greenlander**, or a **Frizlander**, or a **Norwegian**.

These People professed the same Paganism that was in the other parts of the World, and is yet followed by them: for their Religion is **Idolatry**, their Knowledge

Magick, and their Actions **Barbarous**. The chief Gods they Worship are the **Sun, Moon, Stars, Elements, Rivers, Fountains, and Trees**.

II. He beareth Or, an **Islander**, or **Laplander** holding a **Bow unstrung** in his right hand, proper. These are said to go in **Fox furred Coats** to keep them from Frost and Snow; being under the **Frozen Zone**.

In **Lapland, Finland**, and in some parts of **Norway, Lituania** and **Samagotia** with those Neighbouring Countreys, they do to this day profess Paganism, Worshiping the **Sun and Moon, Stocks and Trees, &c.**

In **Westphalia** they Worship an **Idol in Armour**, holding a **Banner** with a **Rose** in his right hand; and in his left a pair of **Scales**: on his Breast was carved a **Bear**, and a **Lion** on his **Helm**.

III. He beareth Argent, a **Russian** holding up his right hand, and the left upon the **Handle of his Fauchion** by his side, proper. This is also a cold Countrey of **Russia**, and therefore the People to preserve them from cold congealed Showres, keep them to well **Furred Coats**, and use **Stoves** and **hot Drinks**, with good **Fires**. Their under Garment is **Breeches**, and a **Coat** to the middle of the **Leg**, gird about their middle, over which they wear

D d

ano-

P. M. Edward Williams de M. H. H. in Com. C. A. S. Armigeri. R. S. S.

another Coat or Gown well Furred or Lined for the season of their Countrey.

The Russians, Russians, Tonia, Lithuania, Samagotia and the Pommeranians, Danes, and Gothes: are all Neighbouring Countreys, and Worship the same Gods or Images that the Saxons or ancient Gauls and Germans did. They used to kill nine Males of each kind of Creatures, to pacifie their Gods with the Blood thereof, then to hang up their Bodies in the Grove next to their Temple, called Upsola.

IV. He beareth Gules, a Muscovian, or a Muscovite, holding up his right hand, and the left on his side. This place lyeth under the temperate Zone, yet in the Winter it is much colder then England, though it lies under the same degrees of Latitude: so that they wear commonly Furred Caps, and long Coats to their Feet, with another Furred Coat above that, yet not so long, buttoned or tied down before.

The ancient Muscovites adored an Idol called *Perun*, in the shape of a Man, holding a burning stone in one hand resembling Thunder: a Fire of Oaken Wood was continually maintained burning to the Honor of this Idol; and was death for the Priests if they suffered this Fire to go out.

In the Countreys about Muscovia, they Worshiped an Idol called *Salota Baba*, the Golden Hag. It is a stature like an old Woman holding an Infant in her Bosom, and near to her stands another Infant; to this Idol they offer their richest Sable skins, and Sacrifice Staggs flesh: with the Blood whereof they annoint her Face, Eyes, and other parts: the Beasts entrails are devoured raw by the Priests.

V. He beareth Argent, a Tartarian, or a Tartary Man cloathed in his own Countrey Habit, holding a Battle head, set with sharp pricks in his right hand, and a Bow unstrung fessewise in his left, all proper. The Tartars wear two long Coats down to their Feet, the uppermost open all before, being buttoned or tied to the waist, and then girded about the middle: they live under the Frigid Zone, and therefore lap themselves warm in good Furs, and Furr Caps.

Some write that the Tartars generally are homely in Habit, & made of the coarsest stuff, & reacheth no lower then the Knees: and if they go to the charge of Furs, contrary to the custom of other People, they wear the hairy sides outwards, and the skin next their own Bodies, only to shew the richness of their Apparel.

The Women suitable to the Men, scorning or wanting Ornaments to set them out: or when they do, they seldom go beyond Copper, Feathers, or such precious Jewels.

This is one of the greatest Countreys in the World, being as Geographers Write 5400 miles from East to West, and 3600 from North to South: by which account it lies from the beginning of the sixth clime where the longest day in Summer is 15 hours, till they cease measuring by climates; the longest day in the Northern parts thereof, being full six Months; and in the Winter half of the Year, the night as long.

In Matters of Religion it is hard to say whether they be Pagans, or Mahometans: some parts being wholly one, and some other, and some mixt of both: and yet these have not so prevailed as to extinguish Christianity; having many Churches amongst them, being converted by St. Andrew, and St. Philip, two of the Apostles.

But the old Religion of the Tartars, Scythians, Carthians, Asiaticans, Zagathians, with the rest of the Provinces in Tartary generally Worshiped the Sun, Moon, Stars, Fire, Earth and Water: to whom they offer the first Fruits of their Meat and Drink before they Eat and Drink themselves: they set their Idols at their Tent Doors to preserve their Cattle and Milk. They believe there is a God that made all things, but Pray not to him, nor Worship him: but in Praying to their Silky or Felt Idols (for of such materials they makethem) they lift up their Hands and smite their Teeth three times. They use to feed the Ghosts, or Spirits with Mares milk cast into the Air or poured on the Grounds: they have their Religious Votaries and Monasteries, amongst which there is an Order called *Senscin*, which Eat nothing but Bran steeped in hot Water. Their Priests on high Trees Preach to them, and after Sermon besprinkles the Auditors with Blood, Milk, Earth and Cow dung mixed together, and no less strange it is that they do not bury their dead, but hang them on Trees.

The Language is Tartarian, but intermixt with much of the Arabic and Turkish Tongues, and in Writing they use the Caldean and Arabian Characters.

The Inhabitants of Nova Zembla, are those which lie in the North parts of the World near the Pole; formerly known by no another name then *Terra Incognita*, because it extended Northwards to the Scythick or Frozen Ocean. The Men there are black haired, naturally beardless, and not to be discerned from Women, but that Women wear a long lock down to their Ears; clad from head to foot in Deer skins or Seal skins, with the hairy side out. These kind of People range about from place to place without any propriety of House or dwelling; the Leader of each company being their Priest whom they call *Popa*. They Worship the Sun as long as he is with them, and in his absence the Moon and North Star, to these they offer Yearly Sacrifices of Deer, which they burn all but the Head and Feet: they Sacrifice also for their Dead. And are all or most of their Priest given to Witchcraft, by whose Jugling delusions the People are much deceived.

The Scythians now a part, or Provincial People of Tartaria, are affirmed by most Writers to be the first Plantation of People which was made after the Flood; before the rest of the World was Peopled by the confusion of Languages. Their Countrey is that which is now known by the name of *Zagathai*: the Northern Limit being termed *Scythia intra Montem Imaum*, which extended to the Frozen Zone: the other part lying by the Borders of Persia, being under the Temperate Climate.

They had neither Images, Alters, nor Temples for any of their Gods except Mars, instead of whose Image they set up an old Iron Sword, to which they offer Yearly Sacrifice of Cattle and Horses, of Men every Hundred Captive, with whose Blood they sprinkled Mars his

Sword. They use no Vows, nor any other Ceremonies.

The **Cathatans**, another sort of People in *Tartaria*, whose Countrey called *Cathay*, is bounded on the East with *China*, on the West with the Mountain *Imaus*, on the North with *Altay*, and on the South with *India extra Gangem*: being 500 miles long, and 900 broad. They of old Worshiped the Sun, Moon, Stars, Fire, Earth and Water: but in these Days they have the *Mahometan* Religion countenanced amongst them; but so that they retain *Mose's* Law, observing many things therein commanded.

The several Terms used by the Heathen Gentiles in their Religion.

Deathemism, are such as Worship Animals for their Gods, as Dogs, Cats, or the first Creature that they saw in the Morning: or inanimate Creatures, as Sun, Moon, Stars, Trees and Stones.

Gentilism, the same.

Gods and Demy Gods, or Canonized Saints; are such as after their Deaths, their Names and Memories were highly Worshiped and Adored: whom the Gentiles held as Gods.

Idolatry, is Image Worshiping, or the adoring of any Creature above the Creator.

Archpriests, Chief Priests; such as our Archbishops.

Flamens, the inferior sort of Priests.

Stoves, or High places; places where they Worshiped the Host of Heaven, as Sun, Moon and Stars.

Temples, the places of their Prayers and Worship which were general very Large, Rich, and Sumptuous.

Oracles, answers given by the Gods, but were meer illusions of the Devil, who gave answers in Idols, to questions demanded of them. There were two principal places of Oracles, the one at *Ammon* in *Libia* from *Jupiter's* Image; the other at *Delphi* in *Beotia* from *Appollo's* Image, which were said to give Doubtful and Ambiguous Answers: these Oracles ceased at the coming of our Saviour.

Sacrifices, the offering and burning of several sorts of Beasts upon Altars to Idols, and unknown Gods.

VI. He beareth Verr, a **Hungarian**, or a **Dan** of **Hungary** in his proper **Countrey Habit**: or else if you will make a further description of him, say a **Hungarian** in his long Coat down to his Feet, gird about the middle, over which they wear another short Coat lined with Furr, having hanging Sleeves: on his head a round Cap turned up with the like Furr, & a sprig Feather in the Front holding an **halbert** or **Pole-Are** in his right hand, and his left by his Girdle, all proper.

This Countrey was of old termed **Pannonia**, the higher and the lower till by the Conquest of the *Huns* and *Avars*, a mixt People of the *Scythian* Nation, from whom it was called *Hungaria*, it lieth in the Northern Temperate Zone, between the middle Parallels of the 7 and 9 Climates, the longest day being about 16 hours long,

the People are strong, so that the Brand of a coward cannot be wiped off without the Death of an Adversary, after which they are privileged to wear a Feather, and by the number of their Feathers to shew how many Enemies they have slain in Battle.

The Language generally here spoken, is a kind of *Scythian*, differing only in Dialect from the *Poles*: and the parts adjoining to *Germany*, the *Dutch* is spoken.

The **Goths**, were a People dwelling on the North part of the *River Elbe* in *Hungary*, and were in the time of the Emperor *Valens*, forced to fly over the River, and supplies for new Habitations in a part of *Germany*, Ann 373, and in *Spain* where they were scarce warm in their new Estate, but they were sent by *Zeno* the Emperor into *Italy* against *Odoacer*, where they finally settled, after which we hear no more of the *Goths* in *Pannonia*.

The **Huns**, are a People of *Asia* in the *Fen* Countrey of *Palus Meotis* a poor and miserable People, till God thought fit to make use of them as a scourge to chastise the Christians of the West, then grown Luxurious by too much felicity: these People by following an Heart or Stag which they had in Chase, did shew them a safe passage into *Europe*, through the *Fens* which they thought to be unpassable, fell suddenly on the *Goths* forced them away, and so possessed the *Both Pannonians* by the slaughter of the *Romans* and *Pannonians* in two several Battles: till at length they were defeated by the *Spanish Goths*, after which we hear nothing of the *Huns* any where at all.

The **Longobards** a People Originally of *Scandia*, and so called from their **Long Bards**, the next invaded *Hungary* and a part of *Germany*, because of the scarcity of Victuals, and want of Habitations; first seized the Island *Rugia*, and the adjacent Countreys, then a part of *Germany*, then fell on a part of *Poland*, then on this of *Hungary*, where after 42 Years, went into *Italy*, and after the end of 206 Years they and their King were totally overthrown by *Charles* the Great the most Mighty Monarch of the West.

VII. He beareth Or, a **Polander**, or a **Polonian** in his **Countrey Habit** holding of a **Baston** or **Bastinado** with his right Hand, and his left on his side, all proper. The Men of *Poland*, I mean of the commonalty, do wear **Shooes**, **Stokins**, **Breeches**, over which is a long Coat extending to the middle of the Leg, open down before, turned down at the Neck, like a square band; buttoned on the Breast, and gird about the middle with a Shash, or Towel, Fringed at the ends: the said Coat is shorter before then behind, and hath hanging Sleeves behind: on their Heads they wear Caps which are turned up, on which the greater sort place Jewels, and Feathers, they generally cut the hair of their Heads all off, or very short; but have Basket hilt beards and long Whiskers, or Murchadoes. The better sort of them as said before, have an over Coat, which hath half Sleeves reaching to the Elbow, and hanging Sleeves behind, which with the Coat fall as low as the Feet; this is worn loose, not gird, though it be adorned all to the bottom, and lides with buttons and loops. The Nobility have the upper Coat like a Robe, with a side Cape or turning down to the middle of the Back, and two long Sleeves hanging from under it.

The

Their Women are said to be **Proud** in their Garb, **Coarse** in their Apparel, **Impatient** in their Humors, and **Delicate** in their Diet. Their Countrey is situate under the 8 and 12 Climates, so that they are in the like temperature to us in *England*.

In old time they worshipped the Sun as their chief God, also the Fire, which they continually maintained by Fires set apart for that purpose: they also adored the **Phœnix**, and every thing they first met with in the Morning, observing the same Heathenish customs in their Marriages, and Burial, to other Idolatrous Nations: for burned the Bodies of their chief Friends with their Horse Furniture and best Cloaths, and withal set down Viduals by their Graves, believing that the departed Souls in the Night time did Eat and Drink there. They held that Marriage was not rightly Consecrated, except it were by striking of Fire with a Flint.

But when Christianity was planted therein, then their Groves were cut down, and at this time most of the Provinces were Governed by Archbishops and Bishops according to the Church of *Rome*, though over spread with new Sects, as *Lutherans*, *Calvinists*, *Socinians*, and *Anabaptists*, &c. Yet amongst all these different Churches and forms of Government, yet there is this Conformity, that when soever the Gospel is read openly in the Congregation, the Nobility and Gentry use to draw their Swords (according to an ancient custome which they had amongst them) signifying their readiness to defend it against all opposers; which reason doubtless gave beginning to the standing up at the Creed and Gospel in the Primitive times, retained still in the Protestant Churches: though some of late hold it for a reliet of Popery, and therefore with greater Nicety than Wisdom, refuse to do it.

They speak generally the *Sclavonian* Language, *Livonia* or *Leiland* being by them Conquered; and so general took their Tongue.

VIII. He beareth Argent, a **Turk** or **Turky-Man** in his Countrey **Armed**, advancing a **Fauchion** above his Head, proper. The usual Habit of the *Turks*, is upon the Head to have a Turban, or Cloath rowled round: a short Coat to the Knees, over which is worn a long Coat to the Heels, with short or half Sleeves, and gird about the middle with a Towel, or a Scarf Fringed at the ends: but the Nobler sort have their said Coat Laced, or Richly Embrauthered, with their Simmiers or Fauchions hanging by their sides.

Turks and *Sarazens* have their greatest part of the Empire lying under the Tropick Line of *Cancer*, and therefore in the *Torrid Zone*.

Their Religion is **Mahometism**, and the Book called the **Alcoran** is divided into 124 Chapters: their Law is composed in eight Commandments. The first, is to acknowledge only one God and one Prophet to wit *Mahomet*. The second, is concerning the Duty of Children to Parents. The third, is of Love of Neighbours to each other. The fourth, is for the time of Prayer in their Temples. The fifth, is of their Yearly fast of *Lent*, which

[]

is carefully to be kept for a Month of thirty Days. The sixth, is of their Charity, and Alms Deeds to the Poor and Indigent. The seventh, is of their Matrimony which every Man is bound to embrace at five and twenty years of age. The eighth, is against Murther.

To the observers of these commands is promised **Paradize**, in which is Golden Carpets, pleasant Rivers, fruitful Trees, beautiful Women, Musick, good Cheer, and choice Wives, store of Gold and Silver Plate, with Precious Stones, and such like concepts. But to such as shall not obey this Law, Hell is prepared with seven Gates, in which they shall Eat and Drink Fire, shall be bound in Chains, and Tormented with Scalding Waters.

The **Alcoran** prescrib divers other Moral and Judicial precepts, as abstinence from Swines Flesh, Blood, and such as die alone: also from Adultery, false Witness, and to avoid Covetousness, Usury, Oppression, Lying, casual Murther, Disputing about the **Alcoran** or doubting thereof. Also of Prayer, Alms, Washing, Fasting, and Pilgrimage: he urgeth also Repentance, forbiddeth Swearing, will not have Men forced to Religion: yet no Mercy or Pardon to be shewed to Enemies. He urgeth Valour in Battle, promising rewards to the Courageous: and shewing that none can die till his time come, and then there is no avoiding thereof.

They hold it unlawful to Drink Wine, Play at Chefs, Cards, Dice, Tables, or such like recreations; and that to have Images in Churches is Idolatry. They believe that all who die in their Warrs go immediately to **Paradize**, which makes them Fight with such cheerfulness: they say that all who live good lives shall be saved, what Religion soever they Profess; therefore they affirm that *Moses*, *Christ*, and *Mahomet* shall in the resurrection appear with three Banners, to which all these three Professions shall make their repair. They say that the Angel *Israhil* shall in the last day sound his Trumpet, at which all living Creatures shall die, and the Earth shall fall into dust and sand: and that at his second sound all shall revive and rise again; then shall the Angel *Michael* weigh all Mens Souls in a pair of scales. They say that a Terrible Dragon is in the Mouth of Hell, and that there is an Iron Bridge over which the wicked are conveyed, some into everlasting Fire, some into the Fire of Purgatory.

They hold that the Sun at his rising, and the Moon at her first appearing should be revered: that it is unlawful to go into their Temples except they be washed from Head to Foot; and if after washing he piss, or go to stool, or break Wind upwards or downwards, he must wash again, or else he offends God. Such Honor they give to the **Alcoran** (which they in their Language call **Mulaphi**) that none must touch it with bare Hands, but must wrap them in clean Linnen; when in their Temples it is publicly read, the Reader may not hold it lower then his girdle, and when he hath done he kisseth it, and layeth it to his Eyes.

Their Religious Orders.

The Order of the Religious Brothers of Love, called the **Imatier**; have for their Habit a long Coat

of

of a Violet colour, without Seam, gird about with a Golden Girdle, at which hangs Silver Cimbals, which makes a jangling sound; they walk with a Book in their Hand containing Love Songs and Sonnets, for the Singing whereof they have Money given them; they are always bare Headed, wearing long Hair, Curled. These are wicked and irreligious, and worse than Beasts in their lusts, sparing neither Women nor Boys.

The Order of **Calender**, they Profess perpetual Virginity, and have their own Temples and Chappels: they wear a short Coat made of Wool and Horse hair, without Sleeves, they cut their Hair short, and wear Felt-Hats, from which hangs tufts of Horse Hair about a hand breadth: they have Iron Rings in their Ears, about their Necks and Arms; they wear also in their Yard a Ring of Iron or Silver of three pound weight, whereby they are forced to live chastly: they go about reading certain Rimes and Ballads.

The Order of **Derwishes**, these go about begging Alms in the name of *Haly*, Son in Law to their God *Mahomet*. They wear two Sheepskins dried up in the Sun, the one they hang on their Back, the other on their Breast: the rest of the Body is naked, go bare headed, and burn their Temples with an hot Iron, in their Ears they wear Rings with precious stones. They Eat of a certain Herb called *Afferad* or *Battlach*, which makes them mad, then they cut and slash their flesh: the madder they are the more they are Reverenced. They have a general meeting of this Order once a Year to the number of Eight or Ten Thousand, whose Superior called *Assambala* is President, after their Devotions are ended, they make themselves drunk with *Afferad* instead of Wine, then fall a dancing about a Fire singing Ballads, and cutting themselves: this Feast holds seven Days, which ended with Banners displaid, and Drums beating, they depart all to their several Convents, begging Alms all the way they March.

The Order of **Corlachs**, are cloathed like the foresaid, but they wear also a Bears skin instead of a Cloak, go bare headed and shaven; they anoint their Heads with Oyl against cold, and burn their Temples against defluxions: they bear in their Hands a knotty Club, they are desperat Assassins, will Rob, Steal and Murder, when they find occasion; for their Life is beastly and beggarly, living in ignorance and idleness; they are begging in every corner, they profess Palmestry like our wandering *Gipsies*. They carry about with them an old Man whom they Worship as a Prophet, and when they would get Money from any Rich Man, they repair to that House, and the old Man there Prophesieth sudden Destruction against that House, which to prevent the Master desireth the old Mans Prayers, and so dismisseth him to his Train with Money, which they spend wickedly.

There are many more Orders amongst them, but these are the most noted: for some Orders go naked except their Privities, seeming no ways moved with Summer heat or Winter cold, and can endure the cutting and slashing of their Flesh, to have their Patience the more admired: Some are admired for their obstinacie Eating and Drinking seldom: some Profess Poverty and will enjoy no Earthly thing: others again Profess perpetual

Silence, and will not speak though urged with Injuries and Tortures: some avoid all Conversation with Men: others Brag of Revelations, Visions, Dreams, and other Enthusiasms: some wear Feathers on their Head to shew they are given to Contemplation: some have Rings in their Ears to note their Subjection and obedience in harkning to Spiritual Revelations: some bear Chains about their Necks and Arms to shew they are bound up from the World: with many such like Hypocritical Orders which they have amongst them, of whom you may read more in *Ross his view of all Religions*, page 168. 169. &c.

Their Secular Priests.

In their Priesthood, they have Eight Orders or Degrees: the first is their **Mophti**, or their **Pope**, on whose judgment all depend, even the Great **Turk** himself, both in Spiritual and Secular Affairs.

The next is the **Caldelescher**, who under the **Mophti** is Judge of all causes, both in Civil and Ecclesiastical.

The **Cadi**, whose Office it is to teach the People.

The **Hodecis**, who have the charge of Hospitals.

The **Antiphi**, who publickly reads the Heads of the *Mahometan* Superstitions, holding a naked Sword in one Hand, and a Semiter in the other.

The **Imam**, who in their Temples have charge of their Ceremonies.

The **Beizin**, who on their Towers Sing, and call the People to Prayer.

The **Sopht**, who are the Singing Men in their Temples: the higher Orders are chosen by the *Grand Seigneur*; the inferior by the People who have a small pension from the *Turk*, which being insufficient to maintain them, they are forced to Work, and use Trades. There is required no more Learning in them, but to read the *Alcoran* in *Arabian*: for they will not have it Translated. To strike any of these is the loss of a Hand in a *Turk*, but of Life in a Christian, in such esteem they have their Priests.

Their Devotion consists chiefly in their Multitudes of **Mosques**, or **Temples**; in their Hospitals both for Poor and Strangers; in their Monasteries and Schools: in their Washings, either all their Bodies, or their Private parts, or their Hands, Face, and Feet: in their Sacrifices, which is only to cut the Beast in pieces and give one part to the Priest, another part to the Poor, and a third part they take themselves: in the Adorning their Temples with multitude of Lamps burning with Oyl, and Writing on the Walls: in Praying five times a Day, and on Friday which is their Sabbath, because *Mahomet*'s Birth day; and in diverse ridiculous Ceremonies used by the Priests, as pulling of Shoes when they enter the Temple; in stretching out the Hands and closing them, in kissing the Ground, lifting up the Head, Praying towards the South, in observing a Lenten Fast, in Pilgrimage, and Circumcising of their Children, in Feasting at the Graves of the Dead, and in other vain Ceremonies.

Calismans and **Derwishes**, are other inferior sorts of Priests among them.

B. a Demy Turk his Turbut wreathed O. and G. Vest of the third, turned up about his Neck of the second, his left Hand on his side, and in his right a Golden Branch. By the name of *Haydenbucher*.

Out of a Coronet between two Wings S. a Demy Turk to the Sinister, his right Hand on his side, and Brandishing his Simmiter aloft (or holding it over his Head) proper, Cloathed G. Born by the name of *Thumshorn*.

O. a Turk to the Sinister, the left Hand held up, and the right on his side G. By the name of *Westermare*.

IX. He beareth Argent, a Jew, or an Hebrew Man in the Habit of his Country of *Juda* in the Land of *Israel*, proper. On their Heads they wear a Cap made of Cloath, with Ears hanging down to the Shoulders of the same: their Top Vestments was a loose Coat or Gown, with a Cape or with a side turning down about the Shoulders, and hanging Sleeves backwards: under which they had a Coat reaching side down, even to the Feet; Girded about the middle with a Sash or Camel.

The Land of *Palestine*, the Country in which the *Jews* dwell; so named from the *Philistines* a Potent Nation in those parts, and so it is termed by the *Greeks* and *Romans*. But according to Scripture Phrase, it is called the Land *Canaan*, *Gen. 12. 5.* and *Zeph. 2. 5.* being first People by *Canaan* the Son of *Cham*: also the Land of *Promise*, because Promised to *Abraham* and his Seed, *Gen. 17. 8.* also the Land of *Israel* from the *Israelites* the Sons of *Jacob* whose Surname was *Israel*: Also it was stiled *Judea* and *Jewry*, from the *Jews* a People from the Tribe of *Judah*. And in the last place termed the *Holy Land*, because the Subject of a great part of Holy Writ, and that the Work of our Redemption was therein accomplished by our Lord and Saviour.

This Country is situate between the 3 and 4 Climats the longest Day not exceeding 14 hours and an half long: the Land 200 Miles long, and 80 broad.

For the Religion used amongst them, they were not known to have any settled Order and Government, more then *Moses Law* for Sacrifices, the Ark, and Tabernacle, with some other Divine, and Moral Precepts, all the time of *David* and *Solomon*: in whose time were chief and inferiour Priests, appointed for the Work and Service of the Tabernacle and the Temple; *Levites* ordered to bear the Ark, Singers and other Musicians, to Sing Praises to the God of Heaven, who Liveth for ever and ever.

The Religion of the *Jews* was made known unto them by God himself by delivering the Law by his own Mouth on Mount *Sinai*: sometimes he revealed things to them by Visions and Dreams; sometime by secret Inspiration; sometime by a Voice from Heaven; sometimes by *Urim* and *Thummim*, that is Light and Perfection, which proceeded from the Precious Stones on the Breast-Plate of the High Priest; but ordinarily he taught them by his Word, either Written by his Holy Pen - Men the Prophets: or unwritten, namely by Tradition; for God de-

livered his Will, and thus Instructed *Moses*, and he *Josuah*, who imparted it to the Elders and they to the Prophets, from the Prophets the great Synagogue received these Traditions, till at last they were committed to writing for the Benefit of the *Jews* in *Judea*; which they called the *Chalmud of Jerusalem*: but 500 Years after Christ, the *Jews* of *Babylon* made more exact Collection, and this they called the *Chalmud of Babylon*, which contains all their common and civil Laws, and is with them of no less authority then the Scripture. It is divided into six parts, 60 Books, and 532 Chapters.

Their Temples and Synagogues.

The outward Splendor of their Religion consisted in the Wealth and Magnificence of their Temple, which for the Beauty, Riches and Greatness thereof was one of the Wonders of the World; for besides the abundance of Iron Work, there was in it an incredible quantity of Brass, Silver and Gold Materials. For the whole House was overlaid with Gold, and the very Floor also: besides the Altar, the Table of Show-Bread, the Candlesticks with the Flwers, Lamps and Tongs, with the Bowls, Snuffers, Basons, Spoons, Censers and Hinges, all of pure Gold. 1. *King. 6. 20.* &c. As for Silver *Josephus* tells us, *lib. 8. & 9.* that there was in the Temple Ten Thousand Candlesticks whereof most were of Silver, Wine Tankards Eighty Thousand, Silver Phials Ten Thousand, Ten Hundred Thousand Silver Trumpets, Forty Thousand Snuffers or Pot Hooks, besides an Incredible number of Silver Plates and Dishes, Silver Tables and Doors of Silver. And for Brasses we find that these things were made of it, viz. the Great Altar, the Molten Sea or Caldron, the Basis, the Pillars before the Temple, the twelve Oxen, the ten Lavers, the Pots, the Shovels, the Basons, and other Utensils of the Temple: besides the Rich Woods, and Precious Stones therein, of which I need not to speak.

The Contriver of the Fabrick was God himself: the form was four square, the Courts before it were four, one for the Gentiles, in which our Saviour was conversant. It was called *Solomons Porch*, out of which he Whipped the Buyers and Sellers, accounting that a part of his Fathers House of Prayer.

The second was for the *Israelites*, into which the Gentiles might not enter, for that was counted a Prophannation of the Temple. The third was for *Women*: and the fourth Court was for the Priests, where stood the Altar of Burnt Offerings, and the Brazen Sea with several other Utensils for the uses of Sacrifices. And in the fourth place was the Sanctuary or Holy place which had no Windows, but therein burned Lights perpetually: behind which was the *Sanctum Sanctorum* the Oracle or most Holy place, because God from thence delivered his Oracles, it had no Light or Windows in it at all: into it the High Priest only had access, and that but once a Year, where he burnt Incense, so that he could neither see, nor be seen: in it stood the Ark, the Cherubims, the Censer: it was Death for any that entred there, even for the High Priest himself, if above once in a Year.

The

The **Temple** was to the *Jews* as their Chathedral or Metropolitan Church; their Synagogues did resemble our Parish Churches: in which the Scribes taught as the Priests in the Temple, and as there was an High Priest for the Temple, so there was a chief Ruler for the Synagogue. in them they had their distinct Courts, and an Ark for the Book of the Law and the same Holiness ascribed to them: But yet they could Sacrifice now here, but in the Temple upon the Brazen Alter in the Priests Court.

The Orders, or Officers in their Religion.

The **Inferiour Offices** in their Church, were such as they found yearly, or continued upon good behaviour which were these. The Office of looking to the Lamps and lighting of Candles; secondly, the office of furnishing the Consecrated Wine, which is spent in their Sabbaths, and other Festivals; thirdly, the Office of folding and unfolding the Book of the Law; fourthly, of lifting up, and carrying about the said Book, which if he did stumble that carried it, that was held very ominous; fifthly, of touching the Sacred Staves on which the Book or Parchment is rowled, young Men are greedy of this office, because they think the touching of these Staves will prolong their lives; sixthly, the office of Reading the Law, for when the **Præcentor** brings the Book out of the Ark into the Pulpit, then they sing these Words, *numb. 10. 35. Let God arise, and let his Enemies be scattered:* and after some Anthems are sung, he who hath bought the office comes between the Chalan or chief Singer and him that bought the Office of carrying the Book, and kisseth the cloaths in which it is wrapt, then readeth a Chapter, and kisseth it again, with a Blessing of God for giving them the true Law. Then it is elevated on high, the whole Congregation shouting, this is the Law that *Moses* gave to *Israel*: so when the Book is wrapped up again both young and old kiss it, and while it is carried back to the Ark or Chest, they all Sing again, *numb. 10. 36. Return Lord to the many Thousands of Israel.*

Mr. *Goodwin* observeth that among the *Jews* Titles, the Word **Rabbi** sounded as Doctor, or Master; **Calamud** a Disciple, in respect he was Learning; and **Katan** a Junior in respect of Minority: and being admitted into Degrees by imposition of Hands, were made *Graduates*, *Priests*, *Levites*, and *Nethinims*: being parallel with *Ministers*, *Deacons*, and *Sub-Deacons*.

The **Levites Office**, was to help the Priests in their killing and ordering the Sacrifices: also to help them in gathering their Tythes, some did carry Water and Wood for the Service of the Tabernacle: to pitch and take it down while it was Moveable. But in *David's* time some were Judges, some Treasurers, some Singers, and some Porters, *1. Chro. 23. 4, 5, 6.* they were distinguished according to the three Sons of *Levi* viz. **Gershonites**, **Cohathites**, and **Merarites**: again, as **Singers** and **Porters**, they were divided into 24 Orders: under them were the **Gibeonites** and the **Nethinims**, whose Office was to draw Water, and hew Wood for the House of God.

The **Priests Office**, was to kill and slay the Sacrifice but of this I have spoken before *chap. 4. numb. 9.* to which I shall send you back, rather then make a double relation.

[]

The **Prophets** were not only such Men to whom God revealed his purposes in an extraordinary way: but were those also that expounded the Scripture; they were also called **Fathers, Doctors of the Law, Rabbies** from their great Knowledge, **Disputers, Wise Men**; their Schollars were called, **Children and Sons of the Prophets**.

The **Scribes** were Scriveners and publick Notaries: these were called **Scribes of the People**, *Mat. 23. 2.* some of which were Expounders of the Law, such a Scribe was *Esd. 7. 6.* they were also called **Doctors of the Law**.

The **Pharisees or Separatists**, so termed from their separating themselves from the rest of the People, to a strict kind of Life, and to the study of the Law, having no commerce with other People, nor communicating with them in Dyer, Apparel or Customs: they held a fatal necessity of Actions and things, and a Transmigration of Souls from one Body to another; they preferred Traditions before the written Words of the Law; and placed most of the their Holiness in washing; counting it a less Sin to commit Fornication, then to Eat with unwashed Hands. They were noted for holding it unlawful to eat with Sinners, *Mat. 9. 11.* for their Superstitious washing of Cups, Pots, Brazen Vessels and Tables, *Mar. 7. 4.* for Fasting twice in a Week, *Luke 18. 12.* and for their broad Phylacteries, *Mat. 23. 5.* which were Scrollws of Parchment wherein the Law was Written, which they wore on their Foreheads and left Arms, by which they kept the Law in their Memory: they were noted also for their large Borders and Fringes, *Mat 23. 5.* in which they used sharp Thorns, that by the pricking thereof they might be put in mind of the Commandments.

The **Nazarites** were Votaries, such as had vowed Temperance and Sobriety: for they seperated themselves from Wine and strong Drink, from coming near the Dead, and from the Razor. Some were *Nazarites* for their Lives, as *Sampson, John Baptist, &c.* others only for a time, viz. 30 Days as *Abfalon* who cut his Hair the thirtieth day of his Vow, and such another was *Paul*, *Act. 21. 24.* they kept themselves Pure, Holy, and sepearate from sinners. Those Hereticks were also called **Nazarites** who taught that the Law should be joynted to the Gospel.

The **Rachabites** so called from their Father *Rechab*, we read *Jere. 35. 2, 3, 4 &c.* These from a Commandment of their Father throughout their Generations neither Drink Wine, nor Sowed Seed, nor Built Houses, nor Planted Vineyards, but like Strangers lived all their days in Tents.

The **Essenes or Esseni**, so called from *Alfa*, which signifieth to do: because they Laboured with their Hands, or else from *Alfa*, to cure Diseases, being much given to the study of Physick: they ascribed all things to fate, and Sacrificed nothing but inanimal things, shunning Oaths, Pleasures, Wine and Marriage (though some did Marry for Procreation) their Apparel was mean, their Garments was white, and they had all things in common amongst them: they Worshipped towards the East, kept the Sabbath more strictly then others, and observed seven Penit-casts every Year, viz. every seven Weeks one; they were Silent at Meat: none were admitted into their Society without four Years approbation. It is thought *S. Paul* alludeth to their Tenets, when he adviseth *Tim-*

thy

to make use of Wine, 1. Tim. 5. 23. and Glanceth upon those that Prohibit Marriage, 1. Tim. 4. 3. and condemned others in the use of Meat and Drink, Col. 2. 16.

The **Sadducees** were so called from *Izedek* Justice, because they would be accounted the only Just Men in the World: or from *Sadock* the Author of this Sect. The occasion of this did arise from a mistake of *Antigonus* by his Scholar *Sadock*; who teaching that we ought not to serve God, as Servants for the hope of reward, but as Sons that love him, from whence they conceive that there was no reward for a godly Life; these were in a short time grown to that height that they denied all Traditions and Scriptures, except the five Books of *Moses*, denied the Resurrection, pains, or rewards after this Life, Angels or Spirits; also Fate and Destiny, ascribing all to Mans free will: and that the Soul died and perished with the Body. These were the most Capital of their Errours as appeareth, *Act. 23. 6. Mat. 22. 3. Luk. 20. 20. 27. &c.*

The **Samaritans** were a sort of People that lived in *Samaria*, which were neither Jews nor Gentiles in Religion, but had a mixture of both, for they entertained the five Books of *Moses*, by whom they came to know the God of the Land: yet they did not so embrace him, but they retained and adhered to the Gods of the Nations where before they dwelt, as *Nergal, Asirvab, Nibran, Turtak*, and the rest of that rabble mentioned in the 2. Kin. 17. 24. 25. &c. for it is testified of them that they feared the Lord, because of the Lions which slew them, but served their Gods after the manner of the Nations. Beside the wicked policy of *Jeroboam* the Son of *Nebat* was so natural to them, that they would not suffer their People to go up to *Jerusalem* to Worship, but set up the Golden Calves, and ordained Priests amongst themselves thereby to divert the People from the Temple of God. They were so conceited on their own perfection, that they thought themselves defiled if in any company, but their own Sect: on the other side they so abhorred the Jews, and the Jews them, that they would not Eat and Drink together, nor have any commerce or dealing as appears, *Joh. 4. 9.* They held that there was no Scripture, but the Pentateuch or five Books of *Moses*, admit of no Traditions: they deny a Resurrection and Life Eternal, acknowledge Angels and Spirits, they Worship only on Mount *Garizim* in the Temple there.

The **Dositheans** so called from *Dositheus* or *Dosithai* supposed to be the first Priest sent to *Samaria* by the King of *Assyria*, 2. Kin. 17. 27. these agree with the Jews in Circumcision and the Sabbath and the Doctrine of the Resurrection; but they reject the Writings of all the Prophets as not inspired by the Holy Ghost: they Eat of nothing that had Life, abstain from Marriage, and in point of Sabbath keeping, outwent the Pharisees: It being resolved among them that in what posture soever a Man was found on the Sabbath day Morning, in the same he was to continue without alteration the whole day after.

The **Sebvians**, so called from one of the Company of *Dosithai* named *Sebviah*: this Sect kept all the publick Feasts as the Jews and Samaritans, but not at the same time: for they transferred the Passover to *August*, the Pentecost to *Autum*, and the Feast of Tabernacles to the time of the Passover: not suffering for that cause to Worship in the Temple of *Garizim*.

[]

The **Herodians** held that *Herod* was Christ, whose birth day was carefully observed by them of the *Herodian* Sect. It cannot properly be termed a Sect in Religion, but an opposite faction in the Civil State: being such as solicited the paying of Tribute to *Herod*, thereby endeavouring his greatness, then the prosperity and liberty of their Native Countrey.

The **Gaulonites** were opposite to the *Herodians*, *Act. 5. 37.* for one *Judas* a *Gaulonite* or *Galilean* with other Jews of his confederacy denied all Tribute, telling the People it was a token of servitude, and that they ought to know no Lord, but the Lord of Heaven; drawing them on this ground to an open War, in which he and his adherents perished, and were brought to nothing. These *Galileans* were those poor Men, whose Blood *Pilat* is said to have mingled with their Sacrifices, *Luk. 13. 1.*

The Maintenance of the Priests, and Levites.

Besides certain Cities and shares in their Sacrifices and Oblations, they allowed them the first Fruits and Tithes: the first Fruit of the threshing Floor comprehending the first Fruit in the Sheaf in the Passover, and the first Fruit of Loaves at Pentecost, beside the first of the Dough, as *Numb. 15. 20. Nebe. 10. 37. Rom. 11. 10* when they brought their first Fruit up to *Jerusalem* they had a Pipe playing before them, and a Bull with gilded Horns, and a Garland of Olive branches on his Head. As for their Tithes the Husbandman as some have reckoned, that out of 6000 Bushels in one Year paid for his first and second Tyth and first Fruits 1121 Bushels, which is above a sixth part of the whole, besides the Tithe of their Cattle, and Fruit of their Trees: also the firstlings of Man, and Beast that were unclean which were redeemed with Money, viz. five Shekels of the Sanctuary: and the firstlings of clean Beasts were Sacrificed, the fat whereof was burnt, but the flesh was given to the Priests. And so strict were the Pharisees in payment of these Tithes, that they Tithed Mint, Anise, and Cumin, *Mat. 23. 23.*

From these Tithes paid to the Levites, was paid a Tithe out of them to the Priests. In the Year of Tithes which was every third Year, the Husbandman spent the second Tithe at home upon the Poor, and not sent to *Jerusalem* to the Levites, *Deut. 26. 12.* and though at this day the Jews have no Lands, yet they pay carefully the tenth of their increase.

Of their Sabbath and other Festivals.

Every **Seventh Day** as a day of rest from all their Labours they kept Holy to the Lord; theirs being the day before the Christians, and answers to our Saturday the day before was the preparation of the Sabbath which begun about the sixth hour, that is our twelfth at noon: that day they might not travel about twelve miles least by coming home too late they might want time of preparation,

E c

ration,

ration which began at six in the Evening, and for its Excellency was called the **Queen of Feasts**, on which day they must not travel about 2000 paces or cubits, for so far was the distance of the Ark from the Camp.

They were so Superstitious in the keeping of their Sabbath, that they would not fight that day, and so suffered *Jerusalem* to be taken twice: and to shew their Zeal for that day, they would keep some more hours then were enjoyned, which addition they called **Sabbathulum**. They proclaimed the preparation of the Sabbath by sound of Trumpet: at which time they would dress no Meat, but what was prepared before that they would Eat.

Beside the seventh day which was the Sabbath or rest for Men and Beasts; they had every seventh Year a Sabbath, wherein the Ground rested from Tillage, so that all Vinyards, Orchards and what came out of the ground it fell without Husbandry was all given to the Poor of the People, *Levi. 25. 3, 4, 5. &c.*

The Jubile or great Sabbath, they kept in the end of seven times seven Sabbaths, which was every fifty Year. In which Debtors, Prisoners, bound Servants, and Mortgagers of Lands were made free, and every Man returned into his Possessions. This was proclaimed by sound of Trumpet throughout the Land, it was an hallowed Year, and kept Holy by them, for in it they did neither Sow, nor Reap that which grew of it self, neither gather the Grapes that were left unlaboured, *Levi. 25. 9, 10, 11. &c.*

The **Passover** was a Feast kept in Memory of the *Israelites* freedom from *Aegypt*s bondage, they Eat the first Passover standing with their Loyns girt, Shooes on their Feet, and Staves in their Hands, to shew they were in hast to be gone; but in after times when they were secured and out of danger, they did eat sitting or leaning after the *Roman* manner; which posture our Saviour observed when he Eat it, *Mat. 26. 20.* When the Passover fell upon a Sabbath (for it was ever Celebrated on the fourteenth of the Month *Nisan*, or first Month at Evening: which answereth to our part of March and part of April, *Exod. 12. 2, 3. &c.*) then it was called the **Great Sabbath**, and then there was a preparation for the Passover, *Joh. 19. 14.* otherwise there was none due to it but in respect of the Sabbath. The Beast to be eaten was a Lamb or Kid of an year old, and without blemish it must be Roasted whole, a bone of it was not to be broken, and to be eaten in the Evening with sower Herbs, and unleavened Bread. The Blood of the Lamb was sprinkled on the Door posts and the Thresholds thereof, and what remained of the Lamb was burnt next Morning. This was also called the **Feast of unleavened Bread**, and continued for seven days, albeit the Passover was only the first day on which they held an Holy Assembly, and the last day: all the others they did no Work or Servile Labour, save about that which every Man must Eat, *Exod. 12. 16.*

The **Feast of Pentecost**, was kept in memory of the Law given 50 days after the Passover; the first Sabbath after the second day of the Passover, is called the second first Sabbath, as *Luke 16. 1.* and because their Harvest begun at *Easter*, and ended at *Pentecost*, they were commanded to celebrate a Feast, *Levit. 23. 10.* by offering a Sheaf of the first Fruits of their Harvest upon the morrow or second day of their great Feast; and on

Pentecost to offer two wave Loaves, in token of Thankfulness; in the old Law it was called the Feast of Harvest, and the Feast of First Fruits, *Exod. 23. 16.*

The **Feast of Tabernacles** was kept in memory of the *Israelites* abode in the Wilderness 40 years in Tents; it is also called the **Feast of Booths**, because seven days they celebrated the same living in Booths, and in the open Air, except in time of Rain; it was kept the fifteenth day of *Tisri*, or the seventh month, which answers to part of *September* and *October*: The first and last days were the chief days, especially the last, called therefore the great day of the Feast, *Joh. 7. 37.* and in these long Feasts, the first and the last are called Sabbaths; in this Feast their Custom was to hold in their Hands Branches of Trees which they called *Hosanna*; during the Feast many Bullocks were offered: On the last day they read the last Section of the Law and began the first; the next day after they compassed the Altar seven times with Palms in their hands, in memory of encompassing *Jericho*. This Feast was kept as a Thanksgiving to God for their Vintage.

The **Feast of New Moon**; that is, every New Moon was a Festival among the Jews, in which as on the Sabbath, the people repair to the Prophets for Instruction, *2 Kings 4. 13.* on which day it was not lawful to Buy or Sell, *Amos 8. 4, 5.*

The **Feast of Trumpets**, was a Feast Celebrated in the first New Moon in the Month *Tisri*, or seventh month according to the Ecclesiastical account, but the first Month in their civil Computation. Now though other Feasts had the sound of Trumpets, yet at this there was more, *viz.* all the day, and was for the solemnity of the New year, from whence they reckoned their Sabbathical years and Jubilees, and dated all their Deeds and Bargains. As this Feast was a solemn Promulgation of the New Year, so it was a preparation for three ensuing Feasts in that Month. Of the Sacrifices to be Offered in the New Moons, read *Numb. 28. 11.* as for those words of *David*, *Blow the Trumpet in the New Moon*, *Psal. 81. 3.* they are most likely to be meant of the first New Moon or Feast of Trumpets.

The **Feast of Expiation**, it was kept the tenth day of the foresaid Month; and was so called because the High Priest then entered into the Oracle or Holy of Holies, to expiate his own and his Peoples Sins; for himself he took a young Bullock and a Ram; for the People a Ram for a Burnt Offering, and two He-Goats for a Sin Offering; the two Goats were presented at the Door of the Tabernacle, from whence one was sent into the Wilderness (which was called the Scape-Goat) upon whose Head the Priest laid all the Sins and Evils of the People, to be carried away by the Goat into the Wilderness, *viz.* the Land of Oblivion, the other Goat was Sacrificed. On this day was their great Feast, *Ab. 8. 9.* wherein they obtained from all kind of work or delights, so that they might not kindle a Fire, or dress Meat.

The **Feast of Reconciliation**, is performed ten days, in which they Fast and Pray; on the Ninth, every Man young and old takes a Cock, and Women kind a Hen, and after some impertinent Sentences out of Scripture, each one whistles the Cock about the Priests head, saying, *This Cock shall die for me, his Throat is cut,*

cut, and roasted, and the Guts are cast upon the top of the House, that the Ravens may carry them away, and their Sins together. After this they go to Church and Confess their Sins, and give to the Poor the price of their Cocks, because of old they used to give the Cocks to the Poor: In the Evening they meet and reconcile themselves where any Offence hath been: If the party wronged be dead, he that did the wrong goeth to his Grave, and before 10 Witnesses confesseth his fault; and according to his demerit, while he is Confessing and beating his Breast, he receiveth by his fellow 39 Stripes on his Back, or less (never more) with a Leather Thong; having done, they return home and make merry with their roasted Cocks and Hens. Over their Cloaths they put on a white Shirt or Surplice, to shew they now are white and pure from Sin.

But that which seems most ridiculous is, that on the 9th day the Men in the Synagogues, and the Women at home, about Evening, Light Wax Candles, over which they Pray, stretching out their Hands towards the Lights, which if they Burn clear, they take it for a good sign that their Sins are pardoned, and that they shall be happy; but if the Lights be dim, or the Wax melt, it is ominous; then they fast, go bare-footed, abstain from Oyl, Bathing, and Carnal Copulation, spending most of the Night in Singing and Prayer: When the Priest extendeth his Hands to Bless them, they all lay their Hands on their Faces, as not daring to look on those sanctified Hands of the Priest.

The **Feast of Dedication**, it was kept eight days together, in memory of the Consecration of the Temple by *Judas Macchabeus*, after it had been polluted by the *Grecians*, 1 *Mac.* 4. 36. 56. at that first Dedication was found a small Vessel of Consecrated Oyl, which of it self could not hold out above one Night, but by Miracle it maintained the Lights the whole eight days; it was yearly kept on the 25 of *November*. Christ honoured this Feast with his presence, *John* 10. 22. not to countenance the abuses thereof, but the Institution it self; for all places set apart for the Service of God, ought to be Consecrated and Dedicated to him by Prayer and decent Ceremonies. and so we read *Moses* Dedicated the Tabernacle and the Altar, *Numb.* 7. 84. and *Solomon* the Temple and Altar with great Solemnity and Prayer, 2 *Chron.* 5. 7, 8, 9. when the Temple was rebuilt after the Captivity of *Babylon*, it was Dedicated again, *Ezra* 6. 16. 17.

The **Feast of Purim**, or of **Lots**. This Feast was kept the 30 day of the 12 Month, which is *Adar* or *February*; it was in memory of the great deliverance the Jews had from the Treacherous Conspiracy of wicked *Haman*, for he had appointed the Jews to be Massacred all in one day through the *Persian* Kingdom, but the Plotters were slain themselves by the Jews, as may be read at large in the Book of *Esther*, 9. 1. 2. &c. therefore they kept this Feast two days, in Singing, Playing, Eating and Drinking, in which the Men wear Women's Apparel, and the Women Mens. In their Synagogues they set up Lights in the Night time, and the whole Book of *Esther* is read, and as often as they hear the name of *Haman*, they make a cruel noise and stamping with their feet; and that the Poor also may be merry, the Richer sort furnish them with Meat and Drink;

and so with this riotous *Bacchanal* Feast, they conclude their Anniversary Feasts, for this is the last in the year.

Of the Jews Fasts.

They keep the four Fasts mentioned by *Zachary*, chap. 8. 19. to wit that on the tenth Month, on the tenth of *December*, in memory of *Jerusalem's* Besieging that day by *Nebuchadnezzar*.

Secondly, They Fast the seventeenth day of the fourth Month, or *June*, in memory of the Two Tables of the Law broken, for the loss of their daily Sacrifice, for the Burning of their Law, for setting up of Idolatry in their Temple, for the Besieging of *Jerusalem* the second time, and for the breaking down the Walls thereof. They account the days from this, till the ninth of the next unlucky, so that they avoid all great Businesses; and School-Masters all that time will not beat their Scholars.

Thirdly, they Fast the ninth day of the fifth Month, or *July*, because the Temple was Burnt; therefore they go Bare foot, sit on the ground, read *Jeremiahs Lamentation*, in the Church-Yard amongst the dead they bewail the loss of *Jerusalem*; from the first to the tenth of this Month, they abstain from Flesh, Wine, Shaving, Bathing, Marrying, and Pleading, and from all manner of Delights.

Fourthly, they Fast the third day of *September*, because *Sadaiiah*, Governour of those Jews that were not carried away into Captivity, was Treacherously Murdered, as we read *Jer.* chap. 40. and 41.

Besides these Fasts, they have others, but not so generally observed; for some of their preciser sort Fast every Monday and Thursday: some Fast 10 March, because *Miriam* died that day, and the People wanted Water in the Desert. Some Fast the 10 April, for the death of *Eli* and his two Sons, and the loss of the Ark. Some Fast the 18 of this Month for the Death of *Samuel*.

At *Jerusalem* the Jews used yearly to Fast in remembrance of the Translation of the Bible out of *Hebrew* into *Greek*, by the Seventy Interpreters; and was observed the 8 day of *Tebeth* or *December*, and was a day of much heaviness to them; and certainly this must proceed from their Pride or Envy, or too much Superstition, disdaining that their Law should be imparted to the Gentiles, and that this Translation was a Profanation thereof: In this Fast they read no passages in the Bible but such as are sad and sorrowful; as the destruction of *Jerusalem*, *Jeremiahs Lamentations*, &c. And their Fast is from all Meat and Drink till the Stars appear.

The only Fast that God commanded was that upon the day of *Expiation*, other Fasts were enjoined by the Prince upon emergent occasions; as that commanded by *Jehosaphat*, 2 *Chron.* 20. 3. by *Joachim* *Jer.* 36. 9. by *Ezra*, chap. 8. 21. and other Princes.

Of their Circumcision.

In preparation to the Childs **Circumcision**, which was precisely to be performed the eighth day, upon the penalty of being cut off from the people, *Gen. 17. 14.* which was Excommunication, or bodily Death of the Patents: There was the Child to be washed, twelve **Wax** Candles brought in, to represent the 12 Tribes; two Cups filled with Red Wine, the *Mohel* or Circumciser seated in his Chair, and the God-father seated by him; the Circumcising Knife ready, with two Dishes, the one of Oyl, the other of Sand.

When the Child is brought to the Door by the Women, the Congregation riseth up, the God-Father takes the Child and sits down in his seat, giveth him his Name, which is usually after some of his Ancestors, *Luke 1. 61.* then being stript naked the *Mohel* first rubs the Præputium or Foreskin, that it may be the less sensible, then Blesseth God for the Covenant of Circumcision; he cuts off the fore part of the Skin, and flings it into the Sand, in memory of the Promise *Gen. 32. 12.* *I will make thee as the Sand of the Sea*; then he spits red Wine on the Wound and washeth it, and some also on the Childs Face if he faint, then takes the Bleeding Member into his mouth and sucks the Blood from it, which he spits into the other Cup of Wine, then takes off the remaining skin with his sharp pointed Nails, and layeth the Clouts dipt in Oyl on the Wound and bindeth it up; then Blesseth God again, and the other Cup of Wine the God-Father drinks, Praying for the Child.

If the Child be sick or weak on the eight day, his Circumcision is deferred till he recover: If he die before the eight day he is circumcised at the Grave, but without Prayers.

Of their Reading and Praying.

They divide the **Pentateuch** into 52 Sections, according to the 52 Sabbaths of the year; the last Lesson which falls out on that day, that immediately follows the Feast of Tabernacles (about 23 of *Septem.*) is accompanied with Singing, and the Priests Dancing; all the Books at this day are brought out of the Ark, with Dancing about it; and while they are out of the Ark, a Candle burns within it, to shew that the Law is a Light; being brought to the Reading Place, the carrier Kisseth it, and so leaves it, the chief Singer with much great Awe, Reverence and Devotion, unwraps it from its covering of Linnen, whose outside is with Silk, Velvet, or Tissue, then with a loud Voice he Blesseth God who gave them that Law, and so proceeds to the reading of a Portion of it, *Act. 13. 27.* and *15. 21.* then is it kissed and wrapped up again within all its coverings, after young and old Kifs it (not the Parchment, for that is too great Presumption) touching it only with their two Fingers, returning it to the Ark with Singing.

Now in their Praying, the **Circumstances** and

Ceremonies which they use are generally these: They Pray being girt, **standing upright**, with their **faces towards Jerusalem**, laying their hand on their heart, and bowing their head; they must not touch their naked skin; they hold that sneezing in Prayer is a good Sign; but to Belch, Yawn, Spit, or break Wind is Ominous, because of the Angels that are there present; and they Believe that whosoever saith Heartily *Amen* to their Prayers, hasteneth their Redemption.

The time of their **Evening Sacrifice** or **Prayer** is about five in the Afternoon, where being met in the Synagogue, they sit down and begin their Service with these words, *Blessed are they that dwell in thy House, Psal. 84. 4.* then the Præcentor saith or Sings some **Psalm**, and the whole Synagogue saith 18 Prayers; after which the Præcentor Ascends the Pulpit, and falls on his Knees before the Ark, after the example of *Joshua, Josh. 7. 6.* and layeth his left hand over his face, which the people do likewise, and with their Faces covered and towards the ground, they say the sixth Psalm, so all is done: But if any have a Quarrel with his Neighbour, he takes the Liturgy Book and shuts it, clapping his hand upon it; intimating thereby that he would Pray no more till his Neighbour were reconciled to him.

Before their **Morning Prayer**, these Superstitious Ceremonies are observed by them; that they ought to rise from the 15 of June till Pentecost before day, because the Nights are long; and from Pentecost to the 15 of June, they may rise after day: If they Weep in the Night and let it fall down their Cheeks (they say) God is ready with his Bottle to receive them: They hold the Morning the best time to go into the House of God, because *David* saith, *Thou wilt hear my Voice betimes in the morning, Psal. 5. 3.* but no Man must offer to say his Prayers till first he hath eased himself at the Stool, and washed his hands, because upon them evil Spirits sit in the Night time, and the Face also, because made after the Image of God; that their right hand by which they touch the Law, and write the Name of God, be no way defiled.

Excommunication.

It was of **three sorts** among the Jews, the first was to **exclude Delinquents** out of their **Synagogue**, *Job. 9. 22.* but not out of the Temple, for they might come to the Gate in time of Divine Service; this Censure lasted 30 days or more till the Party Repented; if he died without Repentance, he wanted the Ceremonies of common Burial.

The second was higher, which *St. Paul* calls (*a giving over to Satan, 1 Cor. 5. 5.*) such were not permitted to come near the Temple; but Curses were denounced against them, as *1 Tim. 1. 20.*

Their highest degree was **Maran-atha** and **Anathemata**, that is, had in Execration, yea Excommunicated to Death, *1 Cor. 16. 22.* the words signifie the Lord was coming with Vengeance against such; these were totally secluded from the people of God, which is called a cutting off from the people, and a blotting or razing of their Names out of the Book of Life.

But they had a more particular way in the **Excommunication**

communication of the Samaritans, to wit by sound of Trumpet, and Singing of the Levites, who first by word of Mouth pronounced a Curse against them, and those that Eat or conversed with them; shewing that they shall never be Proselytes in *Israel*, or have any part in the Resurrection of the Just; then they wrote this Curse, and caused it to be read and pronounced in all parts of *Israel*.

How the Jews Marry.

Their Custome is before Marriage to be contracted and after some space to be Married, which contract was confirmed either by Writing, or by a piece of Money, or by Copulation: but this last was punishable.

They are Married in the open Aire, either in the Streets or Gardens, by their Rabbies: the Bridegroom wear about his Neck a hair cloth, the end of which the Rabbi puts on the Brides head, after the example of *Ruth* who desired to be covered with the skirt of *Boaz* his Garment, *Ruth* 3. 9. then the Rabbi takes in his Hand a Glas full of Wine, over which he pronounceth a Blessing, and Praiseth God for the Conjunction, then gives it to the Bridegroom and his Spouse to Drink.

Then he takes from the Bridegroom his Gold Ring, and asks of the standers by if it be good and worth the Money given for it, then puts it on the Brides Fingers: then are the Marriage Writtings openly read; then the Rabbi takes another Glas of Wine over which he Prayeth, and presents it to the Married couple to taste; but the Bridegroom takes the Glas and dasheth it against the Wall, in Memory of *Jerusalem* Destruction: so the Ceremony is ended.

But beside the Principal Wife they had others, which were Subordinate, which we may call Concubines, who have not the command of the Family, nor have Gift or Presents from their Husbands, nor Matrimonial Writing as the chief Wife hath, nor may their Children inherit, but receive gifts only: and so *Abraham* dealt with the Sons of his Concubines, *Gen.* 25. 6.

Of their Divorce.

When any Man was weary of his Wife, he Writs a Bill of Twelve Lines only, neither more nor less, who subscribes and seals the same, and gives it to his Wife before three Witnesses, thereby he gives her Power to go whether she will, and to dispose of her self as she pleaseth: but she must not Marry again till after 90 days, that it may be known whether she be with Child or not. The Woman may also give a Bill of Divorce to her Husband, of which our Saviour speaketh, *Mat.* 10. 12. and withal sheweth that such Bills of Divorce were not commanded, but tollerated by *Moses* for the hardness of their Hearts: and tells them plainly that whosoever puts away his Wife, except for Adultery, and Marrieth another, commits Adultery, *Mat.* 5. 32.

Of their Sacrifices.

Sacrifices, Oblations, and Free will Offerings were such as these.

A Meat Offering, was a free Will offering, which was put up with Praises and Thanksgivings.

A Peace Offering, had Beasts slain and burnt on the Alter.

A Sin Offering, or an Expiation, or an Attenuement for Sin; is a Burnt Offering.

A Sin Offering, is an Offering for the Sin of Ignorance.

A Trespass Offering, is an Offering for a Sin knowingly acted and done.

X. He beareth Argent, an Ancient Roman Captain in his Roman Habilliments or Habit, with his Mantle behind him; Supporting of a Spear with right Hand, and extending his left to the sinister side, all proper. The Romans were anciently depicted with their Arms naked above the Elbows, and their Thighs below the Knees: with a Robe on their Bodies, with Corded Robes, or Labells hanging from the Shoulder Wings, and Skirts of the Waist: and Startops from the top of the Feet to the middle of the Legs, turned down into Fouldings, Crispes, or Wreaths: the principal of them having Mantles hanging on their Shoulders, or carelessly cast about them.

The Romans were so named from Rome the chief City of Italy, which Countrey is a Peninsula joynted to the main contentent of Europe, being about a Thousand miles long, and in some parts 400. some 126. and other 25 miles broad; the whole Countrey lieth under the 5 and 6 Climats of the Northren Temperate Zone.

Italy is best divided into the Kingdoms of Naples, Sicily, and Sardinia. The Land and Patrimony of the Church: the Great Dukedoms of Urbin, and Tuscany. The common Wealths of Venice, Genoa, and Luca. The Estates of Lombardie, which are the Dukedoms of Milan, Mantua, Modena and Parma, and the Principality of Piemont.

They were all a Heathenish People of old, Worshipping Stocks and Stones, the work of Mens Hands: with the Sun, Moon and Stars, the ancient Hero's, &c. till the Christian Faith was Preached there by St. Peter, and St. Paul, or the one of them with the Disciples.

The Religion professed by the ancient Romans and Greeks was in a manner the same, but under different Names: Numa taught the Romans to Worship their Gods by offering Corn to them, and to erect Temples to them. But Tarquinus Priscus many Years after according to the Grecian manner, taught them to set up Images to their God: Now their Religion I shall in brief set down to you under these Heads. 1. Their Gods and Goddesses. 2. Their Festivals. 3. Their Sacrifices. 4. Their Priests. 5. Their Marriages. 6. Their funeral Ceremonies.

Roman

Roman Gods and Goddesses

Their chief Deities were 20 in Number, under which Names they did generally Worship the Sun, because of his diverse effects and operation: besides they Worship Foreign Gods which they borrowed of other Nations. Their Names as they are ranked up to my Hand are as followeth.

Dij Majores, the **Great Gods** or Principal Deities, are

<i>Jupiter</i> or <i>Jove</i> , the God of Thunder.	<i>Vulcan</i> , God of Fire.
<i>Juno</i> , Goddess of Riches.	<i>Apollo</i> , God of Physick.
<i>Venus</i> , Goddess of Beauty.	<i>Neptune</i> , God of the Sea.
<i>Minerva</i> , Goddess of Wisdom.	<i>Janus</i> , God of Husbandry.
<i>Vesta</i> , Goddess of the Earth.	<i>Saturn</i> , God of Nativities.
<i>Ceres</i> , Goddess of Corn.	<i>Orcus</i> , God of Hell.
<i>Diana</i> , Goddess of Hunting.	<i>Bacchus</i> , God of Wine.
<i>Mars</i> , God of Warrs.	<i>Tellus</i> , God of Seeds.
<i>Mercury</i> , God of Eloquence.	<i>Sol</i> , the Sun, God of Light.
	<i>Luna</i> , the Moon, Goddess of the Night.

Dij Minores, **Lesser Gods**, or Deities of Lesser Note, are these.

<i>Bellona</i> , Goddess of War.	<i>Victoria</i> , Goddess of Victory.
<i>Nemesis</i> , Goddess of revenge.	<i>Cupido</i> , God of Love.
<i>Gratia</i> , Goddess of Thanks.	<i>Charites</i> , Goddesses of Gratuities.
<i>Penates</i> , Mans Titular Gods.	<i>Lares</i> , Household Gods.
<i>Parca</i> , Goddess of Destiny.	<i>Furie</i> and <i>Eumenides</i> , Goddesses of Punishment.
<i>Fortuna</i> , Goddess of Providence.	

Indigites, these were Men who for their Merit were **Canonized** and made **Heathen Gods**, such were these following Hero's.

<i>Hercules</i> .	<i>Castor</i> and <i>Pollux</i> , Gods of the Sea.
<i>Faunus</i> , God of Poets.	<i>Æsculapius</i> , a God of Riches.
<i>Erwand</i> .	<i>Acca</i> .
<i>Carmenia</i> an <i>Arcadian</i> Goddess.	<i>Laurentia</i> .
<i>Quirinus</i> .	

Vertues, **Vertues** of the Mind were also **Deified**, which had also their Temples, Sacrifices and Festivals Dedicated to them: as,

<i>Anima</i> , the Mind or Soul.	<i>Spes</i> , Hope or Trust.
<i>Virtus</i> , Virtue or Grace.	<i>Charitas</i> , Charity or Love.
<i>Honor</i> , Honor or Worship.	<i>Chastitas</i> , Chastity.
<i>Pietas</i> , Piety or Godliness.	<i>Pax</i> , Peace or Quietness.
<i>Libertas</i> , Liberty or Freedom.	<i>Concordia</i> , Concord or Agreement.
<i>Felicitas</i> , Felicity or Happiness.	

Semones or *Semi-Homines*, **Half Men** or **Inferiour Gods**, whose Merits deserved not Heaven, nor scarce Veneration: such also were these Petty Gods which waited upon every servile Office, and Action: as,

[]

Verumnus, a God of Buying and Selling.

Nascto, Goddess of Birth.

Cumina, Goddesses of the Cradle.

Rumina, Goddesses of Sucking.

Vacana, Goddesses of the after Labour.

Potina, Goddesses of Drinking.

Educa or *Edusa*, Goddesses of Eating.

Carnea, Goddesses of Flesh.

Pisca, Goddesses of Fish.

Juventus, God of Youth.

Voluptia, Goddesses of pleasure.

Juvenis, God of Joyning.

Domiducus, God of Bridgrooms.

Lubentia, Goddesses of Lust or Desire.

Partunda, Goddesses of Child Birth.

Egeria, Goddesses of Bringing forth.

Dij Rustici, **Rustick Gods**, or Gods of Country Creatures: as,

Robigus, the God of Simut.

Bubona, of Oxen.

Hippona, of Horses.

Mellona, of Honey.

Terminus, God of Bounds.

Pan, of Shepherds.

Cloacina, of Sinks & Privies.

Sterculius, God of Dung.

Pomona, Goddesses of Fruit.

Pales, of Fodder.

Flora, of Flowers.

Silvanus, of Woods and Fields.

Priapus, God of Seeds and Gardens.

Dij Astivi, **Active Gods**, or Gods that governed Mens Lives, Actions or Passions: as,

Horta, Goddesses of Exhortation.

Volumna, Goddesses of Will.

Laverna, of Stealing.

Pallor, God of Paleness.

Nenia, Goddesses of Funerals.

Libitina, of Graves and Coffins.

Febris, of Feavers.

Pavor, God of Fear.

Foreign Gods they also Worship, which they borrowed of those Nations the Conquered: thinking thereby in serving all Gods they might by chance light on the true God: as *Isis*, *Serapis*, *Osiris*, the Gods of *Aegypt*. *Sanctus*, *Dius*, *Fidius*, the Gods of *Sabins*. With Innumerable more, all which said Deities though under several names, yet thereby they ment but one and the same thing: for the **Sun** was the chief God Worshipped among the Gentiles, which was termed of them: *Sol*, *Phebus*, *Apollo*, *Æsculapius*, *Jove*, *Jupiter*, *Mars*, *Herculus*, *Liber*, *Mercurius*, *Pan*, &c.

To signify the **Moon**, they used these Names: *Luna*, *Hecata*, *Diana*, *Juno*, *Lucina*, *Venus*, *Ceres*, *Cynthia*, &c.

To signify the **Earth** and the benefits they received from it, they gave it these denominations: *Vesta*, *Ops*, *Sybelle*, *Rhea*, *Ceres*, *Berecynthia*, *Tellus*, *Magna Mater*, *Pales*, *Flora*, *Fauna*, *Proserpina*, *Bona Dea*, &c.

To signify the **Water**, they have these Names: *Neptune*, *Nereus*, *Glaucus*, *Proteus*, *Triton*, *Consus*, *Oceanus*, &c.

And to signify the **Infernal Deity**, they use these different Names which is one, and the same thing: as *Pluto*, *Plutus*, *Proserpina*, *Charon*, *Cerberus*, &c. which were all Worshipped under different forms, as I have shewed before, lib. 2. chap. 1. numb. 9.

But we must observe that although the ignorant multitude among the Gentiles did observe and Worship many Gods: yet the Wiser sort acknowledge but one **True God**.

God. Thus *Mercurius Trismegistus* is the ancient of the Philosophers; confesseth there is but one **Unitie** the root of all things; one **Goodness** of infinite Power, the Author of Life and motion in the World: So *Pythagoras* who first assumed the name of a Philosopher, saith that **God is one**, and all in all, the light of all power the beginning of all things; the Torch of Heaven, the Father, Mind, Life, and motion of all Universe: all which was confessed by *Empedocles, Parmenides, Thales, Anaxagoras, Socrates, Plato, Jamblicus, Proclus, Porphyrie, Cicero, Arius, &c.* which all owned a first infinite, and eternal Mover: and not only them, but the Poets assented to this Doctrin also.

For *Orpheus* Sings thus, *there is none other but this Great King, who sits in the Heaven, is compassed with Clouds, who seeth all things, and is seen of none*: to the same purpose is *Phocylides, Homer, Virgil, Ovid*, and others: But this is already performed by *Justin Martyr, Eusebius, Pless* and others, who likewise have inserted many Verses out of the *Sibylls* to the same purpose. But by the light of Nature they could not find out how to adore this True God, but Sacrificed to him either under a Heathenish name, or without a name, as the *Athenians* did, *A. 17. 22. 23.*

As they acknowledged a **Dietie**, so they confesse the **Souls Immortality**, and that after this Life it went either to a place of pleasure and delight, or to a place of punishment: all which they set forth by the *Elysium Fields, Pluto's infernal Pallace, the River of Styx, and the Stygian Lakes.*

It is set down by the Poets, that the **Souls** of dead Bodies which lie unburied, do wander up and down a 100 Years without rest: neither were they admitted into the Gates of *Pluto*, nor were they received by *Charon* the Ferry-Man of *Styx* to pass to the *Elisian Fields*. This made the *Pagans* careful in burying their dead, they accounting it a Work of Humanity, Clemency, Mercy, Piety, Justice and Religion.

Roman Festivals.

Saturnalia, was a Feast Celebrated to the Honor of *Saturn*, about the Suns going to *Capricorn*: at this time the Servants were better then their Masters: this Feast they had from the *Greeks*.

Feriae Latinae, a Feast dedicated to *Jupiter*, it was kept upon the hill *Albanus*, the mid-way between *Alba* and *Rome*, by the *Romans* and *Latins*.

Quinquatria, was a Feast of 5 Days to the Honor of *Minerva*, it was kept after the *Ides* of *March*: the first day was for Sacrifice, the other three for Sword players, and the last for Lustration, or going about and viewing of places.

Matralitia, to the *Genius*, a birth Feast, in which it was held abominable to shed the Blood of some Beasts, and ominous, seeing they were wholly dedicated to Mirth and Joy.

Vertumnalia, were Feasts to *Vertumnus* the God of Merchandizing: It was kept in the Month of *October*.

Supercalia, dedicated to *Pan Lycaeus* the God of Shepherds, who kept the Sheep from Wolves, it is kept in

[]

February, at which time the Hoast (that is two Goats) were slain, two Noble Mens Songs being present, whose Foreheads were blooded with the Knives that had slain the Goats, which dried off the Boys Laugh: that done they cut the skins into Thongs, which the Boyes take in their Hands and ran with them about the City stark naked (save a cloath before their Privities) and strick with them all they met with: young Ladies use purposely to offer their naked Hands to be struck by them, thinking thereby to become Fruitful.

Agonalia, were Feasts kept in *January*, either to the Honor *Janus* or *Agon*, the God of Actions and Enterprizes.

Carmentalia, a Feast in *January* also to the Honor of *Carmenta*, the Mother of *Evander* who was a Prophetess.

Feralia, so called a *Ferendis Epulis*, from carrying Meat to the Graves of their Friends; this Feast was kept in *February* to the *Manes* or *Infernal Ghosts*.

Terminalia in *February* also, and dedicated to *Terminus* the God of *Marches* and *Bounds*; this Feast was observed to keep amity between Neighbours, that they might not differ about the Bounds of their Lands.

Salitaria in *March* to the Honor of *Mars*, whose Priests called *Salij*, went about Dancing with the *Ancilia* or Targets in their Hands.

Liberalia, which the *Greeks* call *Discoisyt*, were Feasts kept in *March*, to the Honor of *Bacchus* or *Liber*, whose Priests did that Day Sacrifice with ivy Garlands on their Heads.

These *Bacchals* or Feasts of *Bacchus*, were so full of Disorders, Riot, Immodesty and Madnes, that the Senate ordered that it should not be used in *Rome* or *Italy*.

Cerealia in *April*, in memory of *Proserpina* found again by *Ceres*: the Ceremonies of this Day were performed by the *Roman Matrons*, but originally this was a *Greek Feast*.

Palilia a Feast in *April*, to *Pales* the Goddess of Shepherds.

Veneralia or **Vinalia**, a Feast in *April* too: so called because kept to *Venus* in whose Temple much Wine was poured out, the Gardens Dedicated and Sacrifices offered to her.

Robigalia, to *Robigo* the God of Smut, this Feast was kept in *April*, that the Corn might not be Smutty.

Campitalia, Feasts kept in *Campitis* Streets, Lanes and High-ways, to the *Lares* and their Mother *Mania*: to whom Children were wont to be Sacrificed, till *Junius Brutus* instead of them commanded the Heads of Poppies and Onions to be offered.

Lemuria Feasts in *May*, so called from the *Lemures* or Night Ghosts, which they pacified with this Feast, in which they used to fling Beans, thinking thereby they drove those Ghosts away out of their Houses.

Matralia in *May*, were Feasts to *Matuta*, which the *Greeks* called *Luchothea*: no serving Maids were admitted into this Feast, except one, whom each Matron was to smite on the Cheek, because *Matuta* was jealous that her Husband loved her Maid better then her self; whereupon she grew mad and drowned her self, with her Son *Melicerte*, and so was made a Goddess: she was also called *Ins*.

Neptunalia

Neptunalia in *June*, were Feasts Celebrated to the Honor of *Neptune*.

Portumnalia to *Portumnus* the God of Harbours, in *August*: this Feast was kept in the Harbour of the River *Tibur*.

Consualia in *August*, to the Honor of *Consus* God of Council: in this Feast both Asses and Horses were Crowned and kept from Work.

Vulcanalia Feasts to *Vulcan*, in the same Month of *August*.

Meditrinalia in *October*, to the Honor of *Meditrina* the Goddess of Physick: for in this Month they used to taste of old and new Wine for a Medicine.

Augustalia, in the same Month in Memory of *Augustus* his return to *Rome* from his Victories and Conquests.

Fontinalie, Feasts in *October*, in which all Fountains and Well were Crowned with Garlands, and Dressed with Flowers.

Mercurialia to *Mercury* in *November*.

Bumalia the same Month to *Bromus* or *Bromus*, that is *Bacchus*.

Saturnalia, Feasts to *Saturn*, which were kept in *December*: and also **Opalia** to his Wife *Ops*.

Angeronalia, to *Angerona* the Goddess of Anguish and Grief: in the same Month of *December* was also the Feasts of **Lourentalia**, in Honor of *Acca Laurentia*.

Besides these and many more set Feasts, they had others called **Conceptivae**, **Imperativae**, and **Numiniae**; of which you may read more in *Alexandrus ab Alexandro*, *Plutarch*, *Ross his view of all Religions*: with several other Authors quoted by him.

The Old Romans Priests.

Salij or the Priests of *Mars*, at their first Institution, they were but 12. afterwards they were made 24 which were chosen out of the **Patricij**, and they were in *March* to Dance Solemnly with their Targets called **Ancilia**, one of which fell from Heaven: these Festival Dances were dedicated to *Mars*.

Luperci the Priests of *Pan Lycæus*.

Duumviri at the first being only increased to three, called **Triumviri**, then to ten, named **Decemviri**, at last to fifteen, called **Quindcemviri**: these were Priests that had the charge of the Sibylls Books.

Epulones or other **Triumviri**, these were Priests that had the charge of all their Holy Feasts: after called **Septemviri Epulonum**.

Arvales, had the charge of the Fields.

Feciales, an Order of Priesthood that had the charge of War, and proclaimed Peace.

Flamines quasi Filamines, Priest so called because they went always covered with Threaden Caps or Hoods, whereof there were diverse sorts, according to the number of their greater Gods.

Augures, or Diviners by chirping of Birds.

Diales, were the Priests of *Jupiter*.

Martiales, the Priests of *Mars*.

Quirinales, the Priests of *Romulus*.

[]

Reg Sacrificulus or the King of Priests, was him that had the charge of the Priests of the Sacrifices, and of the Games and Festivals: he was so called because anciently Kings did Exercise the Priests office: he was after termed **Pontifer Maximus**, and **Papa**: the first from his care and charge of the Bridge called *Pons Sublicus*: and the Later for his Gravity, for **Papa** signifies a Father: he had more Priviledges and Honors than the Kings themselves, for he might ascend the Capital in his Litter, which was not lawful for others, and whatsoever criminal fled to him, he was that day free from Punishment; neither was he bound to give an account of any thing he did.

But above them all was the **Pontifical College**, which at first consisted only of eight, but *Sylla* enlarged them to fifteen, these were to assist the chief Pontife or Pope, in whom alone was the Supreme Power of Religion, of Sacrifices, Holy Days, Priests, Vestals, Vows, Funerals, Idols, Oaths, Ceremonies, and what ever concerned Religion.

Salii were the Priests of *Sybele* Mother to the Gods, whose Chief or Archbishop was called **Archi-gallus**.

Besides these every **Idol** had his Priest, and these had their under Officers or Servants which were termed **Camilli**.

Flamines, were Servants to the Flamine Priests.

Aeditui, were a kind of Church-wardens for the Priests.

Tubicines and **Tibicines**, were Trumpeters and Sacbutters.

Popae, were those that bound the Sacrifices.

Arimarj, was them as killed the Sacrifices.

Preciae, were their Cryers that went before the Priests to enjoin the People to forbear working during the time of Sacrificing.

Præstidae, were the Women that were hired to sing the Praises of the Dead.

Aespilones, were the Grave diggers.

Of the Roman Monasteries, Fraternities, and Nunneries.

The **Arval Fraternity**, which they termed **Stretes Arvales**; was a kind of Colledge or company of Roman Priests, the number being 12. eleven natural Brothers at their first institution, Sons to *Acca Laurentia*, Foster-Mother to *Romulus*. This Order was erected in Honor of *Ceres* and *Bacchus*, to whom they offered Wine, and Corn, and certain Sacrifices, that they may obtain Plenty: their Sacerdotal Ornament was a Garland of Wheat, bound up with a white Ribbon. This Brotherhood were appointed Arbitrators or Judges to decide Controversies concerning Land-marks and Bounds of Fields.

The **Colledge of Pontifices**, of which four were appointed by *Numa* to be chosen out of the **Patricij** or Chief Nobility; afterward four more was added out of the Commons, they were called **Pontifices Majores**, or Chief Pontifices, to distinguish them from seven other, which afterwards *Sylla* added and called them **Pontifices Minores**. These were Priviledged from all allegiance,

ance, giving no account to the Senate or common-
 alty of their Actions: they were to determin all questi-
 ons concerning Religion: did punish any inferior Priest,
 if he either added or detracted from these religious rites
 prescribed him, the head of his Colledge was called **Pon-**
tifex Maximus, the Great or Chief Pontific.

The **Citi**, was another sort of Religious Men, which
 lived in the Suburbs of the City of *Rome*, and prafized
 upon saying: they were so called from the name of the
 Bird which they observed in their Auguration.

The **Septemviri Epulorum**, were seven Men ap-
 pointed by the Pontifices in old time to have the over-
 fight of the Feasts made at Sacrifices, which were of Re-
 ligious Orders: at first they were only three, termed
Triumviri, at length they were made five, called
Quinquēviri, and then to seven, called as aforesaid
Septemviri.

The **Pannery of Vestal Virgins**, was a Religious
 House dedicated to the Goddess *Vesta*: where at the first
 were 4. after 6. Virgins or Votaries elected, who were to
 continue so 30 Years: the first 10 they were Learners;
 the second 10 Years practitioners in their Office; and the
 last 10 Years teachers of the Novices: If they committed
 Whoredome they were Burned or Buried alive. Their
 Office was to keep the **Sacred Fire**, which if it went
 out through their neglect (which was held ominous) they
 were Scourged by the chief Pontifex: a second part of
 their office was to work a reconciliation between parties at
 variance: if they Marry after their 30 Years Virginity,
 they were to lay aside their Scepters, their Fillets and o-
 ther their Sacerdotal Ornaments: for they never walked
 abroad but with an Iron Scepter in their Hands. The
 eldest was called **Maxima Vestalis Virgo**, the Lady
 Mothers or Chief Governess.

Fauna or **fatua**, had her peculiar Priestesses or Wo-
 men Priests dedicated to her Honor.

The manner of the Roman Sacrifices.

Whatsoever was Burnt or offered up unto the Gods
 upon an Altar, it had the name of a **Sacrifice**: and so
 was termed by several denominations according to the
 manner or thing offered: sometime it was called

Ultima, from the Beast being bound to the Altar,
 ready to be Sacrificed: derived from the Latin Participle
Ultus, bound.

Hostia, the Oblation or Sacrifice so called from the
 Verb *Hostio*, which is to strike: because certain under
 Officers called in Latin *Popæ* (standing by the Altars, all
 their upper parts naked, and a Laurel Garland on their
 heads) did *Hostiare Victimam*: that is strike down and kill
 the Sacrifice.

Hostia Precidanea, was a kind of preparative Sacri-
 fice, which were Sacrifices of less value which they offered
 a day before the Solemn Oblations: which were Sacrifices
 if by any token they found unlucky, when would they
 offer a second Sacrifice, which was termed

Hostia Succidanea, was a Sacrifice which succeeded
 when the former was not satisfactory or proved un-
 lucky.

Ambigni, were such Sacrifices as had Rams or

Weathers led to be Sacrificed, with a Lamb on each side
 of them.

Bidentes, were Sheep Sacrificed which had two
 horns, and two eminent teeth.

Ambervales, were Sacrifices carried in their Processi-
 on about the Fields.

Amburbales, were Sacrifices carried about the
 City.

Injuges, were Heifers Sacrificed which had never
 been tamed or put under the Yoke.

Now every particular God had his Sacrifice; white
 Beasts were Sacrificed to the Supernal Gods, black to the
 Infernal.

The **Bull** was the proper Sacrifice to *Jupiter*, *Neptune*,
Apollo, *Mars*, *Luna*, and the *Her es*.

The **Ram** to *Mars* and the *Heroes*: **Wine** was
 offered to *Ceres* and *Liber*.

The **Goat** to *Esculapius* and *Liber*: **Milk** and **Hony**
 to *Ceres*.

The **Horse** to *Sol* and *Mars*: a **Dove** to *Venus*.

The **Lamb** to *Juno* and *Faunus*: an **Hind** to *Diana*.

The **Doe** to *Pan* and *Minerva*: an **Hogg** to *Silva-*
nus: a **Cock** to the *Lares*.

The **Sow** to *Sybelle* and *Ceres*: an **Hen** to *Esculapi-*
us: and a **Child** to *Saturn*: but this Feast was abolished
 by the *Romans*.

Also to each God they assigned his particular Bird,
 as the **Eagle** to *Jupiter*: the **Cock** to the *Sun*: the
Hag - ppe to *Mars*: the **Raven** to *Apollo*.

They had also their peculiar Trees, as the **Oak** to
Jupiter: the **Olive** to *Pallas*: the **Mirtle** to *Venus*: the
Cypress to *Pluto*: the **Wine** to *Bacchus*: the **Poplar**
 to *Hercules*: the **Laurel** to *Apollo*.

The **Manner of their Sacrificing** was as followeth:
 some certain days before the Priest did wash his Body, e-
 specially his Hands and his Feet: also he was to abstained
 from diverse kinds of Meats, and from his Marriage Bed:
 at his going to Sacrifice either himself, or an inferior
 Officer went before him with a white Rod or Wand in
 his hand, crying to the People, *Hoc Age*: attend this you
 are about.

The Priest after this **Preparation**, having brought
 the Sacrifice to the Altar, layeth his Hands on the Altar
 using some Prayers to the God *Janus*, and the Goddess
Vesta: they being the only Persons by which they must
 have access to the other Gods, without whose Intercession
 they could not prevail: Musick in the mean time sound-
 ing.

Prayer ended, he layeth on the head of the Sacrifice
 Corn or a Cake, with Salt and Frankincense, from which
 Ceremony the act of Sacrificing had been termed *Immo-*
latio from *Mola* the Cake. Then followed *Libatio*,
 which was the tasting of Wine, and Sprinkling thereof
 upon the Beasts head: this done the hairs between the
 horns of the Beast being pluckt off, were flung into the
 Fire: this they called *Esamina prima*, the first offering:
 one Cried out with a loud voice, *Macta est Hostia*, that
 is, *Magis Aucta*: more Encreased and made more plea-
 sing to the Gods.

After which voice of *Mactaria Hostiam*, the Beast was
 killed, the Blood received into Vessels, the Intraills search-
 ed by the Soothsayer and Priest, which having no ill to-
 ken therein; at last the Beast was cut in pieces by the

F f

under

[]

under officers, called of some *Popæ*: others *Cultrarii* from their Knives: others *Victimarii* from the Sacrifice or Hoast: others *Agones* from their standing ready to strike down the Beast, which we in English may term, **Church-Butchers.**

Being so cut, these slaughter Men from each Bowel cut some part, which after they had rowled in Barley Meal, they delivered to the Priest who burned it on the Altar, this was termed by them *Litare* or *Reddere*: which is, to satisfy by Sacrifice, or to pay the Sacrifice which was owing unto the Gods.

After the same was burnt, they went to Feasting, where they Sung Hymns and Songs in the Praise of their Gods: Dancing about the Altars, Playing on Cymbals.

The Romans Worshipped *Saturn* in all his Festivals and Sacrifices with their Heads bare; but all the other Gods with their Heads covered.

The Romans Marriage.

Their Religious Rites and Ceremonies used in their Marriages, as having dependance upon the Priest is of several Natures: first in their contracts, which by the Romans was called *Sponsalia*, because each did promise to other to live together as Man and Wife, which for the greater security was Written down and sealed by many Witnesses: the Man giving her a Ring which she was to wear on the next Finger unto the little of the left Hand, because unto that Finger alone is a certain Artery from the Heart.

The Solemnity of the Marriage was with Prayers before the Altar to the chief Wedding Gods, viz. *Jupiter, Juno, Venus, Diana, &c.* then Sacrificed an *Hogg*, the Priest flinging the Gall away, then were Married together, the Bride being sprinkled with Water, touching both Fire and Water, to shew her Purity, and that through all difficulties she must pass with her Husband.

The next day was a *Feast* prepared for the Bride and Bridegrooms Friends, who made merry together: now they may not Marry on unlucky days, such were the days after the Calends, *Nones* and *Ides*, these they called *Dies Atri*, **black Days**: nor on Funeral, Festivals, or Stormy, or Foul Weather Days.

There was several ways by which they became Man and Wife, as when the Woman is brought to the Man having a *Veil* over her Face, and so given him.

Or that the Man by a seeming violence takes away his Wife from the Bosome of her Mother or Friend and possesseth her, this is called his Wife, by *Prescription* or *long Possession*: especially being Wedded with consent of Overseers.

Or is his Wife by certain Solemnities used before the Priest, using set form of Words when the Woman is given to the Man: 10 Witnesses being present, and a solemn Sacrifice being offered, at which they eat of the Barly Cake used in the Sacrifice.

Or by Buying and Selling when a Woman becomes a Wife under a feigned Form of Sale, by giving him a piece of Coyn, or he to her.

Or by a kind of Lottery, where they became Man and

Wife by a certain Coemption or Buying together: and she that was thus Married was properly called the *Prother* or *Missis* of the Family: but if any of these Ceremonies were omitted, then was the Marriage accounted as no Marriage.

These Ceremonies ended, towards Night the Woman is brought to her Husbands house with Torches, where she annoints the Door posts with Oyl, then doth the Husband lift her over the Threshold, and by a seeming force carry her in, because with Modesty she would not seem to go in there without violence, where she should loose her Maiden-head: at her carrying in all the Company did cry out with a loud voice *Talassio, Talassio*.

Of their Divorce.

If after Marriage any discontents did fall out between the Man and his Wife, then both repaired to a Chapel Built in the Honor of a Goddess called *Dea Viri-Plac*: where after they had been a while, they returned Friends.

If not *Divorcements* upon Just cause were permitted, of which they had two ways: the first was called *Repudium*, which was a Divorce between parties only contracted: in which the party suing for the Divorcement, used the form of Words, *Conditione tua non Vivam*.

The second was called *Divortium*, wherein the party suing for it, used these Words, *Res tuas tibi habito*, or else *Res tuas tibi agito*, and both these were termed *Matrimonij Renuntiationes*, the refusal or renouncing of Marriage. In these Divorces, the Ceremonies were quite contrary to those in Marriage: the Just causes of Divorce being fore-signified to the Censors, the Marriage Tables were broken, the Dowry returned, the Keys of the House taken from the Woman, and she turned out of Doors.

All which Ceremonies are Treated more largely by Tho: Goodwins *Roman Antiquities*, lib. 2. cap. 1. to 21.

Tho: Dempsters *Roman Antiquities*, lib. 5. cap. 38.
Alex: Ross *View of all Religions*, sect. 4. pag. 121. &c.

Roman Funeral.

It was the Custom amongst the Romans that when they perceived a Body dying, the next of kinn should receive the last gasp of breath from the sick Body into his Mouth, as it were by way of kissing him: and likewise close the Eyes of the party deceased.

Being Dead, they keep it seven Days, *Washing* it each day with hot Water, and sometime with Oyl, hoping the Body is but in a slumber: all the Friends these seven days met, and make a great out cry or shout with their Voices, hoping the Body is but a sleep: this action of theirs is called a *Conclamation*, after which if it did not revive, was prepared for the Funeral.

The *Pollinator*, for so was he called that Embalmed, Dressed, and Chested the dead Body, which was invested with such a *Gown* as the parties place or office formerly had

had required, then was it set in a Bed by the House Gate, where an Alter was erected, which they called *Acerra*, on it his Friends offered Incense till the Funeral.

Every thing used at the Funeral was to be brought in the Temple of *Venus Libitina*, to shew that the same Deity as brought us into the World, takes us out: then was a common Cryer sent about the Town to call the People to the Funeral, in this form of Words: *Exequiis L. titi L. Filio quibus est commodum ire. Jam tempus est. Ollus ex adibus offertur.*

The Bed being covered with purple, or a rich covering was born by them of next kindred to the burial place, being followed by his Children, Friends and Servants in Mourning Apparel: the Corps thus brought into the great Oratory, called *Rostra*: where a Funeral Oration was made both of the commendation of him deceased, and his predecessors: that ended, the Corps was in old time carried home again, in manner as it was brought forth; but afterwards by the Law of the twelve Tables it was provided that none but the Emperor and Vestal Nuns should be buried within the City.

The manner of their Burial was not by interring the Corps, as in former times it had been; but Burning them in the Fire: the reason was, to prevent the cruelty of their Enemies, who in a revenge would at their conquest digg up the buried Bodies making them Subject of their Wrath.

This Funeral Pile, before the Burning was properly called *Pyra*; in the time that it Burned it was called *Ragus*, and after the Burning *Bustum*: the place appointed was by the *Pontifices* and *Augures*, the *Pyra* was made like a Tabernacle, or in form of a Pyramids on which the Corps being lay, the next of kinn fired the same with a Torch, turning his Face avers: while the Pile was burn'd, they used to Sacrifice Captives to pacifie the Infernal Ghosts: but this being held too cruel, *Gladiators* or *Fencers*, were appointed to fight, whose Blood served instead of Sacrifice to the infernal Gods: and for want of these *Women were hired to tear their Cheeks*, and make pitiful outcries: but these at length were forbidden.

After the Body was burnt, his nearest Friends gathered up his Ashes and Bones, washed them with Milk and Wine, put them into certain Earthen Pitchers, called *Urnae*, *Urns*: the Priests besprinkling the People three times with Holy Water, and the eldest of the mourning Women pronounced with a loud Voice, this word, *Illicet*, it is lawful to depart: then did the company depart, taking their last farewell of the dead Body in this form of words, *Vale, Vale, Vale*; *Nos te Ordine quo Natura permiserit sequemur*: that is, Farewell, Farewell, Farewell; we shall follow thee in that Order which Nature shall permit.

If any of these Ceremonies had been omitted then it was termed, *Sepultura insepulta*, that is, Burial without Burial: the old and aged People after the Funeral were invited to a Feast or Funeral Banquet which was eaten upon an Alter of Stone, which they termed *Silicernium*: the poorer People received a Doal or distribution of raw Flesh, which they called *Visceratio*, and moreover there was a potation or drinking of Wine after the Burial, called *Murrata* or *Murrhina potio*: but this and several other things were prohibited for to void expences.

In like manner for the moderating of Grief it was ordered that this word *Lessum* in their mourning should not

be used for Children under three years old, elder Persons may be mourned for so many days as they are years old: Wives for their Husbands, and Children for their Parents, were permitted to mourn ten Months, if they would; within which time the Widdow could not Marry without infamy and discredit.

But here note that the poorer sort which could not go to this expence, were put into Coffins or Chests, carried on a Beer, and Buried in the dusk of the Evening, or with Torches: and for the Funeral procession of the Richer sort, with all their Atchievements of Honor, because they do not properly belong to this place, I shall treat of the same elsewhere, see *lib. 4. chap.*

The Greek Religion and Worship.

The Greeks and the Romans differed but little in their Superstitious or Idolatrous Worship, the Romans Sacrificed to and Worshipped 20 principal Gods, and the Grecians but 12 of them: as *Jupiter*, *Saturn*, *Bacchus*, *Apollo*, *Mars*, *Minerva*, *Diana*, *Venus*, *Juno*, *Ceres*, *Mercurius*, and *Vulcan*. Their Alters were called the Alters of the twelve Gods; and by these they were wont to swear, though other Gods were in no less esteem amongst them; as *Neptune*, *Hercules*, *Proserpina*, &c. with innumerable more.

Greek Church Officers.

As they had multitude of Gods, so they had Priest; anciently the Priests of *Jupiter* & *Apollo*, were young Boys beautiful and well born.

The Priests of *Sybelle*, were gelded.
Ceres, *Bona Dea*, and *Bacchus*, had their Women Priests.

The Priests of *Bellona*, used to Sacrifice with their own Blood.

The Athenian Priests, used to eat Hemlock and Cicuta, to make them Impotent towards Women.

No Man was made a Priest who had any Blemish on his Body, their Garments were white, if they Sacrificed to *Ceres* for Purity: if they Sacrificed to the Infernal Gods, their Garments were black: but purple if they were Priests of the Celestial Deities. They used also to wear Crowns or Miters with Ribbons or Laces: their Office was not only to Pray and Sacrifice, but also to Purify with Brimstone and Salt-Water.

Their Chief Priests was called *Hierophantae*, which were the same in Authority with the *Pontifices* at Rome.

The Athenian noble Virgins, were called *Cane-phoroi*, from bearing on their Shoulders the Kanes, which was a Basket or Chest of Gold, in which the first Fruits and other Consecrated things were carried in their *Panathenajan* Pomps to the Honor of *Minerva*: These Virgins did much resemble the Vestal Virgins of Rome.

The *Propolos*, or *Episthmites*; was a Bishop or Overseer of their Sacred Mysteries.

The **Pyrophoros**, was he that attendeth the Sacred Fire on the Altar.

They had also their **Cerytes**, which were Cryers or Preachers.

And **Naophylaces**, Church-Wardens and other Officers which had the charge and care of their Temples.

Greek Temples.

At first these Gentiles had no Temples at all, but Worshiped their Gods either on **Hills** or in **Groves**: **Cecrops** was the first (as some think) who built a Temple in *Athens*, and **Janus** in *Italy*: or else they Sacrificed at the **Sepulchers** and **Monuments** of the dead.

Temples of the Celestial Gods were built upon the Ground, and on the highest part of a City: but of the Infernal Gods under the Ground. Their Temples were called **Melathra**, from the black Smoak of their Sacrifices and Incense. And **Naos**, or according to the *Atticks*, **Neos**, was the general Name of their Temples, because the Gods dwelt in them; and because they were Consecrated and Holy, they were named **Iera**.

Serchos, they called that place in the Temple where the Idol stood: the same the *Latins* termed **Delubrum**.

Temenos from the Greek word *Temnein*, to cut or separate, did signifie the Temple as it was set apart, and separated from other buildings: for such Honor they gave to their Temples, that they durst not tread on the Threshold, but leap over it; nor pass by a Temple without Reverence to it: nay it was held an **Impiety to walk in the Temple of Apollo**, and Punished with Death. It was termed **Apollo Pythius**, in Memory of *Apollo's* slaying the great Serpent *Python*: from *Apollo's* Temples, especially that at *Delphos*, were delivered the Oracles of the Gods, by audible voices, from the Mouths of the Images, or Idols.

In *Athens* the Temple of **Mercur** called *Asylum*, was a Sanctuary for delinquents to fly unto.

In the Country of *Sparta*, **Jupiter** had a Temple called **Seotitas** from the darkness thereof, being obscured with Groves.

They had also their **Ges** - **Jeron**, Chappel of the Earth: and their **Moiron**, the Chappel of the Destinies: which were places where they assembled and had Sermons; which kind of Preaching they called it **Schiada**.

Their Matrimonial and Funeral rites were the same in effect with the *Romans*, therefore I forbear to say any thing of them.

The Romans Christian Religion.

Upon the shining forth of Christianity, by the Industry of the Apostles and Disciples, *Rome* was after some certain Years converted to that Faith, rejecting Idolatry with all Heathen Superstitions: which Faith for near 600 Years they kept pure and uncorrupted, since which time many things have by degrees crept in amongst them, which the Protestant Christians have and do still oppose as Heretical, denying to be of their Communion.

[]

Doctrines and other Terms used in the Romish Religion, and when admitted into the Church.

Many things are evidently proved to be done contrary to the Rules of Scripture and Apostolical Doctrine, yet it is hard to find out exactly the time when, where, and by whom such Doctrines first crept into the Church, and such alteration began; to such therefore as a time is mentioned, I shall insert it, and for the rest leave it to others to find out their Original, as,

Merit of Works, that good Deeds merit Heaven, a Doctrine Taught about the year 1081. after which followed works of Superarrogation, that Man could do more than God required of him.

Transubstantiation, is the passing or conversion of one substance into another, as of Bread into the Body of Christ, by the Words of Consecration. This Doctrine was first brought into the *Romish* Church by *Innocent* the 3. about 1215. others say by *Nicholas* 2. at the *Lateran* Council in *Rome*, about 1216.

Auricular Confession, a Confession of our Faults in the Priests Ear, *Anno* 1254. a Tenent brought into the Church by the said *Innocent*.

Erexisim, Adjuration, Prayers used by the Exorcist, to cast the Devil out of him that is Possessed; the calling of foul Spirits out of the Bodies of Men; a thing brought into the Church at Baptism about the second Century.

Predestination, contrary to the Rules of Scripture they affirm to be a fore sight which God had, either of Mans good Works, or of their Faith.

Water mixed with Wine in the Sacrament of the Lords Supper first used, *Anno* 122.

Lent, a Time of Fasting for 40 days before Easter, first used *Anno* 142. by the institution of *Telephorus* Pope of *Rome*; others say it was an Apostolical Tradition; but of the forbidding of Meats to be eaten at that time, came in about 380, not known in *England* till *Anno* 640.

Penance, a punishment of Offenders, first used and instituted for a Sacrament 157.

Marriage made a Sacrament in the *Romish* Church, and forbid to the Clergy and Priests, *Anno* 385.

Popes Bulls, Briefs or Mandates of the Pope, so called from the Lead, and sometimes Golden Seal affixed thereto, *Anno* 772.

Mals, the publick Service of the Church; and so the *Mals* Book is the Common Prayer Book of the *Latine* Church: It was first used in *Latine* about 394 and to us in *England* about 680.

Canonical Hours of Prayer instituted by *St. Hierome* 391. that is set Hours for publick Prayer, as

Nocturnal Prayer, Night Prayers, which are said at Midnight.

Mattins, Morning Prayers.

Clepers,

Hesperis, or Evening Prayers.

Completory Prayers, are such as end all the Divine Service for Night and Day, which are compleatly ended about the beginning of Night.

Extreme Unction, instituted by *Felix*, Anno 527. It is the Anointing of the Sick ready to die, or after they are dead.

Lamps ordained to be continually Burning in Churches by Pope *Severianus*.

Veneto for the Dead, Prayers for the Dead, brought in by *Pelagius*.

Soul Masses or Masses applied for the Dead came in by *Gregory*, in which the Sacrament is delivered thus; in whole Commemoration the Body of Christ is taken, &c.

Mass to be said by the Priest with his Face towards the East, ordained by Pope *Vigilius*.

Masses help Souls out of Purgatory, an Opinion brought in by Pope *Johannes* 19. by reason of a Dream, wherein he heard the Voices of Devils Lamenting and howling, that Souls were delivered from them by the saying of Masses and Diriges.

Dedication of Churches, and that none but a Bishop might Hallow them, so ordained by Pope *Felix* the third, Anno 492.

Canticle called; *Gloria Laus*, &c. in the Procession before the Mass on Palm Sunday was instituted by *Thaddeus* Bishop of *Aurelia*, Anno 483.

Eulogia, or the giving of Blessed and Holy Bread among the People by the Minister.

Oil and Cream for an Unction, brought in by *Stephen*, and not to be Hallowed but by a Bishop.

Baptism should be administered but twice in the year, viz. *Easter* and *Whitsuntide*, except to Infants in extremity; ordained by Pope *Sextus*, and that it should be required 40 days before.

Shirts not to wear Beards, nor long Hair, appointed by Pope *Martin* the first.

Bells first ordered to be Christened by *Martin* afore-said.

Plains sung by Turns, that is, one side of the Quire one Verse, and the other side another Verse, and to end them with *Gloria Patri*, &c.

Copons Case, see *Pir*; it is a kind of Shrine, wherein is put all sanctified things, as *Reliques*.

Patten, is the cover of the Chalice or Communion Cup.

Stole, is the Breast-Plate which goes about the Neck, and crosses the Priests Belly.

Articles, are short Responses or Answers of the Priest and Clerk: as *Gloria be to the Father*, &c.

Censor, is the Frankincense Pot or Box, by which they Perfume the Altar.

Suffrages of the Holy Mother the Church: the good Words or Voice of the Church, thereby understanding the Mind, Will and Pleasure of the Church, Her Acts or Decrees which are not to be altered.

Decretal Epistles, Epistles and Letters of the ancient Fathers of the Church, which are allowed as Authentick, for the defence of the Doctrine, and Ceremonies in Religion.

Masses to be of Stone, Decreed by *Gregorius* 1: and to have some Reliques of Saints in them.

[]

Cleneration, is a Worshipping or Bowing to a thing: see *Image*.

Sacrifices and **Oblations**, were of the old Christians, no other then Contributions and Thanksgivings, *Heb.* 13. 15, 16.

Crossing of things, first invented by Pope *Gregory* the seventh, a notable Ceremony - maker: as *saith Bruno* and *Cochleus*.

Diriges, or **Diriges** for the dead, signifies the Office or Prayer for the Dead, and the Souls in Purgatory: and is so called from the first word of the first Antiphon of the Office, which is *Dirige*.

Antiphon, a kind of Verse or Sentence which Church-Men Sing by course; an Anthem like, one singing one Verse, and another, another Verse: It is a Responsory Song.

Exorcisme, Juration; Prayers used by the Church of *Rome*, against the power of the Devil, and to cast him out of Bodies possessed.

Organs, a Wind Musick, first brought into the Church of *Rome* by Pope *Vitalianus*, to be used with Singing or Vocal Musick formerly used.

Cardinals made first in the Church by *Pascal*, being Priests of certain Parishes, that they might be near his Person, and be at Elections: Now they are Masters for Kings. Others say by *Leo* the fourth, Anno 853.

Matrimony forbidden the Romish Clergy (affirming it better to have a Whore private, then to keep a Wife openly) by *Nicholas* the First, which was so followed by his Successors, that a Priest of *Placentia* being accused for having a Wife and Children, was deprived of his Benefice, but on proof made she was Wife of another Man, and his Strumpet. he was restored again to it.

Election or choosing the Pope, was taken from the Emperour, by *Arian* the third, and left to the Roman Clergy.

Candles first born in the Feast of the Purification of the Virgin *Mary*, thence called *Candlemas-day* by Pope *Sergius* the third, about Anno 905.

Consecration of Swords, Roses, Flags, &c. first by *Sergius* the fourth, to be sent as tokens of Love and Honor to such Princes as deserved best, so *Paul* the third sent a Consecrated Sword to *James* the fifth of *Scotland*, to engage him in a War against *Henry* the eighth who had then cast off the Popes Supremacy.

Cursing with Bell, Book, and Candle: first invented by *Celestine* the second.

Bar or **Pir**, a Box or Vessel to put the Consecrated Bread in, and cover it first commanded by *Innocent* the third, and to be killed Anno 683.

Indulgences and **Pardons** for Sins made saleable first by *Clemens* the fifth, others by *Bonifacius* the eighth, Anno 1300.

Mitre of the Pope, adorned first with Diamonds, Saphirs, and other precious Stones, by *Paul* the second.

Cardinals Hat first given them by Pope *Innocent* the fourth, Anno 1243. to whom *Paul* the second gave them as an augmentation of splendor, their Scarlet Gowns.

Ladies Psalter, a Prayer Book, wherein are diverse Prayers made to the Virgin *Mary*, and other Saints: first authorized by Pope *Sextus* the fourth, Anno 1089.

Beads

Beads to Pray by, brought in him by also: from whence sprung **Rosaries**.

Stews or **Brothel Houses** publickly allowed in Rome for both Sex; and built for Priest and others *ad Purgandos Ranos*, rather then to have lawful Wives, by the said Pope *Sextus* the Fourth.

Swearing by the Gospel, Instituted Anno 528.

Grand Masses or **High Masses**, are Masses said upon extraordinary days and times, as at *Easter*, *Christmas*, &c.

Petty Masses, short Prayers or Services, made for some small occasions.

Canon of the Mass, are Rules and Prayers used at the receiving of the Sacrament.

Secrets, are secret Prayers which the Priest saith to himself, which for the People to hear is a great Sin.

Sanctus, it is a kind of Prayer at the Lords Supper; which is a giving of thanks to the Lord.

Sanctus Sanctorum, the Holy of Holies, it is the inner part of the Temple, the place behind the Chöre is so called.

Holanna, save now, or O Lord save me, a kind of Salutation of old among the Jews, *Mat. 21. 9.*

Sabaoth, is a day of rest, but is by the Jews, an attribute given to God, as Lord of Sabaoth signifieth Lord of Hosts, Powers, and of Armies.

Anthems first used in the Church Anno 387. these are Responory Songs, which Church-men sing by course, one singing one Verse, and another an other: others say about 371.

Alter, a Table to set the Bread and Wine on, ordered to be Alterwise, Anno 135. the place on which the Chalice and Host are placed.

Albe, a long white Linnen Garment wherewith Priests are clothed when they say Mass: Instituted by *Silvester*, Anno 316.

Corporal, a Linnen cloath spread upon the Altar first used Anno 316. a cloath to cover the Eucharist by Pope *Marcus*, Anno 340.

Chalice, the Communion-Cup to be of Graft, then of Gold in time of Pope *Severinus*.

Host or **Wafer**, Bread or a Wafer Cake that represents the Body of Jesus Christ.

Eucharists, the Sacrament of the Lords Supper, or Body and Blood of Christ, administered to none but fasting: so ordained Anno 397. the Word signifieth Thanksgiving, *Eph. 5. 4.*

Indulgence or Popes Pardons for Sins acted, first used by them to get Money was about 1300.

Limbus Patrum, the lower part of the Earth or place where the Souls of the ancient Fathers went unto, till the Resurrection of Christ, at which time they went with him into Heaven: which is a Popish opinion.

Limbus Infantum, the like kind of place where the Souls of Infants were till Christs Resurrection.

Purgatory, a place of Purgation, or State of Purging; that the Souls departed this Life are detained there, because they died not in perfect Estate; to Purifie and Purge them there, that they may be fit for Heaven: and that Christian Prayers, Oblations, and the Charity of the Living may both ease such Souls, and deliver them from thence: This Doctrine was not well known till the Year, 250. and brought into the Church, Anno 593.

[]

Prayers for the Dead, and Sacrifices for them: Anno eodem.

Invocation, Prayers to Saints and Angels: brought in by *Gregory* the Great at the same time Anno 593. Invocation and Adoration.

Kirie Eleison, is Lord have mercy on us; Words often repeated in the Mass and Litany, by the Priests and People: this was added to the Liturgy about the Year 591. **Christe Eleison**, is Christ have mercy on us.

Pilgrimage, a travelling into strange Countreys, commonly taken for going in Devotion to any Holy place, since it was Superstitiously and Meritoriously used and commanded, Anno 420.

Reliques of Saints and Holy Men, esteemed and adored: these are things left or remaining of some part of the Body, or somewhat which hath touched the Body, or been in Possession of such Men: as were esteemed Saints.

Lastly abridged the Sacrament, or since the People have been debarred from receiving the Sacrament of the Altar in both kinds, that is both Bread and Wine, Anno 1414.

Introite, an Entree or place to go into: It is the first part of the Mass which begins *Introibo ad Altare Dei*, which is so called: it was made by Pope *Celestine*.

Incense, the burning of a perfume in a Pot, in Service time, was brought in by *Lea* the first: see *Cent. 2.*

Agnus Dei, an Hymn beginning, the Lamb of God that taketh away the Sins of the World: put into the Mass by Pope *Sergius* Anno 688. but of late these Prayers are turned into round pieces of Wax with the Print of the Lamb on it: which being Consecrated, is held as a preservative against Tempests, Lightning, Fire, Earthquakes, and sudden death.

Shaving of Priests, first instituted by *Anacletus*, Anno 169.

Golden or Tynn Vessels ordered for the Service of the Altar, by *Urban* Bishop of Rome, Anno 225. or thereabouts.

Image Worshipping brought into England first Anno 714. which was in a Council at Rome, decreed to be set up in Churches, and also to be Worshipped and Adored: in time of Pope *Gregory* the third.

Saundy Thursday, that is the Eve or Day next before our Saviours Crucifixion, commonly called *Good Friday*: Instituted in the Year 1361. the last *Thursday* in *Lent*.

Caveats of the Mass, called also *Cautelas* of the Mass; are such things as the Priest must do before he say Mass, and observe in the time of Mass.

Introite, the entrance or beginning of the Mass, which is by a text of Scripture, or other Sentence: first brought in by Pope *Celestinus*: others by *Gregory* the great, Anno 594.

Preparation, the Preparation to Mass, which is by *Judica me Deus*, *Psal. 43. 1.* and two Prayers wherein the Intercession of the Blessed *Mary* the Virgin is desired, or dained first by *Celestinus*.

Confiteor, the Prayer of confession of Sins, brought into the Mass by Pope *Damasus*: the Confession in the beginning of the Mass.

Gloria in Excelsis, Glory to God on High, the Angels Song, *Luk. 2. 14.* was brought into the Mass by *Teligi*.

pbw.

phorus, Anno 140. or 142. but then there was no Mass in the World: therefore more truer as others say by Pope *Symachus, Anno 510.* to which was added.

Laudamus te, &c. We Praised thee O God, We acknowledge thee to be the Lord.

Dominus Nobiscum, the Lord be with you, and the answer, *Oremus,* let us Pray: with the Collects, or short Prayers: which have no certain Author named by whom they came to be used; but doubtless they were borrowed from the Greek Liturgy.

Collects, short Prayers gathered together and made by diverse and sundry Authors; but chiefly by *Gelasius* and *Gregorius*: they were called **Collects**, because in the City of Rome, they said them over the People collected or assembled together in their station days.

Gradual or Responsary, are songs used to be sung at the steps going up to the Altar or Pulpit with *Hallelujah*. It is said that *St. Ambrose* made them, but Pope *Gregory* ordained them to be used in the Mass.

Hallelujah, Praise ye the Lord: It is used as a sign of exaltation, and signifieth a joy beyond all expression or utterance, it is much repeated in the Mass.

Sequences, following songs, or things which follow in the Mass, these were sung on Festivals, and brought into the Mass by Pope *Nicholas*.

Epistle and Gospel, are the Writings of the Apostle *St. Paul* and the four Evangelists, which were not used to be read in the Church service in the Primitive times, but brought into the Mass as some say by *St. Jerome*, others by *Damasus*, some to *Telephorus*: but it is certain Pope *Anastasius* ordained to stand up at the hearing of the Gospel read about the year 406.

Credo, the Creed, or Christian Belief, or Articles of the Christian Faith, or Apostles Creed: It was ordained to be sung in the Mass by *Damasus*, others by Pope *Manlius, Anno 340.*

Offerings, were Oblations, or offerings made by the People entering the Church upon Festival Days and Sundays. This was ascribed to *Eurichianus*, about 280. others say it was ordained by the Synod of *Matiseon*, but it is uncertain by whom.

Elevation and Adoration of the Host, which is the Priests lifting up of the Wafer Cake in the Sacrament, and the Peoples falling down upon their Knees and Worshipping it: which was ordained by *Honorius* the third, *Anno 1222.*

Pater Noster, Our Father or the Lords Prayer, was by *Gregory* ordered to be said or sung of the People, after the Canon of the Host.

De - Maria, Hail Mary full of Grace: the beginning of a Prayer said to the Virgin Mary.

Distributio Communions, the giving of the Communion; the distribution of the Bread and Wine amongst the People.

Post Common, are some Sentences & Collects used to be said after the Canon and Communion: which the Mass Book requires to be used in an odd number, as 1. 3. 5. but never to pass the number 7. the last post common is the last Prayer.

Ita Missa est, is the Priests dismissal, or sending of the People away, the Mass being then ended.

Conones, the end, or utmost extent of things.

Pachal Torch or Taper, first invented by Pope

Sozimus, Anno 417. it is an hallowed Wax Taper, or Candle upon *Easter Even*, by distilling into it crosswise 5 hallowed grains; and so reserve it to the Ascension or Pentecost.

Private Mass, is Prayers whispered over by the Priest, which the lay People for to hear is counted profane-ness.

Rosaries, a pair of Beads, called Fifteens, containing fifteen Pater Nosters and 150 Aves: Beads to pray by, much used by the Papists which are of the Arch-confraternity of the Rosary, Instituted by Saint *Dominick*.

Supremacy of the Pope, above the Emperour; and the Church of *Constantinople*, began about 607 till which time all general Councils were summoned by the Emperour, and the Bishop of *Constantinople* had the chief Prerogative of all Patriarchal Seats.

Jubile, or Year of rest, first appointed by Pope *Alexander* the sixth, *Anno 1500.* for travellers to come to Rome to receive pardons not only for themselves, but for toher persons in any place wheresoever.

Holy Water brought into the Church by *Alexander* the first, *Anno 123.* others by his Successor Pope *Sextus*.

Altars Instituted by *Sextus, Anno 135.* and *Felix* after ordained them to be Consecrated *Anno 271.*

Catholic, first given to the *Romish* Christians, *Anno 38.* it signifieth as much as Universal.

Bells first used in Churches by *Paulin* Bishop of *Nola* in *Campania, Anno 458.* from whence Bells were called *Campane*, and Saints Bells called *Nole*: ordained to be rung in Churches by *Sebirianus* the Pope.

Consecration of Bells, *Anno 968.* first ordered by *John* the 14th.

Bowing the knees at the Name of Jesus *Anno 1275.*

Candles ordered to burn in Churches in the day time during Mass, by *Constantines* command, *Anno 320.* some say 409.

Churches first Built for Christians, *Anno 224.* and afterwards in *Anno 253* came to be Consecrated places, set a part only for Divine Worship. *Anno 228.* and to have possessions. *Anno 219* to have Church-Yards instituted, and laid to them. This is Doubtful.

Copes, that is, a Vestment to put over the Priests Shoulder that served at the Altar, Instituted by Pope *Stephen, Anno 256.*

Crosses first set on Steeples, by *Connal* King of *Scotland, Anno 568.*

Crucifixes, Christ on the Cross painted in Churches, *Anno 461.* with other Church Histories out of the old and new Testament, by *Paulin* Bishop of *Nola*.

Ecclesiastical Degrees, or Offices in the Church, were Instituted by *Casus* Bishop of *Rome, Anno 284.* as,

Officiarius, the Door Keeper.

Lector, the Reader; one that reads Mass, a Priest.

Exorcista, Exorcist or one that adjures foul Spirits out of Mens Bodies.

Acholuthus, an Acholyte; a Minister to bring Water, Wine and Light to the Altar, a Candle or Taper bearer.

Subdiaconus, a Sub-Deacon, an under Servant.

Diaconus, a Deacon; one to oversee the Poor, and distribute Alms.

Presbyter,

Presbyter, a Presbyter or Preaching Minister.

Episcopus, a Bishop or Ruler of the Church in his Diocels.

Ember or Fasts, whereof four were appointed before the times of Ordination, by *Chalixtus*, Anno 219.

Gospel Reading, it was ordained by *Anastatius* Anno 398. that all Men should stand to hear it.

Saints Days or Festivals, Holy Days, when Instituted: as,

Advent Sunday, observed about 433 but the number of Sundays in Advent was instituted about Anno 1000.

All Saints, in Honor of all Martyrs; kept before the Year 835.

All Souls, ratified by Pope *John* the nineteenth, but Instituted by *Boniface* Anno 607. others say 993.

St. Andrew, his Bones translated to constance, and his Feast by all probability instituted 359.

Annunciation, observed in the time of *Athanasius* 357.

Circumcision, in the fifth Century after Christ it was observed.

Conception of Mary, Instituted In *England* 1068. others 1120 and 1386 or 1368.

Corpus Christi, Instituted by *Urban* at the instance of *Thomas Aquinas*, 1264.

Exaltation of the Cross, Instituted upon the recovery of the Cross from the *Persians*, 629.

St. John Baptist, observed about 488 and commanded to be kept as well as other Feasts 813.

St. Luke, St. Bartholomew, and St. Thomas Feasts; Instituted in the seventh Century about 1130.

St. Mark, St. Matthias, St. James; Instituted about 1050.

St. Martin kept, 813.

St. Michael, Instituted by Pope *Felix* 487. others say 390 and 500.

Nativity of the Virgin, made a Feast by *Sergius* 695. others first observed by *Fulbert* Bishop of *Chartres* in *France*, 1007.

St. Peter Ad vincula, instituted 317. others say 440.

St. Peter and St. Paul kept 813.

Purification, Instituted at *Constantinople* upon a Plague and Earthquake, 542.

St. Simon and Jude about 1090.

Transfiguration, observed in many places about Anno 700.

Trinity, Instituted by *Gregory* 834.

Visitation of Our Lady, Instituted by *Urban* the sixth, Anno 1389. others 1441.

Triumph of the Cross, Instituted in *Spain* in Memory of a Victory over the *Moors*, 1213. with hundreds more of Popish Holy days, which many of them you will find mustered up together, and the days on which they are kept, in *lib. 3. chap. 3. numb. 59.*

Gloria Patri, Glory be to the Father &c. added to the Psalms by *Damasus*, Anno 360. and also Hallelujah.

Pope, first so called by the Bishop of *Rome*, Anno 154.

Godfathers and Godmothers at Baptism ordained by Pope *Hyginus*, Anno 153.

Hymns sung by turns, is ascribed to be an injunction of *Ignatius* about Anno 71. others say Anno 383.

[]

by *Flavian* and *Diodore*: others 387.

Consecrations of Virgins, by *Pius* the first, Anno 159.

Fonts, also Instituted by him about the same time.

Holy, Holy, Holy, Lord God of Sabaoth; instituted by *Sextus* the first, Anno 132. See *Sabaoth*.

Kissing the Popes Feet, first begun in Pope *Constantine*, Anno 709.

Offerings, Instituted in the Council of *Maseon*, Anno 588. and confirmed in the Year 813 at the Council of *Mentz*.

Patronages of Churches, first begun Anno 407. in the Council of *Mela*.

Peter pence, first paid to *Rome* by *Ina* King of *West Saxons*, Anno 689. that was a Penny from every House, some say it was in 706.

Responses and Lessons gathered out of Scripture for the Church use, Anno 441.

These things with hundreds more are in use in the *Roman* Christian Church, of which some are retained by the Reformed *Protestants, Calvinists* and *Lutherans*: but others rejected and expunged out of their Liturgy and Belief, as Frivellous and Superstitious: of which see more in *Henry Isaacson* Epitomized History of the Church.

And for conclusion to all, I have in the *Heathen, Turkish, Jewish* and *Romish* Religions given you a [T]ast of all the Grand known Religions that ever was (and less I hope will be) in the World; by which you may see generally the ways of all People, Languages, and Nations, which in their description I shall now forbear to speak any thing concerning it, but only give a brief account of their Situation and Habit, &c.

XI. He beareth Or, a *Wild Irish* man, or an *Irish* Cague; holding an half Pike in his left Hand, in bend sinister, the Head downwards, all proper. The Habit of these kind of wild People, is to go bare headed, their Mantle about their shoulders, which they call a *Brackin*, or *Irish Mantle*: their Shooes, they call *Brogues*: and Hose and Breeches made both together, and close to their Thigh, they call *Trouces*.

The place of their abode is called *Ireland*, it is scimed under the 8 and 10 Climats, the longest day being 16 hours in the South parts, and 17. 3 quaters in the North. It is an Island wholly invironed with the Salt Seas: some Historians say that the Soil, Air, the Habits and dispositions of the People differ not much from the old *Britains*, but more Barbarous, being Man-Eaters and Drinkers of the Blood of them they slew in Fight: neither were the Women free from such savage customs; the modern *Irish* are somewhat better by reason of their Commerce with civil Nations, but the *Wild Irish* of the poorer sort are termed *Bernes*.

Their Language is their own, having no affinity to any save the *Highlanders* and the *Hebrides* in *Scotland*: some hold it was originally *Brittish*, or a Dialect of it but by reason of their intermixture with *Norwegians, Danes, Easterlings*, and *English Saxons*, hath now but little affinity with the *Welsh*. The Characters or Letters used by them

them are directly the same that were used by our ancient Saxons in England.

The **Hanks** or **Hanings**, a people that inhabit the *Isle of Man*, which are supposed to be originally of the *Danish* and *Normegian* Race, for their Language is mixt of the *Normegian* and *Irish* Tongues, and in many things they can understand one another. It is now under the *English* Command, being taken from the *Saxs*, who now follow generally the *English* Laws and Manners.

The **Redhanks**, a people that Inhabit the *Hebrides*, or *Western Islands*, situate on the West of *Scotland*, which are in number 44; the People of them all, as well in Language as Behaviour resemble the *Wild Irish*, very rude, and without all shew of Civility.

The **Oradians**, a People inhabiting the *Isles* of the *Orades* or *Orkney*, in number 32; situate over against the North of *Scotland*; the People use the *Gothish* Language, which they derive from the *Normegians*, in whose Possession they once were, and of whose qualities they still have a smack.

XII. He beareth Argent, an **Egyptian**, or a **Sip**, or a **Han of Egypt**, in the Attire of his Country, with an Apple in his right hand, all proper. The *Egyptians* as well as the *Turks* and *Arabians*, the *Indians* and the *Sumatrans* do wear **Turbuts** on their heads; for the rest of the Habit, it is **Hose**, or **Samashes** over the tops of their shoes, **Doublet** and **Breeches**, with an upper Garment like a **Gown**, turned up about the Neck, and down before; having two Sleeves with slits or holes in the middle, whereby to put it on, either to the Elbow or Hands. These people lye near the Torrid or Fiery Zone, so that the heat of the Sun hath not the power to make them black, yet it doth very pitifully Sun-Burn, that they are generally called **Tawney Moors**, or **Gypies**.

In the Province of *Mozemogoro* the Inhabitants have a rough Skin, like unto **Buff Leather**, of which Kind and Complexion there be many in those parts of *Guiana*.

The Inhabitants of *Florida* are of a colour like **Beals**, the reason is, that they anoint themselves with a certain Ointment, which seconded by the heat of the Sun proves effectual to their design.

The Inhabitants of *Libia* or *Barmarica*, a Province or part of *Egypt*, or near Neighbours to it, and consequently much of the same condition, for they be governed by the same Laws and Customs, but do differ from them in habit, being more dark and black of Complexion.

XIII. He beareth Azure, a **Chinensian**, or a **Han of China** in his Country Apparel, holding his two hands together upon his Breast, all proper. These are a vast people, whose Country is almost as large as all *Europe*, and lyeth in the East and by North parts; they are described to wear **Intulas** or high copped Caps, furled in the lining or turn-up; and to have under

Coats girt about them, with a **Loose over Garment** with wide sleeves.

China lieth as say the most exactest Geographers from the 130 to the 160 degree of Longitude, and from the Tropic of *Cancer* to the 53 degree of Latitude, so that it lieth under all the Climes from the third to the ninth; so that the Longest Summer day in the South, is but 13 hours 40 minutes, but in the North 16 hours 3 quarters; those parts near the Tropic, the Air is somewhat of the hottest.

The people are for the most part of swarthy Complexions, but more or less according to their nearness to the heat of the Sun, short Nosed, black Eyed; and generally all of very thin Beards: They wear their Garments very long, with long loose Sleeves; and their Hair much longer than their Neighbouring *Tartars*, who wear their Hair exceeding short, and their Cloaths much closer.

Their Marriages they celebrate most commonly in the New Moon, and many times put them off till *March*; when the Year beginneth with them, as with us; in which Solemnity they spare no Cost or Charge for Music, Stage Plays and good Cheer many days together. They eat thrice a day, Drink their drink hot, and eat their Meat with 2 Sticks of Ivory or Ebony or the like, like, not touching their Meat with their Hands at all.

They have long enjoyed the use of Printing before it was known in *Europe*, but Print not as we do, from the left hand to the right, nor as the *Jews* from the right to the left, but from the top of the leaf downwards to the bottom. Guns also have been used by them Time out of Mind.

Their Women are for the most part of a fair Hair, of which they are very curious, binding it about their heads with Ribbands garnished with Pearls and Precious Stones; Neat in their Dress and very costly in their Apparel, with reference to their Estates and the degrees of their Husbands.

XIV. He beareth Or, an **Arabian**, or a **Han of Arabia**, in his Country Habit, holding of a **Bot** unfurled in his right hand, all proper. *Arabia* is a kind of Peninsula, being encompassed on the West with *Mare Rubrum* or the Red Sea; on the South by the *Arabick* and *Indian* Seas, and on the North East by the *Persian* Waters. It hath several Provinces in it as *Arabia Deserta* or *Desert*, *Arabia Petrosa* or *Rocky*, and *Arabia Felix* or *Happy*: whose Inhabitants are adorned with **Turbuts**, having flat round Crowns set within them; they have under Coats down to the Knees, girt about the middle with a **Cotwel**; and their upper Vestment is a wide Bodied Coat or **Gown**, with Sleeves open in the middle. Some wear **Robes** (without Sleeves) which reach down to the Heels.

The people of *Arabia Deserta*, or *Kedar* as the *Jews* call it, are said to be of mean stature, raw boned, tawney or swarthy complexioned, having Feminine Voices, of a swift gate, of no set Dwellings, but dwell in Tents,

G g

which

which they remove like walking Cities, as the Pasture for their Cattel failed them; or else taking no more care for Houses than the Boughs of Trees to keep them from the Sun, or other extremity of Weather.

The *Saracens*, a People inhabiting *Arabia Petraea*, or the Mountainous, are said to be a mixt Generation descended from *Chus* and *Ishmael*, the *Midianites* and the *Amalekites*, which at the last united in the name of *Saracens*: They are a Martial People, half Naked, clad as far as the Groin with Painted Callocks, ranging up and down on swift Camels and Horses; they wander from place to place without House or Home, or use of Laws; nor can they long endure the same Air or Soil, living upon every Prey. Their Wives they hire only for a time, and for a shew of Matrimony they present their Husbands with a Spear and a Tent, but they part with them when they please.

Arabia Felix had a more Civil People than the rest of the *Arabians*, yet had many strange and Barbarous Customs: Adultery was punished by Death, and he was an Adulterer which enjoyed any that were not of their own Kindred, be she his Sister or Mother, and so they kept themselves in their own Families; Community of Wives or Women was esteemed no Crime, and thus they continued till the coming of the *Turks* amongst them.

XV. He beareth Argent, an *English Man*, with his *Cloak* on his Shoulders, and the Skirt of it cast over his right Arm, the rest of his Habit according to the *Mode* of the Countrey, all in their pleasing colours. *England* lieth under the Temperate Zone, Cold in the Winter, and Hot in the Summer, being between 50 and 60 Degrees to the North. The Ancient Habit used by them was a loose Garment called a *Cloak*, which they cast over their other Cloaths, which is *Breeches*, *Doublet*, *Hose*, *Shoes*, which are as variable in their Changes, as is the Moon; in which respect we are termed the *French Hens Apes*, imitating them in all their Fantastick devised fashions of Garbs: So that the Comely *Cloak*, altogether used in the beginning of my time, is now scarce used but by old and grave Persons; and in place thereof is come up *Jumps*, *Jackets*, *Wide Bodied Coats*, with *Sleeves*: they according to the fashions, being the only drefs of *English Men*. So that now the Saying falls true, *He that will describe an English Man, must Draw him Naked, with a pair of Taylors Sheers in one hand, and a piece of Cloth on his Arm.*

The place *English Men* inhabit, is called *Great Britain*, one of the greatest Islands in the World, except *Java*, *Barneo*, *Sumatra*, and *Madagascar*. The longest day is 16 hours and some Minutes, but in the Northern parts it is 18 hours, where some observe that there is scarce any Night at all in the Summer Solstice, but a darker Twilight.

This Island is divided into 3 parts, *England*, *Wales* and *Scotland*, the first being the chief and principal part,

*

of which we shall say no more, but leave her Commendation in these two Verses.

*For Mountains, Bridges, Rivers, Churches fair,
Women and Wooll, England is past compare.*

Their Language is the *Teutonick* or *German* refined, having many Hundreds of *Latin* and *French* words, with *Greek* and *Hebrew*, that their Primitive words of Monosyllables (of which their Ancient Language did much consist) is now much lost: And in Writing, their *Saxon* Characters, is within this 200 years, or thereabout lost, and the *Latine* Letters, with the *Italick* generally used.

The *Welsh* are the remaining Off-spring of the *Britains*, the Ancient Inhabitants of *England* and *Wales*, till they were forced out of their Countrey by the *Saxons* and *Danes*, into two corners of it, called *Kent* and *Wales*, where they remain to this day; and after several conflicts with the *Saxons*, *English* and *Normans*, were united to their Laws and manner of living, only retaining their own Native Language, which they call *Gomri*, and themselves *Gomri*, as being Originally descended from *Gomer*, the first Son of *Japheth* the Son of *Nash*, of whom the Isles of the Gentiles were Peoples, every one after his Family in their places, *Gen. 10. 2. 5.* These *Welsh* had an old Character used by them, of which you may see further *chap. 10. numb. 6.* but those being long since extinct, they now use the *Latin* Alphabet, but with an addition of several double Letters, which they pronounce suitable to their guttural Language, as *Dd eth*, *Ch egh*, *Ng ung*, *Ll ethl*, *Pb eve*, *Tb eth*, *Ww*, &c.

The *Scots* and *Picts* were the ancient Inhabitants of the North parts of *Britain*, called now *Scotland*; but in elder times it was the seat of the *Caledonians*, and by them called *Caledon*; and sometimes *Albian*, from *Albin*, a principal Province in the North. It is now divided into the *Highlands* and the *Lowlands*, the first inhabited by the *Irish Scots*, a Wild and Barbarous people, worse than the Wild *Irish*, the other by the *English Scots*, a more civil people, being of the Race of the *Saxons* and *English*, the first speaking the old *Irish*, and the other a broad Northern *English*, with a Dialect only proper to it. These people had a Custom, that took beginning in King *Ewen* the Thirds time, That the King and his Successors should have the Maidenhead or first Nights Lodging with every Woman whose Husband held Land from the Crown; and the Lords and Gentlemen from all those whose Husbands were their Tenants: This continued till the days of *Malcolm Connor*, who at the request of his Wife abolished the same, ordering that the Tenants should pay for such an Homage, a Mark in Money.

XVI. He beareth Or, a *French Man* in his Country fashion, with his *Cloak* hanging on his back, all proper. *France* is under the Temperate Zone, therefore the Inhabitants in cold Weather keep warm, and Muff them

themselves; but in Summer through Fantastick Drestes go almost Naked, and all because they will be in the Fashion; for as their Proverb is, *Pride seeth in Cold*; and better be out of the World than not to follow the Garb in its Mode.

This people were anciently called *Gauls*, and the Countrey *Gallia* and *Galatia* or *Gaul*.

The now *French* take their name from the *Franks* a people of *Germany*, who Conquering the *Gauls*, call their Countrey *France*: So that they are at this day, a mixt people of old *Gauls* or *Britains*, *Franks* and *Barbarians*.

Their Language in the Original thereof, is a compound of the old *Gallick*, *German* and *Latine* Tongues.

XVII. He beareth Or, a *Spaniard* or *Spanish* Man, or a *Man of Spain*, in the Habit of his Countrey, proper. *Spain* is a Peninsula, being compassed on the West and North West, by the great Sea called the Western Seas; and by the Straights, and the Mediterranean Sea; the Neck of Land joining to *France*. The inhabitants of this Kingdom of all the *European* People, are most happy, in not given to Change; for as it is reported of the *Spanish* Dominions that the Sun is never off some part of it (by reason of Foreign Isles and Plantations which they have all the World over,) so that the Change of the Moon is no Change for their Habits as in other places; for they are by all Historians said to wear high Crowned Hats with narrow Brims, short hair, sharp pointed and long Beards, and Whiskers up the Cheeks, Ruffs about their Necks; their Doublets with short and narrow skirts, and broad Wings at the shoulders; Ruff Cuffs at their Hands; their Breeches narrow and close to their Thighs; their Hose gartered, and Shoes with roundish Toes: They ever go Armed with a long Sword (let the Person be never so mean) with a short Cloak cast over their Shoulders.

XVIII. He beareth Gules, a *German*, or a *Man of Germany* in the Country Fashion, proper. This Empire or Kingdom lyeth between the 45 and 55 Degrees of the North Pole, and therefore must be tempered with Hot and Cold, being between both those Zones. They and all the Neighbours round about them, wear Doublets, Breeches, Cloaks, Hose and Shoes; varying in their Cuts and Shapes, as others of their adjoining Kingdoms.

XIX. He beareth Vert, a *Civilized Ancient Brittain*, proper; his Coat without Sleeves, and reaching down to his Knees, Or; girt about with a *Belt* and a *fauchion* hanging thereat, with his Hand upon the Hilt; holding or supporting an *Half Pike* in his right, of the Third.

A. such a Man with a short Coat girt about him G. with an Apple in his right Hand, and the left on his side, is a Coat quartered by *Schroten Van Kindtberg* of *Switzerland* in *Germany*.

G. such a Man Barry from Neck to Foot A. and B. holding in his hand a Garland of Bays, his left support- ing a Hunting Staff Bendwise Sinister crossing the middle

of his Thigh S. on his Head an Infula Cap turned up A. is the Coat of *Van Heinitz* of *Misnian* in the *Netherlands*.

XX. He beareth Gules, an *Ancient Brittain*, with his Body painted, a Chain about his Neck and Middle, supporting an *Halbert* with his right hand, and a *Shield* on his left Arm, all proper.

The *Inhabitants of Bangi* in the *East Indies*, both Men and Women Paint and Embrauther their Skins with Iron Pens, putting indeliable Tinctures thereinto.

They of the Cape of *Lopo Sanfalves*, both Sexes pink their Bodies in diverse forms strange to behold, wherein they put certain Grease mixed with colour made of Red Wood.

The *People of Candou Island*, and the Black People or *Candares*, of the Land of *Mosambique* and *Ethiopia*, also the great *Gaga Calando* King of *Gagas*, are and have their Bodies cut and carved with sundry works, and Anointed with Colours.

The *Virginians* are bid to raise their Faces and whole Bodies with a sharp Iron, which makes a stamp in curious Knots, and draws the proportion of Flowers, Birds and Fish; then with Painting of sundry lively Colours they rub it into the Stamp which will never be taken away because it is dried in the Flesh.

The *Egyptian Boys*, both Men and Women did stain their Skins into Knots and Flowers of Blew, made by the pricking of the Skin with Needles, and rubbing it over with Ink and the Juice of an Herb.

XXI. He beareth Argent, a *Niger* or *Negro*, a *Blackmoor*, an *Indian*, an *Ethiopian*, or a *Nazocco*, holding or supporting of a *Dart* or *Broad Arrow* with the Head erecd (or the Feathers dejected) all proper. These *Blackmoors* in Blazon are termed by any of these names of their Countreys, because their parts of *Africa* in which they dwell, are all under the Torrid Zone, which Burns them: They are generally Drawn Naked, with a *Towel* about their Bellies, or in *short Coats* to the middle of the Thighs and to the Elbows, and *Wreaths* about their Temples sometimes, as in this example.

A *Negroes* head to the Shoulders, Clothed Gules, Garnished, the Ears Jewelled Or, Temples adorned with a *Wreath* Argent and Gules, the end tyed up in a *Bow Knot*, is the Crest of the Worshiptul Sir *John Conmay*, of *Potrothan* in *Flintshire*, *Barronett*.

O. out of a *Coronett* A. a *Negroes* head couped below the Shoulders, Temples wreathed, the ends floatant each side, and on his Crown 3 Feathers of the first, is both the Coat and Crest of *Thommendorf* of *Silici* vs.

A. a *Negroes* head couped at the Shoulders, Garment G. turned and crowned Ducally O. is the Arms of the Bishoprick of *Freyfing* in *Germany*.

In the parts of *Barbary* are contained these several Kingdoms of *Fez*, *Morocco*, *Tunis*, *Tremesen* or *Algiers*, with the chief Isles, of which there are 16 in number; the whole Land of the *Negroes*, with *Aethiopia* *superiour* and *inferiour*; where the People generally are of a dusk-

sh colour inclining to blackness, much of the same nature of the *Arabians*, and speak the *Arabick* Language, except *Fesse* and *Morocco*, which speak the old *African* or *Panick* Tongue.

XXII. He beareth Sable, a *Brasilian*, or a Native of *Brasil*, according to the Climate of the Countrey in his usual Habiliments, viz. a *Brasil* Man, with a *Crown of Feathers* on his head, a cover of the same over his Belly, *Chains* of Gold about his Neck, and under his Knees (or gartering places) supporting a *Club*, the head reversed, in his right hand, and holding up the Leg of a Man couped at the Thigh and crazed in the Anckle in his left hand. This Countrey of *Brasil* is in the South part of *America*, which lieth under the Torrid Zone Southerly; therefore the People must be cruelly Sunburned, and of a Tawny Swarthy Complexion; such as we usually call Tawny Moors.

Some of these Natives cover their Bodies with the Skins of Beasts; but most draw them thus, and so they are often made for Supporters for Noble Persons Coats.

G. a demy *Brasilian* crowned with Feathers of variable colours, holding up his both hands, proper. Or a *Brasilian* in full Aspect, his hand elevated, is the Coat of *Don Wien* a *Spaniard*.

There is in this South part of *America*, (being in it self a Peninsula) these great and vast Provinces, as *Castella Aurea* or *Terra Firma*, *Granada*, *Peru*, *Chile*, *Paragney*, *Brasil*, *Guyana* and *Paria*. They were of old Eaters of Mans Flesh, are Tall and of strong Bodies, spending most of their time in Songs and Dances. The Women of a more white and clear Complexion in *Granada* than any of their Neighbour Countreys, and more handsomely Habited, being Apparelled in Black and party coloured Mantles, girt about their Middles, their Hair tyed up and covered with Chaplets of Flowers, altogether ignorant of Letters; having no Houses but on the Tops of Trees, the Trees of *Brasil* being of that incredible bigness, that whole Families live on an Arm of one of them, every Tree being as populous as the most of our Villages.

XXIII. He beareth Vert, a *Virginian*, or a *Man of Virginia*, also a *Floridan* or an *American* in the Garb of his Countrey, or in his Country Dress, in his right hand a Bow ready strung, in his left an Arrow held Bendways sinister over his Breast, all proper. The Natives or old Inhabitants of *Virginia* and *Florida*, were only clothed with a kind of Apron before the Belly; the Principals adorning their Heads with Feathers, their Necks and Legs with Chains or Bracelets, all the rest of their Bodies are Naked; these parts of *America* lyeth under the 30 and 40 degrees of the North Pole, therefore as they are in the Temperate Zone, so they are White, as all the *Europeans* are.

In the Provinces of *Jucuman* and *New Spain* with *Mexico*, the People or Natives of those Countreys go almost all Naked, and adorn themselves with Feathers, Beads, Chains, and such like trivial things.

XXIV. He beareth Azure, a *Wild Man*, or a *Wood Man*, or an *Hairy Man*, with a *Garland* of

Laurel about his head and middle, proper, supporting of a *Club* with his right hand, Or; and his left hand on his side. See lib. 2. cap. 17. numb. 76.

B. the like to the *Sinister*, proper, supporting an Oak Tree moored up by the Root with his left, the right hand on his side, all proper, is the Coat of *Van Drachsdorf* of *Misnian*.

Out of a Coronett a demy Wild Man holding two Eagles feet G. on his Head 3 Laurel leaves is the Crest of *Van Der Schultenburgh*.

Pliny and others make mention of many Hairy Nations, which are deformed with Hair growing all over their Bodies, except their Faces and Palms of their hands, as in the Island of *Buthnam*, where the Hairy men are very wild and fierce, and eaters of Human Flesh.

In the Province of *Guacai-Rina* there are also such *Wild Men* which were first seen in *Boronia* with the Marchioness of *Soranum*, who brought there with her a Girl of eight years of Age all Hairy, being the Daughter of a Wild Man of 40 years old, born in the *Canaries*, who not only begot this Daughter, but another of 12 years, and a Son of 20 years of Age, whose Hairy Effigies *Aldrovandus* hath exhibited in his History.

Some people that live towards the *Andes*, in *Brasil* in *America*, are said to be all over hairy like Beasts.

There are seen both in the *East* and *West Indies* *Wild Men* who are born smooth, as our Infants are, but in tract of time their Hair increaseth mightily in most parts of their Body. And amongst other Wild Men the *Cinnaminians* are to be admired for their prolix or large and long Beards, and the hairyness of their whole Bodyes, the Women also being all over hairy.

Many have been Born abounding with shagged hair like unto Dogs; we read first of *Esau*, that he was of this Hairy Tribe, *Gen.* 25. 25. and 27. 11. &c. Also all rugged with Hair was one Born in the year 1282. and another *Anno* 1540. Moreover *Columbus* confesseth that in his Travels he saw a *Spaniard* beset with hair in all parts of his Body except his Hands and Face. I my self have seen a Woman all Hairy, no part of her Face free, having a long Beard, about the Year 1661.

2. HAVING now given a brief description of the Fashion and Habits of most remarkable Kingdoms and Countreys used by Men; I shall now give as short an Account of such old fashioned Habits as are worn by the Women of those foresaid places: And among the rest give some account of Women in their Habits, as they are exercised either in Offices or Callings.

XXV. He beareth Argent, a *Queen* in the Robes of Majesty, *Crowned*, with a *Scepter* in one hand, and a *Mound* in the other, all proper. She is also termed a *Queen* in her *Mantle of Estate*, &c. This is born by the name of *Queenhope*.

A demy

A demy Queen in her like Robes of Majesty, is the Crest of *Quecaboron*.

XXVI. He beareth Argent, a Queen only adorned with her *Surcoat* and *Girdle of Honour*, Purple, her *Robe* Gules, turned up Ermyne, *Crowned*, with a *Scepter* in one hand, and a *Mound* in the other, proper. These two are in different Habits of Estate; the first being a Queen in her Mantle of Estate, or Robe of Majesty, which hath only a Cape and no Sleeves, and is so long, that in her Procession it must and is born up, which is called her *Train*: But this Queen is only habited in a Robe that reached only to the Heels and hath no Cape, the Sleeves extending no farther than the middle of the Arm; after this form our Fore-fathers did Depict or set forth one of the four parts of the World called *Europe*.

A. a Queen of *Morocco* in her coat close girt with wide sleeves and hair pendant, holding of a Miter in her right hand, and her left on her side, is the Coat of *Kirchberg* in *Bavaria*.

XXVII. He beareth Argent, a demy Queen in her *Surcoat* and *Mantle of Majesty* turned off her shoulders, holding the Skirt in her left hand, and crowned, proper. I have found this also Blazoned a *Demy Queen*, and a *Demy Queen in her Vestments*, which is sufficient, for she cannot be said to be a Queen except Crowned and adorned in her Robes. This is born by the name of *Queendam*.

XXVIII. He beareth Or, a *Uirago* (or a *Manly* or *Manlike Woman*) her *Scarfe* about her middle, the ends floatant, *Feathers* in her *Hat*, and a *Naked Sword* in her right hand resting on her Shoulder, and the left on her side, all in their pleasant and proper colours. After this manner are the Valiant Women of old described with Sword, Shield and Launce in their hand, or that by which they did Achieve some Noble and Heroick Act.

The Ancient *Amazons*, of whom we read so oft in Learned Authors, were wont to scar off their Right Breast or Pap, both of themselves and their Daughters, and thereupon were called *Amazons*, which signifieth in the Greek Tongue *No Breasts*; and this they do, because it shall be no hindrance to them in their Shooting. The Chief of the Guard to the King of *Congo* are Left-handed *Amazons*: Also they serve the Emperour *Monomota* in, who after the manner of the Ancient *Scythians* or *Asiaticque Amazons* have their Breasts cut off.

Worthy and Valiant Woman Described.

Judeth, who to free the City of *Bethulia* from the Siege of the *Assyrians*, ventured into the Camp, and slew *Holofernes* chief Captain of the Host, whereby she freed the City; so she is drawn with a Sword or Fauchion in

her right hand, and the Head of *Holofernes* by the Hair in the other.

Esther, hazarded her Life to free the Jewish State from the Tyranny of Wicked *Haman*. She is drawn with Royal Apparel, a Scepter in her hand and a Crown Royal on head; both Young and Beautiful.

Deborah, a Prophetess, a Mother in *Israel*, and a great Commander, she overcame the Army of *Sisera*, the chief Commander of the *Canaanites*, and is drawn with a Head piece on her Head, a Shield on her Arm, and a Fauchion in her right hand, her Mantle flying about her.

Jael, the Wife of *Heber*, she invited *Sisera* the Captain of *Jabin* into her Tent, where with a Nail and Hammer she slew him, driving it into his Temples; she is described by a Hammer in one hand lifted up, and a Nail in the other, her Garments according to the old Fashion.

Elizabeth Queen of England, she defended her Kingdom against all the Power and Malice of her Enemies, which though never so many, were Vanquished by her. She is drawn in her Robes of Majesty, with a Scepter and Mound in her hands, and in a Fardingale Dress or Gown with great Puffed Sleeves.

With many more which might be described, but I refer you for that matter to *Hen. I. Jaaksons* Chronology.

XXIX. He beareth Argent, a *Woman in a Fardingale Gown* holding a *Fall* in her right hand, and the other by her side. This was the fashion and manner of Attire for Ladies and them of the Nobility in the Reign of our late Sovereign Queen *Elizabeth*, and King *James* her Successor, of Happy and Blessed Memory: The Gowns were broad Shouldered, narrow Wasted, wide Breeched (set out with a broad Rowle which was called a *Fardingale*) and gathered in Plaits and Trusses to make it full in the Skirt. Their *Gorget* standing up being supported by Wyers and a kind of Roll which they called a *Pecadile*: The Attire standing round the Head was a *Wongate*: The Sleeves round and full set out in the manner of *Buffs* or *Wreaths*.

XXX. He beareth Or, a *Woman with a Coiffe* on her head, and *Gorget* or *Neckcloth* about her Neck, Argent; her *Gown* tyed up, Sable, *Petticoat*, Gules; the right hand pendant (or by her side, or hanging down) the left on her Belly, proper. This I have seen termed a *Gentlewoman*, and a *Merchants Wife*, all under those degrees, in our Fathers days, did wear Hats, or Caps with narrow Brims. This is born by the name of *Maid*, or *Maiden*.

XXXI. He beareth Or, a *Maid*, or a *Damsel* in her becoming Attire, holding a Slip of three Leaves in her right hand, and the left upon her Belly, all proper. In

In the days of old, when fair *England* did flourish: it was the Habit then of all unmarried *Girls*, *Lasses* or *Maids*, that were under the degrees of *Ladies* and *Rich Esquires Daughters* to dress themselves in this kind of Habit, viz. on her Head a *Coife* and *Croset*, about the Neck a *square Handkerchief*, on the Body a *Wasscoat* and *Petticoat*, or a *Gown*, and an *Apron* or *Kirtle* before the Belly.

But now the matter is otherwise, that to see to, there is in the outward Garb no difference between the Maid and Mistress, Dame and Servant; the Children of Tradesmen and Esquires or Knights: a thing abominable in former Ages, but now not regarded; except their whole Portion be on their Backs at a time, and then by the Modest people scoffed at; indeed a fit Reward for Pride.

B. the like Maid to the Sinister close girt, and wide Sleeves O. holding in each hand a Salmon by the middle, A. is the Coat and Crest of *Roten Van Aurnach* of *Frankford*.

XXXII. He beareth Argent, a demy *Shepherdes* with three *Ears of Wheat* in her right hand, all proper. As the Crown is the Token of a King, so the *Shepherds Crook* is a note by which the *Shepherd* and *Shepherdes* is known, without which they are but a Man and a Woman.

Therefore in the naming it, you must understand he or she beareth that which is the principal Emblem of their Function or Occupation. This is the crest of *Shepard*.

In the Base of this square, is placed a *Womans Face in full Aspect*, which of the *Dutch* is thus Blazoned, a *Face compassed about with a Cloud*; But I should rather take it to be the *Moon in a Cloud*, or *invironed with a Cloud*; and such a Bearing I find amongst the *Dutch* and *Germans* Arms, viz. Argent, such a *Face Gules*, *Nebuled* about and a *Chief* of the same *Azure*; by the name of *Van Retzenriedt* of *Smabidian* in *Germany*. Of others it is termed a *full Face*, G. *inbecked*, B.

XXXIII. He beareth Or, a *Lady* with her *Hat* and *Feather*, broad *Shoulder Band*, and *Gown* with *Skirts* after the old Fashion, *Coat open*; holding up the right hand, the other on the Belly. This was a Fashion of old, which was again taken up in the Reign of King *Charles* the Martyr, till some Ministers put them out of Conceit with their Feathers, because they were greater than their Faith.

O. a demy Lady in this posture, is both the Coat and Crest of *Hirman* of *Smabisch*.

XXXIV. He beareth Gules, a *Woman kneeling* on a *Cushion* in full Aspect, Or; the *Cassels* and *Bottom*, Vert; with a *close Hood* on her head Sable, a *Ruff* about her Neck, with a *Bibb*, or *Breast cloth*, Argent, her *Gown* with *Broad Wings* and wide *Sleeves*, Purple, her *Kirtle* or *Apron*, Azure; holding up her hands together before her, proper. This is more shorter Blazoned, on a *Cushion*, Or, a *Woman*

at her *Devotion*, habited after the old manner. Purple; Ruff, Bib, and Apron, Argent; Hood, Sable. This latter Blazon with a Woman so Praying, is the Coat of *De la Voute*.

XXXV. He beareth Argent, a *Woman* standing in full aspect at her Prayers, habited in a long *Robe* close *Girt*, with a *Mantle* thrown (or cast) over both Shoulders, and hooded to the same, all Sable. This is like one of the *Pharisaical Women*, taught by her Husband to Stand and Pray in the Market place, to be seen of the People. This is a compleat Bearing for such an Hypocrite as loves the Praise of Men more than the Praise of God.

Some term this a *Widdow* in her Mourning Apparel.

XXXVI. He beareth Or, a *Poor Woman* demy faced (or half Bodyed) or standing sideways) with a *Hat* sans *Brim*, and a *Patched Coat*, and *Apron* Grey; with a *Staff* in her left hand, Bendwise, Sable. Some term her an *Almes Woman*, a *Beggar Woman*, or a *decayed Old Woman*. By the name of *Poverty*.

XXXVII. He beareth Argent, a *French Woman*, in her Country Dress, viz. a *French Hood*, a *Laced Gorget* and *Bibb*; an *Apron* and *Gown* with *Open Sleeves*. That as made the *French Women* most remarkable to us, was their fashioned Hood, which was made with a long *Flap* or *Tippet* from the top of the head, and so hung down backwards, which end being turned up, was fastened to the top of the head. See chap. I. numb. 78.

A demy Woman with a *French Hood*, is the crest of *De la Vove*.

XXXVIII. He beareth Argent, a *Roman Ladies Face* couped below the Shoulders, proper, Adorned with a *Laurel Garland* about the Temples, Vert; Crested, Gules; Garnished or Trimmied, Or. Born by the name of *Baliscia* an *Italian Family*.

A. 3 such Heads proper, is born by *Madd. me*.

In the Base of this quarter, for want of other room, I was forced to Engrave a *Dutch Hans Cap*, Sable; Turning up, Or; Strings crossed, and Tassels, Gules. See chap. I. numb. 68. 69. Country People of *Hollands* Caps.

G. the like Cap A. turned up of the same, Tassels and Strings V. born by the name of *Stamler* of *Ausprung*.

XXXIX. He beareth Argent, a *Gossipper*, or a *Hearty Jovial Woman*, a *Friend of Bacchus*, with a *Golden Cup* in her right hand; *Hat* Sable; Ruffe, and open in the *Sleeves*, Argent; the Gown with *Cordy Robe Skirts*, and hanging or loose *Sleeves* down to the Heels, Gules; Garnished or Trimmied of the second. This is the Coat or Cognizance of *Skattergood*.

XL. He beareth Gules, an *Assirian Woman* in a long *Robe* turned down at the Neck, Argent; supporting

ing a **Spear** in the right hand, and a **Shield** with the left. Or. This is the Garb by which our Fore-Fathers did Emblem, or set forth one of the four parts of the World, called *Asia*. On her head is an **Insula** out of a **Crown Spiral**, with a **Star** or **Nail** pendant from the top of it.

XL. He beareth Or, an **Ancient Native British Woman**, in her **Civilized Garment**, with her **Hair** pendant; supporting of an **Hail Pike**, all proper. This is also termed a **Civil Antient Woman of Britain**, a **Civilized British Woman**, &c. whose Habit at the first, was only a loose Coat without any Sleeves; the Hair hanging down her Back.

XLII. He beareth Vert, an **American Woman** with a **Crown of Feathers** on her head; the like about her Belly, of various colours, with a purple **Mantle** over her right shoulder falling backwards: holding up both hands each side her head, proper. After this manner of Garb or dress did our ancient Fathers set forth one of the four quarters of the World, termed *America*.

XLIII. He beareth Argent, a **Woman** in a long **Robe** girded about the middle, with a **Nail** upon her head extending to her Feet, all Sable: Hands and Face Argent: After this manner the **Colonish Women** go **Dressed**. This is called a **Patron of Colonia**.

XLIV. He beareth Or, an **Austrian**, or a **Dutch Woman** in her Country Habit, viz. a **Hat** and **Quoife** on their Heads, **Ruffs** about their Necks, full bodied with **broad Wings** at the shoulders, and round **Petticoats**.

XLV. He beareth Azure, a **Frankford Woman** in her Country Habit: some termed them **Franconians**, and **Women of Frankeland**. This is one of the Habits that is used by them and that is by those of the better sort of the commonalty, the other see *numb.* 48.

XLVI. He beareth Argent, an **Holland Woman**, or a **Woman of the Low Countries** or **Netherlands**: a **Woman of Colonia**. This is the habit of such who are young Women and Wives: having **Gowns**, and **Corsets**, and **Quoifs**, but when they walk abroad having **Nails** over their Heads extending to their Feet, backwards.

XLVII. He beareth Argent, a **Country Welsh Woman**, in her travelling habit; that is to say a **Quoif** and **Croset** with an **Hat** on their Head, **Wast-Coat** and **Petti-coat**, with a **short Cloak** hanging about her Neck, which at pleasure she doth cast over her shoulders.

XLVIII. He beareth Azure, a **Country Woman of Franconia** or a **Frankeland Country Woman**, in her Country dress, proper. This differs from the other habit, *numb.* 45. that wearing a **Ruff**, and a **Gown** with a **Peak** before; this is a kind of round **handkerchief** about her Neck, and the **Wastcoat** with round and deep skirts, compassing the whole middle or waste:

with an **Apron** proceeding from under the said skirts, or laps.

XLIX. He beareth Or, an **Austrian Woman**, or a **Woman of Austria**, in her Country habit: This *Austria* is an Archdukedom, and a very large Province in the Empire of *Germany* lying near or bordering upon *Hungaria*. It lieth in the Temperate Zone, and yet by the Country habit seems to be very cold in the Winter.

These People lying so near *Hungaria*, are also from their habits termed **Hungarian Women**, whose dress is also the same: for they wear **Quoifs** on their Heads, **Ruffs** about their Necks, **Wast-coats** and **Petti-coats**, and **Aprons**: about their shoulders they carry **short Cloak**, the Cape and turning up on the sides, are faced with **Furrs**, and skins of Beasts.

L. He beareth Gules, a **Russian Woman** in the habit of the Country, proper: whose Country dress is a **Cap Lined** and turned up with **Furr**: their Garment a long **Coat** down to the Heels and **furred** at the Neck, Sleeve-hands, and bottom of the skirt: their **Shooes** do turn up at the Nose, after the manner of a **hook**.

LI. He beareth Argent, a **Woman of Lappia**, or a **Lapland Woman**, in the habit of that Country: the Women there are described to bear on their backs things like **Pedlars Creats**, in which they carry necessities for their use, when they are in travel from place to place.

LII. He beareth Argent, an **Italian Woman** in the habit of the Country, proper. They were in former times said to wear an under **Robe** or **Gown**, over which was cast a kind of loose Garment or **Vesture** which hung loose and open before, the same reaching to the Feet: the **Sleeves** of it were wide, with a slit in it from the elbow down, so that at the elbow it was loose from the Arm: yet the inferiour sort had no slit at all, but the **wide Sleeve** came over the Arm almost to the Hand; on the head was a kind of **Quoife**, over which hung dangling down the back an **Hood** or **Nail**, so then you may blazon this Figure thus: an **Italian Woman in full aspect**, a **fan** in her right hand, and holding up the left, proper: her **Gown** Azure, **Adorned** Or, **Vest** Sable, **Turned** or **Faced** up before, **Tenne**: **Hood** or **Nail** of the same.

LIII. He beareth Argent, a **Spanish Lady**, or a **Woman of Spain** in the Country Habit; as I said before of the Men, so the Women do not in the least alter their fashions: for they constantly wear **Ruffs** about their Necks with a certain kind of **head attire**, over an under **Robe** or **Gown**, they have a loose **Coat** down to the Feet, it hath large broad **Wings**, at the shoulders, with wide open sleeves reaching only to the Elbow, with **hanging Sleeves** behind, longer then the Arm.

LIV. He beareth Or, an **Egyptian Woman** in that Country habit, **Regardant** (or looking backwards) having an **Hood** on her head, compassing her **Shoulders**

ders & tied before on her Breast with a Ribbon, Argent: her **Petti-coat** Gules; her **Vest** or **Wast-coat** having a large skirts to the knee, and girded about the middle, of an hair colour: in such a kind of habit I have often seen them in *England* which pass under the name of **Siphses**, because they are of a Dun Swarthy or Tawny complexion. Such of them as well in Cities, cover their Faces with black Cypres bespotted with red, their Arms and Ancles they **Garnish** with **Bracelets** and **Hoops** of Gold, Silver or some other Mettle. Those in the Countrey for a **Gaile** use some **Durty Clout**, having holes only for their Eyes, and both in the City and Countrey contrary to the custom of all places else, the Women use to make water standing, and the Men couring on their knees.

LV. He beareth Verr, an **Austrian Lady** or **Gentle Woman** in the attire of that Countrey, proper. I have before given you the description of an **Austrian Woman**, which dwelleth near to *Hungaria*: as they are relating one to the other and Neighbours, but this I take by itt attire to be either one that lives more remote from *Hungaria*, or one of the Nobler race. Yet if they be rightly considered, there is nothing differing in the **Fashion**, but in **Fineness**, they have one **Attire** on the Head, both **Ruffs** about their Neck; this having a **Double Coat**, one silder then the other, and a kind of **Silk Mantle** about her shoulders to shew her Gallantry: the other a **Furr Cloak**, to expresse a Countrey Life.

LVI. He beareth Or, an **Indian Woman** in full aspect, proper: supporting of a **Joynted Cane**, with a **Dart** head on the top of it (some term it an **Indian Dart**, which have not Feathers as ours have, but only an Iron head) with the right hand; holding up the left: on her Head a **Crown of Feathers** of diverse colours, a **Linnen** about her Belly, **Wreathed** or **Rowled** up on the higher part, Argent: Neck, Arms and Wrists, garnishing places and Ankles of the Feet **Adorned** with **Bracelets** of the same. After this manner was one of the four parts of the habitable World depicted, or set forth in Emblems, called **Africa**.

LVII. He beareth Azure, a **Brasilian Woman** or a **Woman of Brasil**, in the Garb of the Countrey, viz. the Body all **Naked**, of a black colour, or of a deep swarthy Sun burnt colour, with a **Cloath** before her Belly (or privy parts) Argent: a Bow held or supported in the left hand, and the right upon her side, at her shoulders a quiver of Arrows, hung by a Lace or Belt: and a Feather on the left side the head, all proper. Some of the Gallants of them dye their Thighs with a black colour, that seeing them afar off, they seem as if they were cloathed in Sacerdotal Breeches. But in most places they are Barbarous, going stark naked, and on Festival Days (that is) when a company comes together to be merry, and rejoyce over a roasted fat Man, that they cut in collops, and Eat with great Greediness and much Delectation. The **Guaymares** disbowel Women with Children and Roast the Children: And that the Savage Nation of **Camucuiara** in *Brasil* have their **Paps** almost down to their Knees, which they tie about their Waste when they run, or go faster then ordinary.

[]

LVIII. He beareth Or, an **Inhabitant of Seal Bay** with his Body **Interchangably** coloured, Argent and Sable. The Inhabitants that Sir *Francis Drake* found in 47 degrees and 30 minutes Southwards, whole Bay he called **Seal Bay**, their whole **Bravery** and setting out themselves standeth in **Painting** their Bodies with diverse colours and such works as they can devise. Some Paint one Shoulder black, and another white, and their Body, Sides, Thighs and Legs, interchangably with the same colours, one still contrary to the other: in some the black part hath set upon it white Moones, and the white part black Suns, being the Marks and Characters of their Gods: they wear their Hair very long, but in their travels, they knit it up with **Ostrich Feathers**.

The natural Inhabitants of *Jucata*, paint their Faces and Bodies black.

LIX. He beareth Verr, an **Old** or **Ancient Native of Brittain**, a **Native Brittain Woman**, (as of old they used to adorn themselves) viz. all naked, their Bodies painted upon with diverse shapes of Birds, Beasts, Flowers, &c. the Hair **Flotant** or **Pendant** Or: a Chain about her middle, supporting a long Staff, with her right Leg **Crossed** or **Debauched** of the left, all proper.

Some think that the *Celique Poiteveins* called by the *Latins Pictones*; **Picts** of whom the *Scots* are descended had their Name given them from the same occasion of **Painting** themselves.

LX. He beareth Argent a **Woman of Cumanan**, holding of a long Staff in her left hand, and the right upon her side, all in their **Native Mode**; or **Painted** according to the Custom of the Countrey, viz. their Bodies all set with Feathers.

It is observed that the Barbarous People which go naked generally used, either to cover their Bodies with Paints, or Feathers of Birds: for in an Island near the Isth called *Pitan*, the People are all Feathered, but the Face and the Palms of their Hands.

The **Chiribichenians** annoint themselves with a certain slimy Matter, and putting Feathers thereon, they cover all their Bodies.

In the Island called *Itty*, the Inhabitants who go naked, not only Paint their Bodies with diverse colours, but they adorn them with diverse Feathers of Birds.

The **Brasilians** have many Hens like unto ours, from whence they pull the small white Feathers, which they strew upon their Bodies, being first annointed with strong Gums, or a tenacious Glue.

3. **H**AVING now given some Examples of Countreys and Kingdoms fashions; with their Habits, both in single Men and Women; and how such are Born in Coat Armor, either in whole, or in Part. I shall now give some few Presidents of Coats that have Persons Born by pairs, by two or three, or more, in a Coat; or for a Crest, Badge, or Cognizance, or for Signs, and Seals and the like.

LXI.

LXI. He beareth Argent, the **Apostle St. Peter** in full aspect, **Clothed** in a long **Robe**, or **Coat** close gilt, **Azure**: **Hantled** and cast behind his back, **Purpure**: holding out his both **Arms**, on the right hand a **Book** closed, with a **Church** standing thereon; and in his left a **Key double Bited**, all proper. This is the form of the **Seal**, used by **Peterhouse** Colledge in the University of **Cambridge**, which was erected out of two ancient **Hospitals**, or **Hospitals**, sometime belonging to the brethren of the **Seal**, called **de Penitentia Iesu Christi**.

LXII. He beareth Argent, a **Serjeant** of a **Company** of **Foot Soldiers** in a **Directing** or **Instructing Posture** with his **Halbert**, all proper. This is the **Coat** of **Serjanter**.

The like to this viz. Or, the **Serjeant** **Gules**, standing upon an **Hill** or **Mount** in base, **Vert**. I find born by the name of **Die Magken**, a Family of **Switzerland** in **Germany**, only he is in his **Counter-march**, or turned about to his left hand.

LXIII. He beareth Argent, two **Men** bowing each to other with their **Hats** in their hands, and the others towards their Mouth, all proper. Beside this blazon I find two more used to this **Coat** or **Cognizance**, the one more shorter, the other more longer: as first, it is termed only the **Salutation**: or two **Friends** (or **Men**) **Meeting**: the other is, two **Men** respecting each other, the dexter bowing with his **Hat** in his right hand doing his **Obeizance** with his left, **Clothed** **Vert**: the sinister, in the like posture, the **Hat** in his left hand, making the like **Obeizance** with his right, clothed **Gules**: This as being a **Coat** **Armor**, belongs to the name of **General**: but as it is the **Sign** or **token** of an **Houfe**, it is called by the name of the **Salutation**.

Masters of the **Dancing Schools**, term these postures, their **Honors**: now in performing the same, there are many **Ceremonies** and **terms** used by them; which are set down chap. 3. numb. 69.

In the **Base** of this **square** is set a **Womans Mask**, it is made sometimes in the form of a long **square**, with two holes in, for to see through when it is put over her **Face**: others are made round on the top part, or **Scalloped** according to the **fantasie** of the wearer. This was a device borrowed from the **Numidians** who covered their **Faces** with a black **Cloth** hanging down to their **Breasts**, with holes to look through: which wear was to preserve their **Faces** and **Beauties** from the taunting of the men, see numb. 54.

A 3 such in **Pale S.** born by **Maskil**.

LXIV. He beareth **Azure**, two **Men** **Embracing** each other, (or **Clipping** or **Clasping** one the other in their **Arms**) **Hats** **Sable**: the dexter **Clothed** in **Grey**, the other in **Buff**: **Sword**, **Scabbards** and **Shooes** of the second. This is the **Coat** **Armor** of **Welmen** of **Bavaria** in **Germany**.

A like **Coat** to this, of a **Man** and **Woman** walking together Or: in a green **Field**, is the **Coat** of **Ambulor**, an **Italian**, a name I suppose derived from the Latin word **Ambulator** a walker, and so the **Coat** and name agree well together.

[]

If these two were without **Hats** and **Swords**, they would then be termed **Wrastler**, or two **Men** **Wrastling**: and such I find born in a **Coat** of **Arms** by an **Italian** Family viz. in a field **Vert**, two **Men** in their **Coats** **Argent**, **Breeches** and **Hose** of **Grey**, **Shooes** **Sable**: **Striving**, **Strugling** or **Wrastling** with each other. Born by the name of **St. Pee**.

Wrastling is a **Game** of activity, as well as strength, so that an **Artist** is able herein to give a fall, where strength is not able to prevail: and as all **Gamsters** have their terms, so this goes not without a name for every **Couch**, **Trip** or **Cye**, that are used by them, the principal whereof takes as followeth.

Terms used in Wrastling.

Catch & hold, is a running catching of one another. **Trip**, a striking with the **Foot** against his adversaries **Leg**.

Cross Trip, is when the **Legs** are crossed one within another.

Inturn, is when he puts his **Thigh** between his adversaries **Thighs**, and lifts up his **Thigh**.

Running Buttock, is when by **Girdle** and **Elbow**, he turns his **Buttock** on his adversary, and lifts him up on his side.

Hugg or a **Cornish Hugg**, is when he has his adversary on his **Breast**, and there holds him.

Collar, is to fix or take hold on the adversaries collar.

Elbow, is to fix on the **Elbow**, and so to turn and wind him.

Lock, is when the **Legs** are cross one the other.

Twist,

File, is to cast the adversary down on the hand and foot, or elbow, or breeches: this is looked upon to be no fair fall.

Fall, is when he is cast on his neck and shoulders; or thrown flat on his back.

In the **Sinister** side of this 64 **square**, is another sort of **Mask** called by our **English Ladies** a **Wizard Mask**: it is made convex to cover the **Face** in all parts, with an out-let for the nose, and 2 holes for the eyes, with a slit for the mouth to let the air & breath come in and out. It is generally made of **Leather**, and covered with black **Velvet**. The **Devil** was the inventor of it, and about **Courts** none but **Whores** and **Bauds**, and the **Devil Imps** do use them, because they are ashamed to shew their **Faces**.

A. 3 such S. is born by **Visard**

LXV. He beareth in a **Lanskip** of **Air** and **Earth**, on the dexter side a **Fountain**, with a **Blackmoor** kneeling thereat, and a **Woman** washing her, clothed in a **Gown** of **Scarlet**. This hath two other terms or blazons by which it is known; the first is, washing the **Blackmoor** white, or to make him white; the second saith, it is **Labour in Vain**: and by that name some **Houles** are cognized, and known by such **Signs**, in the **City** of **London**.

The like with a **Fountain** Or, and a **Moor** standing by it: is the **Coat** of **Fonsmore**.

H h

LXVI.

LXVI. He beareth Azure, the Virgin Mary on her knees Argent, Desk or Table, and a Book open thereon, before her proper: with the Archangel Gabriel Saluting her. The Tavern in *Holborne* having such a Sign as is better known by the name of **Salutation**, then by the foresaid term or blazon, and therefore in short it is best to say, the **Angels Salutation** to the Virgin Mary, or **Saluting of the Virgin**. Such a Coat as this I find quartered by *Monsieur Philip Guillaume*, Duke of *Luxembourg*, Knight of the order of the *Golden Fleece*, in *France*.

Some term this Coat, the Virgin Mary kneeling at her **Oratory** (which is a place used to Pray at) and the Angel Saluting her.

LXVII. He beareth Sable, the Virgin Mary presenting of her Babe to receive the Covenant of Circumcision, or more particularly the Virgin beside the Altar kneeling, and the High Priest with the Babe in his hands to give him the Mark, or Seal of Circumcision, all proper. This as a Coat of Arms, is thus born by *Trevise of Germany*. This is termed the **Circumcision of Christ**, and is no otherwise blazoned: for as this, and the last aforesaid, are Emblems of **Christ Jesus his Conception and Circumcision**; so you shall oft find other Figures and draughts whereby several passages of his Life, and acts are set forth unto us: I shall describe some, by which the ingenious may conceive of the rest.

The **Salutation** by the Angel coming to her as is set in the Figure, 66.

The **Conception of Christ**, by a Glory over the Virgin Mary.

The **Birth of Christ** by his lying in a Manger or Cratch, the Virgin by him, and an Ox, and an Ass eating. The **Nativity of Christ**.

The **Declaration of his Birth** by the Angels, appearing to the Shepherds by night in their Glory.

The **Circumcision of Christ**, by the High Priest cutting off the Fore-skin of his Flesh.

The **three Wise Men Adorshipping him**, by three Kings offering presents out of their Treasures to him sitting on the Virgins knees.

The **Flight of Joseph, Mary and Christ into Egypt**, by the Virgin and the Babe riding on as Asses, and *Joseph* going beside them.

The **Murder of the Innocent at Bethlehem**, by Horsemen and Soldiers killing of Children, and pulling them out of their Mothers Arms.

The **Baptism of Christ Jesus**, by his being in the River, and *John* pouring Water on his Head, and the Dove descending on him.

The **Casting out of Devils**, by Devils flying out of the mouths of mad Men bound in Chains and Fetters: and a Herd of Swine running into the Water.

The **Curing of the Bloody Flux or Issue**, by a Woman stooping down behind our Saviour, and touching the hem of his Garment.

The **Transfiguration of Christ**, by his Glory in the Clouds, and *Moses* and *Eliaz* talking with him, and the three Disciples *Peter*, *James*, and *John* fallen to the ground.

The **Rising of Lazarus**, by his standing by a Grave, and a dead person rising out of it.

The **Riding in Triumph into Jerusalem**, by Christs riding on an Ass, and People before and behind him carrying of Branches of Palm.

The **Institution of the Lords Supper**, by his sitting at Table with his Disciples, and a Cup or a Loaf in his hand.

The **Agony of Christ**, by his Praying and an Angel coming to comfort him, and his Disciples asleep by him, cap. 4. numb. 4.

The **Betraying of Christ**, by *Judas* kissing him and Soldiers apprehending him.

The **Scourging of Christ**, by his tying to a Pillar, and two Men one with a Whip of three Lashes, and another with Birch Rods laying blows on him.

The **Crowning of him**, by his sitting on a square Stone and a Purple Robe on him, and a Reed in his Hand, and two Men with Staves forcing a circle of Thorns on his Head.

The **Mocking and Deriding of Christ**, by his standing in the Purple Robe, with a Reed in his Hand, and a Crown of Thorns on his Head.

The **Bearing of the Cross**, by having a Cross laid on his Shoulder, and his sincking under it; or as chap. 4. numb. 3.

The **Crucifying of Christ**, by his Nailing on the Cross with a Supercription over his head, chap. 4. numb. 5.

The **Death and Burial of Christ**, by his lying along and *Mary* Mourning over him, and kissing his Hand.

The **Descending of Christ into Hell**, by his being naked, with a Mantle carelessly cast about him, with a Cross in his hand, and the Devil in a Flame under his Feet.

The **Resurrection of Christ**, by his standing on a Tomb-stone with a Mantle about him, and a Cross in his Hand, with Clouds about him: see chap. 4. numb. 6.

The **Ascension of Christ**, by his going into the Clouds from the top of a Hill, as in chap. 4. numb. 7.

The **Descention of the Holy Ghost**, by a Dove in a Glory and Fiery Tongues set upon the Heads of the Disciples.

In the Sinister Chief of this square is a Dutch bearing, which is thus Blazoned, viz. a Demy Jew close Girt, having his right hand on his head, and his left on his side, Clothed Azure, in a field Argent. Born by the name of *Schmah*.

G. a Fesse A. over all the like Demy Jew, B. Born by *Schnebell of Bavaria*.

S. the like with a Wreath about his Temples A. clothed O. Turned up in the Breast (or Lined) G. holding an Apple in his right Hand, and his left on his side. Born by the name of *Schoner*. His Crest is the same fans Arms, between two Elephants Snouts S.

LXVIII. He beareth Argent, a Demy German Clooman, with her hands together before her Waist, Garment

Garment Gules; with a **Plume** of 3 Feathers on her head. Or. The *German* Herald do Draw all their **Ro-**
bed Women after this manner, with round **puffing**
things at their Shoulders, and the same **Ruffles** at
the ends of the **Sleeves**, which come no lower than the
Elbow, **Ruffs** about their Necks, and a kind of **Bonnet**
on their heads. Some term her a **Woman in full**
Alpen, &c.

Per Fesse Argent and Barry of 6 G. and O. two such
demy *German* Women issuant of the second, is born by
Schunbeck of Saxony in the Empire of Germany.

The like demy Woman out of a Crown, and Crown-
ed, Hair pendant or flotant, holding of a covered Cup,
O. **Garment** A. is born by *Van Konigsmarch* of Brabant.
The like holding a Catherine Wheel on her right
hand and Crowned, is the Crest of *Van Mollendorf* of
Brabant in Lower Germany, or the Low Countreys, called
the *Netherlanes*.

Per pale A. and G. a *German* Woman issuant, her
Garment counterchanged of the Field, by the name of
Van Andelberg.

Per pale O. and G. the like to the sinister with her
Hair pendant, holding of a Laurel Garland V. the **Gar-**
ment counterchanged of the Field, is the Coat of *Van*
Malkan, of *Misnia* in Saxony.

A demy Youth cloathed with a **Garment** having short
puffing **Sleeves** B. the Arms with close sleeves, O. the
Hands before his Breast proper, is the crest of *Lomben*
van Rolheim of *Alsatia*. The Figure is in the Base of this
squat.

LXIX. He beareth Or, a **Carpenter** with his
Square in the right hand, and his **Axe** on his shoul-
der held by his left, all proper. If you desire a further
Explanation, say a **Carpenter** with a **Cap** on his head,
Sable; turned up Argent; cloathed in a short Coat
girt about the middle, Grey; Breeches and Hose, Russet;
Shoes of the second, holding a **Square** in his right hand,
and his **Axe** or **Hatchet** on his shoulder, supported with
his left, proper. By the name of *Carpenter*.

O. the like in a short Coat girt, Knees bare, with
Startops on his Leggs, Sable; a Rule in one hand, and
his **Axe** or **Hatchet** on his shoulder, is the Coat of *Kropff*
in *Bavaria*.

A demy Man with a high Crown Cap O. turned up
A. holding an **Axe** on his left shoulder proper, cloathed
G. is the crest of *Sigristin*.

The Infula crowned and adorned with a Rose slip out
of a Crown, I have caused to be set in this quarter for
want of other room, but I have treated of it chap. 1.
numb. 52, 53.

LXX. He beareth Azure, a **Woman** in her
Smock Sleeves, (or **Wasscoat** Argent, **Petticoat**
grey; seated (or sitting) on a Stool, with a **Churn** be-
fore her, **Churning** of **Butter**, Or; and a **Spani-**
el or **Cur-Dog** licking of the overcast **Cream** from
the **Churn-side**, Sable. This is the Coat of *Butterall*.

The like to this (sans Dog) in her **Smock** to the mid-
dle, and a **Petticoat** Sable, is the crest of *Putterer* of
Switzerland in Germany.

This is the good **Dairy Mans Wife**, who as he is
looking to his Farm abroad, she is making Cheese and
Butter at Home; so that between both there is nothing
lacking which is necessary for good House-keeping, as
these following.

Things necessary for a good Farm or Dairy.

Good Tillage and good Pasture ground.
Housing good and dry,
Good Corn,
Dairy of Butter and Cheese,
Cowhouse, Sheep Coat, Sty, Kennel and Roost.
Cabin for Boar.
Market to be near.
Good Shepherd and Cowherd,
Good Plowman, Sower, Harrower and Carter.
Good Men and Women Servants.
Pastures well Stocked and Fenced.
Ground Tillaged in time.
Horses, Oxen, Cows, Sheep and Swine.
Plows, Harrows.
Tumbrell, Cart, Wagon and Wain.

In the Barn.

Barn well Locked.
Pitchforks long and short.
Straw fork, Rake and Ladder.
Broom, Wing, Winnow sheet, and Sack with a Band.
Shovel, Peck, Bushell and Strickles.
Reeving Serves.
Seed Corn, Seed Hoppet.

In the Stable.

Stable well Planked, Locked and Chained.
Strong Walls and well Lined.
Good Stall, Cratch or Rack, good Hay and Litter,
Manger, Chaff and Provender.
Fork, Dungfork, and Hay hook.
Sieve, Skop, Bin, Broom and Pail.
Hand-Barrow, Wheel-Barrow, Shovel and Spade.
Sponge, Curry Combe, Main Combe, Whip.
Hammer, Nails, Buttrice and Pincers.
Bridle, Saddle, Pannel, Pad, Pack Saddle.
Wauity, Whit-leather and Nall.
Slips, Collars, Harness, Halter, Headstall and Cord.
Crotches, Pines, Apron and Gsars.

In the Cow-house.

A **Boolee**, is the space between Range and Cratch.
The **Boolee Stake**, to tie the Cows to.
A **Range** either for Ox or Cow to which they are tied.
A **Cratch**,
The **Group**, where they Dung.
Dre **Stalls**, when made up with Boards to hinder their
striking.
Soles about the Cows Necks and Thromp **Utiths**.
The **Caspe** for the Sole is the top of it which hath the
holes in.
A **Foyke** or **Euill** or **Pelve**. H h 2 Jr

In the Cart-House.

Axel Tree well chuted and shod.
 Cart-Ladder, Wheels and Geers.
 Piercer, Pod, Pitchfork or Pikell.
 White or Shave, Whiplash, Goad and Rope.
 Pulling Hook, Hand Hook, Sickle and Sythe.
 Tumbrell, Dung Crone, Pick-Axe.
 Mattock, Bottle and Bag.
 Plough, Chain, Coulters, Shares and Sucks.
 Ground Clouts, side Clouts.
 Plough Beetle, Staff and Slade.
 Oxbores, Oxeyokes, Horse Collars.
 Oxe-Teem and Horse-Teem.
 Rake Iron Toothed, Harrow, Weeding Hook.
 Hay-hook, Sickle, Fork and Rake.
 Bush Sythe, Grass Sythe, Rifle and Cradle.
 Rubbing Stone, Sand, Whetstone and Grindlestone.
 Skuttle or Skreim or Sieve.
 Tar, Tar-pot, Sheep Mark, Tar-Kettle.
 Shearing Shears for Sheep.
 Yoke for Swine, Twitchers or Rings.
 Long and short Ladders, and a Lath Hammer.

In the Farmers House.

Trowell, Hod and Tray, Scales, Beam and all sorts of Weights.
 Sharp Mole Spear with Barbes.
 Sharp cutting Spade to cut the Hay Mow.
 Soles, Fetters, Shackles, Horselocks, Padlocks.
 Clarestock, Rabbit Stock, a Jack to Saw upon, and Pinwood Timber.
 With a Didall and Crome to drain Ditches.
 Hatchet, Bill, Aze, Ads and Nails of all sorts.
 Iron Frower, and Wedges to cleave Laths and Wood.
 Saws long and short, Beetle and Levers with a Roll for a Saw-Pit.

Bad Butter, That is

Of two Colours, of a bad Taste, too Salt, full of hairs, not well washed from the Milk, nor well Brined, and not well Potted, or Tubbs not found, which will in a short time cause it to be tainted.

Bad Cheese, That is

White and dry, the Butter of it being in the Market when it is making; too Salt, full of Eyes, not well prest but hoven and swelling, tough, full of spots, full of hair, full of whey, full of mites and gentles, rotten and yellowish; made of Burnt Milk, and of stinking and bad Runnet or Streep.

All which good Dairy Women must endeavour to avoid, else they will spoil that at home which the good Man is careful to preserve abroad.

The Galotia set in this quarter, I have spoken of it

*

elsewhere, see chap. I. numb. 96. This is to shew you the true shape and form of it.

LXXI. He beareth Argent, a **China Man in full Aspect, Garment Gules**, holding forth both his Arms, and with his right hand supporting of a **China Trumpet, Or.**

On the partition score which divideth these quarters, numb 70. and 71. is placed a **Stone or Rock, Gules**, whereon is set an Old Man **Naked to the Thighs**, cloathed in a short Coat close girt, Sable; his hands before his Breast, on his Shoulders a **Mantle** (pendant backwards) or hanging behind him, Argent. This is the Crest of *Rein of the Rhine Palatinate*.

The **Slipper or Pantable** above, and the **Paten** under it, set on the dexter side of this last quarter, I was constrained to set here, to shew the form and shapes thereof, though I have treated of them, and by whom born elsewhere, as chap. I. numb. 96.

In the sinister chief of this long square, is Engraven a **demy Woman sans Arms**, cloathed in a Coat close girt, with **short round puffed Sleeves**; the **Temples wreathed**, the ends **florant**. Such a Blazoning as this with the Garment party per pale Gules and Argent, the Wreath of the same, is the crest of *Van Komitz of Tyrol*.

The like out of a Coronett O. the Garment G. Sleeves A. her Hair pendant, Temples Wreathed, whereon is set three Laurel leaves, is the Crest of *Tangell of Thurland*.

The like per pale O. and S. with a **Dutch Hat** tyed under her Chin, the Tassels pendant of the same, is the Crest of *Van Wedell of Brabant*.

There are several *German* and *Dutch* Families which bear **demy Women** in this kind of Habit, with Arms holding several sorts of Instruments, as

Van Runghen beareth for his Crest the like demy Woman in full Aspect, the like Garment with close Sleeves to the hands B. which support two Banners O. on her head a Broad brim'd Hat, set with a Plume of 7 Feathers A. and G. counterchangeably.

The like out of a Coronett O. Garment per pale A. and S. a Ruff about her Neck and Sleeve hands, Hair pendant or **dissevered**, holding a Ducal Crown on her head with both hands, is the crest of *Van Warnstet of Brabant*.

The like cloathed G. hair dissevered, on a Wreath about her Temples held by both hands, 3 Ostrich Feathers G. A. and O. is the crest of *Van Brederlow of Saxony*.

TO
The Worshipful RICHARD LEIGH,
OF
EAST-HALL in HIGH LEIGH, Esquire.

O Compiler and Compleat a Work of this Importance, and have never a Slip or an Errata, would necessarily require an Universal Knowledge, and the Continuance of many Learned Heads; yet that I may a little secure past Omissions, it hath been my purpose to make further Additions to the foregoing Chapters, which though they be to Children Born out of due time; yet they may be by the Ingenious ranked in their proper places, and accepted in good Part, rather than draw an Oblique Censure from so good a Disposition as your self, who was in the Beginning so Zealous a promoter of the Design of this, who was and ever will remain

Your Obligated Servant and Indebted Friend,
Randle Holme

Additions to Chapter 1, 2, 3, 4, 5.

THIS Plate I have ordered, as an Addition of some things omitted in the foregoing Chapters of this Book, which the gentle Reader is desired to accept of them in as good part as if they had been inserted in their proper places.

C. He beareth Gules, a **Saxon Crown**, Or. This I term a **Saxon Crown**, because such a fashioned Crown was then in use by our Kings, as most of the Coins and Seals of those Times doth abundantly testify. This was in **Edward the Confessor's** time; being a **Cap** or **helmet**, and a **Crown** on it in this form, which is a strange one to us; yet in the time of **William the Conqueror**, it was the same, as his great Seal manifests: The **Helmet** or **Cap** thus adorned, they called the **Cyne-
helme**, or **Kings Helmet**; as the **Diadem** without the **Helmet**, they termed the **Cyne-band**, or **Kings
Band** or **Royal Fillet**, which was no other than a **Golden Fillet** or **Rubin** tied about the head, with a **Bow Knot** behind. See *numb. 7. 8.* which should have been set before this.

CII. This is another fashion of a **Crown**, which I drew out of the **Glass Window** in **Whisford Church** in **Wales**, which both for its Antiquity and Rarity I could not pass by; for I could judge the same to be no new thing, but rather the form of the **Crown** then used; but whether it be a device, or whence soever it doth proceed I know not; but this I have observed that the **Crowns** that are put on the heads of most **Ancient Kings**, in Pictures of the **Holy Story** of the **Bible**, rudely drawn near 1000 years since, are for the most part thus made, having the raised parts of the Circle no other wise than **Endents**, or **Flowers de lis**, with a **Towell** or such like rouled about the same (as I suppose) to hold it steadfast upon the head.

CIII. This is another sort of **Circle** raised into **Roses** with **Flowers de lis** a little appearing above the **Ring** of the **Circle**, yet in part have some advanced above the heads of the **Roses**, as if it were a **Flower** set upon a **Flower**.

Lib: 3.

Addition to Chap: 2. 3. 4. 5.

V. 166

PM R. Leigh de East Hall in High Leigh in Wm. Castle. Amnigen

CIV. He beareth Sable, a **Miter** and an **Earls Crown** conjoined Or, **Pearled Argent**. This kind of Ornament of a Coat of Arms belonging to a Bishop, consisting both Spiritual and Temporal Jurisdictions, I have drawn of old. Such a Bishop is he of *Cologne* in the Empire of *Germany*, and the Bishop of *Durham* in the Kingdom of *England*. It may be termed a **Lords Spiritual and Temporal Crown**.

CV. He beareth Argent, on the top of an **Infula Azure**, turned up, Or, and divided in the front, and reversed, or turned down; a **Spring of Cypress**. Born by the name of *Capper*.

the like B. Lined G. born by the name of *Eschenburg* in *Germany*.

Earl of *Pommern* in the Empire of *Germany* hath covering of the Turn-up, rolled up after the manner of a scroll A. the Infula G. Button on the top O. with a Peacocks tail proper for his Crest.

In the Sinister Chief, is a **Cardinals Hat** with a square Crown and Brim, of some termed a **Square Hat**, or a **Dutch four cornered Hat**, Strings crossed in form of the Figure of 8. The like is the Coat Armorial for the Town of *Landshut* in *Germany*, viz. A. 3 lach B. Strings G.

CVI. He beareth Vert, an **Infula**, Or, turned up in form of a **Battlement**, Argent; on the top a **tuft of Oaks**. This is a part of that Bearing belonging to the Family of *Mangreuter* of *Bavaria*, viz. Or, a **Barbican Woman** issuant in Base, clothed Gules, with such an Infula on her head, Argent; holding two Trumpets Salterwise over her Breast. Some Blazon this as **Infula out of a Crown mural**, or top of a **Tower**.

He beareth Or, the like **Infula Gules**, turned up Azure, adorned in the front and either side with **Feathers Argent**, by the name of *Engelberg*. After this manner the rising sides are often beset with **Buttons**, **Roses**, **Leaves**, **Piles of Glass**, and with variety of other things; also **Fish**, **Horns of Beasts** and such like, which were endless to give examples of each particular.

CVII. This is the **Royal Crown**, or **Royal Ensign of the Head** as the *Saxons* call it, and such we find in the great Seal of *William the Conquerour*, and his Son *William Rufus*, which they wore on Caps, the raising from the Circle being **Fleurie**, and likewise high **Pyramid points** which have **Crosses Bottony** on them; some of these Crowns having **Labels** at each Ear, and something like an Arch that goes cross the Head.

The **Crown of King Henry the First**, is only made with **Flowers de lis**, which are raised but a little, having two **Labels** of **Pearl** or some such thing hanging at each Ear. King *Stephen* also had his Crown of the like form with *Henry* the second and third, Kings of *England*.

CVIII. This is the form of the **Eastern Imperial Crown** or **Diadem**, Antiently used by the *Constantinopolitan*

Emperours: Thus the **Diadem** from a *Circulus Aureus*, a **Golden Circle** or **Filter** compassing the head, which was the first adorning of the **Kings and Emperours** heads, encreased with the addition of other parts, as **Rayes of Gold**, **Flowers de lis**, and at length **Arched**, which went from Ear to Ear over the **Crown** of the Head; nay at last it was framed to go over a **Golden Helmet** or **Cap**, which made it somewhat like the close Crowns now in use. *Constantine* the great had his **Diadem** on his **Helme**, but the frequent joining of the **Helmet** or **Cap** to the **Diadem**, was not till about *Theodosius* his time.

And whereas the **Tying** was usually behind in the **Imperial Diadem**; yet those of this latter fashion were either **Tyed** at both **Ears** (as we may guess by the **Labels** or **Fillets** that hang on both sides of their Heads) or else the **Caps** or **Helmets** had **Labels** hanging down, only as **Bishops Miters** and **Cardinals Caps** have: And in diverse of these Crowns the Fashion is so frequently varied, that you would think they had as much change in their **Diadems**, as **Ladies** have in their **Dressings** or **Head Attires**.

But it is easier for any Man to satisfy himself by seeing these variety of Crowns together on the **Medal**, than for me to describe them, therefore I shall refer you to these **Authors** who have set them down.

Heraclius Medaills, in his *Lippius de cruce*.

Gretser Tom. 1. de cruce Christi. lib. 2. and Tom. 3. lib. 1.

Opmerus Chronol. lib. 2. where there is not only the old Emperours **Effigies**, but very accurately depicted.

Crispius his Turgo-græcia.

Marcellus Corcyrensis Sacr. Ceremon. lib. 1. sect. 5.

Paschalius de Coronis lib. 9. cap. 17. &c.

Seldens Titles of Honour, cap. 8. fol. 156.

CIX. He beareth Azure, an **Infula reversed Gules**, double turned up, Or and Argent; in the front opened, and set with a **Cypres Branch**. Others Blazon it an **Infula Cap turned over**, **Lined double** (or twice turned up) the first Or, the under or second Argent, with an **Indent** in the middle of both. This is born by the name of *Caphire*, or *Caphigher*.

Two **Infula's** reversed, one **Gules** the other **Azure**, turned up with an **indent**, counterchanged, is the crest of *Van Christwitz*. Some bear these with the opening before, others have it behind, as in the next Example.

CX. He beareth Or, a **Cap**, a **Moion**, or a **Steel Cap**, or a round **Scull Cap**, Azure; turned up, and open behind, Argent. Three such in **Pale**, is the coat of *Steelerd*. Sometimes you shall find them born with their Turn-up open before.

He beareth Sable, a **long Cap reversed**, Argent; **Lined** or **Turned up Ermine**. Born by the name of *Bruch*. In the **Palatinate of Rhine**, in the Kingdom of *Bohemia*. Some to express the length of the Cap call it a **capped Cap**; but I take it rather to be a **Capped Canke**. See chap. 1. numb. 57. This Figure is in the Sinister Chief.

CXI. He

CXI. He beareth Argent, a **Russia Cap**, Gules; **Lined, Furred** and **Turned up**, Or. Three such Caps are the Coat of Arms belonging to the Family of *Rashworth*.

Others Blazon it a **Muscovia Cap**, or a **Prussia Cap**, Gules; **Furred**, Or; signifying thereby that the edge or turning up thereof is a Fur.

In the chief of this square is an **Infula wreathed**, with the **Labels** or **ends floutant**; which kind is born by the name of *Artzet*. Viz. out of a Wreath A. and B. the ends **differed**, an Infula G.

Out of a Coronett O. an Infula parted per Salter O. and G. on the top a Button of the first, is born by *Bolsenheim* of *Alsatia*.

Crowns are also born with a **Scarfe**, the two Labels or ends flying backwards after this manner, of which I shall give one example, on a Moors head, a Ducal Crown with the ends of a **Scarfe** (or Towel) **flourishing** or flying back A. is the crest of *Van Landsperg* of *Alsatia* in *Germany*.

Out of a Coronett a Mans head wreathed the ends floutant A. and crowned O. is the crest of *Lincken* of *Ausperge*.

CXII. He beareth Argent, an **Infula Cap**, (or a **Pyramid Cap**, or a **Spiral Cap**) **Imbowed** or turning backwards, Gules; **Button** and **Cassel**, also **Furred** or **Lined** Or. This is born by the name of *Coplow*. Some term this **Infula Bowed** and **Imbowed**. The like Cap to this on a Mans head, hanging down his Back, and reverting in the end Sable, turned up Argent, is the crest of *Wissang* in *Switzerland*. Others Blazon it an **Infula pendant** and **revertant**; or the end **reversed**.

Sometimes they are born Imbowed forward, as *numb.* 120. and **Imbowed** the end **erected**, as *numb.* 114.

In the dexter chief is the form of the **Bishops** and **Abbots Miter**, as it is drawn by the *High Dutch* and *German* Herald; having in all ordinary Coats neither **Labels** nor **Fillets with Cassels**, or any other adornments with Pearls and Gems, as is used about Miters that are set over the Escuchions of Arms belonging to Bishops, Arch-Bishops and Abbots. This is termed a **Miter Cap**, or a **Cap open** in the crown or top, like a **Miter** or **Miter-wise**.

The like A. with a tuft of Grass out of it, is the crest of *Van Vinningen* in the *Rhine Palatinate*.

The like Gyrony G. and A. on each point a Button O. with a tuft of Grass, is the crest of *Van Roggwell*.

The **Miter Cap** is sometimes born with a **Turn-up**, as other Caps are, with openings before or behind, or with Fur or Ermin.

In the Sinister chief is another form of a **Miter**, contrary to that mentioned *chap.* 1. *numb.* 39. this having neither Fillets, Labels, or any adornments by Gems or Pearls; and thus they are generally made when any thing is charged upon them, or are divided into diverse colours, as the like parted per Cheveron G. and A. 3 Balls counterchanged born by *Van Framenberg*.

CXIII. He beareth Argent, a **Copped Tank** Argent, turned up, in form of a **Chapeau**, Ermin; **Crowned**, Or; with a Branch of **Palm** issuant. Others Blazon it a **Cyprius Branch** out of a Crownett, fixed on an Infula turned up, &c. This is born by the name of *Panholmez*.

G. the Infula B. crowned O. Furred Ermin; the Blanch proper, is the Coat and Crest belonging to the Family of *Buizen* in *Barbaria*.

In the sinister chief is a **Nuns Hood**, which have no Bag or - - - behind, as the **Friers Hoods**, or **Couls** have, as you may see *chap.* 4. *numb.* 32.

A. such a Nun (or Vestal Virgins) hood S. is quartered by *Van Dabertz-Hofen* of *Barbaria*.

CXIV. He beareth Or, a **China Womans Hat**, or a **Womans Hat of China**, Sable. Others term it a **Chinensian Umbrell** for a Womans head. Three of these is born by the name of *Shade*.

In the dexter chief is an **Infula Imbowed**, the end **erected** (or **Bowed Imbowed erect**) turned up behind, ending in a point (or to a point before) and such a kind of Head-tyre is born by *Kolben*.

Also out of a Coronett on an Old Mans head an Infula imbowed erected G. is the crest of Sir *John Bowser*, Knight of the Garter in R. 2. Reign.

In the Sinister chief is an example of **Turn-up Caps** out of Crowns, as well as Coronetts about Hat Crowns; of which see more *numb.* 119. 128. and of Caps and Crown out of one another, *chap.* 1. *numb.* 16.

Out of a Coronett O. a Cap G. turned up Er. on the head of it a Peacocks Tail erected proper, is the Crest of the Earl of *Preussen* in *Germany*. Some Blazon it thus, The Peacocks Tail on a Cap, turned up, out of a Coronett.

The like Cap out of the Crown (*ut Ante*) the Turn-up Furred A. and open before, with an Ostrich Feather erected on the top of it, of the same, is the Crest of *Poppell Van Lobcomitz*.

CXV. He beareth Gules, a **Jews Head cover**, Argent. Some term it a **Jews Bonnet**, or **Cop** and **Scarfed**. Thus on the head of a Man, is from the Garb or Fashion termed a **Jews Head**; but the covers themselves are called *see numb.* 25. Three such as aforesaid, is the Coat of *Jemin*.

B. a **Jews head** couped at the Shoulders, thus attired on the head A. is the Arms of *Gossenprot* of *Auspergey*.

My Graver was mistaken in this **Jews head cover**, therefore let him be Pardoned, because he knew not what it was that he was making; see it right drawn in *numb.* 125.

In the chief of this square is an **Infula Bendulle**, with a **Scarfe** or **Nail pendant** from the top of it, in form of a Cheveron. This is an *Assyrian* Ladies Wear, and it is used generally to the Habit of that Queen which represents that part of the World called *Asia*, as you may see *chap.* 5. *numb.* 40.

G. a Woman to the Sinister, habited in a close Gown with

with hanging Sleeves from her Elbows; on her head an Infula with a Scarfe pendant A. holding a Cup covered in her left hand O. the right on her side, is the Coat and Crest of *Blasbelch* of *Carinthia*.

CXVI. He beareth Argent, an **Head Scarfe**, or a **Chiel for the Head**, ends **crost** and **pendant**, Sable. Born by the name of *Valemer*.

The like Hood or Scarfe Argent, in a Field Gules, is born by the name of *Scharffenohet*.

This kind of **Head Tire** or **Dress**, is oft found in Crests to hang loosely or carelessly on Womens heads, as in the examples *chap. 4. numb. 55. and lib. 2. chap. 18. numb. 120. 130.* though in this place it is made up and crost after the manner of an Hood.

CXVII. He beareth Or, a **Copped Tanke** parted per pale Gules and Azure; turned up Argent, adorned with two **Pheasant feathers** each side one, Bendways. Others thus, a copped Tanke between two **streight feathers** expended Bendways, from the turning up. Or thus, a Tanke between two Feathers set at the middle of the turning up, Bendwise. This is the Crest of *Van Wiering*.

CXVIII. He beareth Argent, an **Infula** Gules, turned up with two **Indents**, the **String crost**, the ends **perforating** the Cap, Buttoned and Tassels Or. This is born by the name of *Garret*.

Parry per pale B. and G. the like Cap or Infula counterchanged, Turned up, Strings, Buttons and Tassels O. is born by the name of *Malegg zu Hugenang*.

A 3 Infulas to the sinister, embowed and turned up to a point; the Strings intire and crossed G. is the Coat of *Melzing* of *Branswick*.

CXIX. In this quarter are two sorts of **Infula Caps** which are only distinguished by their manner of turning up.

That in Chief is termed an **Infula to the sinister**, bound about with a **Scarfe** the ends **flotant**, turned up with a **Furr** to a point or **Chapeau wise**; such a Cap on a demy Mans head sans Arms G. Scarfe O. turning A. is the crest of *Van Cortenbach*.

O. a demy Man sans Arms to the Sinister, Garment G. on his head an Infula of the same, scarfed (or bound about with a Rubin) the ends **dissevered** A. turned up of the second, is the Coat of *Rehebosch*.

The **Infula** in Base, is termed an **Infula turned up to a point before**, adorned with a Feather in the hinder part; the **Ears** tyed together, the **Strings Tassels** and **flotant** each side the Knot. This is of some termed an **eared Infula**, with **Strings and Tassels** fixed thereunto: yet some bear such **Stringed Caps** without Ears, as for Example.

A. a Demy Woman sans Arms clothed, having on her Head an Infula with Earstied under her Chin, the Strings, Tassels, Feathers, and Turn-up, all G. is quartered by, and is the Crest of *Thaimer* of *Tyrole*. But *Thaimer* of *Bavaria*, hath the Infula G. turned up to a **sharp point**, O. Tassels, Strings and Feather A.

[]

A. 3 such (sans Feathers) the Strings pendant, G. is born by *Van Bothman*.

CXX. In the Base of this Square are two other kinds of Caps for the Head, that on the Dexter side, is a **Russian Cap Extended** and **Imbowed** to the right (or forewards) **Button** and **Cassel Erected**: and such is born by *Wesperman* of *Alsatia*, viz. a Demy Boy to the Sinister, sans Arms, Habited O. Turned down, A. on his Head such an Infula imbowed, of the first: Turned up of the second.

The like Demy Man to the Sinister, Cloaths and Cap Imbowed forwards (or to the Front or Forehead) at the point a Plume of three Feathers, B. born for the Crest of *Wilheimsdorf* of *Frankford*.

The Cap in the sinister Base, is termed an **Indians Feathered Cap**, with a **Button** on the top, set with two Ostrich Feathers **Contrary falling**. Three such as these Gules, in a Field Argent. Is born by *Calender*.

In the sinister Chief, is a **Boot** to the **Sinister**, (that is to say, the Toe is turned up to the left side of the Field, whereas generally all charges look towards, or set to the right side) the **Tops**, **Turned down**. But I should rather take this for a **Roman Star-top**: however by the name that beareth it, it should be no other then a **Boot**, for A. 3 such S. Tops O. is born by the name of *Boot*.

Per Fesse S. and Barry bendy A. and B. a Lion Rampant issuant O. and such a Boot S. Top O. is the States Arms of *Schmandorf*.

CXXI. He beareth Argent, a **Girdle** in form of a **Simicircle** (or **Cressant** as some say) the end **Pendant**, Azure: the **Buckle**, **Runner** and **Caps**, Or. Born by the name of *Girdler*.

G. the like **Girdle** A. Semy de Crois Bottony fitted in the Foot of the fourth, O. is the Coat Armor of *Van Beldersheim* in the Palatinate of *Rhyme*. Some term this a **Carriers Belt** or **Girdle**: but I rather take it to be the **Girdle of Honor** mentioned in Holy Scripture, which was bestowed upon Persons worthy and deserving Renown. And *Jonathan* put off the Robe that was upon him, and gave it David, and his Garments, even to his Sword, and to his Bow, and to his Girdle, 1. Sam. 18. 4. and 2. Sam. 18. 11. By the girding of the Girdle is signified Watchfulness and Care, and hast in Matters of weighty concernment, when on the other side the loosing of the Girdle of the Loins, is a token of Idleness, Sloth, and carelessness in business as the Prophet *Isaiah* informs us: *Isa. 5. 27.*

CXXII. He beareth Gules, a **Boot**, bowed in the Knee with one indent in the top, the Toe sharp pointed, and **Erected** or **Turned up**, Argent: the **Spur**, Or. Born by the name of *Kollesheim* of *Alsatia* in *Germany*. This may be termed a **Dutch Boot**, because all their Shoes, and Boots for

Fi

for

for their **Skates** to slide upon, have all such hooked, or turned up pointed **Toes**.

In the Dexte side and Chief of this Quarter, is the Crest of *Crumwell* of the *Nether Rhine* Palatinate, viz. a **Boot couped below the knee**, the **Sole erect**, Argent: **Spur**, Or. Some term it, a **Boot the foot erect** and **couped under the knee**: others call it a **Boot Leg**, the **Foot Elevated**.

CXXIII. He beareth Argent, two **Dutch Boots**, the **Soles erect**, **Imbowed in the knees**, and **Embossed**, Sable; **Issuant out of an Hill in Base**, Vert: **Spurred**, Or. Born by the name of *Boore*, in *High-Dutch* *Leerjen*.

Two **Dutch Boots** Endorfed and Imbowed, one A. the other G. the Feet erected and Spurred O. is the Crest of *Kolbheim* aforesaid, numb. 22.

CXXIV. He beareth Argent, a **Master in a fide Coat**, Sable: **Instructing of a Boy in his Coat how to Read**: or a **Master teaching of a Scholar** who hath a **Book in his left Hand**, all proper. This is the Emblem or description of the first of the Liberal Sciences, which is called **Grammar**.

Grammar Described.

By Grammar is comprehended all sorts of Learning, the Art or Science of Grammar is the right way of Speaking and Writing with Reason and Authority. It is the Study and Profession of Letters and good Literature or Learning, and is the product of all other Arts and Sciences whatsoever. It is described by Men and Women, or them singly reading in Books, having laid by them Volumes, Tomes, Folio's, and Book of all sorts and sizes on Tables or Desks, and stands by them.

Grammar, as by it is understood all sorts of Learning, it may then briefly be defined under these several notions, viz. Letters, Words, Sentences.

LETTERS.

The first and more simple Ingredients required in Grammar, is the information and Instruction of Letters; of some termed the Elements of Learning, which is the Letters of the Alphabet, which consists in these several termed expressions.

Alphabet, which is all the Letters used in any Language or Tongue, of which every Nation and People have for the most part a variety, and a certain number: as the *Hebrew* have 22. The *Chaldee*, 23. The *Syriacque*, 22. each having five Vowels which are double expressed by certain pricks and Marks, either over or under the Letters. The *Tartarian* have to every of their Characters a Vowel joyned to it, as *la*, *le*, *li*, *lo*, *lu*, which makes

[]

long and troublesome Alphabet. The *Indians* have 47. The *Ethiopians* have 26 Letters, to which they apply their 7 Vowls, and add 20 other Aspirated Syllables, which makes no less then 202 Letters in their Alphabet. The *Egyptians*, 24. The *Greeks*, 24. The *Latins*, 23. The *Saxons* and *English*, 24. of which Characters I shall principally discourse in this place.

Consonant, is a Letter which cannot be sounded without a Vowel, all these are Consonants: *b, c, d, f, g, h, j, k, l, m, n, p, q, r, s, t, v, w, x, y, z*.

Mutes, are Letters that are sounded with a kind of whisper: as *b, c, d, f, g, h, p, q, t*.

Liquides, are *l, m, n, r*.

Aspiration, is only the Letter *h*.

Numerals, are *I, V, X, L, C, D, M*.

Semi-vowels, are such as have the sound of Vowels in the name of the Letter: as *e, em, en, ar, es, ex, ez*.

Mutes of Semi-Vowels, are *be, ce, de, ge, pe, fe*.

Spiritous or Breathed Letters, are such Consonants as require to the framing of them a more strong emission of the breadth either through the Nose, or Mouth: as *M, N, ng, hm, hn, hng, V, Dh, L, R, Z, ch, F, Th, bl, br, S, sh, ch*.

Semi-Spiritous or half Breathed Consonants, are such as are accompanied with some kind of Vocal murmur: as *B, D, G*.

Non-Spiritous or breathless Letters, are such as are wholly Mutes: as *P, T, C*.

Sonorous Letters, sounded through the Nose, are such as require some Voice or Vocal sound to the framing of them: as *M, N, ng, V, Dh, L, R, Z, Zh*.

Mutes of Affinity to these Sonorous Letters: are *hm, hn, hng, F, Th, Hl, Hr, S, Sh*.

Compound Letters, are *Et, ff, sc, sch, in, gn, st*.

Double Consonants, as *ll, tt, rr, m, mm, nn*.

Compound Vowels, are commonly called Diphthongs, or Triphthongs.

Aspirated compound Letters, are *th, ff, Q, Ph, Dh, Df, Tj, Ch*.

Compound Letters and Vowels, are *Eng, Ez, edh, Ez, whose Mutes are Hne, Hne, Hnge, Fe, The, Che, Hle, Hre, Se, She*.

Affinity of Letters, are *M to hm, N to hn, ng to hng, V to F, Dh to Th, Gh to Ch, L to Hl, R to Hr, Z to S, Zh to Sh, B to P, D to T, and G to C*.

Notacismus, is when an *I* Letter fully is sounded: as *Fori, Jota*.

Lamdocismus, is when a Letter in a Word is either taken away, or added to it: as *Elucer, Sallvus* for *Eluer* and *Salvus*: or *Moultus, Faulsus* for *Multus* and *Falsus*.

Alchnotes, is when one Letter in a Word, is put for another: as *Nym, Tync*, for *Nunc* and *Tunc*: being for better grace in the sound.

Crailismus, is when through the stumbling of the Tongue, a Syllable too much is added to a Word: as *Cacacanit* for *Canit*, and *Tututullius* for *Tullius*.

Plateasmus, is when one Letter is changed for another: as *Vero* for *Fero*, *Argo* for *Ergo*, *Sparma* for *Sperma*.

Etymology

Etymology, is the true Original or Derivation of a Word: as *Lepus*, quasi *Levipēs*, a Hare from it light Feet.

Vowels, are Letters which make a full sound of themselves, which are five in number: as *a, e, i, o, u*, whereunto is added the Greek Vowel, *y*.

Syllable, is the pronouncing of one Letter or more with one breathe: as, *I am*.

Monosyllable, a word of one Syllable: as, *of, the, thing, strength*.

Disyllable, a Word of two Syllables: as *A-ze, An-gel, Mih-ty*.

Trisyllable, a word of three Syllables.

Tetrasyllable, a word of four Syllables.

Pollisyllable, a word that hath many Syllables.

Diphthong, is the sound of two Vowels together in one Syllable, and of them there are five: as, *e, æ, au, eu, ai* or *ie*, but instead of *æ* and *æ* we do commonly pronounce *e*, also *ee, ea, eo, ou*, of some they are called Bivocales, Triphthongs or Trivocales, if three be together.

Redundat or Superfluous Letters, are such as have one and the same power and sound: as, *C* and *K*, *F* and *PH*, *T* and *S*, &c. or by reckoning double Letters amongst the single: as *X* and *CS*, *Q* and *CV*, also *J* Consonant which is made up of *dz*, or by assigning several Letters to represent one simple power: as, *th, ph, sch*.

Deficient Letters, are such as have not their true and proper power or sound: as *C* not to be named *See* but *Kee*, *h* which should be pronounced with an Aspiration or open Mouth like *ae*; so *G* not *Fee* but to have the sound *Gee* and of *eg*; so *R* not to be called *Ar*, but *er*; also *V* Consonant like *ese*, or *Erre*; an *Z* should be filled *æ* not *zad*: besides our Letters are not always fixed or determined to the same signification, as *C* before the Vowels *a, o, u*, is pronounced like *K*, and before the Vowels *e, i*, as *S*, upon which Sir *Thomas Smith* calls it *modo Serpens, modo Cornix*, sometimes a Serpent, sometimes a Chough; also the Letters *C, S, T*, are often used alike, and *S* frequently used for *Z*. And which is more Irrational some Letters of the same shape and sound are sometimes used for Vowels, sometimes for Consonants, as *J, V, W, Y*, which ought not to be confounded.

Improper Letters, are such as are expressed by words of several Syllables, as in the Greek and Hebrew, as *Alpha, Beta, Gamma*, &c. and thus it is in 15 several Alphabets mentioned by *Hermanus Hugo*: In which respect the Roman and English are much more convenient, each Letter being indifferently well named simply by his power and sound.

Orthography, is the true spelling of Letters, according to the true meaning of the word.

Orthoepia, is of kind to it, and is the Art of right speaking.

Time or Pause to be observed in the pronouncing of several Words, or Sentences: as *Comma, Semicolon, Colon*, &c. I have formerly spoken of them in the Art of Printing, chap 3. numb. 56. to which add these two or three.

Hyphen, is a mark of subunion either of two words, as *Self-love*; or of the connection of two Syllables at the end of a Line, and the beginning of the succeeding Line thus []

Explication, thus marked []

Irony, thus marked | being a Derision or Diffimulation mark.

WORDS.

The joyning of one, two, three, or more Syllables together, is the production of Words and these are differently expressed, as may be gathered from what follows.

Words Distinguished by Writing not Pronunciation, these are Words of the same sound, yet by Writing signifies contrary things: as, *Boar, Bore*; *Done, Dun*; *Dear, Deer*; *Hear, Here*; *Heart, Hart*; *Son, Sun*; *Some, Sim*; *Toe, Tow*; *To, Too, Two*.

Distinguished Words in pronouncing not in Writing, as *Give*, to bestow a thing, and *Give*, a Bill or Bond: *is* and *his* in English, and *is* and *his* in Latin: *Get*, to obtain a thing, and *Get*, a stone: which some Writs *Feat*, &c.

Equivocals, are Words of several significations, which renders them doubtful and obscure: as, *Malus*, which signifies both an Apple Tree and Evil, and a Mast of a Ship: so *Populus*, signifies a Poplar Tree, and the People, with many more in the Latin: so in the English a *Bill* signifies a Weapon, and a Birds Beak, and a Written Scroll: *Grave*, signifies Sober, Ancient, and Sepulcher, and to Carve on Mettle.

Ambiguous Words, which have doubtful significations, or hard to be translated, for every Language have some peculiar Phrases belonging to it, which to turn *Verbatim* into another Tongue would seem wild and insignificant, in which our English doth too much abound, Witness those words of *Break, Bring, Cast, Clear, Come, Cut, Draw, Fall, Hand, Keep, Lay, Make, Pass, Put, Run, Set, Stand, Take*, &c. none of which have less then 30 or 40, and some above a 100 several significations, according to their use in Phrases, as may be seen in the Dictionary.

Synonymous Words, are superfluity of Words for one and the self same thing, it is said that the *Arabick* have above a 1000 Words for a *Sword*, and 500 for a *Lion*, and 200 for a *Serpent*, and 80 for *Hony*. Examples of this kind in our English is innumerable, take this one Word for all: *Danger, Hazard, Peril, Jeopardy, Unsafe, Venture, Adventure, Endanger, Expose, Incure*.

Anomalisms, are Words of Irregularity, unlikeliness, and not to have the same in Grammatical Constructions, but varieth from its Primitive Word: as *Jupiter Jove*, and in our Tongue *Buy, Bought*; *Seek, Sought*; *Have, Had, Haft*, &c.

Analogyisms, are Words of an Agreement, Harmony, or apt answering of the thing applied thereunto.

Difference in Pronouncing, that is words Written contrary to what they are spoken, as it is said of the French, that they Speak not as they Write, nor Write as they Speak; which is proportionally true in our English, many Scribes having diversity of ways in Spelling.

Spelling, is a joyning or setting together so many Letters as doth make a Word.

Integrals, are principal words, such as signify some intire thing or notion.

1 i 2

Particibles,

Particles, small little words containing generally one Syllable: as, *all, at, as, to, for, not, of, but, than, then*, &c. as of two, as *before, becomes, himself, yourself*; and such like, which serve and signify a Circumstance to other words with which they are joyned.

Concrete, is any subject word which hath an accident word joyned together with it: See **Abstract**.

Abstract, is a word taken from another, as *Album white*, is a Concrete, signifying a subject (be it Man or Horse) and the Accident *Albedo whiteness* is termed the **Abstract** word from that **Concrete**. So *Man* is the **Concrete**, and *Manhood* the **Abstract**.

Substantives, are words of things, or names which bear their own signification without the help of others: as, *Man*.

Adjectives, are words whose signification doth import their being when adjoyned to some thing else: as *Good what? Good Man*.

Verbs, are words mixt of two or more, namely a **Predicate** and **Copula**, to signify the quality or affection of the Action or Passion. And to them belongs,

Genus, or the kind of Verbs which are in number five: as *Active, Passive, Neuter, Dependent* and *Common*.

Moods of Verbs, are six; as the *Indicative, Imperative, (Optative, Potential and Subjunctive)* and *Infinitive*.

Tenses of Verbs, are the *Present-Tense, Preterimperfect, Preterperfect, Preterpluperfect*, and the *Future Tense*.

Persons of Verbs are three, *I, thou, he*, Singular: *me, ye, thy*, Pural.

Conjugations of Verbs, are four by which all Verbs are Conjugated, Formed or Declined throughout all Moods and Tenses.

Gerunds and Supines Derived of Verbs, and are so called from their double signification; viz. *Active* and *Passive* under one word, as *Amandum* to Love or to be beloved: *Amatum Amatu*, to love, or to be beloved.

Figure of Verbs, are simple Verbs, as *Facio*; or compound Verbs, as *Calefacio*.

Species or Kinds of Verbs, are twofold, *Primitive Verbs*, as *Ferreo*: or *Derivative Verbs*, as *Fervesco*.

Derivative Verbs, are of five kinds, *Inchoatives*, Verbs ending in *scio*. *Frequentatives*, Verbs ending in *to, so, xo, or tor*. *Apparatives*, Verbs ending in *ico*. *Desideratives*, Verbs ending in *urio*. *Diminutives*, Verbs ending in *lo* or *isso*. *Imitatives*, Verbs ending in *isso* and derived from some Substantive, as *Vulpinor* of *Vulpus*, *Bacchor* from *Bacchus*.

Compound Verbs, have generally a **Preposition** ed to it: as, *Do, Reddo, Obdo, Perdo*.

Defective Verbs, are such as have not their declining throughout all their Moods and Tenses, but only some particular Mood and Tense.

Impersonal Verbs, are such as are only Conjugated throughout the Moods and Tenses in the third person. All these I run briefly over because they are known to all indifferent Scholars.

Adverbs Derived, are words drawn from Verbs, and do signify the same thing.

Predicate, is the word that preceeds, or goeth before that which is the **Copula**: It also signifies the latter part or word of a proposition, as *John is a Scholar*, the word

Scholar is called the **Predicate**, because it is spoken or affirmed of the subject *John*.

Copula, is a word that couples or joyns other words in a Sentence together: see **Conjunction**.

Subject Word, is that as supports qualities belonging to it, as the *Body* is the *Subject*, in which is Health or Sicknes: And the *Mind* the subject, that receives Virtues or Vices.

Participle, is a word that partakes of another of the same Sense, and is so called because it participates of a *Noun* and *Verb*.

Pronoun, is a substitute word, set in the place of some Integral or Principal word, or of some Sentence, or some complex part of it: and these like Nouns have their *Accidence, Number, Case, Gender, Declension, Person* and *Figure*.

Antecedence, is a word that most commonly goeth before a *Relative*, and is generally rehearied again, or understood in the *Relative*.

Relative, is a word having relation to some word or words going before it, and is generally answered by the Latin *Qui quæ quod*, in the English by the words *That* and *Which*.

Interjection, is a word coming between other words, or amongst them, and betokeneth a sudden passion of the Mind under an imperfect voice: whither it be through *Mirth, Sorrow, Marvelling, Dread, Disdain, Exclamation, Laughing*, and such like.

Preposition, is a word proper to Substantives, being usually prefixed before them, either in Opposition, as *ad Patrem*, to the Father: or else in Composition, for compounding of words, as *Indoctus* untaught.

Articles, are words which serve for the more full and distinct expression of Substantives, and to shew of what Genus and kind they are, whither *Male, Female*, or *Neuter*, &c.

Genders, are words that distinguish the *Male* from the *Female*, and the *Neuter* from both: as *hic Vir*, this Man, being the *Masculine* kind: *hec Mulier*, this Woman, being of the *Feminine* Gender: and *hoc Saxum*, this Stone, being the *Neuter* Gender: the *Common* Gender, *hic et hec Parens*, the *Common* of three, as *hic hec et hoc Felix*: the *Doubtful* Gender, *hic* or *hec Dies*: the *Epicene* Gender hath under one Article both *Male* and *Female* comprehended, as *hic Passer, hec Aquila*.

Adverbs undeclined, are words or kind of Particles which are usually adjoyned to Verbs to signify some kind of mode or circumstance belonging to them, of which some be of *Time, Place, Number, Order, Calling, Asking*, with many such like.

Conjunctions, are certain words which serve chiefly for the joyning of Sentences and Clauses together: called **Conjunctions Copulatives**.

Accent, is a prolongation of Vowels, or an elevation of Voice in the pronouncing of any Syllable.

Emphasis, is to distinguish such words wherein the force of the Sense doth most peculiarly consist.

Ironycal, is to denote the words to be intended to a contrary Sense, to what they naturally signify.

Accidence of a Noun, are words that admit of a *Species, Figure, Number, Case, Gender, Declination*, and *Comparison*.

Species

Species of Nouns are twofold, *Primitive* and *Derivative*.

Primitive Nouns, are such as have no other word or syllable joyned to it: as *Donum*, *Dat. m.*

Derivative Nouns, are such as are compounded of two words together: as *Relatum*.

Figure of a Noun, is either the simple Noun it self, as *Justus*: or compounded, as *Injustus*.

Numbers of Nouns are two, the Singular which speaketh but of one, as *Pater* Father: the Plural which speaketh of more, as *Patres* Fathers.

Cases of Nouns, are six in Number.

Nominative Case, so called from the right naming of the word: as *Magister*, termed by the Grammar Rules *Nominandi Casus*, briefly *Nomnandi Casus*.

Genitive Case, or *Gignendi Casus*, from its begetting; or *Interrogandi Casus*, from its asking of a Person.

Dative Case, or *Dandi Casus*, from its giving to a Person.

Accusative Case, or *Accusandi Casus*, from its accusing, or following its verbal Word.

Vocative Case, or *Vocandi Casus*, from its calling to a Person.

Ablative Case, or *Afferendi Casus*, from its offering to serve any sign of a Preposition.

Declination of Nouns, is the variation of words according to the Cases they are put in, of which there is five sorts of Declensions.

Peteroclitics, are words excepted from the common Rules of declining.

Defective Nouns, of which some want a Plural Number, and others a Singular.

Aptotals, are words alike in all Cases: as *Nil*, *Nihil*.

Monoptotals, Nouns which have but one Case: as, *Nata*, *Jussu*.

Diptotals, Nouns which have but two Cases: as, *Fori Forte*, *Spontis Sponte*.

Triptotals, Nouns which have only three Cases: as *Opis*, *Opem*, *Ope*.

Redundantials, Nouns that abound in their Cases, having more then the Declensions requireth: as, *Baculus*, *Baculum & Bacillum*: *Tignus*, *Tignum & Tepetum*.

Comparison of Nouns, are Adjectives of Nouns whose signification may be increased or diminished of which there are three Degrees.

Positive Degree, is absolute of it self: as *Durus*, *Hard*.

Comparative Degree, exceeds it: as *Durior*, *Harder*.

Superlative Degree, exceeds it in the highest Degree: as *Durissimus*, *Hardest*.

Comparatio Anomala, are Comparisons irregularly formed and not according to Rule: as, *Bonus*, *Melior*, *Optimus*: *Magnus*, *Major*, *Maximus*.

Comparisons Defective, are such as want one of their Degrees: as *Senex*, *Senior*, *Maximus* *Natu*: *Junus*, *Junior*, *Natu Minimus*.

SENTENCES.

Sentences, are the joyning of many words together whereby to give the generall description or knowledg of

[]

things, with all its Circumstances: Which may be done either in writing or speaking. Else it is more Scholasticall defined to be, *Complex Grammaticall Notions*, delivered in speech or writing. And is of the Learned termed a *Period*, *Text*, *Aphorism*, *Acron*, *Impress*, *Motto*, *Poesie*, *Phrase*.

Sentence absolute, is that which signifies a compleat sense.

Clause, is that as denotes only some part of the sense.

Verse, or **Stasse**, it doth consist of one or more Sentences.

Section, **Scene**, or **Paragraph**, they do relate to a greater number of Sentences, being an *Aggregate*, an *Heape* or Increase of words put together.

Chapter, or **Act**, is that as contains some principall matter or part of the thing treated off.

Book, **Tract**, **Treatise**, **Volume**, or **Come**, is an intire discourse of a matter.

Prose, is a more loose and free way of putting words or *Phrases* together.

Verse, **Lyrick**, **Pindarick**, or **Ode**, is a way of writing or speaking, by which we are bound up to a certaine measure of Feet, *Words* and *Syllables*.

Rime, are measure of words, or that which doth suppose a similitude in the sound of the ending Syllables.

Proper Sentences, are such as proceed from the naturall forme or signification of words according to the first intention of them.

Tralatitious, or **Artificiall Sentences**, or speech, are Borrowed words containing a reference to some thing else of near Affinity or Similitude. Termed also a **Metaphor**, **Trope**, **Parable**, or **Simile**.

Homely, **Pleane**, Simple matter, framed for the capacity of Illiterate people.

Figurative, or **Ornate speech**, Eloquent, **Allegoricall Sentences**, as **Parables**, **Riddles**.

Defective Sentence, is when something is left out, or is understood, Implied, or Intimated.

Obscure Sentence, difficult to be understood, *Dark*, *Obtruse*, *Deep*, *Profound*, *Mysterious*, *Hard*, *Intricate speech*.

Complex Notions of discourse, or Sentences which may be taken in a double or ambiguous Sense, which may be distinguished into these several terms.

Distinction, sheweth the different Senses which words are capable of.

Equivocation, or **Ambiguous**, words spoken in a **Salacious Sense**.

Limitation, **Restriction**, stint or restraining a Sense into a more proper and peculiar Sense.

Ampliation, is the enlarging of its sense and meaning to the full scope and comprehensiveness, as there may be occasion.

Definition, is the declaring of a thing according to its nature, be it more or less perfect.

Division, **Partition**, a dividing or parting of a Sentence.

Rule, **Maxim**, **Principle** or **Canon**: are such common Principles of knowledg whereby Men are to be directed in their Judgment.

Exceptions, **Restraint** or **Exclude**: is the exemption of such particulars as do not properly belong to the General Rules.

Argu-

Argumentation, to *Dispute, Debate, Reason* or *Argue*, this is when from something already known and granted, we endeavour to prove some other: termed also, **Demonstration, Sophistry, Chop Logick, Polemic.**

Inflation, Deduction, Sequel or **Conclusion**; is the taking of that thing as is by Argument proved to be so: term the **Inference, Consequence, Corollary** and **Result** of the Matter.

Induction, Particularize, the leading matter by which is signified the proving of a General, whether from many or all the particulars thereof.

Example or **Instance**, Exemplify or Specific.

Citation, or **Quotations** are Testimonies alledged from the Authority of some other Persons.

Allusion or **Glance**, a resemblance of some other thing.

Art Motions of discourse.

Propositions, denotes such a compleat Sentence, wherein something is either affirmed or denied: termed a **Thesis, Assertion, Point, Doctrine, Position, Problem.**

Adage, Proverb, Old Saying; are such kind of Sentences, as by common use and long experience have obtained to be of Authority amongst Men.

Oration, Speech, or **Declamation**; doth denote something to be spoken in presence of others.

Epistle, Letter, a thing Written to be sent to a Person.

Narration, a relation of things as to matters of Fact: termed also, **Story, History, Tale, Tidings, Report, Diary, Diurnal, Gazette, Chronicle, Legend, Intelligence.**

Rumor, Brute or **Report**, is that which denotes what is commonly said of many: *Common, Fame, Noise.*

Interpretation, is the Exposition or explaining of a Matter, Construction or unfolding the introcacie of a Sentence.

Translation, Words and Sentences put into another Language.

Paraphrase, is to put a Sentence into other Words of the same Language: termed **Descant, Metaphrase, Circumlocution.**

Commentary or **Annotations**, are to enlarge a Matter by putting several other Words thereto for further Explication.

Epitome, Abstract or **Synopsis**; is a contraction of Matter into fewer Words: termed also a **Compendium, Breviate, Breviary, Summary, Extract.**

Appendages of Discourse, which is Prologue or beginning of a Matter; or Epilogue the conclusion or end of it.

Transition, is a passage or intermediate Matter, that which is more necessary; whereby one part is to be connected to another.

Digression, by the by, by the way, a diversion, is such an additional part added to the Matter, as is less necessary, or nothing at all to the main scope of the discourse.

Modes of Discourse, may be reckoned to be such as concern the Business of proving or perswading.

[]

Question, Demand, Interrogate, or **Examin**; is a desire of being informed by others, to Expostulate or make inquisition.

Answer, Reply, Rejoinder; are returns made answerable to such forms of Speech: a **Respondal, Return.**

Affirmation, is a positive saying of a thing to be so: to *Affert, Averr, Avouch, Profess, Asseveration.*

Negation or **Deny**, is to affirm a thing not to be so: to *Disavow, Gain-say, Refuse.*

Supposition, Admit, Presuppose; is a conditional allowing of a thing to be so for the present, that we may thereby the better judge of the consequence from it, termed an **Hypothesis**: *Proviso*, put case it were so.

Concession, is to *Grant, Yield, Allow, Acknowledge, Admit, Agree too*, or *Owning* the Truth asserted by another.

Opposition, a saying of some against what another affirms; to *Thwart* or *Gain-say.*

Contradiction, to say what is most contrary to what another sayeth.

Objection, is an Arguing against another; to which is opposite, the shewing of an insufficiency in such Arguments.

Solution, Solve or **Resolve**; the giving of a sufficient answer to the thing proposed.

Probation, Prove, Evidence; is as in relation to our own Arguments or Opinions by shewing the truth of them, we adhere to them, and are confirmed in them, and established and ratified by them.

Confutation, Refute, or **Disprove**; is the shewing of the weakness of our Adversaries Arguments, or turning the force of them against themselves, by a **Retortion** or **Inversion.**

Posing, Puzzle, Baffle; is the rendring of an Adversary unable to defend his own opinion: to *Confound, Gravel, Run him down.*

Conviction, is to make one submit to the Truth of an Argument, to Satisfie or Evince him of his Error.

Confession, is a Verbal acknowledging the Truth of our opinion; it is to *Own, Yield, Grant, Profess*, and *Cry Mercy* for the former mistake.

Recantation, or Renouncing of an Error which one was formerly in, or imbraced.

Constructions of Words or Sentences, is the rendering of the same out of one Language into another.

Concords of Nouns, of *Nouns* and *Verbs*, *Substantives* and *Adjectives*, the *Relative* and *Antecedent*, are their right agreement one with another in *Number, Case, Gender*, and *Person*: else it is false.

Syntaxis, is the Rule or Order of Construction.

Figura Dictionis, the Figures of speaking are in number six: which are according to Grammar Instructions, these.

Prothesis, is the putting of a Letter or Syllable at the beginning of a Word: as *Gnatus* for *Natus*, *Tetuli* for *Tuli*.

Aphaeresis, is the abolishing of a Letter or Syllable at the beginning of a Word: as *Ruit* for *Erui*, *Temere* for *Contemnere*.

Epenthesis,

Epenthesis, is the putting of a Letter or Syllable at the beginning of a Word: as *Reliquias*, *Religio*, where *I* is added: *Induperatorem* for *Imperatorem*.

Syncope, is the abolishing of a Letter or Syllable in the middle of the Word: as *Abiit* for *Abiit*, *Piuit* for *Piuit*, *Dixit* for *Dixisti*.

Paragoge, is the putting of a Letter or Syllable to the end of a Word: as *Dicet* for *Dicit*.

Apocope, is the abolishing of a Letter or Syllable at the end of a Word: as *Peculi* for *Peculii*, *Dixit* for *Dixisti*.

Figures in Constructions are eight in number:

Appositio, is when the cases of two or more Substantives are put together: as *Marcus Tullius Cicero*.

Avocatio, is when a first and second person, immediately calls to him a third, both are made the first or second persons to the Verb: as *Ego Pauper Laboro*, *Tu Dies Ludas*.

Syllepsis, or **Conceptio**; is a comprehending of a lesser thing under a greater, or one less in dignity under one of more dignity: as *Quid tu & Soror facitis*, by which the first Person is more worthy than the second, and the second then the third: so in dignity of kinds, Male before the Female, the King before the Queen.

Prolepsis or **Presumption**, is when many, or the whole Congregation of Words are to agree with a Verb, or Adjective.

Zeugma, is when one Verb or Adjective answers to diverse Words, that is to one expressly, and to the other by way of suppliance.

Synthesis, is a Speech or Sentence agreeing in Sense, not in Voice.

Antipthesis, is put a Case for a Case, and that sometimes not unpleasantly or unseemly.

Synecdoche, is that when of a part there is attribution to the whole.

Prosodia, **Prosody**, is the Art of Accenting; that is the rule of pronouncing a Word truly long and short. It is divided into

Tonus, which is a note wherein a Syllable in a word is to be pronounced high or low according to the Accents: but of these I have shewed before in the terms of Printing.

Spiritus Prosodia, is the true life of pronouncing, of which there are two kinds: **Asper** or **Asperative**, is an Aspiration or low pronouncing of a Syllable when it hath no Accent.

Lenis, is to pronounce words very even and smooth without any roughness, of which there are five Rules of sounds.

Differentia Tonum,
Transpositio Tonum,
Attractio Tonum,
Concisio Tonum,
Idioma, **Tonum**,

Tempus, or timing of a Word; is to pronounce it with measure, of which there is a short note thus marked $\acute{}$ and a long Note thus marked —

Foot of a Verse, is commonly of two Syllables, some of three or four Syllables, rarely of any more, and are measured by certain observation of times.

Spondaeus, a Sponde, or a foot consisting of two long Syllables. []

Dyrrhichius, a Foot consisting of two short Syllables, in a Verse.

Trochaeus, a Foot in a Verse consisting of a long and short Syllable.

Iambus, a Foot of a short and long Syllable in a Verse.

Holossus, a Foot in Grammar Verse containing three long Syllables.

Triachus, a Foot of three short Syllables.

Dactylus or a **Dactyle**, is one long and two short Syllables.

Anapaestus, a Foot of two short, and one long Syllables.

Bacchius, is one short and two long Syllables.

Antibacchius, is two long and one short Syllables.

Amphimacer, is a Foot that contains a long, a short, and a long Syllable in a Grammar Verse.

Amphibrachus, contains a Foot of a short, a long, and a short Syllable in it.

Choriambus, **Choriambique**, a Foot having first and last Syllables long, and two middle short.

Scansio, or the Scanning, or Scanning of a Verse; It is to prove the just and right Feet in a Verse, in which there are these five Accidence: as,

Synalaepha, is a contraction of two Vowels into one, in words following one another.

Eclipsis, is as often as an (m) with its Vowel doth follow a word beginning with a Vowel, in Scanning they are cut off, as if such words were Defective.

Synacresis, is when two Syllables in a word is contracted into one.

Diaeresis, is where of one Syllable dissected or cut, there is made two: as *Erblisse* for *Erbrisse*.

Caesura, is when a short Syllable after an absolute Foot is extended or lengthened in the end of a Word; an inlaying of a piece of a Verse.

Caesura Species, the Accident, or Figure or form of the word **Caesura**, is terminated in these four words: as,

Terminimeris, which contains only one Foot and a Syllable.

Penthemimeris, is from two Feet and a Syllable.

Heptemimeris, from three Feet and a Syllable.

Enneemimeris, persisteth to four Feet and a Syllable.

Genus Carminum, is the kinds of Verses used Grammatically, which are these following

Carmen Heroicum, Heroick or lofty Verse, which consists of six Feet, that is of two Dactyles and Spondee, fifth a Dactyle, sixth a Spondee, the rest following as we will.

Carmen Elegiacum, called also **Pentametrum**, an Elegy or Verses of Mourning and Lamentation, these consists of a double **Penthemimeris**, whereof the two first Feet be Dactyles and Spondee's, with a long Syllable, the other two feet are altogether Dactyles with a long Syllable.

Carmen Asclepiadaeum, **Asclepiad Verse**, which consists of a **Penthemimeris**, that is, of a Spondee and Dactyle and a long Syllable and two Dactyles, and after some a Spondee, a Choriambick and two Dactyles.

Carmen Sapphicum, a **Sapphick Verse**, so called from *Sappho* a Famous Poetess held to be the first inventor

ventor

inventer of them; It consists of eleven Syllables, and hath a Trochee, a Spondee, and a Dactyle, and two Trochees immutably.

Carmen Phaleucium, or **Pendecasyllabum**, a **Phaleusick Verse**; It consists of eleven Syllables, a Dactyle, a Spondee and three Trochees.

Carmen Iambicum Archilochium, a **Iambick Verse**; It consists usually of either four or six Feet. This Verse is distinguished into two kinds: as,

Dimetrum, which consists of four Feet.

Trimetrum, or **Penarium**, which consists of six Feet.

Carmen Adonicum, **Adonick Verse**, which consists of a Dactyle and a Spondee.

CXXV. the Cap in the Dexter corner is thus termed, an **Infula Imbowed, Turned up Cheap-wise**, with a **Wreath**, or **Twist**, and **Tassel pendant**. This with two Feathers in the fore part of the folding, on a Demy old Mans head fans Arms. Is the Crest of *Van Stuben* a German.

The like **Wreath** or **Twisted Cord** in some Crests proceeds from **Wreaths**, **Crowns**, **Mitres**, and **Caps**: of which I shall give an example or two.

Van Mulheim of *Alsatia* hath for his Crest a **Demy Moor** fans Arms, with **Als Ears**, A. **Crowned** with a **Wreath** pendant S. a **Bell** at the end of it O. **Cloaths** G.

A Demy Woman (fans Arms) cloathed per Fesse, G. and O. **Crowned**, with **Wreath** pendant, of the second: Is the Crest of *Bravnen Van Reichenberg* of *Alsatia*.

The like Demy Woman, cloathed per Pale G. and A. a **Laurel** about her Temples V. with a **Wreath** pendant of the first and second; **Button** and **Tassel** O. is the Crest of *Crantzzen Van Geispolz-beim* of Germany.

The Cap in the Sinister chief corner, is called a **Jews Cap**, or a **Jews Head Cover**: which is a kind of a **Cap** with a **Copped Top**; bound about with a **Towel**, the ends **Pendant** on each side: see numb. 115. This is born by *Jew* or *Jue*.

That in the Base is another sort of **Cardinals Hat**, delineated so, as the inner part of the Crown and under side of the Brim is seen contrary to that set forth in chap. 1. numb. 35. and 37. to which is added a **Ducal Crown**, with **Strings** and **Cassels** crossing each other.

A. 3 such Hats G. the Coronets O. is born by *Rayben*.

Such an Hat with a **Lion Rampant** on it, O. is the Crest of *Horstel*.

Some term this a **Cap Hat**, or a **Faulconers Hat**, or a **Foresters Hat**, having a round low **Crown**, and a narrow **Brim**: of these see more numb. 128. and chap. 1. numb. 64.

CXXVI. This is a **Maunch** or **Sleeve** of the newest Fashion, being now in use by the great Gallants of our times, even in the present year at the writing hereof which is 1680. It consists of these several parts, which

[]

may ficy make it be termed the **Hounds Ear Maunch**.

The **Sleeve** and its **Turn up**.

The **half Sleeve**.

The **Turn up** which hangs like Ears.

The **Linnen Sleeves**.

The **Cyes** about the **Wrists**.

The **Ruffles**, or **Falls**.

CXXVII. This is the **Maunch** that was in great use about the Year 1548. and at those times it was only a plain close Sleeve, made fit for the Arm, with a plain or **Laced** cuff close to the **Wrist**, the **Shoulder Wing** being all the strangeness of its fashion, which was a thick round quilted Roul, divided into lesser, as if it were a **Raise** or **Wreath** work.

Per Pale A. and G. a Woman issuant, clothed in a close Bodied Gown, with the **Maunch's**, or **Sleeves** Wreathed in the **Shoulder**, and a **Wreath** about her Temples Counterchanged of the Field. Born by the name of *Van Alderberg*.

CXXVIII. This **Maunch** or **Sleeve**, was in fashion about the Year 1520. and is in a manner the same to the foregoing: being a plain close and narrow Sleeve made fit to the Arm, from the top to the **Shoulder**, it had a kind of half or quarter Sleeve, or rather a kind of round deep **Shoulder Wing**, which was wrought after the manner of quilted work, some part rising, puffing, or swelling out, and then again other places (yet in Decent and Comely order) falling down, or inwards to the **Sleeve**.

In the Chief of this quarter, is a kind of **Cap Hat**, or **Hild Cap**, **Turned up** on the side, to two points on the out sides, adorned with a **Crown** about the **Crown**: and such an one I find born for the Crest of *Don Coronetto*, a Spanish Family: see numb. 125.

A. 3 such S. Crowns O. is born by *Brandishfiel*.

In the Dexter base is an **Infula Crowned**, or **Adorned** with a **Coronet**, under the **Turn-up**: which kind of bearing I find doth belong to *Van Langenack* as his Crest: viz. a **Spiral Infula**, S. **Surrounded** with a **Ducal Coronet**, O. with the **Turn-up** over it, ending in a **Point** behind (to the Sinister side) A. **Buttoned** on the top, of the second.

B. 3 such G. Crown and **Button** O. **Turn-up** A. is born by *Alten* an Italian.

These are often born with **Garlands** round the middle of the **Infula** of **Roses**, **Leaves**, **Buttons**, and such like.

CXXIX. This is another **Maunch** and of the same make in the **Sleeve**, only it hath a **side Wing**, or **half Sleeve** at the **Shoulder**: which I have observed in old Pictures which were in the Year 1432. and thereabouts: Of two fashions they wearied them, the one with **whole Cloth** of a wide compass at the lower side or end of it, and then gathered into **Pleats** or **Fouldings** at the **Shoulder**, where it was joynted to the other part of the Garment. The other fashion was **Cordi-rope** like, the same being cut through like so many little **Skirts**, or **Lapps** of a **Doublet**.

CXXX.

CXXX. This fashioned **Maunch** with a **close Sleeve** and **Cuff** was worn in and about the Year 1412. It was called the **deep** and **Indented Winged Maunch**, for the Wings on the shoulders were not only broad on the top of the Sleeve, but the Wing run deep down the Back almost even to the Waste; and of these kind of Wings some had them whole, making a division by fowing between each indent; others had them cut into so many pieces **Cordi-rope** like.

CXXXI. This was a great fashion for **Noble Persons Maunches** or **Sleeves**, in the Reign of **Queen Elizabeth**; most of her Pictures in her Elder days being drawn in this Garbe, that is to say about 1580. They were outwardly of the finest and purest white Laun or Holland, having an inward Lining stuffed with Cotton Bombaste, and then by the Art of the Semstrels wrought into round Puffs, which compassed the Arm, which again were subdivided into other lesser Puffs, which stood up in every round like so many rising, or Imbossed swelling Ovals. This may be termed the **Queens Maunch**.

A **Queens Maunch** crested A. Pinked or Slashed G. with an hand out of it holding of a Stone or Diamond Ring, is the Crest of **Goltz** of **Smabish**.

CXXXII. This is the **Virago's Maunch**, I cannot ascertain any time to the principal use of this Sleeve, because it is so often drawn in all fantastick pieces, and Copper Cuts. It consists of a **full thick swelling sleeve** tied up in the middle below, or above the Elbow, thereby to make the other part to swell the more out. These usually have ruffled or Ruff Cuffs at the Hand Wrists, and a long, small and narrow Wing at the shoulder.

There is also another sort of these **Maunches**, which I well remember was in use, in King **Charles** the Firsts Reign, about the beginning thereof, which both Men and Women wore, and that was to have these said **Sleeves all slashed**, and **cut long ways** open, that either fine Holland shirts, or Silk or Satin, or that their rich Embrauthered under Waistcoats may be seen.

O. such a **Virago's Maunch** G. with an Hand holding of a Sword, point erected, with a Rose Garland about the point proper. Or after some, the point thrust through a Garland, is born by the name of **Vincent**.

CXXXIII. This **Maunch** answers the foregoing, only differs in this, that the face of the **Sleeve is open**, with one slit, being tied in the middle as that before: At this open was seen either fine Holland or Cambric inner Sleeves, or else Silk or Satin laid with Silver or Gold Lace, or richly Imbrauthered. The Cuff belonging to this fashion, was generally Ruffles, or falling Cuffs.

CXXXIV. This is a **Maunch half Maunched**, being a close sleeve, with another open or wide sleeve coming over it, even to the bending of the Elbow. This was in fashion about the year 1620 and 1644. The Wing of this Sleeve was but narrow, yet it was cut in flaps or **Cordi-ropes**; the Cuff in use with it, was a deep falling, or single Cuff gathered much in the Stock, with a Ruff or Ruffle at the VVrist.

*

This half Sleeve was also much worn open from the VVing to the Bent of the Arm, where the two corners were usually tyed together with a Rubin.

CXXXV. This is a **Maunch** or **Sleeve**, with a loose hanging sleeve on the Back of the Wing coming down to the Skirt of the Garment; it was much in use by old and grave Matrons in the days of **K. Charles** 1633. as it is a wear amongst little Children with us to this day; the Cuff was either a single Cuff fastned on the Sleeve hand, or ruffe Cuffs about the Arm VVrist; and with the Richer and Nobler fort, both together as one Cuff.

- Thus much for Womens Sleeves, now an example or two I shall give of the fashion of Mens Sleeves, especially those most remarkable.

In the dexter Base of this quarter I have caused to be set two **Hands and Arms embowed**, which as they are born in a Coat of Arms are thus Blazoned. He beareth Or, two **Arms and Hands lifted up, couped** below the Shoulders, and **contrary embowed**, proper, **Sleeves Gules**, turnings up Argent. Born by the name of **Rasp Van Lausenbach** of **Swabadin**.

Azure two **Hands and Arms** couped at the Elbow, **erected**, Or, is the Coat of **Lawfen** of **Switzerland** in the **Netherlands**. Others in the Blazon of these Coats term them the **Dexter** and **Sinister hands** of a **Han**, &c.

The like, the **Sleeves S.** is the crest of **Cundiger**.

Party per fesse S. & A. 2 such couped, **Sleeves** of the first born by **Marxen** of **Lekwerbeim** of **Alsacia**: Who hath for his Crest on a Cap S. Turn-up A. the like **Arms**.

Party per pale G. & S. the like **Arms** couped, **Sleeves** counter-changed, holding of a Ducall Coronet with a Mullet of 6 points out of it, O. is the Coat and Crest of **Van Berbisdorf**.

Two such **Arms**, the **Sleeves** one per fesse O. & G. the other contrary changed, is the Crest of **Van Der Hohen Landenberg**.

Two such, the **Sleeve** of one G. the other O. holding a Rose Garland of the first, is the Crest of **Van Schick**.

The **Arms** thus, are much used for crests, especially holding something between the **Hands**; as, on a Torce A. and S. two such **Sleeves S.** holding a **Stone Ring**, is the crest of **Mallinkrodt** of **Westphalia**.

Out of a Coronett 2 such naked to the Elbows, **Sleeves** and turn-ups A. (or Shirt sleeves) holding a **Stone Ring**, is **Ottens** crest.

CXXXVI. This is the fashion of a **Hans Sleeve**, as they were worn about the year 1640. the first part of it was either a **Doublet** or **Waistcoat sleeve**, made fit and close to the Arm, over which is cast another loose Coat, whose sleeves reach not much below, or about the bending of the Arm, where it is turned up and faced, and hangs down at the Elbow like a **flap** or **Dogs Tongue**. Now the Fashion and Mode of this said Turn-up is various, and that only as makes so many ridiculous and fantastick mouldings in Garments; for some-

K k

times

times the facing is direct round; others are slit open at the Elbow, and hang down like Dogs Ears; others have them open on the top of the Arm, with the corners pricking up like Asses Ears.

But for **Women** to wear their **sleeves** with such a large open is much more Antient; for in Old Monuments, Paintings and Prints, I have observed this used by them above 200 years since; and so I find in a Field Azure, a Woman with her **hair dishevelled** or **pendant**, habited in a **close Gown**, O. with such **wide sleeves**, holding in each hand, a Rose slip, proper, is both Coat and Crest of *Oliverman*. See numb. 142. c.

A. the like G. in each Hand a Muller B. by Ticks.

CXXXVII. This is another fashion of a **Hans Maunch**, as it is now in fashion by the **Gallants** of our Age, for this present year 1680. but how long it will continue, the Taylor is the only knowing Man to judge of it; for indeed we are all his Apes, delighting in that Dress he puts us in, be it never so ridiculous, to put us out of our comely shapes. This Maunch consists of a **close sleeve** fitting the Arm, which is the **Wastcoat**, and sometimes but a **Counterfeit** or **half sleeve**, made of some rich Stuff or Silk, being the same as the other Turn-ups of the Sleeve are faced withal, over this sleeve is drawn another, not much wider than the Arm, which hath with it a **double Turn-up**, which lyeth on the middle of the Arm between the Wrist and Elbow, and are open in the bottome, falling below the Arm, into corners. The Cuffs hereunto belonging are various according to the fancies of men, some haveing small edges of white about the wrist bands; others ruffe Cuffs, others Falls or long Cuffs to hang over the Hands, &c. and all these of several fashioned makings, which were endless to describe.

CXXXVIII. Is another kind of **Hans Maunch**, being in all respects answerable to the foresaid, only the **outward sleeve** of this is **cut open**, sometimes Buttoned down, that it may be opened at pleasure; this is only to shew that such Gallants wear not **Cheats** or **half Sleeves**, but that their **Wastcoats** are the same clear throughout.

CXXXIX. He beareth Argent, two **Sleeves issuant** in Base **embowed** and **expanded**, Gules. Born by the name of *Mouwen*. The like **Sleeves expended** or set one behind, or by the side one of the other, the first (or next the Field) Argent, the other Gules; is the crest of the Family of *Domanz* in the Province or Countrey of *Silitia*.

CXL. He beareth party per Fesse Gules and Azure; an **Arm** and **Hand issuant** out of the sinister side in chief, proper; the Sleeve Or, turned up, with a **Towel** **hanged over it**, Argent. Born by the name of *Portomell*.

The *French* Heralds Blazon it thus. He beareth Or, on a Chief Gules, an **Hand and Arm** issuant from the sinister side, proper, Sleeve Or; supporting of a **Gonfanon**, or **square flag** over all, Ermine; which bearing belongs to *Pierre de Villiers*, Lord of the *Ille Adam*, and **Grand Master of France**.

CXLI. He beareth Or, out of a **Cloud** in **sinister Chief**, an **Hand and Arm**, the Sleeve Sable, holding a **Ladle skellet** over a **Fire of Faggots** in the dexter base, all proper. This is the Coat Armour of the Family of *Peau* or *Peanen* in *Brunswick*. Some make this short Blazoning of it, out of a **Cloud** an **Hand holding a skellet** over a **Fire**, all in **Bend sinister**, proper.

We shall in the next place give you an account of some particular Trades omitted in the third Chapter of this Book, which are to be added to them there already mentioned, as

CXLII. He beareth Argent, out of the **sinister side**, a **Hand issuant** from a **Cloud** proper, turning an **hook** in a **Slead**, having a **Rope** or **Cable** on it, extending to the Dexter side, Sable. By the name of *Roper*. According to the terms of a *Ropers Art* this is thus Blazoned, an **Hand farveing** or **Platting** of a **Cable**. Of the *Ropers Terms* I have said something before in chap. 3. numb. 55. to which you may turn back.

CXLII. a. He beareth Gules, a **Woman** in a **close Bodied Gown**, **Girt** about the middle, with **round Wings**, and **turned up** at the Elbows Or, **Apron** Argent, **hair pendant**, holding up in her right hand a **Garland Vert**, and the left on her side, by the name of *Padding*. Some for shortness only Blazon it thus, a **Woman** with her **Hair pendant** (or **dishevelled**) in a **close Gown** with **puffed Sleeves** holding of a **Laurel Garland**.

Party per pale O. and G. the like **Woman** to the **Sinister**, habit counterchanged, holding of a **Garland** or a **Crown of Thorns** S. is born by *Van Molken*.

CXLII. b. He beareth Or, a **Pilgrim** in a **Gown** to his Heels, Sable, in his right hand a **Staff** and **Beads** with a **Cross pendant**, and his left holding a **Rake** with two Teeth on his shoulder, Sable, a **Capped Canke** on his head, and Feet bare. Born by the name of *Pilgrim*.

O. the like **Pilgrim** to the sinister, his **Gown** and **Cap** B. with a - - - - held on his shoulder, and a **Staff** and **Beads** in his left hand S. is born for the Coat and Crest of *Van Einsidell*.

CXLII. c. He beareth Argent, a **demie Woman** in **full Aspect**, her **Arms** to the Elbow **naked** (or bare) **hands clasped** together before her **Waite**, habited in a **close Gown** or **Coat** with **wide sleeves**, extended Gules, her **Temples wreathed**, with a **Twist** or **Label wreathed**, pendant, with a **Button** at the end, Or. Born by the name of *Meade*. The like G. habited O. is the Coat and crest of *Durlocher*.

The like fans **Wreath**, in a **close Bodied Coat** A. **Girdle** O. the **Sleeves** pendant (or hanging down from the

the Elbows,) the hands at his Mouth, is the crest of *Glazburgh*.

G the like to the Smister, with an Infula on her head and Scarfe pendant from the top of it A. holding a **Pair of Bellows** by the handles, the Wind Pipe erected, is the Coat and crest of *Blasleeb*.

CXLIII. He beareth Argent, a **Tankard Bearer**, in the dexter base, a **Spout of Water** running into a **Stone Cisterne**, all proper: This is the coat and crest of *Wathame*. Others term this a Man with a **Tankard**, or a **Water Tankard** on his right shoulder, to distinguish him from a Woman, which is also a **Tankard Bearer** or a **Water Carrier**.

This is the manner of carrying Water from the **Conduits** in *London* to every particular Family, and is so born both by Men and Women on their Shoulders; and in other parts of the Kingdom it is born by Men with **Wooden Poles** on their Shoulders, to which is hung small **Barrels** or **Bags of Leather** full of Water, which they bear either from the Rivers or Conduits to what place they are required, and so as to the length of their way, are satisfied for their Pains accordingly. Of these see *chap. 6. numb. 77, 78, 79.*

CXLIV. He beareth Argent, behind a **Counter** or **Counting Table**, Or; covered with a **Green Carpet**; a **Goldsmith** with a pair of **Gold Scales** or **Ballances** poising in his right hand, and several pieces of **Bullen** or **Coin** before him, all proper. Others more short, say a **Goldsmith** weighing of his Gold, behind his **Counter**, with **Shelves of Plate** at his right hand, or in the dexter chief, all proper. Born by the name of *Goldings*.

Terms of Art used by the Goldsmiths.

Refining, is purging of the good Metal from its dross.

May, is to prove if the Metal be good and right **Smelting**.

Alloy, is to mix a softer Metal with the Brittle, to make it plyable.

Melting,

Cusning, is to make it tough and fit to work without cracks or flaws.

Casting, is when the Metal is melted, then to pour it out of the Crucible into an Ingot, a Skellet, Scuttle Bone, or Flask into Sand.

Quelling, to heat the Metal red hot, and cool it to make it soft to Beat.

Flapping, to make it clean from Ashes.

Holding in the Tongs,

Forging, to beat it into the shape you will have it, in the flat, with an Hammer on an Anvile.

Pitching, is to find the center of the Plate to be worked.

Compasning, is to make it round.

Hollowing in the Block.

Deeping, is to thin the Plate on the Anvile from the edge or from the center.

Raising, is to make the Body higher.

Bouging, is to take the Pine stroaks out.

Swelling, is to give it its shape, and make it proportionable.

Planishing, is to make it smooth.

Chasing, is to make it into variety of works, as Flowers, Birds, Beasts, &c.

Drawing, is to give to each thing its true shape.

Snarking, is to set or punch it out as the shape is drawn.

Filling with Simond.

Chiselling, its true Circumference.

Imbolting, is giving every thing its due proportion, and to swell out.

Traceing, is laying the ground even and smooth, the Imbolled parts being Hatched or Freezed.

Freezing, is to fill up all void places with Scrowles, Turns or Leaves, or making them full of pricks or holes.

Hatching or **Hatching**, is to make a Beast or Lion Hairy, a Bird Feathers, Fish Scales, and Flowers and Leaves, Veins and Threads.

Moulding, is forming any thing to be cast.

Swaging, is to put edges or Threads to the skirts or any part of a Plate.

Pitching, is to raise a Lid of a Cap flat, and then to fall gently round of.

Fitting, is to set all its parts together, and to bind them with Wyer.

Charging, is to lay on the place to be Sodered both Soder and Burras.

Sodering, is to put the work into the Fire to make the Soder run.

Boiling, is to make it come to its colour.

Repairing, is to take away the Superfluities of Sodering by Filing, &c.

Burnishing, is to make the work bright and shining.

Scales and Gold Weights, with a Box of Weights to lye on the Table with a Puc of Weights and cover. Besides other Instruments are vety useful for them of this Profession: Other things in this place I shall pass by, only here give you an account of Weights and Nummers used in Merchandizing.

Of all sorts of Weights in general.

There are two sorts of **Weights** used in *England*, viz. **Troy Weight**, and **Avoir-du-pois**, corruptly called by us *Aboydepose*; by the first are Weighed Pearls, Precious Stones, Gold, Silver, Bread, and all manner of Corn and Grain.

By **Avoir-du-pois** Weight is weighed all manner of Grocery-Ware, Flesh, Butter, Cheese, Iron, Hemp, Tallow, Wax, Lead, with other Merchandizes, and all things whereof comes waste.

Troy - Weight.

A **Grain**, is the weight of a grain of Wheat.
 A **Penny Weight**, is 24 grains.
 An **Dunce**, is 20 Penny Weight.
 A **Pound Troy**, is 12 Ounces.
 An **Hundred Pound Weight**, is five score pounds.

These are the general terms of the Troy Weight, from whence there is smaller and derivative Weights, yet all have their dependance on them afore said, as there is the

The **Half grain**.

The **Scruple**,

The **Drachm**.

The **Half penny Weight**.

The **Half Dunce**.

The **quarter** of a pound.

The **half pound**.

The **half or quarter** of an Hundred, &c.

But these terms are never used by the Goldsmiths, all their names of Weights being Grains, Penny Weights, and Ounces only.

Avoir-Du-Pois Weight.

An **Dunce**, it is - - - so that it is lighter than the Ounce Troy by almost one twelfth part, so that 60 pound Avoir-du-pois is equal to 73 pound Troy.

A **Pound** is 16 Ounces; But the Housewives pound is twice so much.

An **Hundred pound**, is 112, which Merchants call the short hundred.

A **Long Hundred**, is 120 pounds.

But in all sorts of Merchandize the Buyer and Seller in all great Weights use no other terms than **Hundreds**, **Quarters**, and **Pounds**, the smaller Weights are for retail Trading only.

As the Weight of such a Commodity is 4 hundred, 3 quarters, and 8/. That is, 3 quarters of an hundred, which is 84 pound, after 112 pound to the hundred.

A **quarter** being 28 pound, 2 **quarters** or half a **hundred** 56 pounds, and 3 **quarters** (as afore said) 84 pounds.

The several Terms used about Merchants Goods.

All Goods bought and sold by Merchants are termed by **Whole-sale**, that is, great quantities together, whether in **Barrels**, **Hogheads**, **Fats**, **Chests** or **Packs**.

Wine, Oyl, Honey.

A **Tun** contains 2 Butts.

A **Butt** or **Pipe** contains 2 **Hogheads**.

A **Hoghead** containeth 2 **Barrels**.

A **Cierce**, is a **Barrel** and a half.

A **Barrel** is one **Rundlet**, and 3 parts of a **Rundlet**.

A **Kilderkin**, is the **Half Barrel**.

A **Rundlet** is 18 **Gallons**.

A **Gallon** is two **Pottles**: Now a **Gallon** of **Wine** contains 8 pound **Troy Weight** by which the fore said **Vessels** are measured; so that 31 **Gallons** and a half is a **Barrel** of **Wine**, being less than **Ale** by half a **Gallon**, and **Beer** 4 **Gallons** and half in the **Barrel**.

Corn and other Grain.

A **Last**, is the greatest measure of any kind of grain or seeds, which contains 10 **Quarters**.

A **Quarter** is 2 **Cornocks**.

A **Cornock**, is 2 **Strikes** or 4 **Bushels**, which in our County is better known by **Measures** than either **Strikes** or **Bushels**.

A **Strike**, is 2 **Bushels** or **Measures**.

A **Bushel**, in most places is 4 **Pecks**; but that which we generally account a **Bushel** of **Oats** is 5 **Measures**, each **Measure** containing 4 **Pecks**; but a **Bushel** of **Wheat** and **Rye**, or other **Grain** and **Cod ware**, is but 4 **Measures** to the **Bushel**.

A **Peck**, containeth 2 **Gallons**, or 8 **Quarts**.

Iron, Lead, Tin, Copper.

These are numbred by the **Tun**, **Hundred**, **Quarters** and **Pounds**.

A **Tun** is 20 **Hundred Weight**.

A **Hundred Weight** is 112 pounds.

A **Fodder of Lead** is 19 **Hundred Weight**, each **Hundred** being 112 pounds.

A **Pig** or **Sow** of **Lead**, is generally about three hundred pounds apiece.

Fish and Flesh.

Ling, **Cod**, or **Haberdine**, have 124 to the **Hundred**.

Stock-fish and **Herring** have 120 to the hundred, and 10000 to the **Last**, which is 12 **Ale Barrels**; some measure also **Salmons** and **Eels** by **Ale Measure**.

Hides, Skins, Furrs.

A **Last** of **Tanned Hides**, or **Leather**, is 20 **Dickers**.

A **Dicker**, is 10 **Hides**.

Calves skins, are reckoned by the **Dozen**, which is 12.

Sheep and **Lamb skins** are numbred by

Goat skins are reckoned by the **skip**, which is 50 **Skins**.

Grays, **Martins**, **Sables**, **Jenits**, **Minks** and **Filches** are reckoned by the **Timber**, which is 4 **Skins**.

Lamb

Lamb, Coney, Kid, Cat, Budge, have all five score to the Hundred.

Paper and Parchment.

A Bale of Paper is 10 Reams.
A Ream is 20 Quires.
A Quire is 25 Sheets.
A Roll of Vellum or Parchment is 5 Dozen of Skins.
A Dozen is 12 Skins.

Wool, Flax, and Hemp.

A Last of Wool, makes 12 Sacks or Packs.
A Sack is 2 Weys, or 364 pounds.
A Wey contains six Tods and a half.
A Tod contains 28 pounds.
A Stone of Wool is 14 pounds, in some places 18 and 19 pounds.

CXLV. He beareth Argent, a Bricklayer behind a Brick Wall in Fesse, with a Crowel in his right hand, all proper. Some term this a Man Working, or making up a Brick Wall in Fesse. This is the Badge or Cognizance of a Brick-Man; and may well be good for his Coat that beareth that Name.

Terms of Art used by Brick-Makers.

Casting the Clay.
Tempering the Clay.
Wheeler, is him that carryeth the Clay from the Pit, to the Moulding Board foot, and there turns it off the Wheel Barrow.
Staker, is him that puts the Clay off the ground, upon the Board.
Moulder, is him that works the Clay into the Brick Moulds.
..... is the striking of the superfluous Clay off the top of the Moulds.
Bearer off, is him that takes the Mould with the Clay in it, from the Moulder, and layeth it on the ground to dry.
..... is the parting of the Clay from the Mould.
..... is the putting of the empty Mould in the Tub of Water.
Sanding the Brick, is to riddle or cast dry Sand on the Wet Brick lying on the ground.
..... is the raising of the Brick on one side, that they may dry the better and sooner.
Taker up of the Brick, is his work also to dress and smooth them from irregular edges.
Walling the Brick, is to lay them one on another after the manner of a Wall, to keep them from foul Weather, and that they may dry thoroughly.

*

Sod, or cover the Bricks.
Setting the Brick in the Kiln.
A **Kiln** of Brick.
Arches of the Kiln, are the hollow places at the bottom, where the Fire is.
Pigeon holes, holes in the Fire Arches.
Chequer course, is the lower row of Bricks in the Arch.
Tying course, them as cover the top of the Arch.
Binding course,
Breaking course, is the laying of Brick over the Joints of its under course.
..... is the laying of Slack or Small Coal between every course or row of Bricks.
Dividing Course, is the division parts of the Kiln.
Flatting course, is the top of all the Kiln.
Daubing the Kiln, is the Claying of it all about and top to keep the Fire in, and secure the Kiln from Weather.
Firing, is to set the Fuel put in the Arches on Fire.
Pearching, put Earth about it, to stop the Arches that the Fire may take upwards to the top of the Kiln.
..... is the cooling of the Kiln after it hath done Burning.
Breaking the Kiln.
Middle of the Kiln.
Counting of the Brick.
Carrying the Brick, is to bring them to the place where they are to be used for Building, which is either on Horse-backs or Tumbrels.

Terms used by the Brick-layer.

A **Wall**.
A **Course**, is the thickness of a Brick, or a row of Bricks the whole length of the Wall.
Breaking of Band, or Joint.
Band, is the laying of Bricks so that one binds another.
Flemish Band.
Header, is the laying the end of a Brick in the outside of the Wall.
Stretcher, is the laying the Brick longways in the out-side of the Wall.
Closter, is a part of a Brick put in a Wall between two whole Bricks to make Band.
Coping, is the cutting off in the thickness of a Wall.
Screw or **Campher**, is the cutting off of a corner of a Wall.
A **Splay** or **Angle**, is the corner or turning of a Wall.
Queering, is the covering of a Wall when it is new Built, that Rain drive not into it.
Plinning, is to try by Rule whether the Wall stand straight and upright.
Battering, or the Wall Batters when it is not straight, but overcasts outwards.
Over-hangs, when the Wall bends inwards.
Bulges, when a Wall stands out with a Belly.

Quine

Quine or Quine Ends.

Stretch the Line, is to draw the Line streight to the side of the Work that the Brick may be laid streight by it.

Mortar, is Lime, Sand and Water mixt together by the **Bunginator**.

Fat Mortar, as much Lime as Sand.

Lean Mortar, when it hath too much Sand in the Lime.

Filling Mortar, having small Stones in it to fill the middle of a Wall.

Perger Mortar, having Horse dung mixt in it, which is onely to plaster or daub the in-side of Chimneys.

Top a Chimney, is to make an handsom head upon it to set it forth.

Labourer, is such as carry the Brick and Mortar to the place where the Bricklayer or Workman is Building.

Scaffold, That as the Work-man stands upon to work up high VValls.

Putlocks, are pieces of Spars to put into the sides of the VVall to lay Boards on for the Brick-layer to stand and work up high VValls.

In the sinister chief of this square *numb. 45.* is an **Annulett crowned**, having a **Tuft of Grasse** out of it; of which kind of Bearing after this nature, I find much variety; I shall only give 1 or 2 examples. This is the crest of *Reich*.

The like A. with a Plume of 5 Feathers out of the Crown S. is the crest of *Van Enningen*.

An Annulet set with 7 Palm Branches at a distance contrary Bowed, is the crest of *Van Battendorf*.

An Annulet per pale A. and G. a Tuft of Grasse contrary Bowed in the Piles, on it, is the crest of *Gundelfinger*.

CXLVI. These two **Beer Brewers** *stinging* of a **Barrel of Beer**, should have been in the Plate of Trades, but being there omitted, I shall here only give the draught of them, referring you to a farther Treatise of that Trade in *chap. 3. numb. 44.* This is the Sign or Cognizance of a **Beer Brewer**.

In the Chief of this square is a certain Bearing, which by the *French* is termed a **Chame**, it is an Annulet with a sharp rising side. Argent, 3 such Gules, is born by *Chamereh*. But from the name it should seem to be a small round Shell-Fish like a Cockle.

CXLVII. He beareth Argent, two **Men playing** at a **Billiard Table**, all proper. But if you will have a larger Blazon, than this, say, a Billiard Table lined with Green, on each side standeth a Man, the one cloathed in Scarlet, the other in Velvet, with a **Tack** in his hand, to push the Ball into an **Hazzard**, or **Hole**.

*

Things used about Billiards.

The **Table**, which is four square, or rather something longer one way, with a Ledge about it to keep the Balls from falling off, which must be covered with fine green Cloth.

The **Hazzards**, the Holes in the four corners and sides of the Table, but not at the ends, from whence, and whereunto the Ball Plays.

The **King** is the little Pin or Peg standing at one end of the Table, which is to be of Ivory.

The **Port**, is the Arch of Ivory, standing at a little distance from the other end of the Table.

The **Cacks** are the two Sticks (or what else they are made of) with which the Balls are pushed forwards.

The **Balls** are round things made of Ivory, which will turn any way.

Some Boards have a **Bell** and a **String** instead of a King, but this is a Bungling Play, there being not that Art in it, as the King.

Orders for the Play at Billiards.

1. If the Leader touch the end of the Table with his Ball at the first stroak, he loseth one Cast.
2. If the Follower intend to hit his Adversaries Ball, or pass at one stroak, he must string his Ball, that is lay it even with the King, or he loseth a Cast.
3. He that passeth through the Port hath the advantage of touching the King, which is one Cast if not thrown down.
4. He that passeth the Port twice (his Adversary having not passed at all) and toucheth the King without throwing him down, wins 2 ends.
5. He that passeth not hath no other advantage but the Hazzard.
6. He that is a Fornicator (that is, hath past through the back of the Port) he must pass twice through the fore-part, or he cannot have the advantage of *Passing* that end.
7. He that hits down the Port or King, or Hazzards his own Ball, or strikes either Ball over the Table, loseth that Cast.
8. He that Hazzards his Adversaries Ball, or makes it to hit down the King, winneth the end.
9. If four Play two against two, he that mistakes his stroak, loseth one to that side he is of.
10. He that after both Balls Played, removes the Port without consent, or strikes his Ball twice together, or that his Adversaries Ball touch his Stick, Hand, Cloaths, or Playeth with his Adversaries Ball, loseth One.
11. He that sets not one Foot on the ground when he strikes his Ball, shall lose an end, or if he lay his hand or sleeve on the Cloth.
12. A Stander-by, though he Betts, shall not instruct, direct, or speak in the Game without consent, or being first asked; if after he is advertized hereof he offends in this

this nature, for every fault he shall instantly forfeit Two Pence for the good of the Company, or not be suffered to stay in the Room.

13. He that Plays a Ball while the other runs, or takes up a Ball before it lie still, loseth an end.

14. He that removes the Port with his Stick when he strikes his Ball, and thereby prevents his Adversaries Ball from passing, loseth an end.

15. All Controversies are to be decided by the Standards by, upon asking Judgment.

16. He that breaks the King Forfeits 1 s. for the Port 10 s. and each Stick 5 s.

17. Five ends make a Game by Day light, and three by Candle light.

The Game of Truck.

Truck is an *Italian* Game, and is not very unlike **Billiards**, the Table is something longer and covered with green Cloth, it hath 3 holes at each end, besides the corner holes.

The **Sprig**, which stands for the Billiard King, stands at the middle, near one end; it is a piece of Iron made fast in the Board.

The **Argolio**, which is as the Port at Billiards, stands against the middle hole at the other end; and is a strong hoop of Iron fastned to the Table.

The **Cacks** with which they play, are much bigger than Billiard Sticks, and headed at each end with Iron; from the middle is round taperwise to one end, the other is flat.

The **Balls** are of Ivory, as large as Tennis Balls. In the Play they use the same Orders as in the Billiards, only they have these terms in the Playing.

Cruck, that is the striking of the Ball to the Adversaries, to hole him.

Bank, is to lay the Ball at a certain place by striking it.

Fulkat, or **Fulkating** over hand, is to make your Ball jump over his through the Argolio, when his Ball lies directly in the way before you.

The Game because it is soon up, is either nine, eleven, fifteen, or as many as you please; for if you Truck your Adversary, it is one Cast: If after you have past, you Truck your Adversaries Ball, and hit the Sprigg, it is three: If you pass at one Stroak, Truck your Adversaries Ball, and hit the Sprigg you win four, but this is very rarely done.

CLXVIII. He beareth Or, on a Table covered with a Carpet, a **Chess Board** proper; on each side a **Man** seated in a Chair, exercising themselves at the Game of **Chess**, the one clothed in Blew, the other in Red. Now you may say more shortly, Two Men seated in Chairs each side a Table, Playing at **Chess** or **Daughts**.

Chess is a Royal Game, and more difficult to be un-

*

derstood than any other Game whatsoever, and will take up some time in the Playing; Artists at the Game, have Played a Fortnight by times before it hath been ended: The Table is a four square Board divided into 64 squares, Chequer like, each contrary to other White and Black, the Chess-Men are these following.

The **Kings**, which is the first and highest, called

The **Queens**, which are the next in height, called also the *Amazons*.

The **Bishops**, which have cloven Heads, called the *Archers*.

The **Knights**, having their Heads cut assaunt like a Feather in a Helmet.

The **Rooks** have a round Buttoned Cap on their heads, called also the *Rocks* or *Dukes*.

The **Pawns** are all alike, they are Serving Men to the Noble Men.

Terms used in Chess-Play.

A **Forke**, is when two of the Adversaries Rooks stand in the same Rank, and a House between them void; if a Pawn guarded with another, advance into the House before them, thereby one of them will commonly be taken; This is of some termed a **Dilemma**.

A **Stale**, is when a King hath lost all his Men, and hath but one place to fly unto, if he be Barred there without Checking him, so that being now out of Check cannot remove but into Check, is a Stale, and he that giveth it to the distressed King, loseth the Game.

A **Blind Mate**, is when one giveth Check Mate, but seeth it not, yet nevertheless it is a Mate, though a disgraceful one.

A **Dead Game**, is when only the two Kings are left, at which most Gamesters will draw Stakes; some will do it when they have but a Knight or Bishop left with their King; and the enemy only his King, for then it is not possible to give a Mate by force.

Take Guard or **Guards**, is the securing of the Men that they be not taken, by having others at their Back.

Check, is when pieces lie in the way, that neither the King, Queen, or any other cannot pass, but are forced to stand.

Pawn-Mate, is when the King cannot remove out of the Pawns way, but is taken by him, which is the end of the Game, and lost by him whose King is so Mated.

Mate, is when the like is done by a Rook, so that the King is taken, or that he can neither take the Checking piece, nor cover the Check, nor yet remove out of it.

Pawn-Check, is when a Knight hath checked a King of the adverse party, so that he cannot be covered, then the King must either remove, or course the Knight to be taken, for he himself cannot take the Knight that Checks him, or its Mate, and the Game is up.

House, is every one of the squares, whether they be white

white or black on the Chess-Board, which are termed 1, 2, 3, 4, of the one Gamester, and 1, 2, 3, 4, of the other Gamesters.

Field, is the whole square of the Board.

Scholars Check, a Check that might have been avoided, had not the Player been a young Beginner.

Scholars Mate, is a Mate that might be prevented, but is made by young Beginners.

Check Mate, is the end of the Game, which is by following the flying King, giving him Check as long as he hath any place to fly unto.

Laws of Chess - Play.

1. If you **Touch** your Man, you must Play it, and if you set it down any where, it must stand there.

2. If your Adversary Play a **False Draught**, and you spy it not before you Play the next Draught, it is then too late to be Challenged.

3. If by mistake, you Play a False Draught, and your Adversary let it alone for his **Advantage**, till he hath Played his next Draught, you nor he cannot then recall it.

4. If at first you **Misplace** your Men, and Play 2 or 3 Draughts, it lieth in your Adversaries choice whether you shall play out the Game, or begin it new again.

5. The King in **Changing**, may not go into Check, nor at any time remove into Check.

6. If your Adversary playeth or discovereth a Check to your King, and giveth you no notice of it, you may let him stand so for that Draught if you please.

7. If your King **standeth in Check**, and you remove a Draught or two, the Adversary may not give Check when he pleaseth, unless he remove the piece checking, or some other.

8. If you take up your **Adversaries Man**, and after think best to let it stand untaken, before you set your piece in place thereof, you must **Cry him Mercy**, or lose the Game.

9. The moving of a King, ought to be certain in his shifting, and not as you please to place him.

10. If any one **Wager** that he will give **Mate**, or **Win the Game**, and the Adversary brings it to a Dead Game, though he save the first Stake, yet he loseth the Wager.

11. He that **Gives Over** the Game before it is finished, without the consent of his Adversary, loseth his Stake.

Many more Observations might be inserted for the understanding of this Noble Game, but I am forced to avoid Prolixity.

Draughts.

Is a Play on a Chess-Board, or the back of a pair of Tables (which generally have four rows of Squares made upon it, viz. 4 of Black, and 4 of White interchangeably) and are set with the Table Men, one

*

Party setting on the White, and the Adverse party on the Black.

The Play is, to remove each Man corner ways.

If they be not in Play well **Backed** or **Guarded**, but that a Man may leap over his Adversaries Mans Head to a Void square, that Man is **Huffed**, that is, he is taken up as a Slain Man.

Single Men must go all forwards, they cannot go or remove backwards.

A **King** is that Man which hath passed through the Board to the farther side, and being Crowned (that is, having a Table Man, put upon him) is free to walk backwards or forwards as he pleaseth.

Thus they move and remove too and again, seeking to Huff one another, and him that stands longest without taking, wins the Game.

CXLIX. He beareth Gules, a Man cloathed all in White, with a Racket in his hand, Receiving (or ready to strike) a Tennis-Ball. Or say thus, a Man Playing with his Racket and Ball in the Tennis-Court.

The Game at Tennis is a most Princely Exercise; having its first Original (as I have been informed) or brought over to us from the *French Court*; it is a Gentle, Cleanly, Active, and most ingenious Recreation, exercising all the parts of the Body; therefore for its Excellency is much approved of, and Played by most Nations in *Europe*, especially by our great Gallants of *England*, where such Tennis Courts are Built.

The form of a Tennis Court is much after the manner of **Old Halls** in great Houses, all open to the top; they are generally Built long, and wide, and the **Gable ends** up to the Roof without any Windows, the sides yards up to the Lights or Windows, which are only square Pillars of yards high, on which the Roof is laid, the **floor** even **Flagged**; on one side there is a long **Gallery** for people to stand in to see the Gamesters Play, over which is made a **Penthouse** of Boards evenly laid, that the Ball being cast upon it, may run smoothly, without any Rubs; the Lights are all hung with **Netts**, to keep the Ball from flying out.

The manner of the Play is so intricate that it is hard to describe, which I suppose is the reason none (as ever I could hear) have written concerning it, as of other Games; there being so many **turnings**, **windings** and **motions** of the Body; as also the several ways of **striking** the Ball both **backwards**, **forwards**, **under** and **over hand**, and from the **rebounds**, that they were endless to set down; yet according to that little understanding I have in the Play, I shall give you some few of those terms which is used therein, as

Serve, is the first casting out of the Ball upon the Pent-House, for him on the contrary side to strike at.

Stroke, is a Blow given to the Ball as it comes off the Pent-House.

Fault

Fault, is to miss a Blow or stroak at the Ball, which if it be twice missed, it is a Loss to that Player, which is 15.

Line, is a long Rope hung over-crofs the middle of the Court about a Yard off the ground, with a Net on the Ground.

Stroak of the Ball into the Net, is a loss of 15 to the Player.

Ball struck into the square hole at the end of the Tennis Court, is a place made up with Boards, with a Pent-house over it, into which place if a Ball be struck, it is a loss to the Striker.

Distances, are 6 figures made on the ground on the Service side, each a Yard asunder; on the other side there are only two Figures besides the Galleries.

Blew, is a Line drawn on the Flags over-crofs the Tennis Court on the Hazard side, over which the Player must serve the Ball, for the other Player to strike it.

Hazard side, is the side where they receive the Ball from the Pent-house.

Pent-house, the place on which they first cast out the Ball.

Chafe, is to miss the second striking of the Ball back.

Bisk, is a stroak given by the better Player, that gives him a stroak, and is 15 when he pleaseth, and will save him from a Fault if he loseth one.

Stroak forwards, is a Cast in the Play.

Loss, it is more or less, sometimes a single loss; sometimes it amounts to 15.

Game, is a part of a Set, and is generally wone by that side as gets the first 4 Stroaks.

Set, is either 4, 6, or as many Games as the Tennis Players agree upon.

Laws of the Tennis Court.

1. They that serve upon the Pent-house, are to serve behind the Blew on the Hazard side, else it is a loss.

2. If the Receiver miss two stroaks at his Serving, which is two Faults, it is a loss, which is 15.

3. They that get the first four stroaks, get the first Game of the Set, which may be as many Games as the Players order to be in the Set.

4. If 4 Games be the set (or what other number agreeable) when they come to four all, then you must play the first come to two Games, before you win the set; or you may make it otherwile.

5. If it be agreed upon, you may Play as many as you please on a side.

6. You must observe that there is no changing sides without two Chafes, or Forty one Chafe, and then they may change sides, and the other serves upon the Pent-house beyond the Blew, and then the other is bound to play the Ball over the Line, between the Chafe and the end Wall; and if the other side misses to return the Ball, he loses 15.

8. He that gets a Biske, makes him a stroak, which is 15, and saves him from a fault which is the missing of a stroak.

9. None is to be in the Court but the Players, and him that counts the Game, who is the Judge.

10. All Standers in the Galleries are not to speak a word in the Games, except they be asked, if they do, they lie liable to pay the Game that they plaid for.

CL. He beareth Argent, a **Slater** sitting on a **square Stone**, with another before him Gules, with his **Hewing Knife** lifted up in his right hand, and a **Slate** in the left, proper; cloathed Gules. This may more shorter be termed a **Slater dwelling** of a **Slate**, cloathed Gules, the rest proper.

In the dexter chief of this quarter, is a **Naked Man** in full aspect, only cloathed in a short Coat, close girt B. his **Legs cross**, holding in each hand a **Trefoile** G. in a Field A. is the Coat of *Mendel van Steinfels* of *Bavaria*.

Slaters Working Tools.

A Slaters Hatchet.

A Trowel.

A Hewing Knife to cut the Slates even and square.

A Pick to make a hole in the Slate.

A Pinning Iron to widen the hole in the Slate to put the Pin in.

A Hewing Block, any square piece of Wood or Stone to cut the Slates upon.

A Lathing measure.

A Stone measure.

Pins, Stone Nails or Lath Nails, and Laths or Latts.

Names of their Slates according to their several Lengths.

Short Haghattee.

Long Haghattee.

Farwells.

Chirts.

Warnetts.

Shorts.

Shorts save one, or short so won.

Short Backs.

Long Backs.

Batchlers.

Wivetts.

Short Twelves.

Long Twelves.

Jenny why Jettest thou.

Rogue why Winkest thou.

The shortest Slate is about 4 Inches, all the rest exceed an Inch, one in length from the other; sometimes less or more, according as the Work-man pleaseth.

The several ways of covering Houses, or other Buildings.

Tyling, is a covering with long square Tiles, made of Clay and Burnt in a Kiln. **Pan-Tyle**, is when they Bend round in form of an S and so lap over the edges one of another.

Leading, is by covering them over with Sheet Lead.

Flagging, is a covering made of very large broad Flags of fine Greet Stone, a Yard or more in height, and half in breadth. These are called broad Slates.

Slateing, is a covering of Houses with a kind of Blew Slaggy Marble, which will split into thin pieces of all sorts of Sizes, according to pleasure; some that are left thick, broad and long, are **double Slates**.

Shingling, is a covering with cleft Wood, made about 6 or 8 Inches broad, and 12 long, and pinned at one end to hang in the Laths: They are laid as Slates with Moss under them, which is termed **Houseting**.

Clauting, is a cover made Arch-wise of great Hewn Stones, as Ashlers.

Thatching, is to cover them with Straw, Ferne, Rushes or Grist, which is bound and held together by Laths, Windings and Thatch Pricks, done by the Art of the Thatcher.

Sodding, is the covering of little shourings and places of shade from Rain, with green Turfs or Grass Sods, or paring of the surface of Heathy Earth, which being laid on the Roof of a House keeps it dry.

CLI. He beareth Sable, a Man in a Frock (or Linen or Canvas Coat,) with a Cap upon his head, holding in his left hand a Cart Whip or White over his Breast in Bend Sinister, Sable. Some more shorter term him a **Carter in his Frock**, with his Whip in his left hand **Bendways**. Born by Carter.

In the precedent Chapters, viz. chap. 3. numb. 24. 25. I have given some small account of Husbandry, as much as concerns Hay Making, and Corn Reaping, with the Farmers Terms about the same; and in chap. 5. numb. 70. I have given an account of things needful and necessary for a good Farm, and what Husbandmen cannot be well without: And now in this place I shall give you an account of the Rules of Good Husbandry, both for House keeping, and their Monthly Observations for the good Ordering and Manuring of their Lands and Estates without Doors. All which, as it is the practice of Freeholders, Yeomen and Farmers, so it is not unworthy the Knowledge of the Gentry and Nobility of our Land, seeing the greatest of persons are maintained by the Field, and Kings have delighted in Husbandry Affairs, *Lecles. 5. 9. 2 Chron. 26. 10.*

Here I stand, with Whip in hand }
To Slash all those, that do oppose } Good Husbandry.
For all they, that me gainsay }
Shall soon run, and quickly come } To Beggery.

*

Observations of Husbandmen.

The way to Thrive, is to get a good Housewifely and careful Wife.

Careful **Husbands** are at Labour when others Sleep, and spend according to their getting and income.

It is a **Blessing** to have a good **Land-lord**, for under a bad, a Man shall never thrive.

In **Bargains** of Buying and Selling be careful and wise.

Unthriftiness, Slothfulness, Carelessness and **Rashness** in Businels, are 4 Beggars that must be Lath from the Door.

The **Officers of a good Husbands House**, is Money the **Dudge**, Work the **Servant**, Wisdom the **Controller**, good Order the **Clark**, Provision the **Caterer**, Skill the **Cook**, and **Steward** of all is Pen, Ink and a Book, Hunger the **Physician**, Thirst the **Butler**, the **Masters Eye** the **Usher**, and **Bolt and Lock** the **Porter**, Husbandry the **Bayliff** to provide abroad, and Housewifery the **Master** and **Mistress** to guide all daily at Home.

The **Armory of good Husbandry**, a sure House in good repair is his **Cattle**; a **Coffer** fast **Lockt** his **Storehouse** and **Treasury**; a **Ban-Dog** the **Scout Watch**, to give notice of a **Thief**; **Gun, Arrows** and **Bell**, to give notice that the **Chieftain** is within.

The **Enemies to Thriftiness**, are too much credit given to **Servants**, ill usage of **Goods**, a bad, destroying and a scolding **Wife**, **Graceless Children**, **Wretched Servants**, a **Ravening Mastive**, **Hogs** that eat **Poultry**, and a giddy **Brained Master**, to be each day **Feasting**, and **Building Houses** for **Glory**, spending faster than it comes in, and delighting in **Parasites**, **Harlots**, and such like as **Borrow** but never pay.

Friends to Thriftiness, is good Husbandry to get and gain, good Housewifery to keep and save, to be seldom **Surety**, but never for much, to be pinching in lending and spending, never to crave but live of their own, if they **Borrow** to be just in keeping their time.

For, who lives but Lends? or Lent too he must,
Else Buying and Selling must ly in the Dust.

Not to Trust the **Borrower** if once or twice he hath cracked his **Credit**, except he bring his **Surety**; if he be **Angry** for asking, make even with him, and trust not anew.

Take **Weekly** and **Monthly Accounts** of thy Expenses, first **Reckon**, then **Write** before you **Pay**, and **Receive** before you **Write**; Be sure to receive good Money.

Keep not **two Houses** for **Pleasure**, for that is double Charges, for the **Rolling Stone** can gather no Moss.

The **Masters Eye** makes the **Horse Fat**, and Work to go forwards, and the **Mistresses Eye** doth as much, which if they govern with **Skill** and **Reason**, their **Servants** are ever at their **Will** and **Pleasure**.

To

To seek Revenge for every Trespas or Wrong, shall not long live quiet.

Go not to Law, except on urgent occasions.

Say little to Hawkers and Hunters, neither be Rude, but rather open them a Gap than let them do it themselves.

Keep the Sabbath, and thy Servants from-gadding abroad, observe Fifth days and Fast days according to the Custom of the Church, pay thy Tythes and Offerings freely.

Pay Workmen weekly, to feed their Household, and Servants Quarterly, to Buy what they need, and be Charitable to the Poor, and give to cover the Naked.

Keep out Rascals and Vagabonds that are Slothful and will not Work, Purloiners and Filchers that lurk about Houses, and Lubbers that are loth to take pains.

Give thy Children good Nurture and Learning, and teach them how to live in the Fear of God, for this is the best Portion that can be given.

Do not pinch or spare, nor pine thy self to Chest Bags for thy Wife, for after thy Death they shall be open to such as sooth her, and so come to waste; but good husbandry to prevent these frailties in some; take part of Gods Blessings, and leave the rest to Wife and Children each one their part, as he thinks best.

Januaries Husbandry Observations.

When Christmas is gone, we must begin our Work to renew.

If the Weather serve bring Muck to your Field, and dig your Gar dens, and break up Ground.

Ewes ready to Year put in clean ground free from Stubble, Mire and Briers, and keep them from Dogs, Rear Lambs that are Twins, and they will breed Twins.

Rear Calves and geld them, let them be likely and fair, and Calved between Christmas and Lent, Sell such as fall between the Change and prime of the Moon.

A good Farrowing Sow is as profitable as a Cow, rear Pigs that are largest.

Geld all Cattel young, as Calves, Colts, Lambs and Pigs. Lambs soon sold, is best for old Ewes, but if you will have Milk from the Dam, let it suck till May, the like observe in the Goat.

Good to Lop and Prune Trees, and fall Wood.

Set or remove young Trees and Stocks, Vines and Grasts, [a] Willows, Muck Hop-yards with Pigeon Dung.

Set Chestnuts, Walnuts, Nuts, Filberds, Apricocks, Peach-a, Plums and Cherries, with all other Stone Fruit; set the young Bay and Laurel, or the Berries.

Set the Kernels of Apples and Pears, and all other Trees that bear Grapes.

In ridding of Pastures, fill every hole up, for that will be profitable.

Break up ground where Barly is sowed, and give the Land good Tillage.

Sow Oats now where you intend Pasture ground, and it will come the sooner, and the Oats be better, for he that sows them in May gets but little by them.

House the Rearing Calf, and suckle it twice a day, and after a while set by him Water and Hay, and a ragged Stake to rub on, and at 50 days end Wean it, so the older Wean-d will teach the younger to drink and eat.

*

Februarys Observations.

Keep your Cattel well, if you will have them work.

Lay Muck a Month in the Field before it be spread from the Dung heap.

Make good Fence and Ditches about your Fields; but for want of Pasture, let Fields for a time be laid open for Cattel to feed and run about to fill their Bellies.

Dung Meadow Land, and cast abroad Molehills; But if Meadows be given to wet, the more Molehills the better, that Lambs may sit on.

Take Sme, New Hawks, and let Shepherds look to their Flocks, for now is busie both Wild Dogs, Wolf and Fox.

Sow Kernels of Haws, Mustard seed, and all sorts of Pot Herbs and Sallet Herbs.

Set all sorts of Flowers that can be got; Trim all sorts of Fruit Trees from Moss, Canker, and superfluous Branches.

Plow and Sow Pease the Moon past the Full, but sow fine See: the Moon increasing.

Sow on Stubble for Fitches, Bean, Pease, and Runcivals; but sow not white Pease till St. Gregories day, all in the main of the Moon, and Harrow them well.

Sow Hemp amongst Nettles, and the Nettles will die.

Set Clapper and Scare Crow, with Gun, Bow and Arrow, where such Seed and Coal-ware is sowed.

And now he that slacks his Tillage to follow a Cart, for a Groat gotten abroad, loseth three at home.

March Observations.

Sow White Pease, and Barly when the Hathorns are white, be it dry or wet, and follow the Plough with the Harrow, viz. March, April and May: And roul the Barley after a Rain when first it appeareth, and it will grow better and Mom.

If Clods in Wheat Land break not in Frost, roul it, or break them in dry Weather.

March dry or wet set Hop roots; it is also a fit Month for Grafting from Change of the Moon to the prime, regarding Wind and Weather.

Set Quick, is, and cut those of growth, cover the Roots of Trees (sened in December and January) with fat Earth.

In this Month also sow Garden Roots and Pot-herbs, slip Artichokes and Sage.

Spare the Meadow from eating, if you expect good Hay.

Spare Mires and Marshs till May if you expect good Pasturing.

Kill on the Clod the Pye, Roak, Crow, and Raven, and Pigeons fright away if you expect a good Crop.

Aprils Observations.

Make Fens, and spread Hillocks in Meadows for Hay.

Set Poles for Hops deep and strong.

Sow Flax and Hemp, set and sow all kind of Gard n Herbs, yet this Rule do not forget, to Sow ury, and set wet.

Restore the liberty of the Laborious Bee by opening her Hive.

Now let good Wives look to their Gardens, and begin to think of their Dairies, for from April to St. Andrews tide Dairies do last.

L12

May

Mays Observations.

This Month commands the Provident Wife and the prudent Artist to set their Skill on Work; in the beginning of this Month set and sow those tender Herbs that would not endure the former cold; also Buck, Pease, Hemp, Flax.

Weed your Hop-yards and Gardens, and Corn fields, Poultry are their ill Neighbours.

Put Lambs from Emes that are to be Milke'd, and Kids from the Goats; and keep Sheeps Tails from Maggots and Mads; put Calves to Grass.

If Corn be rank turn in Sheep to Wood-lands, never to Champion ground, or Mow in.

Drain Ditches and Fens, and twice Fallow thy Land, and gather up Stones.

Watch swarming of Bees, and thrash up thy Barn.

Fetch home Fuel, as Coals, Billets, Faggots and Turf, but Crop not till Michaelmas.

Junes Observations.

Wash Sheep to Shear, and Shear them the Moon increasing.

Repair thy Barn and Floor, keep all dry over head.

Marle and Slice thy ground, and mow thy Meadows.

Plow early, and have Cart and all things in order to bring in Fuel and Fodder.

At the Full of the Moon this Month and next gather your Herbs to keep dry for all the Year.

Set Rosemary and Gilliflowers, and sow Lettice and Rarish 3 or 4 days after the Full, and they will not run to seed.

Distilling of Roses and other Herbs, and making Syrups and Conserve are now in prime.

Julys Observations.

Get Rue, Wormwood, and Gall to strew on your Floors to destroy Fleas.

Now is the time for Hay-making, and make Horvels and Stacks for want of Barning.

Pull up thy Hemp, and dry Flax get in, Mow or pluck up thy Buck and Branke.

Thrice Fallow thy ground.

Gather ripe Pease and Beans to eat from thy Garden.

At the Full of the Moon gather Flowers and Seeds, dry your Flowers rather in the Shade than in the Sun, but to avoid Corruption let the Sun beat a little visit them.

Augusts Observations.

Gather Saffron and Mustard seed; and now with Thankfulness Reap your Harvest by day, and gather and Cart it dry in.

Get Gorse, Hamme, Heath, Turf and Furzin for Firing.

Break and Swingle Hemp and Flax.

Thrice Fallow Ground, sow Winter Herbs in Full of the Moon, and muck for Barly ground.

Esteem of fair Weather as precious, and mispend it not.

After Harvest Harrow thy ground, let it lie Common if Town Fields.

Mend High ways, and provide Milch Cows for Lent, and Salt fish.

Septembers Observations.

Sow Rye in the Dust, the cleaner the Rye the better the Crop; Sow before Michaelmas.

Muncorn, mix Rye with Wheat to sow, and sow it neither too thick nor too thin, for Weeds grow where Seed is wanting; and endeavour to keep off Pigeon, Rook and Crow.

Now is the time to Trench, Hedge, Ditch, repair Mud-walls, scour Ponds, and mend Dams.

Gela Bulls and Rams, Sty the Hog and Boar, and ring the Swine.

Mast and Acorns for Hogs gather now.

Gather Crabs, pull Grapes, with other Michaelmas Fruit.

Karle Hemp up clean which before was green, beat out the Seed, and lay it to steep in a Pit.

The beginning of this and end of the last Month gather Hops in fair Weather, and new Den.

Set Quick Sets, remove Trees from this time to February in the New of the Moon, and the Weather warm.

Sow Parsnips and Carrots, Set Roses, Raspes, Barberries, Gooseberries and Strawberries.

Now Old and New Farmers make Bargains and take Farms.

Octobers Observations.

Plow up and round ground for Barley.

Sow the best Wheat upon Pease, Edish is also good to sow Wheat.

Woodland and Manured Land will bear three good Crops,

1. Barley, 2. Pease, 3. Wheat.

Champion Land will abide but two Crops, 1. Barley and Wheat, or Barley and Rye, 2. Pease.

Fallow ground (to lye saugh) is good for Wheat, but Waterish Fields bad.

Gravel and Sandy ground is not the best, but rotten black Land is worth Gold.

Hard Barren Land doth bear a small Straw and Ear.

If Weather prevent not, Sow Wheat before Hallownas Eve.

Much Wet causeth Thistles and Weeds.

Gravel and Sandy ground is good for Rye, Clay and rot-tener Land for Pease and Barley.

Lusty and strong Land for Wheat, which makes the Straw and Ear big and strong.

Light Land for White and Red Wheat.

Heavy Land is best for white and red Pollard, and Turkey and French Wheat.

Crop upon Crop of the same Grain, will bring Land soon to decay; therefore some use 1. To Fallow. 2. Barly. 3. Pease. 4. Wheat. 5. Fallow again, or ly Lay for Cattel.

Upland new broken up or over Dungen is not best for Wheat.

Pease Sowed, and a Fallow after, requires no Dungen for Wheat.

Ground that hath Winter Water upon it, sow with Cattle, Pease, Runcivats and Fitches.

In this Month sow Acorns and Hastings, set Quick Set, sow Kernels and Berries.

Novembers Observations,

Sett Crab-tree stocks to graft on, and in the beginning of the Month remove young Plants and Trees about the new Moon, observing this as a seasonable secret, that in setting, they will place that side to the South and West, which will be before you took the Plant up.

With the old of the Moon set Pease and Bean, sow Parsnips, Carrots, and Garlick.

Trench Gardens with Dung, and uncover the Roots of Apple-trees, and so let them remain till March.

Kill Swine in or near the full of the Moon, and the Flesh will prove the better, for now Hogs, Pork and Souce, is good for in a Country Farm, but much Bacon and long kept groweth Rasky.

If thou have it, Thresh Barley for Malt, but for thy own use, no more then is to be used.

Till March Thresh not Wheat but as you Eat it, for fear of Rusting and Fustiness.

Rear no young Cattle in the Winter.

Lay Muck and Straw in a Muck-hill to Rott.

Pay soul and full Privies, and Rid Chimneys by good sweeping of Soot.

Spread Mold-hills, and Ring Swine.

As in Conclusion be careful of the Barn, for Threshers in early and late are apt to pilfer and fill their Bag and Bittle.

Decembers Observations.

In the later quarter of the Moon this Month and next, or best to fell Timber.

Carver your Artichoke Roots, and all your best Flowers and Herbs from cold and storms with Muck or Rotten Horse Dung.

Look well to the feeding of thy Cattle, and blood thy Horses if there be occasion.

In no Season of Hedging and Ditching or any out Work, but to cleave Logs of Wood, and to carry in Fuel for Kitchen and Hall Fires.

Feed Bees with Honey, remove young Trees and Stocks: as Cherries and Plums, in open Weather.

Christmas Fare, for the Good Husbandman and Housewife, is good Bread, good Drink, good Fire in the Hall, and varieties of good Meat: as Brawn, Pork, Puddings, Souce, Beef and Mustard, Mutton, Pig, Veal and Pyes of the best, with Geese, Capons, Turkeys, and Ducks: also Cheese, Apples and Nuts, &c. with Masking and Mimming, Carols and dancing good Store.

And of other Dainties I leave out a many, which costs the Husbandman never a Penny.

CLII. He beareth Argent, a Turner, Turning (or Throwing) at his Lath, all proper. This is the Coat belonging to the Company of Throwers.

[]

A Turners, or Throwers Tools.

A Lath with all its appurtenances or members thereunto belonging which you will find named c. 8. n. 149.

The Seat, where the Turner sitteth when he is Turning.

Gouges of all sorts, bigg and little, wide and narrow.

Hooks or Hook Gouges of several sorts.

Grooving Hooks, and Grooving Tools.

Chisels, and flat Chisels.

A Handrel, a Broad flat Handrel.

A Pin Handrel, and an Hollow Handrel.

A Screw Handrel.

Collars of several fashions, with the joynt and round Collars.

A Hawl,

An Hatchet,

A Draw-Knife,

A Cleaving Knife,

A Chopping or hacking Block.

A Pair of Compasses,

The Callipers, Compasses with crooked shanks to measure the Diameter of any round body.

A Drill-bench,

A Swath Board,

The Brasiers turning Tools.

The Brasiers Lath, with its Members: see chap. 8. numb. 162.

An Iron Axe,

Hooks, or Edge Tools.

An Iron Lath, called a Turn Bench.

A Drill-bow, and Drill-string,

A Grader and a Sculptor, of these there are round and flat, great and small, to the intended Moldings, in the Work.

A Turning Engin, by which Oval Work is turned, also Rose Work, and Swath Work is made: chap. 8. numb. 143. 163.

Terms of Art used by the Throwers or Turners in their Exercises.

Axis, is the imagined straight Lines that passes through the two Center-points that turned Work is turned upon.

Crack or Crank, is the end of an Iron Axis, turned square down and again turned square to the first turning down, so that at the last turning down a Leather Thong is slipt, to tread the treddle Wheel about.

Female Screw, the Screw made in a round hole of a Nut, or Box.

Male Screw, the Screw made upon a Shank, or Pin.

Nut, a piece of Iron that the Female Screw is made in.

Swath,

Swash Work, is a Figure whose circumference is not round but Oval; and whose Moldings lie not at right Angles, but oblique to the Axis of the Work.

Wabble, is when a piece of Work is not pitcht true upon its Centers, it will in a revolution incline more to one side of its circumference than on its opposite side.

There are several other Terms used in the Exercises of **Turners** not mentioned here: which are used in the Trades of **Joiners, Carvers, Carpenters**; in which Occupations they are set down, to which I shall refer you.

CLIII. He beareth Argent, a **Mans Face coupéd below the shoulders**, proper; having three **Sun Beams** proceeding from each side his Head, Or: **Clothed Gules**. Born by the name of *Colmarstine*. The like to this **Clothed Argent**, having an **Elevation** on his Breast parted per Pale Sable and Argent, two **Cheverrons counterchanged**: is the Crest of the Family of *Wolfgangheim* in *Alsatia*.

A **Mans Face** with a forked **Beard**, and side or long **Hair**, with the **Sun Beams** issuing from his **Temples**, Or. Is the Crest of the Honorable the Baron of *Hilton*.

Some Blazon this a **Mans Face**, others a **Womans Face** with **Sun Beams** each side the Head; saying no number by reason such bearings have them always three in a Place from that part they do proceed; as a **Giffin** (sans Wings) **Leggs, Beak and Gorged** with a **Coronet Chained**, Or: having the **Sun Beams** proceeding from each Shoulder and the lower part of the Back, is the Supporter of the Right Honorable the Earl of *Ormond*. The like is born by the Lord *Hannsdin*, with this difference that the **Giffin** hath the like number of **Sun Beams** out off his Forehead; viz. three Beams, *Cum multis aliis, &c.*

Now here is one thing to be noted, in the manner of the **couping** of such kind of Bodies: for to say, **couped at the Shoulders**; then it is to be understood that there is a part of the top of the Shoulders joyned to the Neck, as is shewed more largely, *lib. 2. chap. 17. numb. 5, 6, 7.* But to say **couped below the Shoulders**, then it is to be taken that the coupling is to be at the Navel or lower then the Breast, though there be no Arms seen at the Body: for were there Arms, it would or could not be termed, a **Body Coupéd**; but a **Demy Man** or **Woman**, as you may see *chap. 4. numb. 59. and lib. 2. chap. 17. numb. 63, 64.* Now this way of coupling is much in use amongst the Dutch and German Heralds, as the Works published by *Johán. Sibmacher de Norimbergia, Anno 1605. & 1609.* doth abundantly Testifie: see *chap. 3. numb. 16. and lib. 2. chap. 18. numb. 143.*

CLIV. He beareth Argent, a **Mittals**, or **Cuckolds Face**, proper; **Band Argent**: his **Cloths** below his Breast triparted, or turning into a fouldage, Gules. Born by the name of *Garvittal*.

This way of bearing things triparted into fouldage (that is, into Leaves representing the three pointed

[]

Leaf, or Figg-tree Leaf) very rarely exceeds more than three Leaves, one on each side, and one in the middle; and these three again are subdivided each into three, else they could not be termed **Fouldages** but **Partings**, as in *numb. 156.*

CLV. He beareth Or, a young **Satyr's Head**, or **Hydas Head** proper; sans Arms, his Garment below his Navel, turning into fouldage, Azure: Wings of the Garment and Girdle about his Loyns, Argent. Born by the name of *Douterille*, see *lib. 2. chap. 17. numb. 18.*

This manner of bearing may in short be as well blazoned a **Demy Satyr**, sans Arms, his Garments triparted into a fouldage, Shoulder Wings (or Pieces) and Girdle, so and so.

Hydas Head coupéd below the Shoulders (or under the Breast) **Clothed A.** is the Crest of *Waldeck*, in *Rhyne Palatinate*.

CLVI. He beareth Argent, a **Womans Head**, **Muffled about the Face with a Cap**, Gules; **Turned up**, Or: **Erazed at**, or in the Shoulders of the second, by the name of *Vanglin*. This is the Dutch blazoning.

B. such an Head, the Shoulders ending in a Tripartine form A. is the Coat of *Van Neicken* in *Bavaria* in *Germany*.

Some blazon this kind of parting by the term of **Triparted**, if it end in three points; and **Duparted** and **Bi-parted**, if it end in two points: as *lib. 2. cap. 18. numb. 141, 142.* for it cannot be said, to be **Erazed**, seeing there is no sign of a Renting, Tearing, or of a Raggedness of the parts, which **Erazing** signifies; when on the contrary these partings are smooth and plain, as the Examples shews.

CLVII. He beareth Azure, a **Satyr's Head coupéd at the Shoulders**, proper: with two **Dragons Wings Overture**, Or. Some term it a young **Satyr's Head between two Bats Wings**: but it cannot be said properly to be between the Wings, when the Wings are joyned to the Shoulders as these are; but rather to say a **Satyr's Head coupéd at the Shoulders, Winged like a Dragon** (or **Bat Overture**). This is the Coat Armor of *Glachiner*.

A **Mans Head** proper, with a **Cap on**, and **Mittled about the Temples** Or, and Gules; **Adorned**, or beset on each side with **Als Cats**, between two **Dragons Wings**: is the Crest of *Gaston Desfoys* sometime a Knight of the Order of the Garter, as I find in an old Manuscript.

CLVIII. He beareth Or, a **Sea Satyr's Head coupéd at the Shoulders**, Gules; this is of some Heralds diversly called or blazoned, a **Hare-Mans Head**, and a **Sea Fing**, or **Devils Head**; others a **Sea-Apes Head**, and a **Sea-Wonders Head** with a **Humane Face**: but I hold it best termed a **Sea Satyr**, being the **Land Satyr** is drawn also with Ears like an **Als**: as *cap. 10. numb. 4.* see *lib. 2. chap. 15. numb. 48.*

CLIX.

CLIX. He beareth Sable, an **Harpie Displaid**, Or: **Crowned**, and the **Face** or **Visage**, proper. This is a French Coat, and I have followed the French Herald's Blazon, who saith that this Coat belongs to *Monsieur Montmarry*. However I find such a bearing viz: Sable, with an **Harpie Displaid** and **Crowned**, between four **Choules** of six Rays, Or. to be the Coat Armour of *Monsieur John Count Deostfrise Lord de Durbuy*.

But if I may give my thoughts of this blazon, I should not so term it (as is aforesaid) but rather, a **Demy Roman Soldier sans Arms, Crowned**: or thus, a **face Crowned** out off a Roman Coat: but a' owe all blazon it, a **Demy Brazilian**, or **Native of Brazilian Arms**: for according to that Climate they go thus usually adorned with a Crown of Feathers on their Heads, Arms and about the middle, as you may see chap. 5. numb. 22. 42.

CLX. He beareth Argent, a **Frier** or **Monks head**, proper; **couped** at the **Shoulders**, with his **Monks Hood** or **Cowle** hanging about his Neck, Sable: **Monks, Friers** and **Popish Priests** are always born with **Bald** or **Shaven Crowns**, having only a circle of short Hair round about the lower part of the Head, and above the Ears. This is born by the name of *Monkby*.

A **Frier couped** below the **Shoulders**, with a white Coat and **Cowle**, or **Hood** hanging behind his Head; which some call a **Frier Carmalite**, **couped** past the middle. Is the Crest of *Sir Thomas Barryngton*, who lived in the time of Queen Elizabeth.

CLXI. He beareth Sable, the **Virgin Marys Head** **couped** at the **Shoulders**; **Coiffe** and **Habit** (or **Clothing**) Argent, with an **Umbrel** hat on her, Or. Antiquity did ever set forth the **Virgin Mary** after this form with her **Umbrel** or **Shady Hat**, when she was represented to us in any of her travelling postures, as when she went down into *Egypt* from *Herods Bloody Massacre*, &c.

CLXII. He beareth Argent, a **Womans Head** **couped** below the **Shoulders**, on her Head a **Capped Tank Embowed**, and **Tied** under her Chin Gules, **Turned up** Or: **Robed** and **Faced** answerable thereto, (or after others) **Robed** or **Mantled** of the second, **Lined** of the third. This is the Crest of *Van Joansdorf*.

The like Head, **Cap** and **short Mantle**, with the **Strings** **Flotant** on each side the Chin Argent, out of a **Coronet** Or: Is the Crest of *Van Neiching* of *Bavaria*; whose Coat I had occasion to tell you before, numb. 56. Some take this to be a **Demy Woman** **Pilgrim** in her **short Cloak**, as chap. 4. numb. 36.

CLXIII. He beareth Argent, an **Annulet** beset in **Cross** with four **Buttons** **Casselled**, Or. This is the Coat, and the like is the Crest of the Family of *Abdurin* in *Switzerland*. **Annulets** after this manner have

(in the German Coats) very often things of this nature joyned to them; as **Balls, Leaves, Flowers, Feathers**, with other various charges, which if the same be not set close and full, then the number is to be mentioned and how they stand, whether in **Triangle, Cross**, or **Salter, &c.** else number them not: see the three succeeding Examples.

CLXIV. He beareth Or, an **Annulet** with eight **Staves** **flout** **conjoynd** there unto, Sable. Born by the name of *Offerby*. The like **Annulet Staved** and **flout** Argent, over a **Bend** Sable, in a **Field**, Or. Is the Coat of *Reinboltlin* in *Alsatia*.

A. the like **Annulet Staved** and **flout**, having on the top of that **Crested**, a **Mullet** of six **Points**, Or: in a **Field** per **fesse** Argent and Gules, belongs to the Family of *Aiebenzeiler* of *Alsatia*, and also to *Virmcorn* in the same Province or Countrey. Others term this, a **Mullet** on the **Point** of the **highest Staff**, or on the **Head** of the **upright Staff**.

CLXV. He beareth Azure, an **Annulet** **conjoynd** to six **Staves** **Patee** in the **Ends**, Argent. Others say, six to the ends of six **Staves** **Patee**. But it is best blazoned an **Annulet Staved**, the ends **Patee**. This is the Coat of *Pranthoch* of *Swabadia* a Countrey in the *Netherlands*.

CLXVI. He beareth Or, an **Annulet** beset with three **Boat-hooks** in **Triangle**, Sable. Born by the name of *Brobach* of *Braunschick* in *Germany*. These are termed **Fisher Boat-hookes**, see chap. 15. numb. 26.

CLXVII. He beareth Argent, a **Cross** **Catw** Gules, **Edged** and **fitched** at the **Ends**, Sable. This is the Coat of *Gundersdorff* of *Bavaria*. What this Instrument is, or what rightly to term it, I have not yet better Learned; or only to call it else, a **Crouch** or **Crouch Staff**, **hooped** and **Spiked** at all ends (till a better name be known) is not amiss.

In the Dexter of this Square, is such another like bearing, which at first sight were able to confound a young blazoner what to call it: I found it in *Abraham Ortelius* his *Theatrum Orbis Terrarum*, to be Impaled with Barry of 8, as the Royal Arms of the Kingdom of *Hungary*: and may be thus Blazoned, on a **Hill** or **Mount** of three **Cops**, a **Cross** of *Hungary*; this being sufficient to describe it, yet if you will be more curious in the thing, you may term it, a **Pale** **couped** above, and **Betitled**, or the **upright Stem** of a **Cross** thrice or **Treble Crossed**: but from the Person or Place of its bearing, is its best Denominations, as you have had formerly Examples of the like blazonings, see lib. 1. chap. 5. numb. 6.

In the Sinister Base, is a kind of a **Drinking Cup**, or **Vessel** made off the higher end, or the small top of a **Bull** or **Cows Horn**, the **Tip** end **Reversed**, Supported by two Feet fixed on a **Hoop**, environing the middle of it. It is by some Gentlemens Butlers termed a **Souce**, or **Goglet**, or **Goblet**.

A. 3 such V. is quartered by *Risley* of *Risley*, as I find

find in an old Manuscript, but by what name I cannot understand.

CLXVIII. He beareth Gules, a Papal Goufanon, or square Banner Inbecked at the Bottom, Argent, the Staff, Or. This is an Ensign of Triumph, and is ever carried before the Popes Holiness, when he goeth, or is carried in Processions: therefore, (because they hang contrary to all other Banners) these kinds are ever termed Papal Banners, to distinguish them from others, see chap. 2. numb. 67.

The Ropemakers Instruments for making Ropes.

CLXIX. He beareth Argent, a Ropers Hook, and Cop, Sable: by the first is the Rope Yarn Spun, or turned in the Slead, when it is Laid for the making of a Cable; and is generally termed a Slead Hook.

The second called a Ropers Cop, is a round piece of Wood Taper wise, with three half round Gutters in the out sides, with an handle to hold and guide it; through these Gutters the Ropes run as they are Sarved or Pleated into a Cable. These are made of several sizes or bigness, according to the largeness of the Quoil, or thickness of the Rope or Cable made.

In the Sinister base is another Instrument of the Ropers, called a Ropers Stake, only of three Tangs, or Teeth to keep the Fakes or Rope Yarn in Spinning, that they neither touch or tangle one with another, when two, three, or four are working together, and set in a Basis, or over Thwart piece to keep it upright. But were it not amongst the Ropers Instrument, I should take the boldness upon me as to blazon it; a Potence or a Crouch Lambear reversed, as being contrary posed to that formerly mentioned, lib. 1. chap. 5. numb. 104. and chap. 9. numb. 42.

A the like G. is born by Wellton.

CLXX. He beareth Azure, a Robemakers Wince or Winch, Or: when the Spinner hath drawn out his Rope Yarn to that considerable length he can, then it is taken from the Wheele Spindle, and Wound upon the Wince, till it be as full as the cross staves will contain it. It is turned upon an Iron Bolt fixed in the Wall or the like, when it is full it is called a Wince of Yarn.

That marked (a.) in the Base is termed a Ropers Slead, a thing by which they Twist their Ropes, it is termed more properly the Laying of a Rope, when they make double, treble, or fourfold Cable Ropes: It hath these several parts.

Standards,

Plank,

Slot, to lay the weight on.

That in the Dexter chief is blazoned a Ropers Whare or Wharve, or Wheele Spindle, and is one of those little hooks, with a Spindle on its Shank, that turns or spins the Hemp into Rope Yarn by the help of

[]

a Leather compassing the great Vwheele and the Spindles.

CLXXI. In this Quarter are four Instruments very much used by the Roper.

The first in the Dexter chief is termed a Turning Braids, marked (a.) it is only a piece of Wood cut with handles having three holes in which are put the handles of the hooks, that Ropes are turned, where being well seated in the said holes by the help of this Engine in moving it up and down, too and again, one Person will with ease turn all the three hooks with long Ropes fixed upon the ends of them, which otherwise it would require two or three Persons to turn.

The next under it marked (b.) is termed a Ropers Stake, this is a Stay or Stake with many Teeth or divisions of its use, see before numb. 169.

That in the Dexter base, marked (c.) is termed a Neptunes Mace, or a Trident inverted or Turned Inward, this is by Jo. Hemelarius in his Comment or Explanation of the Images on the Roman Coins, termed a Trident Inversant in form of the Letter T. and is an Emblem of the Anchor, being a sure and steadfast hold. It is on several of the old Roman Coins held in the hands of the Image Tellus, or the Earth, or Mercury, and such like Figures.

The third is the Ropers Wwheele, marked (d.) by which the Rope Yarn is made or Spun: this Wheele is turned between two standards with an Head - stock on the top, wherein by the help of a Wheele - string or Band, is turned one, two, three or more Whares with hook: It hath these several parts.

Frame,

Wwheele Stocks,

Wwheele String,

Head of the Stocks, where the Spindle runs.

There is another way of fixing the Wwheele between four Standards with Cross Pieces in the middle, after the form of two Roman H's, through the middle of which pieces turns the ends of the Arle - Tree, or Spindle, by which the Wwheele is turned, having a Semi - circle Board on the top of either Standard (as the former Wheele) between which is turned two, three or four Whares or Whares, with hooks at the ends of their Arles to Twist and Spin the Rope Yarn; being turned by means of a Wwheele - string or Leather compassing them and the Wwheele.

The last, is that on the Sinister side marked (e.) termed a Distaff, or a Distaff full of Hemp, from this the Spinner by going backwards draws the Hemp which the Whares turns into Yarn.

A Pair of Rippers, being the under Ripper and the higher; these are of Iron, and are to hold the Rope fast down in the Cat Pan, while it is drawn through the Car: It is drawn out by a Windlass, such as Buckets are drawn out of a Well; yet it being turned but three times about the Stock of the Windlass, is drawn off it as fast as it is drawn through the Car.

Upholders

Upholsters Tools, by which they per- form their Work.

There are several things which they use in their Trade, which are also Exercised in other Occupations; and therefore to avoid their double Engraving on Plates, I have omitted many here, which are set down else where; to which Plates I refer you, where their names are set down in particular, chap. 3. numb. 35.

CLXXII. In this Quarter I do present you with four sorts of Instruments chiefly used by the Upholsters, and by very few other Trades.

The first on the Dexter side is the **Stuffing Stick**, it is or may be made of tough Wood or Iron, being a little bent at the end, with a nick in it; by the help whereof, all parts of the seat of a Cushion, Chair, or Sofa, are equally filled.

The second which occupieth the Fesse point (marked *b.*) is termed a **Prickal**: It is a kind of Aul with a great Box of other hard Wooden head; by the help of this, with the blow of an Hammer on the head is made an hole, to put and drive the shank of a Brasse Nail into the Wood, which would not drive otherways.

A. 3. of these is born by the name of **Prickall**, or **Prickard**.

The third which stands on the Sinister side, is termed an **Upholsters Rule**, or **square Rule**; the one part twice as long at the other end, with a Shouldering under it like to a Lase under a Beam which makes it much resemble a **Sibbet**, or of a **Cestudo** in which the **Romans** of old used to sling their Battering Rame.

The fourth is that lying in the Base, (marked *a.*) and is called their **Back** or **Matting Needle**; It is made of Iron or Steel with a **Long Eye**, bending upwards at the Point, the bottom side is flat, and the bending side round.

Things of most Note in the 1, 2, 3, 4, and 5, Chapters of this third Book: Noted according to the Folio's.

Several ways of Blazoning with the Characters for the Planets and Precious Stones, fol. 1.
Crowns of several fashions fol. 3. 4. 32. 245. 247.
Coronets or Crownets for several Degrees of Persons fol. 3. 4.
Chapeaus, and Caps of Maintenance, Honor and Dignity, fol. 5.
Torces, Wreathes, and Filletts of Honor, of diverse fashions, fol. 5. 6.
Chapletts, Circles of Gold, 4. 6.
Laurels, Garlands of several sorts, 6. 7.
Caps of several fashions, 8. 9. 10. 11.
Several ways of Bearing things on Caps, 9.
Helmets, Tankes, and Head Covers, several sorts, 10. 11.
Hats of diverse Countrey fashions, 11.
Cowles, Hoods, Caules & Head Attires, diverse, 12. 13.
Parts of a Boor, 13.
Slippers, Shooes, Hofs, Boots, 13. 14.
Parts of a Shooe, 14.
Sorts of Shooes, 14.
Parts of a Band, 15.
Bands, Ruffs, Cravatts, diverse fashions, 15.
Turnes up in Caps and Garments several ways, 10.
Mantches, Sleeves of men & women diverse fashions, 17.
Robes, Coats, & other Garments, 18 19. (18)
Parts of a Childs coat, 18.
Parts of a Vest, 18. Parts of a Ston-Ring, 20.
Several Crofs- Staves, 23.
Coines, Bullen, Money of several Countreys, how called and of what value, 25 to 37.
Rings with the Terms for the several parts, 20. 21.
Several ways of coupling, 270. []

Emperours, Kings, Princes, with other noble Personages that rule & governe people, 40.

TO
PETER EDWARDS,
Major of the City of Chester, in the Year 1682.

AND TO
PETER EDWARDS, his Son and H. ir.

SOME Men bring into the World with them such aspiring Souls, that even from the Cradle are Seeking after Dominion and Command: And for such it were the greatest Injustice to deny it them, that by their sudden rise, may see the folly of Self-Exaltation, which as it Regards none, is as little Regarded it self. But this appeared much contrary in you, who like the Wise Man in the Proverbs bath another to Praise him and not his own Lips, Pro 27. 2. Others to Advance him and not his own Seeking, which signifies a mild Temper of Spirit, which were wished to remain in all Great Officers of Estate, according to your Example: which is the Prayers of him, who is

Your Loving and Serene Friend

Randle Holme.

CHAP. VI.

HAVING in the former Chapters Treated of several Trads and Occupations, with the manner of their Bearings in Coats of Arms; as also the Chief of their Terms of Art, used by them. I shall now proceed to give some Examples of Coats, composed of Mechanick Tools and Instruments, together with such as pertain to the several Mysteries and Occupations depending upon the Liberal Sciences.

We shall therefore begin with those things which are for meer Necessity, such is Clothing, Meat and Drink, &c. which how meanly soever they be reckoned to the bearing of other things, yet nevertheless it is clear that these Tools and Instruments (no less then those) do proceed from the immediate Gift of God,

as doth plainly appear by B. zaleel and Aboliab, Exod. 35. 3.

Therefore there is but little reason for their contempt, but rather the contrary: seeing they do express Trads so much becomen for the use and support of Mans Life, and their exquisite skil, and knowledge, issued out of the Plentiful Fountain of Gods abundant Spirit.

We do begin then first with the Instruments belonging to the House-wife: for the Spinning of Wool, Flax, and Hemp.

I. He beareth Vert, a fiece of Wool, Argent. This is born by the name of Fleek.

Donum Petri Edwards Gen: lio: civit: Gestr: 1674:

Get: Edwards junior: Scripsit:

A **Fleece**, is as much Wool as is taken of the back of one Sheep, therefore it is, that some are large, and other small: because it groweth better on one Sheep then another. So it is in the Wool, some are of a fine growth, Soft and Gentle; others are more harsh and hairy.

II. He beareth Azure, a **Wool Pack**, Argent. Born by the name of **Pack**.

V. 3 such A. is born by *Wolley*, or *Woller*.

S. one such A. is the Coat of the Company of **Woolpackers** of the City of *London*.

This is a great number of **Fleeces** made up together in a cloth tied up at the four ends or corners.

III. He beareth Gules, a **Wool-Pack**, Argent; **Corded**, Or. This is born by the name of **Wooljack**. The like bearing to this is born by the Company of **Dyers** in the City of *Chester*, viz. Sable a **Cheveron** between three such **Wool-Packs**: yet for that Company they are termed three **Bailes of Hadder**; that being a kind of dying stuff which they use, and so being born according to other Trades it ought to be termed, as

A **Bundle**,
A **Crusse**,
A **Fardel**,
A **Baile of Hadder**,
A **Pack of Wool, Cloth, Hops**.

IV. He beareth Sable, a **Swingle Hand erected**, **Surmounting** of a **Swingle Foot**, Or. This is a Wooden Instrument made like a **Fauchion**, with an hole cut in the top of it, to hold it by: It is used for the clearing of **Hemp** and **Flax** from the large broken **Stalks** or **Shoves**, by the help of the said **Swingle Foot**, which it is hung upon, which said **Stalks** being first broken, bruised, and cut into shivers, by a **Blake**.

S. 3 such erected in Fesse O. born by *Flaxlone*.

G. 3 such in Pale A. born by *Swingler*.

V. He beareth Sable, a **Wool-Card**, Or. Three such is born by the name of *Cardingaon*. The Card in its parts is Blazoned thus, the **Card-Board**, Or; **Leaf** and **Lift**, Gules: **Teeth**, Argent. Some call it a **Cloth-Card**.

These are termed **Wool-Cards**, from their Carding of Wool, whose Teeth then are made short, and set thick together for strength.

Flax-Cards, requires no such strength in them, therefore the Teeth are set in longer, and thinner.

B. 3 Cards O. is born by the *Card-makers* of the City of *Chester*, as their Companies Coat.

The Parts of a Card.

The **Card-Board**,

The **Handle**,

The **Leaf**, is the Leather in which the Teeth or Wyer is set.

The **Lift**, is that as is nailed about to hold on the leaf.

The **Teeth**, are the crooked Wyers.

[]

The **Tacks**, are the small Nails which Nails the Lift about the Leaf to hold it on the Board.

Terms used by Card-makers.

The **Skin** or **Canned Leather**.

The **Pattern**,

The opening of the **Wyer**.

The cutting of the **Wyer** in length.

The **Doubling**, is the first bending of the Wyer for Teeth.

The **Crooking**, is the second bending the Wyer.

The **Picking the Leaf**, is making holes in the Leaf of Leather into which the Teeth of Wyer are set.

The **Setting**, is the putting the Teeth into the said holes.

The **Nailing of it**, is the making of the leaf fast on the Board with a Lift of Leather nailed about the edges.

The **Pairing** of the Card Board and Leaf even.

The **Stoning** of it, is burnishing it.

The **Cutting the Lifts**, is making them even at the ends by cutting of the Superfluities.

In the Dexter base of this Quarter, is another sort of a **Flax** or **Hemp Blake**, made of a contrary way to that in the succeeding square; *numb. 6.* and in truth is the true shape of it, and is born as the Coat and Crest of *Habel of Alfatia*, viz. B. such a **Flax Bake O**.

VI. He beareth Argent, a **Flax Blake**, Gules. This is an Instrument of Housewifery, by which both **Flax** and **Hemp** are first broken from the strong **Stalks** into large **Shoves** or **Shivers**. This is a Coat Armor belonging to the name of *Hamberake*.

V. 3 such O. is born by *Naller*.

A **Flax** or **Hemp Blake**, is a logg of Wood cut along with Teeth like a Saw; having a like piece of Wood cut into Teeth, which falls into the under Teeth being fastned at the end with a hinge, it hath liberty to rise and fall at one end, between which Teeth the Flax being put the Teeth bruise and breaks the hard husk of the stalk all into shivers.

VII. He beareth Azure, a **Stock Card**, Or; **Toothed**, Argent. Born by the name of *Flashier*.

A. 3 such G. Toothed S. is born by *Stocky*.

The **Stock Card**, is of the same nature as the **Wool Card**, only of a larger size, having a double handle fixt on the middle of the Board, by which the Workman holdeth with both Hands, and so Cards Wool (for it is only for Wool) upon another such like Card, but larger, fastned upon a Board or Bench set upon four strong and weighty Feet, not easily to be moved or drawn over.

The *London* Herralds draw the **Boyers Flote**, by which Bows are made, after the form of this stock Card, which is a great error: see it *chap. 8. numb. 122. 215.*

VIII. He beareth Sable, an **Hatchel** Or, **Teeth** Argent: if it were all of one colour or mettle then it may be termed only an **Hatchel** or a **Flax Comb**, or **Flax Card**.

Card. This is born by the name of *Machell* or *Hachell*, as I find in an old Written Manuscript.

There is several sorts of **Hatchels** used by Housewives for the making of **Flax**, from one degree of fineness to another; and that is by the fineness and closeness of the teeth set one to another: as,

The **Round** or **Course Hatchel**, which is long and wide toothed.

The **Fine Hatchel**, which is short and close toothed.

IX. He beareth Vert, a **Wool Comb** (or a **Jersey Comb**) Argent; the **Handle**, Or. This is born by the name of *Jersey*.

S. 3 such O. the Teeth A. is born by *Bromleygh* alias *Bromley*.

This **Jersey Comb**, is the way of drawing it by our modern **Heralds**, which hath some resemblance to the true shape of it, yet differeth, but not so much as the other Comb set forth in the **Bale** of this **Quarter**, and also in number 10 following, which were the form and shapes of them drawn of old.

Terms used by a Jersey-Comber.

Jersey, is the finest Wool taken out of other sorts of Wool by Combing it with a **Jersey-Comb**.

Dyeing the Wool,

Ordering the Fire, is to make a Fire of Charcoal to heat the Combs teeth.

Heating the Combs Teeth, is to put a gentle heat into the teeth.

Wool the Comb, is to put Wool on the teeth of the Comb.

Combing the Wool, is to pull it through the teeth.

Drawing it out, is to strike one Combs teeth into another, thereby to draw it fine.

Cleaning the Comb, is to take the course Wool remaining, out of the Combs teeth.

Weighing the Jersey, is to put it in pounds or half pounds.

Rolling it up, either in **Hanks** or **Balls**.

Course or **Drossy Wool**, such as is hairy that will not Comb fine, and is left of that which is Combed.

It is a stinking imploy, the workmen are fit Companions for Devils, for with them is heat, smoak, and stink, enough to stifle a body while seeing of them.

X This is the old way of Drawing the **Wool**, or **Jersey Comb**, which I have caused to be set here, that it may be seen what a difference there is between them used of old, and those in our Days, as that set in the Chief of this Square which is the true form of the **Jersey Comb** used now by those kind of Workmen.

G. 3 such erected O. the Teeth A. is born by the name of *Holiercomb*.

XI. He beareth Argent, a **Spinning Wheele**, Sable. This is born by *Spinnell*.

S. 3 Spinning Wheels O. is born by the name of *Spinner*.

There are several sorts of these kinds of **Spinning Wheels**; some for **standing** or **going**, a second sort for **sitting**, and the lesser sort to be **carried**.

The first is the large **Spinning Wheele**, called a **long Wheele**, or a **going Wheele**, or a **Woolen Wheele**, because Wool is principally, nay only spun at it, and at none of the other sorts of Wheels. This Wheel consists in these parts.

The Stock standing on four Feet.

The Standard which bears the Wheel.

The Axle-tree on which the Wheel turns.

The Wheel in which there is the Nave, the Spokes, the Rimm.

The head Standard, or two Pillars which bears the Spool.

The Spool on which the Wheel string is put.

The Spindle on which the Yarn is turned.

The Wheel string that turns the Spool and Spindle.

The Wheel finger by which the Wheel is turned.

The second, is the **sitting Wheel**, generally called the **Spinning Wheel**; which is made after the form of the Draught set forth in this *numb. 11*. all that Spin at it use to sit, being the Wheel withal its appurtenances are not above a yard high.

And of these there are three sorts, first the **Country Farmers Wheel**, which is in all respects like the **long Wheel** above said, only this hath the **Dissaff** at it, which the other hath not; this a **Spool**, the other a **Spindle**.

The **City Wheel**, or **Gentle Womans Wheel**, because of its more curious making: this is adorned with many tricks and devices, more to shew the Art of the Turner, then to add any goodness to the working of the Wheel. In this Wheel there are these several parts, with their name given to them.

The Stock or Wheel stock, and Feet.

The Quill Box and Button with the Lid or cover.

The Standards or Stoops for the Axle-tree of the Wheel to rest upon.

The turned Pinns to keep the Wheel in the - - - of the Standards.

The Axle-tree.

The Button of the Axle-tree.

The Nave, middle of the Wheel.

The Spokes.

The Rimm and Riget, to keep the string on.

The Spires, little turned Buttons with points set between the Spokes to adorn it.

The Screw Pin, and Screw Box in the stock, by which the string is drawn up or let down slack.

The over-crofs or handle of the Screw.

The Bosse or Cup.

The over-crofs for the Maidens or Damsels.

The Maidens or Damsels, the two Standards in which the Spindle turns.

The Leather that holds the Spindle in.

The Spindle, the Iron Pin with the hole or eye for the Thrid to pass through.

The Feathers or Fly, or Wing: is that which the crooked Wyres are set in.

The

The Quill, is that as the Yarn is spun upon.

The Whorl, or Wharve; is that as the Wheel string runs upon.

The Jerly Wheel, or Double Spool Wheel, by which Jerly is only spun; it hath a Cradle, or Foot-trad, by which the Wheel is turned about, so that an ingenious Spinner can and may work with both hands, and do as much in a Day as another at a single Wheel shall do almost in two.

The Jerly Wheel that is single differeth nothing from the foresaid Wheel save in the Tradle and Distaff which are turned to a Jerly Distaff, and an Instrument to turn the Wheel with the Foot, if the Spinner please to use it: and they are termed

In the Jerly Distaff, is the shank by which it is set in the over-crofs, which is fixed to the Distaff body or hand, see it between *numb. 29* and *30*.

The Bowl on which the Ball of Jerly lyeth.

The six Pillars which keeps the Jerly from running off the Bowl, being fixed in it.

The Leather on the Bowl side, through which the Jerly is drawn to Spin.

For the Wheel to turn with the Foot, there is the Tradle on which the Foot is set.

The Tradle Staff, which goes from the end of the Tradle to the Axle-tree of the Wheel.

The Tradle Axle-tree hath an Iron Button at the further end on which the Staff hangs.

The third is the Girdle Wheel or the small Wheel; it is a Wheel so little that a Gentle-woman may hang it at her Girdle or Apron string and Spin with it, though she be walking about.

It is made and composed of Wood, Brass, and Iron: having two Wheels with Nuts on the Spindles with several other giggam bobbis pleasing to Ladies that love not to over-toil themselves with this sort of work: therefore may fitly be termed the Do-Little-Wheel, whose parts are these.

The Stock to which all the other work is fixed.

The Frame.

The Feet.

The Pillars which holds up the piece in which the Brass Wheels are.

The greater Brass Wheel which hath Forty teeth in it, which turns.

The lesser Brass Wheel or Nut, which hath Twenty Teeth in it, which turns.

The small Wheel of Wood,

The Wheel string which comes from it to the Feathers.

The Feathers, Spool, Whorve.

The Distaff which hath a Standard, and Crofs piece.

The Handle and Axle-tree.

The Hooks by which it hangs to the Apron string, or Girdle.

As for Antiquity of Spinning and the Necessary use of it, we have undoubted preidents, as *Exod. 35. 25, 26.* where it is said, *That all the Women that were Witty-hearted did Spin, with their Hands, and brought them in that they had Spun, both of Blue, and of Purple, and of Scarlet, and fine Linnen. And all the Women whose Hearts stirred them in Wisdom Spun Goats Hair.* Nay it is a token of the

most Honorable Women to follow the Spindle and distaff, as *1 Pet. 31. 13, 19, 21, 22, 23, 24*

XII. He beareth Gules, a Reel between a Quill and a Reel Pin, Or. These are three very necessary Instruments of Housewifery, the Quill to spin the Yarn upon; as is manifested by Figure 14. and the Reeling Pin (which some call a Knave, or Reeling Stick) which is for the Spool to run or turn upon whillett it is Reeling upon the Reel, as *numb. 19*.

In the Wheel Quill there is these parts and terms.

The Feathers, and its Teeth.

The Spindle with its Holes and Screw.

The Spool, with its String nick or Gutter.

The Whorve with its Screw Plate and Gutter.

In the Reel there are these parts.

The Reel body or part which it is held by.

The Holding head, which is an over-crofs end piece with a Button at each end.

The Slipping head, is another over-crofs end piece set crofs the other head, it hath a Button at one end, the other is to slip the Reeled Yarn off, having as much on, as the Housewife thinks convenient, which is called a Slipping of Yarn.

In the Reeling Pin, there is only the Handle, and the Iron Pin, on which the Quill Yarn turneth in the Reeling of it.

XIII. He beareth Vert, a Pair of Yarringles with its Pins, set upon its Stock, having a Triangle foot, argent. This Instrument is also of great use, with Housewives, by the help whereof Yarn Slippings or Hanks is wound (after their washing and whitening) into Clews or round Balls, as in *numb. 15*.

Some term these a Pair of Yarringles, or Yarringle Blades which are nothing else but two tricks, or pieces of Wood set crofs with a hole in the middle to turn round upon a Wood, or Iron Pin, set in the stock: the ends are full of holes to put the Pins in lesser or wider according to the compass of the slipping of Yarn put upon it. Some have these joynted with hinges, to turn treble, they being the easier for portage; but such are more for curiosity, then necessity.

The Stock, is made of diverse forms, some hath a Square on the top, with a Wharve in the middle, and Edged about like the sides of a Box, in which the Clews are put as they be wound: and this is set upon three or four Wooden Feet. Others have them thus, being in form of a Pillar fixed into a square, three cornered or round foot, either plain or wrought with turned and carved work to shew the Ingenuity of the Workman, or the Glory of the Possessor: so that belonging to them there are all these.

The Yarringle Blades.

The four Pins for the Blades.

The Stock with a Pin in the top on which the Blades turn.

The Box.

The Foot on which it stands.

The Bobbin or Nogg, a piece of round Wood with an handle to begin to wind or make the Clew on.

The

The Bead, to draw the Yarn through, that it cut not the winders Fingers.

On the Dexter side the Yarringle foot, is an Instrument used by Housewives to wind their Yarn upon before they can bring it into a Clew, and this they call a **Rogg**, a **Bobbin**, or **Handle**; by which they prepare a Bottom for a Clew.

That on the Sinister side the foresaid Foot, is called a **Bead**, it is a piece of Box, or other hard Wood, turned round, with a hole through, in which the Yarn runs when it comes off the Yarringles, that the Yarn do not cut the Winders Finger, in making the Clew: the first winding of the Clew on this **Rogg**, is called the bottom (or Bothom vulgarly) of the Clew: and from hence, in many places it is named (when all made up) a Bothom of Yarn, and a Bothom of Thrid.

XIV. He beareth Azure, a **Quill of Yarn** (or **Loaded with Yarn**) Or: this is born by the name of **Spool**. But if you will go to the exact term of it, it is by all our best Blazoners termed a **Quill**, or a **Wheel Quill** filled with Gold thrid, and so it is born by the Company of *Imbrauthers* in their Coat Armor: as G. 2 Imbrauthers Broches in Salter between 2 Q's of Gold thrid erected O. on a Chief A. a Lion passant of the first.

XV. He beareth Gules, a **Wharrow Spindle** Or: charged with a **Fusile** or **Spool of Wollen Yarn**, Argent: between two Clews of Silver thrid. *Housewife* is the name of that Family that owneth this Badge or Honor, and by the good Women of that name, these rounds of thrid, have several denomination, either from the largeness of them, or from the matter they are made off: for they call them,

A **Bottom**, or Bothom of thrid.

A **Clew of Yarn**, Linnen or Wollen.

A **Ball of Silver**, or Gold thrid.

Argent 3 such with a Cheveron between, Sable: is the Coat of *Trefues*.

XVI. He beareth Argent, a **Fusile**, or **Clew of Yarn**, Gules: on a **Slipper** or **Spindle**, Sable. This is by the Housewives best blazoned when they term it a **Spool of Wollen Yarn** on its **Spindle**, with the **Point Erected**. This is born by the name of *Fusil-slippe*

A. 3 such G. is born by the name of *Hobby*.

S. 3 such transposed, or the Points downwards A. (as *Gwillim* terms them) is a Coat quartered by *Kinnell* of *Standford*.

These are called **Fusiles**, from *Fusus* a **Spindle Yarn**: this sort of Spindles are used at long or going Wheels; but the foregoing is of a different nature being used by Women at a Distaff put under their Girdle, so as they oftentimes Spin therewith going: the round Ball at the lower end, serveth to the fast twerling, and the long turning of it, to twist the thrid, &c. is called a **Wharrow**, and therefore is called a **Wharrow Spindle**.

XVII. He beareth Argent, a **Spool Knave**, with
[]

the **Spool Pin** therein, Sable: In the Base a **Spool of Wollen Yarn**, Azure.

S. 3 Spools of Yarn erected A. is born by *Spinberg*.

This Instrument is made of Iron, with a hook to hand it by the Girdle, so that the good Housewife may walk about, yet be at her Work. But there is another sort of **Spool Knave** made of Wood, with two Standards mortized in it, standing upright, in which there is holes made according to the length of it, for two, three, four, or more **Spools** to be wound off into Clews, by several Persons: but especially it is used when a thrid is to be made two or three Yarns together; and to be wound off upon one Bottom, or Clew together: see the Figure in the Sinister Chief of this Quarter, chap. 20 num. 31.

XVIII. He beareth a **Roper Winch** filled with **Rope Yarn**, but of this I have spoken before chap. 5. num. 170.

XIX. He beareth Sable, a **Reel Or**, charged with a **Slipping of Yarn**, Argent. This is born by the name of *Reelr*.

If in the Reeling of the Yarn upon the Reel, they chance to lay a thred cross or contrary to the true way of Reeling: it is in our Countrey termed a **Mare**.

A **Knot**, is a Hundred threds round the Reel, at which place Housewives make a **Palch**, as some call it, or a **knot**, or an **Hank**.

When it is taken off the Reel and tied up with a **Lap Band**, (to keep it from ravalling or running into Snigles or Knotted up it is termed a **Slipping of Yarn**: which generally contains a pound Weight.

XX. He beareth Or, a **Hank of Yarn** or **Thred**, Gules. Born by the name of *Hankley*. This Hank according to the several bearers name, hath diverse Denominations; as when it is blazoned for *Cotton* of *Cottons* Coat, it is termed an **Hank of Cotton**: In *Yarnbank* Coat, an **Hank**, or **Slipping of Yarn**: And in *Lyams* Coat, it is called a **Dog-leale**, or a **Lyam tied up**: see chap. 7. num. 81.

B. a Cheveron between three such A. born by *Cotton* of *Cotton* in *Cheshire*, and of *Cumbermare*, within the said County.

A. 3 such and a Chief G. born by *Yarnbank*.

S. such an one A. born by *Lyam*.

White thred, or Silk thred, when they are made up into **Skain**, are then tied at the top, leaving a small head, but a long bottom or tail as is set forth by the Figure on the Dexter side of this square.

2. **W**hen the Wool, Flax, and Hemp, hath run through the good Wifes hands, then it is time to let the Weaver to handle his Instruments, and by his Art and Skill of single threds, to make Woven Cloth, which he doth by the help of these Tools following.

XXI. He

XXI. He beareth Gules, two Weavers Reeds in Salters, Or. Born by the name of *Reeda*.

This is an Instrument belonging to the Trade of a Weaver, and is made of the Cane, for the Weaving of cloth, but for fine Cloth, of Reeds. It hath these parts belonging to it.

The *Bier*, are the two out sides to which the middle Reeds or Caves are fixed.

The *Whipping*, is the Pack-thred turned round about the Bier to hold them together.

The *Watt*, is the middle part of it, where the Cane is fixed by one at a little distance.

The *Cope*, is the two flat and smooth ends.

XXII. He beareth Azure, a Weavers Shuttle in the middle, Or. between an *Chrum* and a *Preme*, Argent.

These are things belonging to the Weavers Occupation, and of great use: A. 3 such Shuttles S. Nosed or Tipped O. born by *Shuttler*.

The *Chrum*, is that as the Web is tied too (or knitted, as they term it) which is only ends of Yarn coming out above five or six Inches or more, of a narrow piece of cloth, in which these ends are Woven: which narrow piece is termed the *Fent* of the *Chrum*.

The *Preme*, is made of white Wands, this is for the opening of the Yarn from the Beam on which it is rowled, it comes off thence foulded, or run one upon another: so that each thred may pass clearly through the Reed.

S. 3 Preme O. is born by the name of *Preme*.

XXIII. He beareth Sable, a Weavers Shuttle, Argent: Tipped and Furnished with a Quill of Yarn, the Threds pendant, Or. Others say thus, a Shuttle Tipped and set with a Quill or Pin of Thred, the end pendant. This is born by the name of *Weaver*.

A. 3 such S. Tipped and charged with a wound Pin, O. Is born by the name of *Shuttlerworth*.

The parts of a Shuttle are, the Shuttle Trough, or *Box*, is the square hole on the top of it, in which the Pin or Shuttle Prick is set within two holes, having Yarn winded or wound about it to Weave withal.

The *Ring*, is an Iron Hoop or Ring fixed in the side of the Shuttle in a hole through which the Yarn runs through from the Pin, when it is cast through the Web: this Ring is to keep the hole from wearing.

The *Nose*, is either ends of the Shuttle which are ever tip with Iron.

The *Sole*, is the Bottom of it, which is smooth shod with Iron Plates, that it may run swiftly away.

In the Base of this Quarter I have caused a *Weavers Preme* to be set, to shew the difference of its draught, this being the form in which it was anciently made, the foregoing being our modern one, and in use now: which is born by the name of *Kemmat*, viz. S. a Preme crested O. the like is also his Crest.

XXIV. He beareth Sable, a Distaff, with a Dis-

ting of Flax tied about it, Or. This is our Country way of tying Flax about the Distaff, and thus I find is born by the name of *Diske*.

G. 3 such tied about with Flax O. is born by the name of *Distaff*.

To the Distaff there belongs a *Stand*, to which it is fixed by those as Spin at the sitting Wheel, the form of it I have set at the sinister side of its Distaff: It is constantly fixed in an hole, made purposely behind the *Bosse* or *Cup*, which holds the *Sputtle* and *Waddens* on, near the corner of the Wheel stock: all the parts are thus termed.

The *Distaff Body*, is the Standard set in the Wheel stock.

The *Dver* or *cross Piece*, is that fixt into an hole of the top of it.

The *Distaff Shank* or *Arse*, is set in a hole of the over cross piece.

The *Distaff Head*, that as hath the Tow rowled about it.

The *Button* on the *Head*, at which an *Jukle*, or *Fillet*, or *String* is tied for to rowle about the *Flax* or *Tow*, to keep it on.

In the Dexter Base of this Quarter, is another way of drawing the *Distaff* tied about with *Flax*, or *Demp*: the *Distaff String* or *Fillet* drawn orderly about it, to keep the Flax in a Handsome equipage, for its drawing out to Spin: this A. being set on a round Foot, or *Basis*, issuing out of the Base of the Escalation V. is the Coat of Arms for the Abby of *Kockenburgh* in *Germany*, the Field being G.

XXV. He beareth Sable, two *Habits* Endorsed, and another in Base, Argent. Here I have purposely set three *Habits* (or *Cudern Irons*, or *Clothiers Bench Hooks*) to shew the several ways I have seen them made in Coats of Arms, and yet none right for the hooks at the ends should stand more streighter out, not turning inwards.

S. 2 *Habits* A. and a *Tassel* split, O. with the *Chevron* Emblin between them; is the Coat of the *Worshipful Company of Cloth-workers and Shear-men*.

G. 3 *Habits* A. born by *Harvid*.

XXVI. He beareth Gules, a *Clothiers working Tassel*, Or. It is so termed of Gold, but the Workmen themselves call it (being thus furnished and set with Tassels) an *Handle*: and having no Tassels, is termed an *Handle Stock*. This is born by the name of *Eppin*.

B. 3 such, the *Stocks* O. Tasselled A. Born by the name of *Serrmanera*.

O. a *Salter* between 4 such Transposed G. is born by *Tashal*.

XXVII. He beareth Argent, a *Pair* of *Shearmans Shears*, the *Points* open, and *Crested*, Sable.

Some say that all sorts of *Shears* and *Cizars* are to have their *Points* born upright, in which posture

sture they need not to be termed **Upright** or **Erected**, or with the **Points upward**: but term this a **Pair of Shearmans** or **Cloth-workers Shears**, open at the **Points**.

O. the like S. is born by *Van Schaumberg* of *Frankford*.

B. the like A. born by *Van Hagen* of *Tharland*.

A. 2 such B. born by *Van Kellech* of *Tharland*.

A. one in Bend Sinister G. born by *Haldenberg* of *Bavaria*.

A. such like erected S. born as Coat and Crest for *Manshem*.

XXVIII. He beareth Gules, a **Pair of Wool Shears**, the points open, Argent. There are several sorts of **Wool Shears**, these being the shape of them which are generally used by the *Wet-Glovers* for the cutting of those **Knots** and **hard Locks**, which they find in their **Fleeces of Wool**.

A. such a like pair G. is born by *Van Langen* in the Province of *Westphalia*.

These **Shears** upon constant and daily use, are by a **Leather band** kept close together, else they are apt to fly too much open by reason of the strength of the head, which is a spring; which would in a little time of working, strain and benum the hand. But by this **Leather Socket**, it puts a check to it, and keeps it from flying out, as you see in the Figure, which may be termed a **Pair of Wool Shears Binded**: and such a Pair A. the **Widde** G. in a **Field** S. is born by *Corlshall*.

XXIX. He beareth Azure, a **Preen** Or: this is an Instrument used by the *Cloth-makers*, and is for their **Handle Dressing**, or **picking of the Wool Flocks**, which comes off a piece of Cloth in the **Rowing** of it; It is an half round piece of Wood, with a handle at it, the streight side being set with Wyers like teeth about an Inch and half long. This is born by the name of *Preener*.

S. 3 such, the Handles O. Teeth A. born by *Prensdorf*.

XXX. He beareth Or, a **Piece of Cloth Imbowed**, the ends pendant, Gules. This is by some only termed a piece of Cloth, and no more; and so I have found it anciently blazoned in the *Merchant-Taylors* Coat, but now the same is converted into **Parliament Robes**.

This piece of Cloth is (as it were) cast over the Arm, as serving Men do their **Napkins** when they waite at the Table, in feasting time: so that if it be born white it may not unfily be termed either a **Towel** or a **Napkin**: if Red a **piece of Scarlet Cloth**, &c.

A. a Tent between two pieces of Scarlet, on a Chief B. a Lion Passant Gardant O. born by the Worshipful Company of *Merchant-Taylors* of the City of *London*.

In an old Pennon made for the Company of *Taylors* of the City of *Chester*, Anno 1579. I find the same Coat save on the Chief Azure, there was an **Poly Lamb Couchant**, Argent: on a **Bible**, Gules.

XXXI. He beareth Argent, a **piece of Cloth foulded up**, Gules: the **Lift** or **Selvage**, Azure.

[]

Born by the name of *Cloath* or *Cloather*.

A. 3 such pieces G. Weltd S. is born by *Don Walden* a *Spanish Family*.

XXXII. He beareth Vert, a **Button makers twisting Wheel**, Or. This is also termed a **Rope-makers Wheel**, but that is more exactly set forth, *chap. 3. numb. 171.*

V. 3 such O. is born by *Gympeller*.

3. **WE** come now to give some Examples of *Taylors* Tools, or Instruments of working: which in themselves are but few in number, though thereby most rich and costly Apparels are made: and being the fewer, the less fear there is of a *Taylors* breaking, for to be an unthrif and so run away he may, but break he cannot: for at the next Town he comes too, he is set up again, if he have but a Needle, Thimble, his Goole and Shears.

XXXIII. He beareth Azure, a **pair of Taylors Shears**, or **Cizars**, opened Salter wise between, a *Taylors* and a *Semsters* **Chimbles**, Argent.

O. a like pair of *Taylors* Shears G. is born by *Shrnberg* of *Frankford*.

Such a pair B. with a **Leopards head** between the cutting part O. this was the ancient Crest belonging to the Company of *Taylors* in the City of *Chester*, as I find in an old Roll of their Arms with others of the same City made about the Year 1579. from the fancie of this earing, comes that Proverb, or by Word (as I suppose) used to the *Taylors*.

*Snip snap quoth the Taylors Shears,
Alas poor Loufe beware thy Ears.*

Some unhappy Wagg, being pur-blind, taking the **Leopards head**, for a **Lowfe head**.

XXXIV. He beareth Sable, a **Taylors pressing Iron**, surmounted of a **Needle**, with **Chred** in the Eye thereof, Argent. 3 Such pressing Irons S. in a **Field** A. is born by *Presse*, or *Pressing*.

G. 3 **Needle** A. with Gold threads in the Eyes pendant. Is born by *Neeller*, or *Nedler*.

XXXV. He beareth Gules, a **pair of Wool Shears**, transposed, (some term them **Sheep Shears**) between a **Taylors Scozer**, and his **Bodkin**, Argent: **Handles** or **Halt**, Or. Such a pair of Shears is only born by the name of *Shearman*, as for the other charges in this Quarter take this description.

The **Scozer**, is a round piece of Iron-plate fixed in another long piece slit in the middle like the neck of a Spur, in which the round is fastned that it cannot move; the long Iron is after fastned in a round handle, or **Halt**, or **Halve**, to hold the better, with this *Taylors* score, or make an impression or mark on Cloth before they venture to cut it. 3 Such B. Halves O. in a **Field** A.

would

would be an Honorable Badge for one that is a good orderer and fore-caster of Business.

The **Bodkin**, is a blade or round Pin of Iron fixed in a Halve, it is not very sharp at the end: by its help, is Eye lid holes, and all other holes (which are not very large) made.

B. 3 *Taylor's* Bodkins A. Handle O. is born by *Bodkins*.

FROM the *Taylor* which arrays the Body, we can produce no more working Tools, that are worth taking any notice off: therefore shall leave that mystery, and see what Instruments the **Felt-maker** or **Hat-maker** can shew us, to be fit bearing in Coats of Arms.

XXXVI. He beareth Argent, a **Hatters Block**, or a **Felt-makers Block**, or **Hat-makers Block**, with a **round Top**, Sable. There are **Blocks** of all fashions, as high and low, round and square, or flat on the Crown; and Sugar-Loaf like, &c.

Within the block at the **flat Bottom**, is an hollow turned with an Handle, or rather Button, by which the block is put in, and taken out of the **Hat Crown**, as oft as there is occasion so to do.

A. a Cheveron between 3 such S. is born by the name of *Blocklie*.

XXXVII. He beareth Or, an **Hatters Block Sugar-Loaf** fashion, with a **flat Top**, between a **Felt-makers Bow-stick**, and his **Walking-pin**, Sable.

The **Bow-stick** is that wherewith he striketh the string of his **Bow** to make it play amongst to Wool, thereby to rent and tear it to a Downy substance.

The **Walking-pin**, is a four square Iron, a foot or more long, with pointed ends; upon this the Workman nows his **Hat** often times, and makes use of it as a rowling-pin, to lay is stuff close together in the walking of the Hat.

XXXVIII. He beareth Gules, an **Hatters Scull Block** (or **low Crown Block**) and his **Bow**, Or. Some term it a **Wool-Bow**, because it is an Instrument by which Wool is rent and torn and beaten very fine, much like to Down, before it can be worked into Hats. It is a long Pole, with - - - - - like the Bridges of Musical Instruments to bear up the strings, so these bear off the string from the Pole.

XXXIX. He beareth Sable, a **pair of Shearmans Shears**, the **points Pendant**, Argent. Born by the name of *Shearman*.

The other **Shears** on the Dexter side, are the form of such as are used in *Spain*, *Holland*, and *Germany*: they making the points of the shearing place longer then the Back part, and we make them either all of a length, as *numb. 27.* or the Back a little longer, as afore in this figure.

[]

A. 3 such in Pale, bendways S. born by *Eyzenborver*. Per Pale G. and O. a Cheveron A. and Clothiers Shears S. born by *Van Der Deck* of *Frankford*.

A. 2 such G. is born by *Marschalk* of *Gotsman-Schaufen* in the Province of *Thurnigian* in *Germany*.

XL. He beareth Azure, a **Weavers Trough**, Or. This is a kind of low footed **Stool**, or **Cricket** (as some call it) with a ledge or border of Board nailed about the top of it, after the manner of a **Swallow Box**: It is used to put the **Clews** of **Warr** into, when they are to be wound upon the **Pins**, that are set into the **Shuttle**.

A. 3 such S. born by the name of *Hagenberg*.

5. WE are now to give some Examples of the Tools or Instruments belonging to the **Cordwainers** alias **Shoe-makers**, which are born in Coats of Arms, or are set forth as Signs, Tokens, or Cognizance of Persons, Families, or Houses.

XLI. He beareth Sable, a **Shoe-makers cutting Knife**, between a **Punching Lead** and an **Aule**, Argent: the **Halves** or **Hafts**, Or. Though these be set here together, yet their bearing is different: for I find that S. such a Cutting Knife, is born by *Spoonise*.

G. 3 such, is born by *Skinger*.

This is the old way of making their **Cutting Knife**, with an **Haft**: which many would rather take to be a **Poll-ax**, an Instrument of War, than to belong to a **Shoe-maker**.

The **Punching Lead**, is for the Punching of Holes in the instep and Langetts of a Shooe for the ties to go through: the softness of which Lead secures the edge of the Punch, which otherwife would be soon blunted if it struck into an harder thing.

V. a Cheveron O. between 3 such Leads A. born by *Leadbate*.

The **Aule**, is also termed a **stitching Aule**, or a **sowing Aule**: which then it should bend something in the blade, and not be so straight: however an **Aule** this is, and is used in Coats of Arms: as,

S. 3 Aules points crested A. Hafts O. born by *Aule*.

Some hold that the point of the **Aule** being downwards needs no mentioning, it being the proper posture for it: yet others affirm that all Instruments having **sharp points**, are generally born with points upright.

XLII. He beareth Azure, a **Shoe-makers cutting Knife**, and a **pegging Aule**, proper.

Any Instrument made of Silver, Tinn, Steel or Iron: for the use of the Workman, is born in Arms of that colour, *v.z.* white. They may be said to be proper, or the colour, or mettle, not mentioned: also note that all **Hafts** or **Halves**, naturally made of Wood (as of the **Aule**, **cutting Knife**, **paring Knife**, or other

O o z

Tradesman

Tradesmens Tools if they be born in Arms, are generally made of Gold; In such things there needs no mentioning them, but if they be born otherwise coloured, then nominate the same. This is the **Cutting Knife**, now in use, the blade and handle being all Iron and Steel: about which is usually sowed some foulds of Leather, either red, black, or yellow, to secure the Hand, and for its more stedfast and stedy holding.

B. 3 Cutting Knives A. handle G. is born by *Cutt.*

S. 3 Pegging Aules. is born by *Pegallin.*

XLIII. He beareth Azure, a **Paireing Knife** Azure, Handle or **Past**, Or: and an **Deele Tack**, Sable. The point on the back of the Shoemakers pareing Knife is to **Score** or **Trace** out the Leather before he venture to cut it, according to the saying, *Score twice before you Cut once*; else they will cut themselves out of Doors.

There is also two sorts of **Tacks** used by them, the **Sole Tack**, it is only with a single nick about the square head: and the **Deel Tack**, which is much larger and longer, it having a double, some a treble nick about the head.

A. a pareing Knife B. Handle O. is born by *Dal-mate.*

G. 3 such A. Handle O. is born by *C. bler.*

A. a Chevron between 3 Shoemakers Tacks S. by *Nallrug.*

XLIV. He beareth Gules, a **Shoemakers Last**, Or: and a **Shooe-sole**, Argent. Some term this, a **Pattern** for a **Shooe-sole**; of the first I have read that a *Collier* call'd to Death to bring him his Aule, but he reached him his Last.

B. 3 Lasts O. born by *Last.*

S. a Fesse between 3 Shooe-soles A. born by *Sole*, or *Soley.*

G. 3 Shooe-soles erected O. born by *Polis*, or *Police.*

S. 3 in Triangle, the Toe parts pointing to each corner of the Field O. is born by *Soler.*

XLV. He beareth Argent, a **Shoemakers polishing stick**, (or **Hollin stick**) and a **Bakers Bake**, Ringed at the Ends, Gules. This is one of *St. Hughes* Bones (as they term all their Tools) and it is that wherewith they polish and slicken their Leather, when the Shooes are wrought up.

XLVI. He beareth Sable, a **Petty Boy**, or a **Shoemakers petty Boy**, between a **Hounter** and a **Dresser**, in Pale, Or. These are all Instruments belonging to the *Coraminiers* Occupation: and are used generally for their burnishing and smoothing down the **Stitches**, and to pair pieces of Leather upon.

For other Instruments for Shoemaking, see the Plate following *chap. 8. numb. 112. to 117.*

6. Being now outwardly furnished by means of such Instruments as serve for our necessary covering: let us see what Tools are used in Arms by such Trades as support our being, and without which there is no subsistence; these are principally three, the first is the **Butcher**, whose Instruments of Slaughter, Blood, Wounds, and Death are as followeth.

XLVII. He beareth Gules, a **Butchers Cambil**, Or: between two **Scuers**, and a **Raising prick**, Argent. This is born by the name of *Buncher.*

B. a Cambrel between 3 Knives O. Blades A. is born by *Butcher.*

A. 3 Cambrels in Pale G. born by *Cambwell* alias *Cambell.*

G. a Fesse between 3 Raising Pricks A. Born by *Prickett.*

XLVIII. He beareth Azure, a **Butchers Are**, between his **Steel** and **Knife bendwise**, proper. The Butcher or Slaughter-man in the Slaughter-house useth the **Are** to strike down Beasts, as Bulls, Cows, Heifers and Oxen, and by the same Instrument doth divide, cut and break their Bones: also at the Shambles where they sell their meat, both the **Are** and **Cleeber** are used to cut the quarter of Beasts into smaller and more vendable pieces.

B. 2 such Axes in Salter, between 3 Bulls-heads coup'd, Argent: Horned and on a Chief O. a Boars-head G. between 2 Garbs V. is the Coat Armour of the Company of *Butchers.*

A. 3 Butchers Steels, and Rings B. Halves O. born by *Sharpe.*

B. 3 Knives A. Halves O. born by *Knife.*

The **Butchers Steel** hath a round turning Ring at the head of the handle by which he hangs it at his Apron strings on the left side, which is his only badg of being a **Slaughter-Man**: upon this Steel, by a nimble and dexterous way they whet and sharpen the dull edge of the **Slaughter-Knife.**

XLIX. He beareth Vert, a **Dutch Butchers Cleeber**, and a **Chopping Knife**: the **Chopping Knife** is to mince and thread Flesh off the Bones, small for Pyes, and such like use, &c.

The **Dutch Cleeber** or **Chopping Knife**, so called by reason it is much born by them in Arms, (and is termed an **Hacker**, or **Hack-mes**) but seldom or never born with us.

S. 3 Dutch Cleevers in Pale A. born by *Hacker.*

G. 3 such in Pale O. born by *S. L. w. r. s. s. s.* These are also termed in Pale pointing to the **Sinister**: because their cuttings are let that way.

L. He beareth Sable, three **Punching Hooks** in Pale, the first trebble, the second double, and the third

third **single Hooked**, proper. By the help of the **Punching Hook**, the Skin is with much ease taken off any **Beast**, by striking and pricking between the Skin or Hide, and the **Flesh**, which causeth a separation between them. This is born by the name of *ancher*.

G. 3 **Punching Hooks** in Fesse A. handles O. is born by *Skilmere*. The usual **Hook** used by the Butcher, hath but one Bend, but if it have more, then term it double or treble as afore said.

LI. He beareth Argent, on an **Hook**, issuing out of the Chief, a **Leg of Geal**, proper. Some term it a **Leg of Geal** or **Button** hung by the **Hain** String on a **Hook** out of the chief, Gules. This is a Cognizance belonging to the **Scrambles**, and for most **Cooks** Shops, either by the thing it self hung in the **Window**, or by its shape and figure in a **Sign** over the **Door**.

LII. He beareth Or, a **Westphalia Ham**, hung in an **Iron Staple**, proceeding out of the chief, Sable. Some term it an **Ham of Pork**, or a **Leg of Bacon** ham-like. The sweetest of **Bacon**s is that which is said to come from *Westphalia*, because there they are fed with **Walnuts** and **Chestnuts**; many of our *English* Cheats with their feeding of **Swine**, with **Pease**, **Corn** and **Acorns** (to sweeten the **Flesh**) besides their Art used to colour them red, have come very near the **Westphalia Ham**, both in colour and taste, yet could never attain the full Skill, and the reason is very plain; for that as we take for *Westphalia* **Bacon**, is no other than the **Ham of a Cub**, or young **Bear**, the delicate taste of whose **Flesh**, our **Bacon** cannot attain unto by any Art.

7. THE Instruments of the second Occupation, very necessary toward Mans Support, is the **Baker**, whose Tools are such as these which follow.

LIII. He beareth Or, a **Bakers Peel** and **Haukin**, in Salter, Sable. Or as others more fully Blazon it, a **Haukin** in Bend sinister, surmounted of a **Peel** Salterwise or Bendwise. This is the Coat of *Van Boker of Switzerland*.

A. on a **Peel** S. 3 **Manchets** proper, born by the name of *Pistor*.

A. 2 **Peels** in Salter S. born by *Peele of Peele*.

The **Haukin** is a foul and dirty Cloth hung at the end of a long Pole, which being wet, the **Baker** sweeps all the **Ashes** together therewith, which the **Fire** or **Fuel** in the heating of the **Oven**, hath scattered all about within it.

The **Peel** is that which puts the Batch of **Bread** into, and takes it again out of the **Oven**, when Baked; it hath but two terms about it: The **Peel Board** is that on which the **Bread** is set.

The **Peel staff** or **handle**, which is the long Pole, to which the **Board** or **Peel** is fastned.

*

Peels are sometimes made of **Iron Plate**, fixed to a **Staff** by a **Socket**, having the further part made roundish, whereas the **Wooden Peel** is large and broad before, and narrow or round to the **Staff**. See that in the **Base** of this **Square**.

O. 3 **Peel Plates** with **Sockets** S. born by *Schoneck*.

LIV. He beareth Vert, an **Haunch of Venison**, Argent. Born by *Hanch*.

LV. He beareth Azure, on a **Dish** or **Platter**, Argent, a **Round Pye**, Or. By the name of *Pye*.

The rearing of **Paste** to make **Pies**, are the works of the **Cook**, who as he hath several forms and shapes, so the matter is variable.

For there are **Round**, **Square**, **Triangled**, **Escallop**, **Eele**, **Goose**, many cornered, and flat **Pies**.

With several others, whose form is generally made answerable to the filling, or at leastwise according to the ingenuity of the **Pastry Man**.

The **Goblet** or **Country Pye**, is made of large pieces of **Flesh**, as **Beef**, **Mutton**, **Pork**, &c. which large or square pieces, are termed **Goblets**.

The **Pince Pye**, is made of **Fish** and **Suet** finely shred together, which **Cooks** term **Pincing**.

LVI. He beareth Gules, a **Rowl** or **Manchet**, and a **Loaf of Bread**, Or. These are the two sorts of **Bread** generally moulded by **Bakers** for their Sale. Of which one I find born with an **Ordinary** between, viz. A. a Fesse between three **Bosired Loaves**, or **Wheat-en Loaves**, proper. Born by *Kunzbein*.

A. on a **Peel**, S. 3 **Manchets** proper. Born by *Pistor* of *Lincolnsire*.

The **Baker** hath several ways of making **Bread**, which according to the form hath several denominations; as **White**, **Baulted** and **Brown**, are the sorts, except **Boile Bread**, which is made of **Bran**, **Pease** and **Bean**.

French Bread, is a light Spungy **White Bread**, made in the form of a round **Cake**, but thick or copied in the middle.

A **Rowle**, a **Manchet**, a **Wegg**, is **White Bread** moulded long ways, and thick in the middle.

A **Loaf** is round, and flat on the top.

A **Jannock**, is **Bread** made of **Oats**, Leavened very sour, and made round but not very thick, with a Cop on the top, for it can be made no otherwise, by reason it is Ovened very soft, the sides will fall thinner than the middle.

A **Dumpling**, or **Pot-Ball**, is made either long or round, as the maker pleareth, with ordinary flour and suet minced small, and mixed up with **Milk** or **Water**.

A **Simmell**, is a thick opped **Cake**, or **Loaf** made of white **Bread**, Knodden up with **Saffron** and **Currans**.

Bara-Biklett, is **Bread** made of fine flour, and knodden up with **Bearm**, which makes it very light and spungy, its form is round about an hands breadth.

Bust-Coat, a soft **Bread** eaten hot with **Butter**.

Daten

Oaten Cakes, are made of Oat meal, and Leavened very well, and knodden flat and round, and Baked on a Back Stone, of which there are 2 sorts, **hard** and **soft**.

In the division score between 55 and 56, is set the form of an Egg, which according to the colour of its Shell it is termed, if white an Egg, that is its proper and most usual colour, as coming from a Hen, Goose, or Ostrich; if green, it is termed a Duck Egg; if green peckled, a Ravens Egg; if white or brown peckled, a Turkey Egg, &c.

G. 3 Eggs, or 3 Ostrich Eggs, is quartered by *Eyrl* of *Thurland* or *Tyrole* in *Germany*.

LVII. He beareth Vert, on a **Dish**, a **Roasted Pullet**, and in Base a **Shoulder of Veal**, all proper; but of these in their Order.

B. a Dish or Platter, A. with a Roasted Fowl thereon O. is born by the name of *Pullet*.

G. 3 such, the Dishes A. Fowl roasted, proper. Born by *Roastell*.

S. 3 Shoulders of Veal proper, is born by *Veal*.

LVIII. He beareth Or, a **Boach in Bend**, Sable; thrust through a **Dressed Pig**, Gules, between a **Cup** and a **Jugg**, Sable. This is the reward of all them that Travel to *Merry Land*, and the *Isle of Lazy*, where such Fellows get half a Crown a day for Sleeping, and when they awake, are fed with Roasted Pigs and good Ale as long as they can gape; after they may sleep and rest again: Sir *Lawrence Lazy* is the Governour of that place.

S. 3 Cups A. is born by the name of *Cup*.

LIX. He beareth Argent, a **Quart** and **Pot** Sable. This should be looked upon by all good Artists to be the most ignoble and dishonourable Bearing; but as the Custom takes away the sense of dislike; so the frequent use takes away the dishonour, which is seen by those multitudes that have it for their Cognizance; inasmuch that it is Painted over their Doors by the way side, to shew that the Inhabitant is a lover of the Black Art, and a Friend of Transgressors, as all such are who too much frequent such places, and keep not within the Bounds of Chastity and Sobriety.

S. 3 Quarts A. is born by *Berkins*.

S. 3 Quarts their Lids open A. born by *Quaffer*.

A. 3 Black Pots or Earthen Cups. Born by *Potts*.

LX. He beareth Vert, a **Basket full of Apples**, proper. Others term it a **Twiggen Basket** with two **Ears** or **Handles**, Or; filled with **Fruit**, proper. This is born by the name of *Fruister*.

LXI. He beareth Vert, two **Tabacco Pipes** in Salter, and a **standing round Trencher** or **Plate**, with **Tabacco** on it, all proper. This is the Badge of all Tobacconists; yet is Born as the Coat Armour of the Company of *Smokers*.

V. 2 such Pipes in Salter, between four **Roses**, is born by *Piple*, or *Peepell*.

LXII. He beareth Gules, a **Paper of Tobacco** opened, and a **Showmakers pair of Nippers** or **Pincers**. This is a sure Token, therefore an Admonition in it, that he who smoaks away the chief of his time, shall be foully nippt and pinched in the tale or latter end of his Life. This then may be a fit Coat for Mr. *Prodigality*, to put him in mind of what shall come after.

LXIII. He beareth Azure, a **Treble Purse**, Argent. This is more properly termed, an **Hosers Purse**, a **Uituaillers Purse**, or an **Inn-keepers Purse**, being threefold, in which they keep their single Pence, and lesser Moneys, for readines of Change to Customers. This then is a sure Token to know an Ale-woman by, viz. by her **Pouch** or Bag by her side.

S. 3 such Purse A. is born by *Pu. hsh*.

LXIV. He beareth Sable, a **Sack** or **Bag**, or **Bag full of Corn**, the mouth open, and rouled down, Argent. Some term it, a **Bag full of Deal**, or **Flower of Wheat**. This is born by the name of *Sack full*.

G. 3 such is born by *Wolfsacker*.

8. THE third and last necessary Trade for the support of a Mans Life, is the **Beer-Brewer**, an Occupation very needful, if the Fruit of their Labours were not too much abused by intemperate persons, such as care not which End goes first so they can get Drink; and though the Wife and Children Starve at Home, they will be full Abroad.

LXV. He beareth Gules, a **Coopers Hatchet**, Argent, the **hawme**, Or. This was the old way of shaping it, and in this form I find it born by the name of *Hacklett*.

LXVI. He beareth Argent, a **Coopers Hatchet**, Azure; the **hawme** in the Base, Or. This is the modern way of proportioning it, and is much more agreeable to the truth of a right Drawn Hatchet belonging to a Cooper than the foregoing.

G. 3 such the edges to the Sinister A. Hawmes O. born by *Van Steten*.

B. one so stared, is born by *Gienger van Wolfseck*.

O. the like in Bend sinister B. is born by *Hilgartshausen*. And in Bend dexter, and contrary coloured, by *Messenhausen*, both in *Bavaria*.

A. the like in Bend sinister, G. born by *Cammer*, and contrary coloured. G. the Axe in Bend A. born by *Cammerberg*, both of *B. v. n. i.*

LXVII. He beareth Or, a **Coopers Axe** in Chief, Azure, and a **Drawing Board** Charged with its **Iron**, Sable. This is the old way of Drawing their Axe, and is thus used without any alteration, in the Coopers Coat of Arms to this time, viz. *Parry per Salter*.

er Gules and Azure, on a Cheveron between three **Amulets** (or **Hoops**) Or, a Drawing Board, Sable, between two Axes of the second.

A. 2 such Axes endorsed G. born by *Van Ruckers-hausen of Altharia*.

And B. the like O. by *Sturmfer* of the Rhine.

LXVIII. He beareth Gules, a **Wine Piercer**, Argent, the **Handle**, Or. This goeth under several names, as, a **Simblet**, a **Nail Piercer**, an **Hand-bit**: It is only to make Holes in the Heads and Sides of Barrels and such Vessels, to give Vent to the Liquors contained in them, or to draw the same out into other things.

G. 3 such is born by the name of *Pieson*.

LXIX. He beareth Sable, a **Coopers Mallet**, Argent. This Instrument they used in former times to drive on the **Hoops** of their Vessels, but now it is wholly laid aside as useless, in room whereof they employ the **Adlice**.

B. 3 such O. born by the name of *Coope*.

S. 3 such A. born by *Mareville*.

LXX. He beareth Argent, a **Sage**, or **Raising S'w'**. This is a kind of Instrument composed of **Hoops** and upright **Stands** or **Feet**, to hold them at a distance; into which **Hoops** the new Barrel Boards are placed (after they are **paired** or **backed**) to hold them up together, till one end of them be hooped with the **raising** hoops. This they term **Raising a Barrel**.

A. on a Cheveron G. between 3 such Sable, 3 drawing Boards, A. is the old Coat of the Company of **Coopers** within the City of *Chester*, used about 1590, but now it is wholly rejected, and that of the City of *London* is used by them.

LXXI. He beareth Argent, on a **Munt** or **Hill** in **Bale**, Vert, a **Barrel erected**, Tenne: Fire issuing out of it, proper. Some only term it a **Barrel fired**, and a **Barrel firing** for the driving on of the **Hoops**; for after this manner they use to heat their Barrel **Staves** with a **Flame**, to make them pliable, and bow to the **Hoops**. This was the Ancient Crest of the Company of **Coopers** within the City of *Chester*, as aforesaid.

LXXII. He beareth Vert, a **Tun** with a round **Bung**, Or. This hath several terms according to the Persons or Occupations which bear it, as a **Tun**, an **hoghead**, a **Cerce**, a **Barrel**, a **Firkin**, or a **Rundlet**; but whatsoever it is called, it lieth in this posture, it is in its proper Station, and so needeth no other expression to shew it lying, but if it be otherwise, then mention the same.

B. 3 Tuns O. the Sign of the 3 Tun Tavern.

S. a Cheveron between 3 Tuns A. is the Company of **Vintners** Coat.

B. a Tun with a Bird Bolt through it. Born by *Baton*.

G. on a Cheveron A. 3 Barrels S. Hooped O. between six Garbs 2 2 and 2 Salterwise O. is the Coat of the Company of **Beer Brewers**. *

V. a **Rundlet** with 3 **Leaves** out of the **Bung** O. is born by *Kilderkin*.

The Measure of these kind of Vessels.

A **Tun** contains 8 Barrels.

A **Hoghead**, is two Barrels.

A **Cerce**, is a Barrel and an half.

A **Barrel** is 36 Gallons, but of Ale it is 32 Gallons.

A **Kilderkin** or **Half Barrel**, is 2 Firkins.

A **Firkin** is the fourth part of a Barrel, containing nine Gallons.

A **Rundlet**, is any Vessel under a Firkin, and of any measure from a Pint to 9 Gallons, which are called **Rundlets** of such or such a measure or quantity.

LXXIII. He beareth Gules, 2 **Tuns** standing upright, (or **er ected**, or turned an end, as the **Vintners** term them) surmounted of another **freeways**, Or. Born by the name of **Tuns**.

The several parts of a Barrel, Hoghead or Tun.

A **Cask**, the general term for all such kind of Vessels.

The **Staves**, is the Timber of which the Cask is made.

The **Head**, the round Boards at the ends of the Vessel.

The **Cow** or **Crews**, the nick in which the **Barrel Head** is fastned.

The **Raising Hoops**, the first strong Hoops that holds them together.

The **Duer Run Hoops**.

The **Bilge** or **Bulge Hoops**.

The **Quarter Hoops**.

The **Wing Twigs**, are Withen Twigs Cloven.

The **Leg** or **Chime**, that part above the Barrel head.

The **Cross Bar**, the cross piece over the Barrel

The **Bar Pins**, the Pins that holds it on.

The **Went hole**,

The **Bung** and **Bung hole**,

The **Forget hole**.

LXXIV. He beareth Argent, a **Coopers Diver**, within a **Barrel Hoop**, both proper. That **Hoops** or **Rings** are Born in Coats of Arms, is not to be doubted, therefore shall here forbear to give any example of them: only tell you that there are two sorts of Hoops, as,

White Hoops made of Ash cloven

Barrel Hoops, made of **Hassel Staves** cloven, and Twigged together.

LXXV. He beareth Or, a **Water Bowget**, Sable. This is the form of the **Bowget** in ancient times, and was called a **Water Budget**, or **Water Baggs**; and for a distinction may be termed **Horse Water Bowgets**, by reason Water was at first carried on Horse

Horse Backs, before that our People carried it in Cankards, or in Leather Bags or Buckets, which the Bowgetts do signifie. These were also of old termed Oges or Gorges.

In a Field paved with Azure Stones, a Water Bowget Sable, on the Back of a Horse Argent; followed by a Man in a red Waistcoat, with a Scoop on his Shoulder, Or. Is the Coat of the Company of Water Leathers in the City of Chester. This is more short, & termed a Bag-bowget, followed by a man with a Scoop on his shoulder. See *chap. 13. numb. 43.*

LXXVI. He beareth Argent, a Water Bowget; Gules. This is another way of our Fore-fathers making the Water Bags, or Bowgetts, as is to be seen in several old Monuments, and other Draughts of Coats of Arms. These may according to our modern terms be called the Water Bags, because carried on Horse Backs. See these now in use *chap. 7. numb. 13.*

A. 3 such S. born by *Waterman*.

O. 3 such S. a Bordure B. is born by *Lademater*.

LXXVII. He beareth Azure, a Gorge, or Budge, or Bowget, Argent. This is the Water Bowget now in use by our modern Merchants, and is the representation of no other thing than two Leather Bags or Buckets hung at a piece of Wood, cut with a semi circle in it to go about a Man's or Woman's Neck, so resting on the Shoulders; by means whereof the Bags are born and carried with much more ease than otherwise by the strength of Arms and Hands; and the Staff through the middle, is to keep the Bag from Swagging or Flying out in the Carriage. This in our modern time may be termed Water Budge, because carried by Men or Women as aforesaid. See *Leigh's Accidence*, pag. 127. 176. See also *chap. 20. numb. 33.*

G. 3 such Er. by the name of *Ros of Ridney*.

A. 3 such S. by the name of *Ros*. Also of *Ilderton*.

B. 3 such A. by *Kirkton*, and O. by *Bolcher*.

O. 3 such S. born by *P.rrr*.

LXXVIII. LXXIX. These are two other sorts of Bowgetts, in which Foot people carried Water, and was the old manner of Drawing them; though some good Arms Painters and excellent Workmen, do to this day delineate the Water Bowgets according to the form of the first of these two. Some call them Bowges.

Some mistake these for a certain *Aquifolia*, which hath its nourishment in the Water, as being the proper Element thereof; so that he that would discern the Rudimental stroke of a Plant which they take it to be, may behold it in the original of *Duckweed*, in Mr. *Brown's* Garden of *Cyprus*. But Mr. *Gwillim* defines them to be (as indeed they are no other) Vessels made of Leather or such matter to carry Water in, for an Army, or other Domestick uses.

LXXX. He beareth Argent, two Water Bags; Sable; Hooped together, Or. Some term them joyned to an Annulett. However by the help of this

Ring, or Hoop put about the persons neck, the Bags were carried with much more ease, than by the strength of Hands. This is born by the name of *Bansler*.

LXXXI. He beareth Sable, two Water Bags fitted to an Annulett hanging Salterwise, Argent. This between 3 flowers de lis, Or, is the Coat Armour of *Bansler of Derrym*.

LXXXII. He beareth Argent, a Bucket, Sable, the Handle and Hoops, Or. This is termed for a distinction, a Well Bucket, or an Hooped Bucket. See *chap. 16. numb. 102*. Three such is born by the name of *Pemberton*.

LXXXIII. He beareth Or, a Fire Bucket, (or a Leather Bucket) Sable. This is also called a Syphon, which is a kind of Vessel made of Tanned Hides to carry Water in, to quench Fire that is raging amongst Dwelling Houses.

A. 3 such S. is born by *Taine*.

LXXXIV. He beareth Argent, a Tub or Runge, Sable, Hooped, Or. Born by *Tresken*.

Also the like A. is born by *V. in Budlar*.

A. the like O. is born by *Mulberg*.

O. the same with 3 small Feet S. hooped O. born by *Saltz*.

LXXXV. A Runge with a Pipe on the side of it Or, in a Field Gules, is born by *Runge*.

A. the like S. hooped O. is born by *Saltzer of Switzerland*.

LXXXVI. He beareth Azure, a Brewers Mash in Bend sinister; surmounted of a Scoop salterwise, Or. These are two Instruments belonging to the Trade of Brewing, the one to stir up the Mash in the Combe, while it is soaking in the Liquor, which is termed Mash it up, and the Pole is termed a Mash Staff or Pole, or a Mashing Staff; And the Scoop is to lade the Liquor from one Vessel to another, till from Water it is made Beer, as before I have shewed in the Beer-Brewers Terms of Art. This is born by the name of *Scope-mash*.

V. 2 Scoops in Salter O. born by the name of *Scope*.

G. 2 such in Salter O. is a part of the Coat or a quartering of the Town Arms of *Schrabach* in Germany.

In the Base of this quarter, is a Brewing Dish or Bowle, it is of Wood, with which Wort is stirred about when it is working in the Combe. *Van Linling* beareth G. on 3 Bars B. 7 Bowle Dishes 3, 3 and 1.

LXXXVII. He beareth Sable, a Cankard, (or a Water Cankard,) Argent: In the Sinister chief a Pump or Water-sucker, and in dexter Base a Clack, Or. These are all used about Water Works, the two last being least known, I shall inform you what they are. The Sucker, is an Instrument fixed in a round Pipe or Pump, to draw or suck up Water into it; and is nothing else but a round piece of Wood with a hole through it; on the top a piece of Leather nailed on one side

fit over the hole, having a piece of Lead fastned on the same to make it lie close, so that neither Air nor Water can pass the hole downwards; but what comes through the hole upward, hath liberty to come in, by reason it raiseth the Leather up, one side thereof being not close Nailed to the Wood.

The **Clack**, is the term of that foresaid square or round piece of Leather, with the Lead fixed on it. Some term the Sucker thus prepared, a **Bucket for a Pump**.

B. 3 Water Tankards A. is born by *Tankerberg*. The **Milk Tankard** is the same, wide at bottom, and narrower at the top, sans handle and mouth spout, being they are carried on a Horse like **Panniers**. See chap. 32.

LXXXVIII. He beareth on a **Hill** issuing out of Base Vert, a **Pump** Sable; in a Field Argent. This is the Coat of Arms belonging to the name of *Pumpell*.

A. the like, the Hill B. **Pump** G. the **Sweep**, O. born by the name of *Pumperg*.

The **Pump**, is an Instrument wherewith Water is drawn out of a deep Well to the surface or superficies of the Earth, in which to make it a compleat Drawer is contained these parts or members.

The **Pump tree**, is that part as stands above the earth, or top of the Well.

The **Lead pipe**, or the **Bottom Trees**, are pieces of Timber boared through, and set one in another, so long as will reach to the bottom of the Well.

The **Suckers**, are as is aforesaid *numb*. 87. which be set in the bottom of the pipe, or tree, or near the same, to suck the water in, as it is drawn up the Pipe.

The **Bucket of the Pump**, is the like Sucker fastned to an Iron rod, which is moved up and down by the help of the **Sweep**, or **Swafe**, or **Handle**.

The **Sweep**, is the handle of the Pump, which is

made of Iron: The **Pump Brake**, by which people pump up water.

The **Water Passage**, is the pipe by which the water runs out of the Pump into other Vessels.

On the Dexter side of the Pump, is the **Bucket** of the Pump, which is a round piece of wood with a hole through it to the middle, and then open on both sides with a long slit. At the bottom of the open slit is fastned a **Clack** upon the hole which goeth through the bottom of the Wood. The Wood is Leathered about that it fit the hole of the **Pump tree** that neither Air or water come between them.

In the Sinister side is a **Water forcer**, which is only a round piece of wood fixed to an Iron rod; having leather about it to fit the hole of a Pipe. By the motion of this in a pipe, water is forced to any height the Pipe is of length.

There are three sorts of **Pumps**. The first is this **Common** or **Land Pump**.

The next is the **Bur Pump**, or **Bidge Pump**, because they hold much water; The manner of these are to have a staffe 6 7 or 8 foot long with a **Bur** of wood, where unto the Leather is nailed, this serveth in stead of a **Bar**. And so two men standing over the Pump do thrust down this staffe to the middle whereof is fastned a rope for 6 8 or 10 to hale by, and so they pull it up and down the water.

The third sort are **Chaine Pumps**, these have a Chaine full of Bars and a Wheel. These are soonest of all other mended, having spare **Chies**, if any chance to give way.

There are also **Pumps** made of a **Cane** or **Latin**, which *Sea men* put down into the Caske, to pump up the drink; for they use no Spickets.

T O

The Right Worshipsful

S^R. J A M E S P O O L E,

Of Poole, in the County of Cheshire, Barronett.

S I R,

ARTS and Sciences were never esteemed Heavy or Troublesome to the Possessor; neither is it below a Gentleman to exercise himself for his Recreation, in Mechanick Exercises, a Worthy Patron of which we had in that Noble Prince Rupert lately Deceased, who did not only Exercise himself therein, but was an Improver of several Mysteries: In imitation of which Noble Patron, you are said to Exercise your self; to whom I make bold to Present You with a Plate of Tools and a Chapter of Works, without which no Art can truly be Accomplished. So not doubting of its Acceptation, I Subscribe my self

Sir, Your Real Friend and Kinsman,

Yet Devoted Servant,

Randle Holme.

C H A P. V I I.

HAVING exemplified such Bearings of Arms as are borrowed from the several Arts of Nourishing, and Cloathing our Bodies, the next place may be justly Challenged by that Occupation or Science which we call **Armature**; Trades by the help whereof we are defended from all outward Injuries, either of Foes or Weather: And first for Metal Workers, where I shall begin with the **Smith**, or **Black Smith**, whose working is in the Fire, the product of all Arts, for till it was found, Arts lay asleep.

I. He beareth Argent, an **Hammer**, or **Smiths Shovelling Hammer**, Sable; on the Sinister side, a **Nail**, (of some termed a **Spizig Nail**, because without a Head.)

Or. The **Hammer** is the Smiths chiefest Instrument for Forging and Forming of things Malleable for necessary use.

All **Hammers** that have not a **Claw** to draw out a Nail, but have a **Pen** or solid end, have other terms given them according to their bigness, as you may see *numb 128*. This fashion in Heraldry being only called the **Hammer**, without any other addition to it.

The **Nail** hath its use in Military Service, as well as Domestick uses, of which there are several and distinct sorts, some are named from their proportion, one bigger than another, others have their denomination from their shape and fashion, whither big or little, as for the first sorts, there are **twixt Heads**.

*

Cat

Tack Nails, or Card-makers Tacks.

Hob Nails, having great heads and short shanks.

Stake Nails, or Sadlers Tacks.

Stone Nails, or Lath Nails.

Boat Nails.

Single Spikes.

Double Spikes.

Ceremony Nails.

Straw Nails.

Two-penny Nails.

Pea Nails.

Nails, which are made of all lengths and breadths, according to the use to which they are used.

Nails without Heads, are such as these following.

Claw-nails, the ends of Nails, as of Horse-shoe Nails.

Spikes to Nails, Nails to clout shoes withal.

Spring Nails, as nails, made and the largest sort of Springs.

Single Springs, are of the length of single Spikes.

Double Springs, are the length of double Spikes.

Nails without Heads, as large as any that have heads.

Nails named from their shape and use are,

Horse-shoe Nails, whether big or little.

Shoemakers Tacks, with square heads.

Star Nails, with crooked heads.

Ceremony Nails, or **Pea Nails.**

Ball Nails, or Pumping Nails, with round heads.

S. a Chevron between 3 Hammers A. crowned or honoured O. is the Arms of the Company of Smiths.

A. a Chevron between 3 Hammers S. is born by Hammers.

S. the like A. Crowned O. is the Smiths Companies Coat, being between a pair of Pincers and an Horse-shoe.

A. 2 Chevrons S. each charged with 5 such Nails O. is born by the name of *Abwell*.

II. He beareth Argent, a pair of Pincers, Sable, by the name of *Pincerne*.

A. a Fesse between 3 such G. is a coat quartered by *Ruffel of Thornham*.

As touching the first Invention of this Instrument; *Pliny* saith that *Cynus*, the Son of *Agrippa* devised Pincers, Hammers, Iron Crows, and the Anvil or *Seythe*. The Pincers have these several parts.

The Chops and Teeth, the opening of the Pincers.

The Head, all the round part above the Revit.

The Rest hole and Pin, that the Chops move upon.

The Stalles, the long ends by which they are handled.

The Buttons, or ends of the Stalles.

III. He beareth Argent, four Billets or Gads of Steel, Azure. I do here in this quarter set four sorts

of Gads, being the four ways I have both anciently, and these modern times seen them set forth; but them in chief are now such as are generally used, termed of old **Bills or Rows of Paper.**

A. a Chevron G. Pinculiced O. between 3 Billets B. is the Coat of the Worshipful Family of *Delors* of *Doddington*, in *Cheshire*.

A. Billette S. by the name of *Bilvale*.

G. 16 Billets O. by the name of *Candrey* of *Cheshire*.

A. a Cross charged between 12 Billets G. born by *Heath*.

A. 13 Billets G. born by *Van Frankenberg*, of *Switzerland*.

IV. He beareth Gules, a Smiths Anvil, Argent. Some term it a square Anvil or *Seythe*. This is born by the name of *Arvaile*.

The Anvil hath these parts.

The Face, which is very smooth and hard.

The Pike or Bickeln, or Beak Iron, that as comes out of one end of it.

V. He beareth Or, a Round Beaked Anvil, in chief two Nails with heads, Sable. This is born by the name of *Stybnell*. This kind of Anvil is used by Smiths that make small fine Work.

A. the like Anvil between 3 Roles, is born by *Kahn*.

A. 3 Nails S. is born by the name of *Nayle*.

S. a Chevron A. between 3 such O. is born by *Sufall*.

VI. He beareth Argent, an Horse-shoe Azure, between three Horse-shoe Nails, Sable. This is born by the name of *Shughale*.

A. on a Bend S. 3 Horse-shoes, A. born by *Ferrars*.

A. on a Chevron S. 5 such O. born by *Crispe*.

O. on a Bend S. 3 such A. born by *Shoywell* of *Suffex*.

Per pale G. and A. two Horse-shoes, the fore parts conjoined counterchanged, born by *Schyromsky*.

G. an Horse-shoe A. born by *Hertensfelden*.

B. an Horse-shoe reversed, and a Cross patee A. born by *Sobitz*.

VII. He beareth Sable, an Horse-shoe fretted with two other, Argent. Some Blazon it three Horse-shoes fretted or braced. Born by the name of *Sureby*.

B. 3 Horse-shoes reversed, with Cross Patees within them A. born by *Geraldson*. But *Geraldsonsky* beareth but one such.

VIII. He beareth Argent, a square Lock, with a Key in it, Azure. This is the Coat Armoir of *Kylock*.

A. such a Lock, sans Key B. born by the Earl of *Neubaus* in *Germany*.

As there are Locks for several purposes, so they are of several shapes and inventions, in the making and contriving their Wards or Cards, as in Street Door Locks, called **Street Locks**; Chamber Door Locks, called **Spring Locks**; Cupboard Locks, **Chest Locks**, **Trunk Locks**, **Hanging Locks** or **Pad**

Padlocks, &c. in all, or most of which there is in a Lock there are these several Terms:

The **Main-plate**. The **Key-hole**.
The **Top-hoop**. The **Cross-wards**.
The **Bolt or Shoot**. The **Bolt-rod**, or **Pin**.
The **Crimbler**. The **Pin of the Crimble**.
The **Cover-plate**. The **Pin**.
The **Main-ward**. The **Cross-wards**.
The **Staples**, those as holds the Bolt to the Plate.
The **Main-back Spring**.
The **Step-ward**, or **Dap-ward**.

IX. He beareth Gules, two **Keys Endorsed**, the **Bows Interlaced**, Or: **Fretted** with a **Sword Salterwise**, proper. This Coat belongs to the See or Bishoprick of *Winchester*, which I find blazoned thus: He beareth Ruby, two **Keys Endorsed in Bend**, and United in the Heads, Topaz: with a **Sword Extended in Bend Sinister**, Pearl: **Pommel** of the second, and dividing between the **Keys**. Now take another Blazon as short: two **Keys Endorsed and Biased**, with a **Sword Salterwise Fretting** them.

Per Pale, O. and B. 2 **Keys Endorsed and Conjoined** at the Bows Counterchanged. Born for the Coat and Crest of *Van Beher*.

X. He beareth Azure, a **Key**, Argent: others say a **Key in pale**, yet I never saw the Key born but it ever stood thus, upright; except it were born **Fretted**, or in **Salter** with some other thing. This is the Coat Arm of *Goaler*.

A. 3 **Keys** G. is born by *Jolley*.
G. a **Key in Bend Sinister** O. is born by *Van Rolitz*.
G. 2 **Keys endorsed** A. born by *Gitelde*.
G. a **Key the Bit** to the Sinister A. born by *Froberg*.
G. a **Sword in Pale**, proper: Surmounted of 2 **Keys** in **Salter** O. is the coat of the Bishoprick of *Exeter*.
G. 2 in **Salter** A. in the Chief a **Cross patee** fitch O. the Bishoprick of *Bremen*.
G. 2 **Keys in Salter** A. in chief a **Crown Royal** O. is the Coat of the See of *York*.
S. 2 **Keys in Salter** O. the See of *Gloucester*.
G. 2 **Keys in Salter** between 4 **Crosses** Bottoned Fitched O. is the Arms of the See of *Peterborough*.
S. 2 **Keys in Salter** A. is the Bishoprick of *St. Asaph*.
A. 2 in **Salter** G. in Base a **Shapournet** O. born by *Sluselberg*.
G. 2 in **Cross** A. is the Bishoprick of *Brandenburg*.

The **Key** is a very Honorable Bearing, the parts of it are these as follow.

The **Bow**, the **Round** or **Handle** of the Key.
The **Shank**,
The **Pin-hole**, or **Drill-hole**.
Bot or **Bead**, is the round under the Bow, at the top of the Shank.
The **Bite**, is all the flat part of the Key, in which the Wards are.
The **Bowward**, is the distance between the two ends of the Bow.

[]

The **Wards**, are all the nicks in the Bite.
The **Dap**, or **Stepward**, that next the end of the Key.

The **Hookward**, is any cross Ward that comes out from it.

The **Windle** or **Main cross Ward**, is the straight ward running into the Bite on the side next the Shank: which is generally set in the middle of the Bite.

The **Cross ward** of the **Main**, is that as crosseth the **Main cross ward**.

The **Main ward**, is that on the lower side the Bit.

The **Cross ward** of the **Main ward**, is that as crosseth it.

XI. He beareth Azure, a **Key double Bited** in **Fesse**, Or. It is also termed a **Key double Clavier**, as much as say a **Key double Keyed**, for *Clavis* is the Latin Word for a Key: It may then as well be termed a **double Key**. This is born by the name of *Bitis*.

Such a Key A. is the Crest of *Froberg*.
G. the like Key A. is the Town Arms of *Walde* or *Unter-Walden* in *Germany*.

In the Base of this Square, is the **Key of a hanging Lock**: or as some term it, a **Key with the Bite separated**, A. 3 such in **Pale**, Bar-ways B. is born by *Horapike*.

A. 2 such Endorsed S. is born by *Van Falckenberg*.
A. 3 **Keys** in **Pale**, Bar-ways the Bits upwards G. born by *Schutzen* of *Frankford*.

XII. He beareth Gules, a **Cramp cramped**, Or. It is also termed, a **double Cramp**, O.

XIII. He beareth Argent, a **Cramp**, or an **Iron Cramp in Bend**, Sable. These are strong Bars of Iron made to hold Timber work together in old decayed Houses, which kind of Work is termed **Cramping**, from whence these Irons had the name of **Cramps**.

In the Sinister chief is placed a **Barnacle** made after the *German* manner with the Teeth on the out sides with a Ring to run it close together. And such an one G. in a Field A. is born by *Lisberg* of *Frankford*: See other fashions of them, *numb.* 25, 26, 27, 28, 29, 31.

XIV. This is another form of a **double Cramp** which I have seen very ancient in Draughts of Coats of Arms. O. such a Cramp S. is born by *Van Breidenbach* of *Alfatia*.

XV. This is also the Delineation of a **Cramp**, as it was made by our Fore-fathers: of which I shall say no more but give you their Forms.

XVI. He beareth Azure, a **Crampette**, or a little **Cramp**, Or. Some term this a **Crampnett**. This is the Badg of Baron *Leigh*, Knight of the Garter: who bore it in memory of his taking the *French King* prisoner in a field fight. *Leigh*, pag. 50.

XVII. He beareth Argent, a **Double Lock**, Azure. It is also termed a **Fetter- Lock**. This is born by the name of *Horfley*.

V. 3

V. 3 such A. is the Coat of *Erlock*.
Such a Lock with a Falcon Displead A. Brak and
Lees O. standing upon the lock part, was the Badge of
the sixth, Queen Mary, Queen Elizabeth.

Shakle, that as compasseth the Horse foot.
Turn of the Shackles, where it is made fast to the
Socket.

Socket or Barrel.
Clard hole, the hole at the end of the Shackle.

Clard, and his round head, that as is put into the
Socket, to hold in the Shackle.

Key and Clards, in the bended end.

XVIII. He beareth Sable, three Hoyle, or, *Fetters* =
Locks interlaced, Argent. By the name of *Holtzen*.

XIX. He beareth Azure, an half round Padlock,
Or. Born by *Rodenbach*.

XX. He beareth Gules, a Pad-Lock, Argent: as
is the bearing so is the name of the Bearer *Padlock*.

☞ If it be round it is generally termed a Padlock
without any other addition; yet some have called it a
Round Padlock, or a Port-mantle lock, because
most used for their Security.

XXI. He beareth Sable, an hanging lock, Argent.
Born by the name of *Locker*.

Of these sorts of Locks for the hanging upon Shop-
Doors, and Gates in Fields, and such like places: You
shall find them Born in Coats of Arms in various forms,
some round, some half round, some square as the
foresaid Examples. Others also are born in the shape of
ovals, three square, and in the form of an heart, &c.
which are to be named accordingly.

All these Locks are opened with Keys, having in
them all those things which belong to other Locks which
I shall not need to mention again.

XXII. He beareth Sable, a Door Hinge between
a Dove-Tail, and an Hach Hinge, all in Pale, Ar-
gent. These are the three sorts of Hinges which are ge-
nerally used, in all things that require an opening or turn-
ing: and are all born in Arms as I shall shew presently.

The first is the Door Hinge, which is used to all
great Doors of Houses, Barns, Stables, Gates of Towns
and Cities, Parks and Fields, &c. which for length and
fashion made and adorned at the ends, and on the sides,
according to the fancy and pleasure of the maker, with
Flourishes, Cartoes, Scrolls, and heads of Flowers de lis,
and such like; which being fastned on the Door or Gate,
is by the Eye thereof hung upon an hook droven into a
Post on which it turneth: from whence it is termed a
Hook and Hing, or a Hinge for a Hook.

O such a Gate Hinge in Bend, the Eye or Loop
reversed B. is born by *Van Brunk*.

The second is called a Dove-Tail Hinge, because
it is broad at the ends like a Dove or Pigeons Tail.
It is used for all small Doors of Wainscot, Cubbards,
Boxes and Trunks; where nailing may be on both sides.

A. 3 such B. is born by *Hinge* or *Hinges*.

[]

The third is the P. Hinge, being in the form of the
Roman H. this sort of Hinge is used to such kind of
Doors, Cubbards, or Presses, which will not admit of
breadth, but of height, to have them made fast: and
that is through the narrowness of the Timber, or Stiles
on the Edges of the Doors and Places where they are
fixed: See another fashion of them, *numb. 32*.

To these three may be added a fourth, which is a
Composed Hinge, both of a Door, and a Dove-tail
Hinge; or of a Door, and H. Hinge: and this sort of
Hinge is by Workmen termed, a Cross Garnet
Hinge.

The several parts are these.
The Tail, or long part of the Hinge.
The Cross.
The Joint, one being a Notch.
The Pin-hole.
The Pin.
The Nail-holes.

XXIII. He beareth Or, two Iron Staples, (or two
Stables Sable) and as many Fretted Salterwise of the
second. These are things of Iron made of several forms,
as half round, square and triangular: and are dro-
ven into wooden Work against the Bolts of Locks,
and Door Bolts: to shoot into, to keep them fast and
close together. This is born by the name of *Stables*.

A. a Fesse between 3 square Staples S. is born by
Holdfast.

O. 2 Staples Fitted S. born by *Plumer*.

XXIV. He beareth Argent, an half round Staple,
and a triangular Staple: or a Staple in form of a
three square.

Farriers Instruments.

2. FROM the Smith take a view of what Instruments
is born in Coats of Arms, which is used by his
Brother the Farrier, and they are such as these.

XXV. He beareth Sable, a pair of Barnacles, Or.
Laced and Fretted, Gules. These are called also,
Hoyle Twichers, or Bracks: which are used to put
on Horses Noses, when they will not stand quietly to be
Shoed, Blooded, or Dressed of any sort of sore, or such
like occasions: for although the nature of the Horse is
not to be tame, yet this Instrument made by Art, maketh
him obedient. G. the like A. Lace O. is born by *Barnacle*.

Per Fesse O. and V. 2 such S. and 3 Roses A. born by
Leitte.

XXVI. He beareth Vert, a pair of Pincer-Bar-
nacles, Argent. These are termed so, to distinguish
their form from the fore-going; this having handles at
them like Pincers, to hold a Horse with ones hand by
them, whereas the other is bound to his Nose, with a
Lace or Cord. This is born by the name of *Tame*.

A. 3 such G. born by *Barnack*.

XXVII.

XXVII. He beareth Gules, a pair of **Barnacles**, or **Barnacles**, Or. This is a third sort of Barnacles, which if you take notice, differs from the first, though but very little; for this is held together at the top by a Ring inclosing the Battons; the first having the top Buttons held together by an Iron Pin ravetted through them.

XXVIII. He beareth Azure, a pair of **Roller Barnacles**, Or: **Corded**, Argent. Some term them **Wood-Twitchers**, being only two Roller of Wood bound together with the Horse Nose between them, which for want of better serveth in place of Iron Barnacles.

XXIX. He beareth Gules, two **Barnacles**, Argent: in Chief another **Extended** (or laid open) Or. These are the several ways that **Barnacles**, **Backes**, or **Twitchers** have been drawn by the Heralds of old: for another sort *numb. 31.*

The Dutch draw them with the Teeth on the out side of which I have shewed before, *numb. 13.*

A. 3 Barnacles G. born by *Barnickell.*

B. 3 Barnacles extended, in Pale O. on a Chief Er. a Demy Lion Rampant G. is born by *Geneyle.*

A. a Barnacle G. the string crossed in Base the ends Buttoned and Tasselled and Erected S. is born by *Tungfeldt of Franchford.*

XXX. He beareth Argent, a **File** (or a **Smiths file**) between an **Horse-lock Key**, and a **Farriers Buttrice**, Azure: the **Handles**, Or. These are severally born in Arms, as I shall shew presently.

First, the **File** is an Instrument used by *Smiths* for the cutting off, and smoothing of the Irregularities and **Hammer strokes**, made in the **Forging** out of any *Smiths* work: and for the several sorts of Work, there is different sizes of Files, big and little: even from two Inches square, with length answerable to them as small as a Wye: and besides there are of them of divers forms and fashions; as **round Files**, **half round**, **three square**, **square**, and **flat Files**; which have their denominations answering their form: but from the roughness, and smoothness of their cutting, and from their use in Work they have other names: as,

The **Common**, or **Rough File**, called a **Rubber**: it is cut with large and deep Teeth, to take off the first roughness of any Forged piece of Iron Work.

The **using File**, is a long and broad File, exactly flat on both its cut, or teeth sides: but the teeth not half so rough as the common File: with this work is made more smoother and brought to a nearer perfection.

The **Jack File**, is a broad File somewhat thin in both edges, and stronger in the middle: with this **Jack Wheels** have their Teeth cut in them.

The **smooth File**, this makes work smooth and fine, and ready to the polishing: and hath the teeth cut very close and fine upon it as if it were almost plain.

Thus you see Files are of several cuts, for the **Rough toothed File** cuts faster then the **Ballard toothed File**; and it, faster then the **Fine toothed File**; and it, faster then the **smooth toothed File**: one succeeding another, till the Work is so smooth as can be Filed, yet

[]

it may be made smoother with **Emerick**, **Tripoli**, and such things.

A. 3 Files in Fesse B. Handles O. born by *Howsky.*
S. a Fesse between 3 Files, A. Handles O. born by *Phivall.*

The **Buttrice**, is that wherewith the *Smith* pierces the Sole that is over grown, and the hoof of a Horse: to fit the Shoe to it, and to cut of the skirts of the said Sole, which over casts the Shoe, making both even.

A. 3 such in Fesse Sable, born by *Bruttrie.*

O. the same between 2 Horse-shoes S. born by *Buttery.*

The **Horse-lock Key**, is for the opening of a Horse or Fetter-lock, and therefore is more, and generally by Country Men termed a **Fetter-lock**, or **Chain-lock Key**. It is an Iron Plate square bent at one end, having a square hole and nicks in that part of it, to answer the Springs and Wards within the **Bolt**: the other end is bent half round, with a small turn at the end, to make it look handsome.

XXXI. He beareth Or, a pair of a **Smiths Tongs**, and a pair of a single tooth **Barnacles**, Sable. Others blazon it to be **Barwise**.

These Tongs goe under diverse Denominations, some term them, **Smiths Tongs**, others **Smithy Tongs**, and **Forging Tongs**, but generally they are called **straight nosed Tongs**: to distinguish them from another pair which they commonly used, called the **crooked Nosed Tongs**, in *numb. 129.* The first used to hold in the Fire short things, or what ever is flat, as Plate Iron. The latter used for the Forging of small Batts, and such Work as will be held between their Chaps: in which there is these terms, as

The **Chaps**, which is the holding part.

The **Joynt**, and **Rivet**, the place where it turns to open and shut

The **Handles**, by which the *Smith* holds them.

These are another sort of **Barnacles**, which have the Teeth on the out side, being made stetter, or looser by the running of a Ring higher or lower, on the Teeth towards the Joynt, see the others *numb. 25. to 29.* of this sort I find one born in **Bend Gules**, in a **Field**, Or. by the name of *Ketteler in Westphalia.*

The like is born by the Earl of *Churlandt* in *Germany*, on an Escuchion of Pretence.

XXXII. He beareth Argent, a **Hand-Vice**, Azure. Born by the name of *Handy.*

There are two sorts of Hand Vices, the one called the **Broad Chapt Hand Vice**, having the same Chaps as the **Large Vice** fixed to the *Smiths* Board hath: as *numb. 49. 128.* The other is called, the **Square Nosed Hand Vice**, which is this: Now the Office of both are to hold small Work in, which in the Filing requireth often turning about. The latter is seldom used but for Filing of small **Gobulous Work**, as the heads of Pins, that round off towards the edges. The several parts of these Vices are these following.

The **Face**, the top part of it:

The

The **Chaps**, the holding part, which is nicked or cut with a Bastard cut.

The **Screw-pin**, which is cut with a Worm or Thread.

The **Nut**, or **Screw-Bor**, which hath also a Worm in it.

The **Spryng**, which forceth the sides to open, being unscrewed.

The **Joynt and Rivet** at the bottom, on which it turns in the opening and shutting.

In this quarter I have set another form of an H hinge, of which see more *numb. 22.*

XXXIII. He beareth Gules, a **Planishing Anvil**, Argent. Others term it a **smooth faced**, or a **square Anvil**; on such an one set in a Hole in the Smith-Bench; he points and straightens his Horse shoe Nails when he is about to use them, thereby beating off all the loose Scales which cleave to the Nail.

S. 3 such A. is born by the name of *Planisher*.

Spurriers and Lorrinors.

3. FROM the Smith and Farrier, we proceed to the **Spurrier** and **Loziner** or **Bit-maker**, whose Tools are the same, and therefore shall onely give some examples of what Works of theirs are born in Arms, and what Terms of Art they use about them.

XXXIV. He beareth Gules, a **Scotch Spur**, Or. This is an old way of making Spurs, Rowels not then being in fashion, as may be seen in many ancient Seals of men on Horse-back, where their Spurs were only armed with a sharp point like a Cocks Spur, the Buckles being solidly fixed to the Heel-piece.

XXXV. He beareth Vert, a **Spur**, Or; **Leathered**, Argent.

Some term it a **Spur** with the **Rowel erected**, which is superfluous, seeing the Spur cannot in a Coat be born in a better posture, considering it is a part of Offensive Arms, having sharp points, as I gave you an Item of before; but if it be set contrary, then say a **Spur reverted**, or the Rowel downwards.

S. 3 such A. Leathers G. is born by *Spurrier*.

O on a Wing elevated S. a Spur O. is born by *Van Spor*.

In the Spur there is these nominal parts.

The **Rowel**, the **Neck**, the **Eye** or **Rivet hole**, and **Rivet**, the **Shank**, the **Button holes**, the **Button** and **Hooks**, and the **Buckles**; which are all so well known that they need no farther description, but the last named, hath several terms in it, which you may see *numb. 37.*

XXXVI. He beareth Sable, a **Buckle**, with a

*

Spur Neck and **Rowel** fixed thereunto pendant, Argent. Born by the name of *Buckrowel*.

B. 3 such O. is born by *Ingamer*.

XXXVII. With in this Quarter, and the two next Succeeding, I do present you with nyne severall sorts of **Buckles**, which I have found, and seen born in coats of Armes: The terms of each and by whom owned, shall in their due places be manifested.

The first is Azure a **Buckle**, or **Fermale**, Or. this form of Buckle being round, needs not to be mentioned that it is so, but if of any other form, then to add its proper term, or its use; for several Buckles are named from their several uses: Buckles are called **Females** or **Fermaults**, but more generally in the Plural Number **Fermaultres**.

G. the like A. born by *Grasswein* of *Steinrich*.

A. 3 such the Tongues reversed S. or more properly 3 Buckles reversed. This is born by *Crantz*.

The Second is termed a **Spur Buckle**, which hath more to it than any other Buckle that is born in Arms by those things called, a **Chape**, which holdeth the **Tongue** of the Buckle in its proper place: And the **Cross Barr** in the Diameter of it, to which they are fixed. When it is blazoned a **Spur Buckle**, the end of the Chape is turned up into a **Hook**. If it be blazoned a **Garter Buckle**, the Chape hath a **Button** fixt on the end of it; and such Buckles are made on the Garter of Honour, as you may see *chap. 1. numb. 88.* and *chap. 2. numb. 59.* This Buckle is also made square.

The third is a **Girth Buckle**, or of some termed a **Square Buckle**. And such is the coat of *Garjide. viz.* B. 3 such A.

XXXVIII. The first in this Square is termed an **Haile round Buckle**, Some blazon it, a **Semiton** (or **Semi round**) **Fermale**.

A. 3 such S. born by *Johnson* of *Chester* & *Alvanley*.

G. on a Chapurner O. the like erected A. by *Ringenberg* in the Low countreys

The Second is termed, a **Triangle Buckle**, or a **Three square Buckle**, which I drew from an ancient coat of Arms thus blazoned; Three **Fermaultres** **Semi-Losenge** like, Or: In a Bloody field. born by the name of *Sempeir*.

The third is termed either a **Losenge**, or **Masle Buckle**, or **Fermale** (or **Fermale**, as some write it)

B. the like garnished A. is born by *Wedischmill*.

S. the like A. by *Schencken*.

B. the like, stony in the corners, with the Tongue set in the side, pointing to the dexter O. is born by *Petersheim*.

A. on a Pale G. a Masle Buckle O. born by *Buklegh*.

XXXIX. He beareth in the first place, a **Fermale** or **Buckle**, the **Tongue** pendant, Argent, in a Field Gules, by the name of *Flaklone*. The like form of Bearing the Buckle thus, is by *Jandrell* of *Lardestey* in *Chefbine*,

Cheshire, a Family of high esteem there, viz. Sable three such Buckles with the Tongues pendant, Argent.

Now know there is a difference between the **Tongues pendant**, and the **Tongues reversed** or turned downward.

The second is termed a **Buckle garnished** and **adduced**. Now of these sorts of adorning Buckles, take notice that **Garnishing** is to have them chased or wrought over with Flowers, Branches, Leaves, and such kind of work: But **Studding** is to have them plain wrought up, and set with spots resembling Stones or Button heads.

O. 3 such G. born by *Sapye*.

O. a Fesse G. between 3 such B. born by *Bradley*.

Party per Fesse G. and A. two Cinquefoils and a Buckle counterchanged is born by the name of *Smyth*.

The third is a **square Female, Buttoned** at each corner, the **Tongue Bendwise**. In this Buckle we must suppose the Tongue is slipped out of its place, for want of a **Chape**; for a Buckle of this form is looked upon to be very useless, if the supposition aforesaid be not granted. This is born by *Van Dasseheim*.

XL. He beareth Gules, a **Spur Rowel** of eight points, Or.

You need not name pierced, for the Spur-Rowel is ever so; yet in the Spur-Rowel you must ever name the number of its points, whether under or above five; for the number five needs not, by reason the Rowel is generally made with so many, as the next examples manifest.

Per Fesse G. and O. the like A. born by *Zornen Lap-ten*; and also by *Zornen van Bulach*, in *Alsatia*.

A. the like Rowel S. is born by *Steernenberg*.

A Spur Rowel of 9 points O. is the crest of *Van Wems*.

XLI. He beareth in this quarter 3 sorts of Rowels; the first is a **Rowel of four points**; the like to which is born by *Van Roweller*, viz. Vert three Spur Rowels of four points (or four pointed) Argent. By the name of *Scrivenberg*.

The second is a **Spur Rowel**, which some term a **Mullet pierced**.

But in my Judgment when it is Blazoned a Mullet, it ought to be plain, though it be pierced, and not **quarterly quartered** and **patched**, as the Rowel is to be: Though many good Heralds do Blazon all Rowels by the name of **Mullets** of such and such points pierced; yet by reason the Rowel is ever born pierced, and the Mullet not, it were best and most proper to term them **Mullets** when not pierced; and **Spur Rowels** when pierced.

A. 3 such G. born by *Mitler*.

The third is a **Rowel of three points**, which some take to be a **Salthrope**, but such are mistaken in their Judgment, that being quite another thing; and this no other than a three pointed Rowel; though I

confess I have very rarely seen such born in Coat Armour: However I take it here for the Coat of *Triponts*. Viz. G. 3 such O.

XLII. He beareth Sable, a **Spur Rowel** of six points, Or. Born by the name of *Rowell*.

V. 3 such O. born by *Spurstone* of *Spurstone* in *Cheshire*.

B. a Fesse between 3 such O. born by *Van Wems* of *Alsatia*.

B. 3 such A. born by *Kofsboden* of *Frankford*.

Party per Fesse G. and Watery a like Rowel O. by *Strudell*.

A. 3 such S. born by *Grandell*.

O. one such S. born by *Waldeck* of *Bavaria*.

B. the like O. by *Knockhen* of *Brabant*.

Per Bend Sinister O. and B. such a Mullet counterchanged by *Van Wiermitz*.

XLIII. The first is termed a **Spur Rowel blemished or rebated**. Others Blazon it a **Mullet per forated or pierced and rebated**. A. 3 such G. is born by *Van Martberg*.

The second bearing in this quarter, is termed a **Mullet**.

Now the difference between a **Mullet** and a **Spur Rowel**, I have shewed *numb. 41*. But as the Rowel exceeds in points, so doth the Mullet, which are to be numbred, if they be less pointed, or exceed the number of five points: Again, a Mullet cannot properly be a Rowel, by reason they want that finishing on the sides, which the Rowel hath.

A. a Mullet S. born by *Ashton* of *Ashton*, in *Lancashire*.

B. a Mullet O. born by *Welshe*.

A. a Mullet G. born by *Harpenne*.

B. a Mullet of 6 points A. born by *Haggard*.

A. the like G. born by *Harpdon*.

Per Fess O. and B. a Mullet of 8 points counterchanged, born by *Scotto*.

S. 3 Mullets A. born by *Pulston* of *Emrall*, a worthy Family in *Wales*.

B. 3 Mullets O. born by *Crofton* and *Hard*.

A. 3 Mullets G. born by *Gedding* and *Knorville*.

A. 2 Bendlets between 2 such S. by *Browne* of *Nether-Leigh*, in *Cheshire*.

V. a Chevron between 3 such O. by *Aston* of *Al-derley* and *Chester*.

There are 3 sorts of **Mullets**, one is the **Celestial Mullet**, and is that Meteor or shooting or falling matter in the upper Region. The second is of the **Sea**, which is a Shell having a kind of Life in it. And the third is a **Terrestrial Mullet**, a kind of a Stone, which hath also a kind of motion with it, especially if it be put in Vinegar.

XLIV. He beareth Gules, an **Hoyle Bit**, Argent. Some do call it a **Bit** or **Snaffle**, a **Widle Bit**, or an **Half Cheek Bit**. Mr. *Morgan* calls these **Curbs** or **Curb Bits**. It is the Hieroglyphick of a rational and well governed and temperate person, as was seen i

David, who kept his Tongue as with a Bit and Bridle while the Wicked were in light, *Psal.* 39. 1. Again, it is the Emblem of a Curb and Stay to unruliness, being the only means by which Head-strong and untamed Horses are brought to Servitude and Subjection, *Psal.*

32. 9.

There are several sorts of Bits, as
 The **Upset Mouth**, with one **Plight** within another.
 The **Whisper Snaffle**. The **Whole Port**.
 The **Broken Port**. The **Canon Bit**.
 The **Cats foot Bit**. The **Half Bit**.
 The **Scatche Bit**. The **Half canon Bit**.
 The **Half scatch**, or **Half cheeke Bit**.
 The **Hellon Bit**. The **Wastonet Bit**.
 The **Campanell** or **Bell Bit**. The **Peare Bit**.

The several parts of a Bit, or Snaffle, or Curb Bit.
 The **Mouth-piece**, or Bit, or Canon Bit.

The **Cheeks**, and the **Eyes** thereof, the Upper and Lower Eye, that is the Holes therein.

The **City** of the **Cheek**, is that part which extendeth from the nether Eye, sustaining the leue downwards.

The **Head** of the **Cheek**, which the *French* call **Stranghera**, containeth the great Eye where the leue is fastned, and a little Hole above that, for the **Water Chain**; and the Upper eye, whereto the **Portsmouth** is put and there made sure and fast.

The **Port**, is the Mouth-piece made whole with a square or half round in the middle, therefore called the **Port Bit**.

The **Chafles**.

The **Campanell**.

The **Corb**, and **Hook**, is the Chain and Hook under the Horse Chops.

The **Bosses**, are Brass Bob's set to the Cheeks, for an Adornment to the Bit.

The **Bollers**, and **Rabbits**, are them as beare the Bosses of the sides or Cheeks of the Bit, and Ravets them fast to the Cheeks.

The two **Water Chains**, or **Water Chain**, and the **Nether Chain**.

The **Side Bolts**.

The **Bolts** and **Rings**, for the Bridle raines: or **Rolls**, **Rings**, and **Buttons**.

The **Hurdles** of the Bit, or **Corbe**.

The **Trench**.

The **Flap**.

The **Top Roll**. The **Leue**.

XL. He beareth Azure, a Bit or Snaffle in Fels, Argent, between two Bosses, Or. born by the name of *Snaffer*.

A. on a cheveron B. between 3 Curbs S. as many Bosses O. is the coat Armour of the Company of *Lorioners* or *Bit-makers*, in the City of *London*.

G. 3 Snaffles in pale A. born by *Bits*.

Per fesse G. & B. a Bit or Snaffle pendant O. is born by *Van Wierrandt Vogten* of *Austria*.

The *Poets* tell us that the first men which tamed wild horses with the Bit and Bridle, were the *Pelastropians*, a people in *Thessalie*.

XLVI. He beareth Azure, three Bosses, Or. The

*

Bosses of Bits are only an adornment to them, being for no other use; and therefore in their round and swelling form the Workman maketh what figures and devices he pleaseth, as these with severall others of like nature will witness the truth thereof.

G. 2 Bosses imbossed pointed to the center, in fesse towards the sinister, A. is born by *Musenlo* of *Frankenford*. Some call them Shields, see *numb.* 45. But I take them rather to be Bosses turned sideways.

G. 4 such O. with 2 Barrs Interposed S. 2. 1 & 1. by the name of *Bissenhusen* of *Brunswick*.

O. on a pale B. a Boss chased with a Flower de luce A. born by the name of *Ellenhusen* of *Alsacia*.

Per fesse G. & O. 2 such imbossed O. by *Ascheberg*.

Founders Tools.

4. THE next Trade in Order to be Handled, is the **Founders**, or **Melters** of **Mettle**: Under which is comprehended the **Plumers**, **Pewterers**, **Silver Smiths**, **Brasiers**, and **Glass makers**, with such like; severall of whose working Tools are to be found born in coats of Arms, as in these examples.

XLVII. He beareth Sable, a pair of Draughts, or **Brasiers Ballances**, Or. This is a small thing to look upon, and by the help of it any considerable Weight may be certainly known by the equal poising of it with that small Weight running on the **Beam**, the thing to be weighed hanging at the contrary end, at the hook: The spots are the number of pounds marked on the **Beam**, which encrease more and more from the **Rings** to the end of it.

And by turning of the **Beam**, and holding the **Ring** next the **Hook**, the weight is doubled and trebled, to that of the holding which is now up.

XLVIII. In this quarter there is three Instruments, which severally take thus.

The first is termed an **Ingot** or **Lingate**, which is an Iron, Brass, or Copper Instrument, with an hollow place made in it, to receive and hold any sort of Metal cast into it; which being cold, is from the thing it is cast in, termed an **Ingot** or **Lingate** of Silver or Gold, &c.

Argent 3 such in Pale or Barwise, Or, is born by *Lingate*.

The second and the third are two sorts of **Blow-pipes** or **Blatt-pipes**, which the Silver and Goldsmith, as also the **Brasier** useth, which is to Blow the Flame of a Candle or Lamp, upon any small thing (laid on a Charcoal) which requires soldering.

XLIX. He beareth Azure, an **Hand-Vice** screwed up, Or. This is born by the name of *Littlehold*. The **Hand-Vice**, as I told you before, is to hold small things in

in it, which in the Filing requires often turning. See *numb. 32. 49.*

L. He beareth Sable, a **Cross Staff** in Fess, between a **Plummers Shave Hook**, and a **Lead Plummert**, proper. These are a part of the Coat belonging to the Company of *Plummers*, as you will see in *numb. 54.*

S. 3 Plummers Shave-hooks, A. Handle O. is born by *Sharvock* or *Sharvux*.

LI. These are another manner of ways, which of old I have seen the **Shave Hook** and **Plummert** drawn. First, the **Shave Hook**, is to scrape the old scurf, either of Lead or Pewter off, that the Soder may hold the joint more firm.

The second, being a **Plummert**, is used for the making of things level by the help of that which is called a **Plum-rule** or **Plym-rule**, a Rule to work by the level falling of a Plummert, or Bullet hung in a Thread.

A. a Cheveron G. between 3 such Plummerts S. born by *Jennings*.

LII. He beareth Sable, two **Soddering Irons** in Saltier, Argent. Some term them **Plummers** or **Glasiers Soddering Irons**. These Soddering Irons are only used about Lead Workings, other Soddering Irons there are used by other Trades, but of different forms to these, which are to be termed according to the Trade they are occupied in, as examples afterward will manifest. This foresaid Blazon is the Coat Armour of *Sodderings*.

LIII. These are the forms of **Plummers Soddering Irons**, as anciently they were made, of whom I shall say no more in this place, but shew you their form and fashion.

LIV. He beareth Sable, a **Plummers Plym-rule** reversed, Argent; in chief a **Cutting Knife**, Or. Born by the name of *Plummer*.

These are two Instruments very necessary for the Plummer, the **Plym-rule** to set the **Shafts** of his **Casting Frame** even, true and level; and also to prove the Sand cast upon, that it be of the same levelness, else the Sheet of Lead will not run true, but be thicker in one place than another: Now that all these mentioned in the five last quarters belong to Coats of Arms, take this Blazoning, *viz.*

Or, on a Cheveron Sable, two Soddering Irons in Saltier, between a Cutting Knife and a Shave-hook, Argent. In chief two Plummerts Azure, interposed with a Cross Staff, and in Base a Plym-rule, Sable; which is the Coat Armour of the Company of *Plummers* of the City of *London*.

The **Cutting Knife** is for the cutting of Cast Sheets of Lead into fit lengths and breadth, according to use; and to cut off the **Catches** or **Catch Lead**, at the end of them, with the **selvages** or edges, which are over thick.

LV. He beareth Azure, an old fashioned **Limbeck**, Argent. This thing I could not tell what to name it, until an ancient Brother of that Society to whom it did belong, did assure me that it was made for a Limbeck, but ignorant Drawers of old have made it thus, and so it continues to Posterity, as many other Erroneous things do, which ought to be mended. This may rather be termed a **Latice** from its shape.

B. on a Cheveron O. 3 Roses between 3 such A. is the Coat belonging to the Society of *Pewterers*, in all the Incorporated places in *England*.

LVI. He beareth Sable, a **Furnace of Metal** surrounded with a **Flame** of Fire, with a **Ladle** therein, all proper, born by *Siron*. Some term it a **Melting Pot** or **Crucible** in a **Flame of Fire**. The like Bearing to this, *viz.* out of a Cloud is two hands proper, Sleeves Gules, turnings up, Or, holding of a pair of Tongs, by which a Melting Pot is taking out (or turning about) within a Flame of Fire, is the Crest or Cognizance of the Company of *Brassiers* or *Furniers*.

LVII. He beareth Azure, a **Furnace of Brick-work**, flaming out at the top, all proper. This is termed **Mebuchadnezzars hot Fiery Furnace**, in which he caused the Three Children to be cast, for refusing to Worship his Golden Image, *Dan. 3. 20. 21.*

S. the like G. Flame proper, is born by *Castorall*.

LVIII. He beareth Argent, a **Grass Art**, Azure, Handle, Or. It is used for the taking out of any Engraving, and to help there where a File cannot conveniently come to do its work. This is born by *Grasex*.

LIX. He beareth Or, a **using File**, Sable. It is to flat any piece of Plate, by rubbing it thereon.

LX. He beareth Argent, a **pair of Fire Tongs**, Sable. The use of these Tongs are to take out, or put any thing into the Fire. They ought rather to be termed the **Gold** or **Silver Smiths Fire Tongs**, or a **Plate Workers Fire Tongs**. The round head is of the nature of a Spring which makes them fly open of themselves. This is born by the name of *Lugdorf*.

LXI. He beareth Azure, a **pair of Cording Tongs**, Or. They are of some termed **Charging Tongs**, whose use is to take any small thing up, and to lay it upon a place.

LXII. He beareth Gules, a **pair of Gold-Smiths Shears**, Argent. These are to cut Wyer, and other Irregularities in the Hammering of Silver or Gold Plate. 3 such A. in a Field B. is born by *Workman*.

LXIII. He beareth Sable, a **pair of Plyers**, Or. These are termed **round Plyers**; for of these there are several kinds, as round and flat pointed. This is born by the name of *Parply*.

LXIV. He beareth Azure, a **pair of Scales** or **Ballance**, Or. By the name of *Ballance*. That the Bal,

Ballance or Gold Scales are oft used in Coats of Arms, no one will deny; seeing the Bakers cannot without them make and perform that just Size put upon them; who for their Coat Bear Gules, a Chief Or, charged with two Bars Wavey Sable, out of a Cloud in Chief, a Naked Hand and Arm, holding a pair of Ballances, between three Garbs of the second.

Out of a Cloud, an Arm and Hand erected holding or poising a pair of **Scales**, all Or; was the old and ancient Crest belonging to the Bakers of the Loyal City of *Chester*.

B. 3 pair of Ballances O. is born by *Wrighty*.

If the **Scales** with all its appurtenances be of one Colour, or Metal; then to term them a pair of **Scales** or **Ballances** is sufficient; if otherwise, it hath these several parts, which term with the Colour it is of accordingly.

The **Beam**.

The **Eyes**, or holes of the Beam.

The **Axel Tree**.

The **Needle** or **Poise**, and its center.

The **Checks**, in which the Beam turns, the handle and its left.

The **Ring** to hold it by.

The **Play** or **Stay**, that which hangs and playeth at the Checks, under the Axel-tree, and keeps them at their due distance.

The **Hooks** and **Rings**, to keep the Cords to the eye or holes at the ends of the Beams.

The **Cords** and **Tassels**.

The **Scales** or **Balls Dishes**.

LXV. He beareth Gules, two **Crucibles**, and a **Graver**, the point erected Argent, **Haft**, Or. By the name of *Pargrave*. **Crucibles** are a kind of Earthen Pots, made of a Whitish Clay or Soil that will abide Fire and much heat; in them Gold-smiths melt their Silver and Gold; and Brafiars their Metals.

G. 3 Crucibles A. born by the name of *Firepot*.

S. 3 Gravers A, Handles or Hafts O. born by *Graver*.

LXVI. He beareth Argent, an **half round Graver**, Azure, the **Haft**, Or; and a pair of **Holding Tongs**, Sable; both **Barwise**, the first with its point to the sinister side. There are two principal sorts of Gravers, besides the larger sort, called **Scalpers**.

The one is the **long Graver**, which is streight and long, used for the Graving of any flat thing, as Plate.

The other is the **short Graver**, which turneth up somewhat at the end, whose use is to Engrave Letters and Escachions in Seals, of Plate or other Metal.

The **Scalper**, is a kind of **Graver** with a flat point; its use is to take away, and clear the bottoms of broad Letters or Escachions sunk into the Metal, which the sharp pointed Graver cannot do. Now of them there are these sorts, the **flat pointed Scalper**; the **half round Scalper**, and the **round Scalper**.

All Gravers and Scalpers have round Knobs at the end of the **Haft**, which the Artift calls the **Pummell** of the **Haft** or **handle**.

The **Holding Tongs** are generally used to hold any piece of Plate, or other Metal, while the Workman beateth it out on the **Anvil**, when it is hot.

A. the like Tongs in Bend G. is born by *Harschkircher* of *Bavaria*. The same in Bend Sinister, is born by *Zangberger*, in the same Province.

LXVII. He beareth Sable, a **Wooden Hand-Vice**, closed, with the **Chaps** to the Sinister side, Or, **Screw** Argent. And a **Borax Box**, the Pipe to the sinister, of the second. For the use of the Hand-Vice, see numb. 32. 39. together with the several forms and fashions of them; of which I shall say no more.

The **Borax Box**; of some termed a **Borace Box**; but more vulgarly a **Burras Box**, is a Brass or Copper Box with a Pipe in the side, in which bruised Borax is put, to scratch it by little and little out of the Knobbed Pipe, on the place intended to be Soderred.

S. such a Box A. is born by *Borax* or *Borranx*.

G. a Fesse between 3 Borace Boxes O. born by *Boswel*.

S. 3 such Hand Screws or Vices O. is born by *Screw*.

LXVIII. He beareth Vert, a **Stone Burnisher** Azure, **Haft** or **Handle**, Or; and a **Gold-smiths Sparrow Hawk**, Argent. The first is to polish and make bright any piece of Silver or Gold. The latter is of some called a **Beak Iron**, others a **Sparrow Hawk**, having a Beak on each side, and a kind of Tang at the bottom of it to be fixed upon a Block or Bench that hath a Hole in it. Mr. *Morgan* calls these **Anvils**, but rather termed the Gold-smith or Brafiars Anvile.

A. 3 such Burnishers erected S. Handles G. is born by *Burnish*. Some term them **Aggat Burnishers**, which are generally the Aggate Stone, and sometime a Polished Steel, as in the next.

LXIX. He beareth Gules, a **Steel Burnisher**, Azure; **Handle**, Or; and a **Beakett** or **Anvile** with a **square face**, and **double Triangular Billed**, Argent. Of the latter of these two Bearings, viz. the Beakett, or small double Beak Iron or Anvil, I found born by a *German* or *Dutch* Family in the foresaid colours, named *Ichgan*.

A. 2 such Burnishers erected S. Hafts O. and a Rose G. by the name of *Trafaber*.

LXX. He beareth Sable, a **Beak Iron** with a flat bottom, Argent; set upon an **Dragon** (or eight cornered) **Crencher**, or Board, Or. born by *Beak*.

LXXI. He beareth Azure, a **Spoon Anvil**, Argent. This is a kinde of hollow, or halfe round Anvil in the face; on which Mettle men work any thing half round and hollow; both Concave and Convex, as Ladles & Spoons with such like. 3 such is born by *Spoonall*.

LXXII. He beareth Gules, a **Swage**, Argent. born by the name of *Smaggeley*. In the face of this kinde of Anvil are smal halfe round nicks, which are termed **Swages**.

ges, and they are of severall widnesses, according as the workman will have the Ring to be.

B. 2 Treloiles O. & a Swage A. born by *Tercent*.

LXXIII. He beareth Sable, a *Botol Anvil*, Argent, between a *Pile of Weights*, and the *Casse* of them Or. this is born by the name of *Aurifaber*. This is termed a Goldsmiths *Pile*, being *Troy weights*, and gradually set one within the other, as *Merchants* smal weights are set one upon another *Pyramid wise*.

Glasiers Tools.

ALTHOUGH Glas be not a Natural mineral, yet we may take it for an Artificial mettle, and therefore put the Instruments of the *Glasmakers*, and the Tools of the Glas workers, viz: the *Glasiers*, into the same *Classis* of Mettle founders.

LXXIV. He beareth Argent, a *Glasiers Nipper*, or *Grater* in Bend, between a *Nail*, and a *Soddering Iron*, Sable. born by the name of *Van Gravex*. The *Nipper* is by Mr. *Vpton* termed a *Sheering Tool*, of which I finde several coats of Arms that have them.

A. 2 Nippers in Salter, betw: 4 Nails S. on a Chief a demy Lion of *England*, The Crest, on a Wreath of the colours; 2 Soddering Irons in Salter, S. Was the ancient coat & crest of the worshipfull Company of Glasiers in the City of *Chester* used Anno 1579.

A. 2 Nippers in Salter S. born by the name of *Taunt*. A. the same S. betw: 4 Pears G. by *Kellerway* of *Hammer*. The same coat with a *Bordure* engrailed S. is born by the same name of *Kellerway*.

LXXV. He beareth Argent, a *Glasiers Cutter*, or *Cutting Tool* Reversed: between his *Fire Iron*, and his *Ancient Nipper*, Sable. Before the use of the *Diamond* for cutting of Glas was found out, these were the Instruments, or Tools which the Glasiers used for that purpose: for with them, with the help of a little fire and water, Glas was cut into what form the Glasier pleased. This was the ancient coat Armour of the *Glasiers*.

LXXVI. He beareth Sable, out of the Chief hung by a *Waper* a *Lamp* of one light, *Flamant*, Argent. this is born by the name of *Lampe*, alias *Lamperin*. This is called a *Cyn*, or *Cyn-mans*, or an *Oyl-mans Lamp* &c. according to the trades which make use of it. By the help of this *Lamp* the Goldsmith and other Mettle workers, Sodder small things together.

Lamps are also born with *Double Lights*, the one contrary to the other. As in the coat of *Diluck*, which is an *Italian* family, who beareth Gules, a *Lamp* Or double flamant.

LXXVII. He beareth Vert, a *Forging Hammer* *Head*, a *Spoon hammer* *Head*, and a *Planishing Hammer* *Head*, in Pale Argent. These are three sorts

of *Hammers* used by Goldsmiths, and other mettle workers, as *Pewterers*, *Copper Smiths*, and such like.

The *Forging hammer* hath a round Flat face, and a Round ball Pen. The *Spoon hammer* hath round Buttons at both ends. And the *Planishing hammer* is Square in the face, and long in the Body, with a smaler Square in the Pen, or contrary end. Some of which with their Handles in them I have found and seen born in coats of Arms.

S. a Spoon hammer A. handle O. betw: 2 Lillyes. is born by the name of *Stethamer*, a familie in *Italy*.

A. 3 Planishing hammers S. born by *Hammerston*.

G. one such O. is born by *Don Malleato* of *Spain*.

Embrautherers Tools.

6. THESE few belong to the Trade of an *Imbrautherer*, beside which I know not, nor can learn of more of any concernment.

LXXVIII. He beareth Argent, an *Imbrautherers Tent*, with a piece of Cloth strained therein, and *Imbrauthered* with a *Rose* all proper. By the name of *Imbrautherer*. In the Working Tent, or Straining Frame, there are these parts.

The *Frame* or *straining Tent*.

The *Mortised pieces*, which have square holes cut through at each end.

The *Running pieces*, which go through the *Mortises*, to make the *Frame* wider or closer together.

The *Holes and Pins*, they hold it at its distance.

The - - - - - or *List* about the *Imbrauthered* work.

The *Pack-thread*, by which it is strained.

Some Tents have all the four pieces of the *Frame* with a *Mortise* at one end and the other plain, by which means the straining part may be so drawn together, that it may be made fit for any piece of *Imbrauthery*, big or litle, long or square.

LXXIX. He beareth Gules, a *Quill* of *Silver*. Others term it a *Quill* Or, filled with *Silver Thread*. By the name of *Silverquile*.

Gules two *Imbrautherers Broaches* in Salter, between 2 such *Quills* of *Gold Thread*, Or; on a Chief Argent a *Lion passant* Gules, is the Coat of Arms now born by the Company of *Imbrautherers*, of the City of *Chester*.

LXXX. He beareth Sable, a *Quill* emptied of its Thread, Or. This I take to be the ancient way of drawing the *empty Quill*, and so I find it born in the Coat Armour belonging of old to the Company of *Imbrautherers* of *Chester*, viz. Pale of six *Ermin* and *Azure*, on a Fess Gules, two *Embrautherers Broaches* in Salter, and two such *Quills*, Or; between three *Lions Passant* *Gardant*, or 3 *Lions* of *England*.

A. 3 such G. is born by *Van Haven* of *Thurragram*. In

In the sinister side of this square, is placed a **Ball** of **Silver** or **Gold Thread**, which some term a **Ball Fusil** wife, because it is rather long than round; and thus the *Imbrauthers* bear it in their Coat at *London*.

LXXXI. He beareth Azure, an *Embrauthers* **Boach** in Bend Or, between an **Hank** of **Gold Thread**, and a **Needle** with a **Silver Thread** in it. Some Blazon it between a **Hank** of **Thread** Or, and a **Needle** with a **Thread** in it **Argent**. This is born by the name of *Brauthers* corruptly, but rather *Imbrauthers*.

The **Boach** is a piece of Turned Wood of what sort the Master pleaseth, but the solideft is the best, having a nick or notch at one end, and 3 square at the other, which is to keep it from turning about; on this they use to roll or wind their **Gold Thread** or **Silk Twist** which they *Imbrauthers* withal. see *numb. 80*.

The **Hank** of **Silver**, and **Gold**, and **Silk Twist**, are generally made up close after this manner; but **Thread** or **Yarn** more open at the ends, as in *chap. 6. numb. 20*. Some term this a **Roll** or **Knot** of **Gold Thread**.

Instruments of Torture, or Goalers and Marshals Tools.

7. IF a Vertuous mind do not induce to a good Occupation, whereby the Life and Being of a Man is supported; but that with the Idle and Slothful he will sit down and Sleep; or with the Vagabond spend his Time in Wandering about, choosing rather to do any thing than Labour: For such Fools *Solomon* hath provided places of Reward, and Tokens of Triumph, that these persons may be distinguished from those of the Industrious sort of people.

LXXXII. He beareth Azure, a **Pillory**, Or. This is the reward of Cheaters, Coseners, Forgers of Deeds, and Mens Hand Writing, Treasonable and Seditious Words, with several misdemeanours not punishable by Death: And that is by having a Mule or Fine set upon the Offender, and he to stand on the Pillory for so many Market days, with Papers of his Offence set on his Back, there to be mocked, derided, and made a common Spectacle, that all Beholders may see, and beware of the like Offences, and do no such Wickedness. Grand Rogues have sometimes their Ears Nailed to the Pillory, where they are forced to leave them, being cut off.

LXXXIII. He beareth Gules, a **Wooden Horse**, Argent; the **Mane** and **Tail**, Sable. The Riding of this Horse, whose Back is only two Boards set together like the Ridge of a House, is a kind of Punishment used among Soldiers, and Men under Martial Laws; the

sharpness of which ridge doth so gall and cut the Riders Thighs and Breech, that he shall be scarce able to go or stand for a certain time after; especially if his Offence require his Punishment to have Spurs at his heels, (that is a Musket or two tied at each Legg) and his Hands bound behind him.

Besides this there are several other Punishments used by Military Officers for the Chastising of Offending Soldiers, as Tying Neck and Heels, running of the Gauntlet, the hal: Strappado, the whole Strappado, and Hanging or Shooting.

The least of which is Commitment either to the Guard, or Imprisonment with the Marshal, which is no bodily hurt, but a confinement from Publick Employ, and a restraint of Liberty, which after a time may be purchased by a Pecuniary Mule.

The **Tying Neck and Heels**, is a Punishment of decrepiting and benumbing the Body, by drawing it all together, as it were into a round Ball, by Ropes, or Match-ropes; that is the Heel to the Breech, and the Head between the Knees, and the Arms tyed backwards; and thus to lye tumbling for a certain time, according to the hainousness of the Soldiers Offence.

The **Running of the Gauntlet**, is to be stripe down to the Waist, and so to run through a Company or Regiment of Soldiers, each giving him a Blow with a Whisk or Switch Rod.

The **Half Strappado**, is to have the Mans hands tyed cross behind his Back, and so by them to be drawn up to a considerable height, and so let down again; this in the least of it, cannot but pull either the Shoulders or Elbows or both out of Joynt.

The **Whole Strappado**, is when the person is drawn up to his height, and then suddenly to let him fall half way with a jerk, which not only breaketh his Arms to pieces, but also shaketh all his Joynts out of Joint; which Punishment is better to be Hanged, than for a Man to undergo.

A like Torture to this is for an Offender to sit stride-legged over a great Gun (as a Culverin or Demy-Cannon) and so to have it Fired, the very shake whereof will shake a Mans Joynts all out of their places, and make him that he shall be fit for no manner of Service for the time to come.

The Punishment of Death is two ways, either by Hanging by the Neck till the Body be Dead, which is looked upon to be an Ignominious or Dogs Death; or to be Shot to Death by either Musket or Pistol, which is a Soldiers, and more Honourable leaving the World.

LXXXIV. He beareth Gules, a **Torturing Wheel** in Chief Or, and a **Torturing Plank**, or **Wrack**, or a **rouling Torturing Wheel**, fixed on a long Plank with Feet, Argent. These are two kinds of Instruments made to Torture Malefactors and Transgressors upon; the first being a **Wheel**, called a **Katherine Wheel**, because say some, St. Katherine was Racked

Racked and torn in pieces, and all her Bones broken to shivers upon such a kind of Wheel; and thus the Tyrants of old used to Martyr the Saints and Christians, by tying them on a Wheel with their Legs and Arms wide open, and then the Tormentor by degrees, with a great Maul or Club dashes their Bones to pieces.

The other is a **Wracking Plank**, with a **Rowling Wheel** of so many Spokes fixed to a thick Rowler to turn it about. This Figure I drew from the manner of one Tortured upon it; which was thus, he was laid all along the Plank, his Arms tied behind him, and a Man with a Folling Dish pouring Liquor into his Belly till it be swelled like a Tunn; at the other end of the Plank is a Wheel or Winder to the Rowler, at the other end of the Rowler is an Hook to which a Rope was fastened and to the Mans Feet, and a Man (as it were) turning the Wheel about. Now what kind of Punishment to the Body, or by what People or Nation daily I can give no farther description.

LXXXV. He beareth Gules, an **Heading Axe**, fixed on a **Block**, proper. This in former times, and yet is, the way of taking off the Lives of great and honourable persons, as have been any way accessory to Plots, Rebellions, Treasons, and such grand Offences against their Prince or Sovereign; and that is by a sudden and quick severing of the Head from the Shoulders; a Death easie, and of some countenance honourable, but never so esteemed by Royallists, till made so, by the Death of that Worthy and Pious Prince, King Charles of Blessed and Happy Memory, who by Rebels and Traytors, was made his Peoples Martyr, by suffering willingly his Head to be cut from his Body, rather than see his People brought into Egyptian and Tyrannical Slavery and Bondage.

LXXXVI. He beareth Sable, a **Shackle-Bolt**, Argent. This is born by the name of **Shackle**. These are called of some **Dismal Shackles**, or **Prisoners Bolts**; they are Irons fastened about the Legs of Prisoners that are cast into Prison for Theft, Robbery, Petty Larceny, Burglary, Murder, and such like, thereby to keep them the more safe and secure.

A the like S. born by *Norfolk of Cheshire* (noque)
S. three such born by *Anderton* (noque)

LXXXVII. He beareth Sable, a **Double Shackle-Bolt**, or **Shackle-bolt**, Argent. Two single Shackle-Bolts, and one double one, is born by *Anderton of Lostock in Lancashire*. The **Bolt** is the straight Bar of Iron, with a Nut or round head at one end, and a hole at the other.

The **Shackle**, or **shackle**, is the round Iron with two eyes or holes, through which the Bolts run; and is made fast by an **Iron Feather** (as they call it) put through the hole of the Bolt, bent both ways that it cannot fall out.

LXXXVIII. He beareth Argent, a pair of **Shackles** chained in Pale Sable; and a **Whip** of three Lashes, Gules. By the name of **Whipstock**.

There is a manifest difference between these two sorts

of **Shackles**, the first having a Bolt through them these without, being made fast about the Legs with an Iron Pin revitted in the holes, which keeps them close and firm together, having a Chain at them of such a length, as will only permit the person shackled, liberty to walk. These are also termed **Fetters** being all made fast together, when as of right they should be Blazoned **Shackles fettered**, or **Shackles and Fetters**.

S. 3 such A. is born by *Anderton of Clayton*.

The **Whip** is an Instrument for the Backs of Fools, to Whip and Chastise them for their Folly, as *Solomon* tells us: It is a Punishment inflicted upon all Vagabonds, Wandering Beggars, and Idle Rascals, to bring them if possible to some Labour. Also by our Law, all Petty Theft, Pilfering and Purloyning, is punished by Whipping such persons at the Whipping Stock, or through the Market place by the Common Gaoler, or Master of the House of Correction.

The **Zeal** at their Whips for Punishment, had three Lashes on Thongs of Leather, with which by their Law, they were wont to give the Offender above 13 Blows, which made so many times three Stripes, viz. 39. which amounted to that saying of *St. Paul*, *Five times received I Forty Stripes save one*, which was just Thirteen Blows with the Whip, and one less than the Law allowed, shewing thereby that they would not be so cruel as to correct according to the severity of the Law; yet that they would shew such an Offender no favour, they Whipped him within a Blow to the full extent of it. *Deut. 25. 3. 2 Cor. 11. 24.*

The **Abby of Crowland**, before its dissolution, had for its Coat of Arms. Quarterly G. 3 Knives A. Hsts O. And B. 3 Whips with many Stems O. A demy Frier, clothed in holding such a Whip in his right hand O. the Lashes double knotted S. is the crest of the Lord *Sturton*.

LXXXIX. He beareth Azure, on an **Hill** or **Mount** issuing out of Base, Vert, a **Whipping Post**; (or **Whipping Stock**). On the **Hand Cuffs**, or **Hand Irons**, Argent. To this Post is Offenders and Petty Rogues and Vagabonds made fast while they are Whipt, by making fast their Hands in the Irons that are fixed to the Post.

XC. He beareth Argent, a **Chain** in pale, from Chief to Base, between a **Burning Iron**, and a **Whisk** or **scrub Rod**, Sable. This Coat consists of three parts, as

First, the **Burning Iron**, which is an Instrument by which Thieves and Robbers, that are Condemned by Law to dye, yet having the Benefit of the Clergy, escapeth with Life, but is marked in the hand with an hot Iron, or on his shoulder for a Rogue. See an other chap. 16. numb. 126.

And 3 such with Annulets or Rings at the Handles or Bottoms, all meeting in point G. is born by *Haller*, the general Master-Master of *Brandrick* in *Germany*.

The

The **Chain** is an Emblem of Servitude; however much born in Coats, Crests, and with Supporters: Of the two latter I shall take no notice in this place.

S. a Chain of 3 Links in Pale A. born by *Nemenhof*.
G. on a Fesse A. a Chain of 3 Links in Bend S. by *Schopper*.

B. on a pale A. an Anchor, and in Base Watery B. between 2 Chains of 5 Links a piece of the second. Born by the Earl of *Hoyos zur Sixen-stein*, in *Germany*.

The **Whisk Rod** is used to correct Rebellious Youths, and such as run the Gauntlet, as I have before said.

3 such V. in a Field A. is born by *Seucher*.

An Ape sciant A. with his Collar about his middle G. holding in his right hand a Switch or Whisk Rod S. and in his other an Apple, proper, is the crest of *Kotzelberg*.

XCI. He beareth Vert, a pair of Stocks, Or; in chief, a Ferrular. The first is a Prison or place of security, to keep safe all such as the Constable finds to be Night Walkers, common Drunkards and Swearers, that have no Money, and such like; also petty Thieves, Strippers of Hedges, Robbers of Hen-roosts, and light Fingered persons, who can let none of their Masters or Mistresses Goods or Cloaths lye before them; also Wandring Rogues, Gipsies, and such as love Begging better than Labour; but which of all these *Joh* was, when he complained, that his Feet were made fast in the Stocks, *Joh* 13. 27. I leave to others to judge; however it may safely be said, that he was then Gods Prisoner, and that his hand did press him so sore, that he could stir neither Hand or Foot.

Like to this, there is another like place of Punishment in our House of Correction in *Chester*, (the like to it I have not heard in any other place) it is called the **Little Case**, a place cut into a Rock, with a Grate Door before it; into this place are put Renegadoes, Apprentices, &c. that disobey their Parents and Masters, Robbers of Orchards, and such like Rebellious Youths; in which they can neither Stand, Sit, Kneel, nor lie down, but be all in a ruck, or knit together, so and in such a Lamentable Condition, that half an hour will tame the Stoutest and Stubbornest Stomach, and make him have a desire to be freed from the place.

The **Ferrular** is an Instrument used by School-Masters to correct their Scholars for petty Faults, by giving them slaps on the Palm of the Hand. A Hand holding a Ferrular O. is the crest of *Varvan*.

G. 3 such O. is born by *Ferrular*.

XCII. He beareth Azure, on a Hill issuant, Vert; a Gibbet, Or; and a School-Masters Rod, Argent. Some term it a Gibbet with the Cross part turned to the sinister side.

Here the **Gibbet** is set as an Instrument of Punishment, being that on which Malefactors for Murther, Rebellion and Treason are Hanged in Chains, till their Bodies are consumed to nothing, and therefore may be thought to be a Badge of Infamy and disgrace; but see *chap. 18. numb. 48.* and this kind of Gibbet having a

Lamp hanging at it (being a **Beacon**, is a thing more honourable, and of greater esteem, and usually born for either Coats or Crests.

A. on 3 Mole-hills V. 3 Gibbets S. born by *Gibbet* or *Gibbott*.

The **School-Masters Rod**, or a **Birch Rod**, is for the punishing of Scholars for great faults in the School, as the Gibbet for great enormities in the State.

A. 3 such Rods G. born by *Rod*.

From the middle of a Bugle horn G. such a Rod A. is the Crest of *Van Falckenheim*, of *Silitia*.

XCIII. He beareth Vert, on a Hill issuing out of Base, a Gallow or Gallows, Or; with a Ladder mounted thereunto Bendwise sinister, Argent. But I have heard of a Merry Blazoning of this devise, which is thus, on a Hill two Trees mountant, with a cross Bar couchant, a Ladder ascendant, with a Rope pendant, and a Chief at the end on't: An ignominious Bearing for such a person as so claims a Right to it. Yet though it be so taken to him, in *chap. 18. numb. 40, 41, 42.* having a Battering Ram hung to it, it is and may be reputed a very honourable and worthy Bearing, and is used in Coat Armour.

B. a Ladder in Bend O. is born by *Kratzen van Langenbruck*.

G. 3 Ladders A. born by *Kadiver ap Dinwall*, a Noble person in *Wales*.

XCIV. He beareth Gules, an heading Block fixed between two Supporters, with an Axe placed therein, on the Sinister side a Haule, all proper. This was the *Jews* and *Romans* way of Beheading Offenders, as some write, though others say they used to cut off the Heads of such with a sharp two handed Sword: however, this way of Decollation was by laying the Neck of the Malefactor on the Block, and then setting the Axe upon it, which lay in a Rigger in the two side Posts or Supporters; the Executioner with the Violence of a Blow on the head of the Axe with his heavy Maul, forced it through the Mans Neck into the Block.

I have seen the draught of the like heading Instrument, where the Weighty Axe (made heavy for that purpose) was raised up, and fell down in such a like rigged frame, which being suddenly let to fall, the weight of it was sufficient to cut off a Mans Head at one Blow.

XCV. He beareth Argent, a Rock Gules, with a Chain fixed to the top thereof, Sable. This is born by the name of *Holdby*. It is the custom of Goalers, that when they meet with sturdy and unruly Prisoners, to Lock and Chain them to some strong Post, or unsupportable Block, or Timber Log, or Massy Stone prepared for that purpose, that such evil doers shall not exceed their limited bounds.

It is Feigned by the Poets, that *Andromeda* was thus fixed to a Rock, when she was to be devoured by the Sea Monster, but *Perseus* by the help of his Flying Horse (called *Pegasus*) slew the Monster, and so preserved the Lady, who he Married.

The Worshipful AUSTIN LECH.

Of West Hall, in High-Legh, in the County of Chester, Esquire.

STR,

I May boldly affirm, nothing makes a compleat Gentleman more than Reading, which I may term the Theorick; and Discourse, which is the Practick part, in which I make no question but you are well groundd, being so forward in the promoting of this Work, which is so abundantly stored with things, of all Natures, Arts and Sciences. This part whereof is a Token of Thankfulness, is Dedicated to your Generous Consideration, by him who is

Your Servant to Command

Randle Holme.

CHAP. VII.

COURTEOUS Reader, I have added a Plate more to this Chapter, because I was wanting therein in the two former, to which I desire these following may be added.

Butchers Instruments.

XCVI. In this quarter is set down the shape of four Butchers Instruments, all lying in Pale; I shall begin with the highermost, and so proceed to the lower.

The first is termed a Stait; it is only a Sack about an Inch in Diameter with two sharp ends cut with shouderings, and serveth to keep open a Beasts Belly, and draw out its Legs when it is slain, till it be cold, and ready to be cut down, or cut into Quarters.

The second is called a Pick; this is a strong thick Staff near 3 or 4 Inches in Diameter, Hooped with Iron at both ends; into one is fastned a long Pill or Iron Pick, and the other a small Pickell gravis; with this

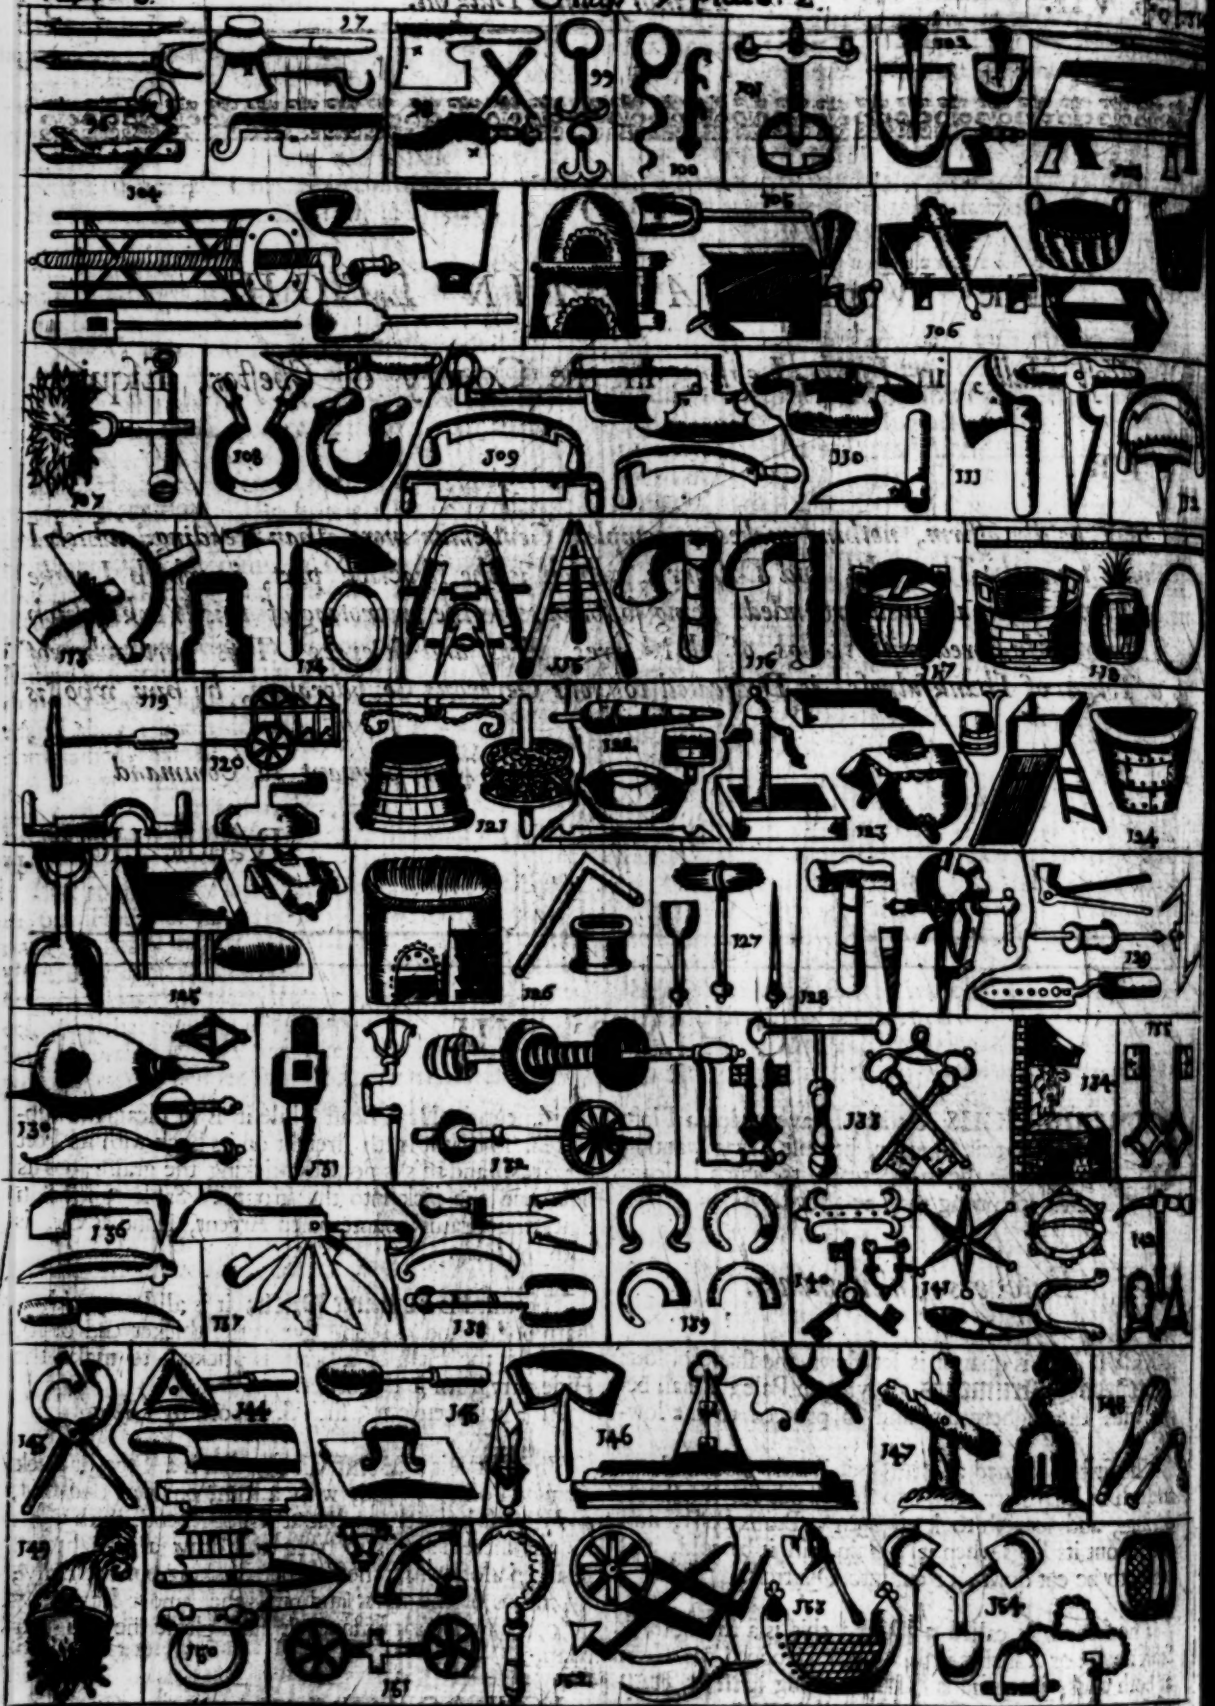

Instrument the Dead Beast while it is lying is supported, so that it lyeth streight on its Back with its Feet upwards; and this is done by sticking the gravis into its side, and the pick into the ground. Sable 3 such in Pale, the Gravis counterpoised Argent, Handles Or, is born by Picks.

The third is a raising Pick; it is all Iron, with a sharp point and a round Eye at the thicker end of it; with this the Flesh of a Beast is pricked, to make the Hide part from it the better.

A. a Kisse between 3 such S. Horn by Larch.

The fourth is a Beast Tree, that is a Tree, or thick Arm or Post of Wood, with a snag on it at one end, and diverse holes through it at the other end, with a pin to put therein: It is so hang and draw a Slaughtered Beast up aloft, while the Butcher is taking out the Belly; by means of the holes and pins, the hinder Legs may be opened, or what distance it shall please the Slaughter Man.

XCVII. A Shambles Pick between an Axe and a Cleaver,

Cleaver, Argent, the **Handle**, O. in a red Field, is born by the name of *Slayer*.

The **Hook** is a thing known by every one seeing they are so common in all Shambles (and other private places) to hang their Meat upon.

The **Axe**, which is the right form of the Butchers **Knocker Down**, is thus made; it is to strike down great Beasts when the Butcher is to Blood them and tickle them out of their Lives, and with the sharp end Bones and Joints are to be cut in pieces.

G. 3 Axes A. Handles G. is born by *Axall*, or *Axson*.

The **Axe** is generally born **upright**, and the face of the **Axe** to the dexter side; if otherwise, then to be mentioned how **transposed**.

The **Cleaver** is in a manner for the same use as the **Axe**; only with this difference, it is used to cut the small Bones, and the **Axe** for the cutting of the great and large Bones, being it hath weight and substance in it, whereas the other is light and slender, and the **Handle** hori, of one and the same piece with the cleaving part.

G. 3 such in Pale Barwise A. is born by *Cleavall*.

XCIII. He beareth Azure, two **Skewers** or **Flesh picks** in Salter points reversed, between two **Dutch Cleavers** or **Chopping Knives**, Argent. These I call so, because they are generally thus drawn by the Dutch and German Heralds; yet for distinction sake, if the higher be termed an **Hatchet** like **Cleaver**, or a **Chopping Knife** of an **Hatchet** shape, it were not much wiser of the mark.

Such an **Hatchet** like **Cleaver**, or **Wood Axe**, having a longer **Helve** or **Hawme**, I judge is termed by them a **Schabe**, that is a Broad **Axe**, or **Chip Axe**. The Germans call it a **Schaab**, or an **Hovell**; and a little **Axe** with a short **Handle** or **Hawme**, a **Flein Hobbe**: And so it may be termed, *Viz.* Per Fesse G. and A. 2 German **Chip-Axes** in Salter A. and a Limb of a Tree Raguled and Trunked in Fesse G. is born by the name of *Van Axt*.

B. 3 such A. Hawmes O. is born by *Axtell*.

And the other an **Hulch** or **round Backed Cleaver**; Those that have the Backs bending inwards, are termed **down** (swaid, or broken) **Backt Cleavers**. And such an one B. handle G. in a Field A. is born by the name of *Altnach*.

All Instruments of this nature are generally born erected, and the edge to the dexter side.

XCIX. Here are two sorts of **Drag Hooks**, the one for high places, the other for low Rooms, the one having a long **Shank** in a **Twirle**, and the other a short, with a **double Hook** at the bottom; upon these are hung two Veals or Muttons at a time in their **Cambrils**; But in Heraldry the one is as the other, no difference in either; for I find that *Shamble* beareth A. 2 such Hooks S. and a **Cleaver** B.

C. Is a **Butchers Rope**, with a **Noose** at one end, and the other pendant; with this great Beasts are

held or tyed to a **Post**, while they are Knocked on the Head, or stricken down to be Blooded. 2 such O. in a Field B. is born by *Noose*.

G. 3 Ropes in Nooses, their ends pendant O. by *Roper*.

The second thing in this quarter, is a **Treble Hook** fixed all in order upon one **Stem** or **Bar**; some call it a **Aril hook**, but for what use it is, I understand not yet, except to hang Spits on in Kitchens; or Arms, as Muskets and Pikes on. as in Noblemens and great Persons Halls, and then the hooking part is to be erected; however three such as these in Fesse S. in a Field O. is the Town Arms of *Kreilsheim* in Germany.

CI. He beareth Sable, a **Screw Candlestick**, with **double sockets**, Argent. Born by the name of *Night*. This is a kind of Iron Candlestick set on a round hoop, stand, or foot, the main Stem being an Iron Rod with a screw on the middle, on which is screwed a Female screw with two Candle sockets, each side one of it; so that by the help of the Screws the sockets are raised or lowered according to pleasure; see another kind in chap. 19. Plate 2.

Bakers Instruments.

9. These few Working Tools belonging to the Bakers Craft, being omitted in the former Chapter, I desire the Courteous Reader to accept of them in this place, as if they were there chap. 6. numb. 53. altogether.

CII. In this quarter is two Instruments used by the Bakers, the one is termed an **Iron Cake Peel**, or a **Cake** or **Bisket Peel**; they are usually made of Iron Plate with a Socket fixed to it, for a Staff to be put in, to thrust it into the Oven: Of these they generally have two sorts, the one long, and the other short, as the two Figures in this square doth manifest: Some term them **Pioneers Spades** sans **Handles**; and so the French Heralds term them. *Viz.* G. three such O. born by *Leonard Elfrid*, Count de *Meegau*, Baron of *Creuzen*, Knight of the Golden Fleece, in the time of *Philip* the fourth, King in France.

In the dexter Base, is a **Dough scave**, or a **Grater**: It is a kind of **Paddle** with a **Bended handle**, set into a **Wooden Haft**, with this they scave and cleanse the sides and bottom of the **Kneading Trough** from the Dough that sticks to it.

A. 3 such B. handles O. is born by *Craterx*.

CIII. He beareth Sable, a **Moulding Board**, or **Moulding Table**, Argent; in chief a **Dough Knife**, proper. Born by the name of *Karver*. The one of these is a large **Tressel** or **Plank** set upon strong feet, upon which Loaves of Bread are made or moulded up; The other is a long **Bladed Knife**, with a very long

R r 2

Haft,

Draft, half a Yard or three quarters long, with which Dough is cut into smaller pieces from the large Lump.

CIV. He beareth in this Quarter five Bakers Instruments, the first and largest is the **Ark Wheel**, which is a long Beam with **Hoops**, **Cross pieces** and **Ribs**, set at a distance from it, and covered with a kind of Canvas; by the help of this Engine more Meal will be taken from its Bran in one-hour, than a person can **searce** or **sift** in a whole day. Such an Ark Wheel in Fels between 3 round Twiggen (or Bakers) Baskets O. in a Field S. is born by *Boulter*.

The next to it in the chief point, is the **Custard Dish** or **Custard Filler**; by the help of this Custard **Batter** is put into the Cases, as they are in the Oven, being no other than a Wooden Dish made fast upon the end of a Staff. In shape this may serve for the Chyrurgions Silver **Uvula Spoon**, as in *chap. 11. numb. 26.*

S. 3 such O. born by *Filler*.

That in the sinister chief, is termed a **Braide**, or **Braid**, which is a broad long Board, with a hole in one end of it to hold it by. Upon this Cooks, and all Household Servants carry Bread unbaked, Pies, Pasties, and all other sorts of Baked Meats, to and from the **Bake-House**.

B. 3 square Braids erected O. born by *Pybrade*.

G. one in Bend, the holding part erected O. on the middle a round Loaf, is born by *Hieblingen* of *Holland*.

That in the dexter base is termed a **Peel shod**, or a **shod Peel**, being a Peel made of Wood, but by reason Wood will not carry so thin an edge as to go under little things with tender sides and bottoms, therefore it is plated with Iron like a Shovel to take such things out without hurting them.

S. 2 such in Salter O. between 4 Roses, is born by *Holmon*.

That in the Sinister Base, is termed a **Bakers Peel**, without either addition to, or subtracting therefrom; it is all Wood, by it all sorts of Bread and Dishmeats are taken out of the Oven, without hurt or danger.

S. 2 such in Salter O. is born by *Peelshall*.

CV. He beareth in this quarter on the dexter side, an **Oven** with an **Ashes hole** under it; some term it a **double Oven**, or one Oven mounted upon another, having a stay or stand on the left side of it, to rest or set any thing out of the Oven thereon.

In the sinister side is placed the **Bakers Ark**, with its **Lid** or **Leaf open**, the **Wheel** set therein, with its **Dopper** set upon it, into which the Bolted Meal was put to fall into the Wheel, and so from the Wheel, the Bran to run out at the ----- into Tubs or Vessels set to receive it; and the pure **Dant**, or second sort of Meal to fall into the Ark.

In the chief is a **Bakers half round shovel**, or a **Meal shovel**, being a Shovel with rising sides to take Meal out of the Ark; these kind of Shovels have no

head or cross piece at the top, as others have; for there needs none such, being it hath no strength laid to it, to go into any hard thing.

V. 3 such, one having the shovel part reversed, between the other two erected (in Fels as some will say, but that is needless the former expressions sufficing) O. born by the name of *Shorell*.

CVI. He beareth in this quarter three necessary Instruments belonging to the Trade of a Baker. The first is that on the Dexter side called a **Blake**; it is that wherewith Dough is knodden and beaten together, so long till it be fit to be **Moulded** into Loves. It is a thick Plank set upon four or more strong feet, then at the farther side of it is fastned a **thick Pole** fixed with a **Bolt** into a **turning Staple**, so that the nearer end of the Pole, (which is made small to hold it by) may be turned to any side, or part of the Plank. And such an Instrument O. between 2 Martlets and a Bread Basket A in a Field S. is the Coat of *Bakeman* or *Brakman*.

In the Base, is that which they call a **Kneading Trough**, being made all of Plank or strong Boards; in this they **Knead** all their Dough, or mix it in the Trough, and after bring it to the Brake to Knead it, or beat it well together.

In the chief is a **round large Basket with Ears**, or with **handles**, as some have them, they are generally called by the name of a **Bakers Basket**, or a **Bread Basket**. And 3 such I find born by the name of *Wisket*, (which name alludeth to the thing, for in some places these kind of Baskets are called *Wiskets*, and *Burthen Wicker Baskets*.) Viz. V. 3 such A.

The other kind of Basket in the Sinister chief, is called a **flat Bottom Bread Basket**, these are generally made of Otter Twigs with a close wound bottom, with a Wreath about the middle and top with two Ears, all the rest being so open, that any thing may be seen that is put into it. These kind of Baskets or are altogether used by Hat-makers to put their Wood, and carry their Hats in, to be dried. The *Netherland Dutch* term these kind, a **Hande** or **Koof**, an open **Wicker Basket** or **Pannier**.

G. 3 such O. is born by *Gevochten*.

CVII. On the dexter side, is a **Kid** of **Gorse** or **Gols**, with a **Pikill thrust** into the middle of it Fels-ways, all proper, in a Field Sable. **Gols** is a Fuel wherewith Bakers heat their Ovens; and this is now in a ready posture to be cast into the Oven to be Burnt. The like to this erected in a Field Gules, is born by the name of *Fuell*.

The Handle or Staff of the **Pikell** or Pitchfork debrueth a **Bakers Break** in Pale: Some Masters have the Break made thus, being a long round Rowler with Rings and Staples fastned at each end. And such in Fels O. between 3 Annulets A. in a Field S. is born by *Break* or *Break*.

Bakers Terms in their Art.

Beat, Pound, Bray, is to pulverize or make
 Spices into Powder with Pessel and Mortar.
Prisan, or Husk of Corn.
Burgin, or Bran.
Groats, Cutlings, Oats husked.
Gist, Meal unsifted from the Bran.
Starch, it is made of fine Dant or flower of Wheat,
 frumentie or Furmentie is Hulled Wheat
Sift, is to part the Meal from the Bran by a Sieve.
Puffy, Fuffy, Foisted, Puff Corn.
Light, Spungy Bread, switt for an Household Family.
Sad, heavy, close Bread.
Libered, tough Bread.
Crust, the out-side of Bread.
Crum, the in-side of a Loaf of Bread.
A Scovel, a Maukin, an Oven sweep.
A Bake-House, where an Oven is to Bake Bread.
A Hair searce, to sift Meal from Bran.
A Slice, to cut Dough into pieces, called a **Beater**,
 a **Break**.

Coopers Instruments.

10. **UPON** a farther Enquiry after several sorts of
 Tools, I find these following to be wanting in
 those of the **Coopers**, formerly treated of, which I
 desire may be added to them *chap. 6. numb. 65.*

CVIII. In this quarter are three **Coopers Instruments**
 which are born in Arms.

The first is termed a **Chwittel**, or the **Coopers**
Chwittel; It is a large strong Knife. And *Thwitle* beareth
 Azure, 3 such the points erected Argent, the Halts, Or.

Them in the base are termed **Becke Shaves**, of
 which (as you may see) there are two kinds one having the
handles streight with the Edge of the Tool. The other
 having the **handles** side-ways. The first with the cut-
 ting part of the Tool, but half the compass, and then
 cut off into corners: The latter having the cutting part
 thereof of the same breadth to the handles, before it be
 diminished.

CIX. In this quarter also are five useful Tools be-
 longing to the **White Coopers**, viz. on the dexter
 side in Pale is three, the **Churn Shave**, the **Drawing**
Knives both crooked and streight, and on the
 sinister side the **Broad Aze**, and the **Heading Knife**;
 all which I find born in Coats of Arms, of which I shall
 speak in their order as they lye, and I have named them.

First, the **Churn Shave**, is a long Staff about a
 yard and half or more long, with Hoops of Iron at both
 ends; into which is fixed an Iron Ring or Hoop, with
 a Tange at the side of it which goeth into the Hoop
 or Socket at one end of the Staff, and into the other
 end after the same manner with a Tange is put an half
 round Instrument of Iron like a large and open Auger.

*

Secondly, the **Drawing Knife**, or more properly
 the **White Coopers Drawing Knife**, because they
 only have it thus rounded in the back, and cutting part;
 and therefore as the **White Cooper** and **Barrel**
Cooper, (termed by the name of **Wine Cooper**)
 are two distinct Trades, and their Tools different; so
 their ought to be a distinction in their Instruments.

B. 3 such in Pale A. Handles O. is born by *Sagan*.
 B. 2 such, and an Adds A. Handle O. is born by
Cooperage.

Thirdly, the **Wine Coopers pareing Knife**, or
drawing Knife; with this he shaves and fits his **Bar-**
rel stave or **Boards**, to such a breadth and thick-
 ness, as is needful for the making them up into a Barrel.
 S. 3 such in Pale A. handles O. is born by *Sharplinger*.

Fourthly, the **Coopers Aze**, or the **Broad Aze**,
 so termed, because they use ano another kind of Aze
 much like to an **Hatchet**. This is contrary to all other
 Workmens Axes born for the p. and use, having a
 large Iron **Socket**, into which the handle is fixed,
 which is but short.

V. 2 such endorsed A. Hawme O. is born by *Head-*
man.

Fifthly, the **Heading Knife**, or **Wine Coopers**
Heading Knife, it is a crooked Instrument with two
 handles, one standing inward to the edge, and the
 other streight along, answerable to the back of the Knife.
 S. 3 such in pale, the halts contraryposed, is born
 by the name of *Bechborg*.

CX. In this quarter are two Instruments belonging to
 the Cooper; that in chief is a **Spoke shave**, the other
Lat or **Lath Aze**.

The first called a **Spoke shave**, is an Iron with a
 sharp edge set in a piece of Wood with two handles
 after the manner of a **Plan**, with this any round bo-
 dy is made smooth and round.

The second termed a **Lath Aze**, is an Iron Instru-
 ment like a **Knife Blade**, with a round thick back,
 having an **Eye**, into which a thick strong **Handle** is
 put, the edge standing outwards: With this, great Tim-
 ber after it is cloven with the Maul and Wedges into
 small pieces, it afterwards cleaves them into **Laths**,
Barrel Boards, and **Pannels**. It is ever born thus
 as in its proper station. And 3 such B. handles O. in
 a Field A. is born by *Latax*.

CXI. He beareth in this quarter a **Coopers Hat-**
chet, and a **Bung Auger**, of the first I have spoken
 formerly *chap. 6. numb. 66.* only here give you the ex-
 act form of the Instrument, being more like the Original
 Tool than that.

The second is the **Bung Auger**, which hath its
 name generally from its Bigness, the shape and form
 being all one and the same: If a large one, it is a **Bung**
Auger; if less, a **Tap Auger**; if lesser, then a **Gent**
Auger, or **Gent-here Bit**; But with other Workers
 in Wood and Timber, this Instrument is termed a
Capee.

Taper Bit, because they make all holes wider at the top than at the bottom.

G. 3 such A. handles O. born by *Bungall*, or *Bongholl*.

CXII. He beareth in this Square two Instruments of the wine Coopers; the one called a **Round Shaft**, the other a **Drawing Iron**. The first is contrary to the **Shaves**, or **Shafts** mentioned *numb. 108*. this having the Blade round with the edge inwards, and the handles streight forwards.

B. 3 such A. handles O. is born by the name of *Cooper*.

G. 2 such, and a Drawing Iron A. born by *Fillet*.

The second termed a **Drawing Iron**, is an Iron made after the form of a Roman T the top part broad, and cut into teeth like a Saw, and the lower part Taper, ending in a point. This Iron set in an halfe **Round Board**, as *numb. 113*. is shewed, maketh the **Groop**, or nick in the top parts of a Barrel, for the **heads**, or ends to be fastned in.

A. 3 such S. is born by the name of *Groop*.

A. a fesse betw: 3 such B. is born by *Grapling*.

CXIII. The Instrument in this quarter is termed a **Drawing Board** as it is ready fixed for the work: It is an half round Board near an Inch in thickness, with a square piece of Timber fixed in the middle of it, which is to move up and down as occasion serveth, in this square piece is the Drawing Iron fixed. This may be termed the **Coopers Grooping Tool**, being the **groop** or **nick** for to fasten the **Barrel head** in, is made by it. This I take to be the Instrument expressed in the Coopers Coat of Arms made anciently of another fashion, as you may see *chap. 6. numb. 67*. but it ought to be this, with the round part of the Board set upwards, and the square piece in it **erected**.

CXIV. He beareth Azure. an **Adds** or **Addice**, Argent; **Handle**, Or; between a **Driver**, and an **Hoop** of the third. Born by the name of *Cooper*. These are severally born in Arms, of which take these few examples.

The first is the **Driver**, a piece of Wood cut in the form of a **Wedge**, broad and slender below, and narrow and thick above, or in the head; with this by the help of Blows with the **Addice**, all sorts of Hoops are driven fast upon Barrels, and other such like Vessels.

A. 3 such O. on a Fesse S. is born by *Driver*.

The second, is the **Addice**, called more properly the **Longnate Addice**; it is like a square faced Hammer with an indifferent long Neck at one end; and the other like an **Hatchet**, with the edge turned crossways, and bending a very little to the handle; so that it is serviceable to drive or cut any flat thing.

A. 3 such B. Handles O. is born by the name of *Addice*.

The third, is the **Hoop**, of which there are two sorts, the one (which this Figure doth decipher) is termed the **White Ware Hoop**, these are made broad and slender, and are held fast together, and about the Vessel that it is put on, with holes and notches cut into it, which they term the **Notching of a Hoop**. The **Barrel Hoop**

is an half round **Hoop**, whose ends are made fast one over the other with **Drier** or **Withy Twigs**, which they term **Twigging of a Hoop**. Such an one you may see *numb. 118*.

S. a Cheveron O. between 3 such A. is born by *Hooper*.

B. 3 such Hoops A. is born by *Saring*.

CXV. In this Quarter are other three Instruments of the Coopers Trade, as the **Compasses**, the **paring Ladder**, and the **Runging Addice**; of all which in their Order, with the Coats I find them born in.

First, the **Compasses**, are made of Wood, round in the **shanks**, and half round in the turning part, or head; the ends are **hooped** with Iron, and Iron Pins put into them: Now by the help of a piece of Wood, with a screw at both ends, and put through screw holes in the midst of the said Compasses, the same are made wider open, or closer shut, by turning of the said Screw in it: And such a pair of Coopers Compasses I find born by the name of *Compell*. *Viz.* B. the like O. hooped and pointed A. between 3 Roses.

Under these great Compasses I have caused another fashion of Compasses to be made, yet not much differing from them though of an Elder standing.

The second, is the **paring Ladder**, or **Coopers Ladder**, with a **pareing Staff** in it: By the help of this all Barrel Staves or Boards are held fast and fur while the Work-man is paring or shaving them fit for his purpose.

A. the like S. between 2 Lions heads couped G. born by *Ladderhead*.

This is the Instrument now in use for that purpose; but in our Fore-fathers time they made use of another thing called a **Lathe**, which I have described in *chap. 6. numb. 70*. but not knowing what it was, I gave a wrong name and description of it, which here be pleased to take notice that it is termed a **Lathe**, whose use was to shoot Staves in, and to join them and truss them without any Fire, or very little Fire: It hath Screws at the two ends, to draw the middle rounds together, or set them farther off, as the Work required. It is now quite laid aside by our Coopers, not one of them scarce knowing what it meaneth.

The third, is the **Runging Addice**: This is in all respects like an **Hatchet**, save the edge part stands cross to that of the **Hatchet**, turning back towards the **Handle**.

A. 3 such B. Handles S. on a chief G. a Mullet O. is born by *Don Adrunco*, a *Spanish* Family.

CXVI. He beareth Gules, a **Runging Addice**, Argent; **Handle** Or, born by the name of *Van Runging*. This is another sort of those **Addice**, and by the *Dutch* and *German* Heralds are generally made thus, with round eyes or holes for the haume or handle.

CXVII. He beareth Gules, a **Round Bellied Rung covered**, Argent, by the name of *Van Langkloep* of *Barvaria*.

G. on an Hill in Base V. the like A. hooped O. is quartered by *Die Ligfaltz* in *Barvaria*.

CXVIII. He

CXVIII. He beareth in this square three things which are the Workmanship of the **Cooper**, or **White Ware Cooper**. The first is termed a **Rung**, or a **Tub**, or a **Washing Tub**, such as Laundresses wash their Linnens in.

S. Such a Tub O. between 3 Soap Balls A. is the Arms of the Company of *Linnen Washers*, or *Laundresses*.

B. 3 Washing Tubs A. is born by the name of *Tub*.

The second is a **Barrel eteated**, and **hooped**, or **double hooped** at both ends, with a square **Dow** opened in the middle of it; on the head of it a Tuft of Grass. Such a kind of Bearing I find is a part of the Crest of *Van Schoulen* in *Bavaria*. Viz. Out of a Crown, such a Barrel crowned with a Tuft of Grass on it. Some term the Barrel with a **Window**, or **Stals Window** opening in the side of it. Or **Diogenes Tub**, with the **Dow** opened to the sinister side.

The third is a **Barrel hoop**, or a **Twigged hoop**. These in Arms are generally drawn with a longer round than broad, oval like, according to the name which beareth them. Viz. S. a Chevron between 3 Twiggen Hoops, O. born by *Owall*.

In the chief of this square lyeth a Geometrical Rule, or Gaging Rod; it is for length 3 foot, and hath four scales described upon it, the one is an ordinary scale of Inches, numbred by the Figures 1, 2, 3, to 36. and that divided into halves, quarters, and eighths. The second Scale (if you turn the Rod) is divided each 7 inches into ten equal parts, and those into lesser parts. The third Scale (still turning the Rod towards you) is of Wine Measure, which is from Gallons into eight parts representing Pints. The fourth is the Scale of Ale Measure, which is again subdivided into Pints and Quarters; whose use see *Clerks Tutor for Arithmetick*, p. 95. I am only to tell you that 3 such in Fels O. in a Field G. is the *Gagers Coat of Arms*.

CXIX. Here is in this quarter the form of an **Auger** rightly drawn, and an **Hollowing Knife**; the first used altogether in Carpentry Work, and but seldom with a Cooper, yet it is used by them, therefore may come amongst their Tools. Of this Bearing in Arms I have this example only remarkable, Viz. V. an Auger A. Handle O. the shank wrapped about with an Adder B. born by the name of *Augermorme*.

A. 3 such Augers S. born by *Anger*.

The **Hollowing Knife** is a Tool much like the paring Knife, one part of the cutting being streight, the other end rises into a semi circle or half round, by means whereof any round body either with an Invex or Convex may be wrought; provided it be of length slender like.

CXX. In the Base of this Quarter is the true shape of the **Coopers Are**, none of those before mentioned being drawn true, the Graver having overlooked them all: This is made sans *patome*, and therefore is to be Blazoned so. A. a Fels between 3 such B. is born by *Rapdaxe*.

Beer-Brewers Instruments.

II. I Must again Beg an excuse for the neglect of omitting some Instruments belonging to the Ale and Beer-Brewers Art or Mistry, which I have set here together, what was wanting in the former place, *chap. 6. numb. 75.*

CXX. He beareth Argent, a **Trowe**, or **Beer-Brewers Crow** or **Dray**, Sable; or a **Crow** in Fesse born by the name of *Trowle*. This is a thing drawn by an Horse, having only sides and Axel-tree and Wheels, with overthwart pieces to hold all together, between which pieces Barrels of Beer are usually laid to be carried from the Store-house to the Customers house.

A Trowe in Fesse S. between 3 Barrels G. in a Field A. is born by *Bierburgh*.

CXXI. He beareth Azure, a **Comb**, or a **Brewers Working Comb**, or **Pelling Comb**, Argent; in chief the **Slings** with the **Chains** extended, proper. The **Pelling Comb** or **Tub** is that Vessel into the which the Wort is put to Work with the **Peast**, or **Bearm**.

B. a Chevron between 3 Brewing Combs O. by the name of *Combs*.

B. the like Comb with 3 Ears of Barley on their Stalks out of it, contrary Bowed O. by the name of *Moat*.

The **Slings** are a strong thick, yet short Pole, not above a yard and an half long, to the middle is fixed a strong Plate with a hole in which is put a Hook with an head, which will turn any way after the manner of a **Twerl**: On this Hook is fastned two other short Chains with broad pointed Hooks, with them clasping the ends of the Barrels above the heads, the Barrel is lifted up, and born by two Men to any place, as is shewed, *chap. 5. numb. 146.*

The third thing in this quarter, and set in the sinister side, is termed the **Brewers Thorn** with the **Cap Staff** through the middle of it. This is a thing set over the hole in the bottom of the **Brewing Comb**, with the Staff in the hole to keep that no Liquor run out, but when the Master pleaseth; the Thorn keeping that none of the **Grains** run out with the Wort: It being (as it were) a strainer over the hole, to keep the Wort from the Malt, at the drawing of it out into the **Trough** or **Drawing Comb**.

CXXII. He beareth in this quarter, an Instrument belonging to the Vintner or Merchant, called a **Valentia**; and three other belonging to the Brewer, the **Cunning Dish**, the **Cooling Vessel**, and the **Bearing Staff**.

The first being the **Valentia**, is a Pipe made of Silver or Tin, round and taper, and hollow withal, with a small

small Pipe at the large end, and an hole at the bottom: This being put in at the Bung hole of either Wine or Beer, or any other Liquor will fill it self immediately, when being stopped with your Thumb in the higher hole, will keep it in the said *Valentia*, hold it never so much down; till you give it Air by removing your Thumb off the hole, then it will run into a Taster or Glass, or what else you please, till you stop the hole again with your Thumb, as before said.

S. a Cheyren between 3. *Valentia*'s A. born by *Tappin*.

The second is a *Turning Dish*, some term it a *Filling* or *Filling Dish*; for by the help of it Liquor is poured into Vessels with small holes, without the least threat of spilling, by putting the Pipe of the Dish in to the hole of the Vessel, and so pouring the Liquor in to the Dish, which immediately runs into the Vessel. This A. between 3. *Roles* O. in a Field B. is born by *Turningen*.

The third is a kind of a *Cooling Cessel*, having an oval like broad bottom with ebb sides; I draw this from an Ancient Coat of Arms, but by whom it was born, or how properly to term it, I know not, except an oval pointed cooler, for all coolers have an hole at one side in the bottom.

The fourth is a *Bearing Staff*, by which empty Barrels are carried by Servants from place to place, by fixing the ends of the Staff into the Barrels at the Bung holes, and so putting the middle of the Staff on his Shoulder.

CXXIII. He beareth in this quarter, a *Brewers Pump* set in a *Stone Trough*; and the use is this, when the Malt in the Comb is sufficiently washed and soaked with the Boiled Water, then it is drawn out from the Grain into the Stone Trough set under the Comb, out of which place it is Pumped into a *Wooden Trough*, through which it runs into the *Drawing Comb*, or into the *Copper Brewing Pan*, to have a second Boiling.

A. the like G. is born by *Pump*. Also by a German Family called *Van Pumperell*.

The second is the form or fashion of the *Brewers running Trough*, or *Cutter Trough*, by which the Liquor is conveyed from one Vessel to another, as you heard before.

The third is the *Brewers* or *Water Leaders Water-Bags*: They are only used in *Chester*, and not any other place as ever I saw or heard, they are carried upon Horses, and was a part of the Antient Coat, and is still owned to this day of the Company of *Water Leaders* in the City of *Chester*, as you may see *chap. 3. numb. 43. See numb. 125. another.*

A. a *Chester Water Bouget* (or *Water Bags*) S. in chief 2. *Scopes* in Salter B. is born by *Waterman*.

CXXIV. In this part of the Plate under the Figure before set, is three other *Brewers* Instruments; the first on the dexter side towards the chief, is termed a *Gaun*;

it is a Vessel made after the form of a *Purgen*, but hath a long handle or neck thereby to reach to the bottom of deep *Brewing* Vessels, in which the Liquor is most used by *Ale-Brewers*.

A. 3 such O. is born by *Gaune*.

The second is called a *Pane*, it is used by *Maltsters* and *Brewers*, that make their own Malt, to Pan or cleanse the Malt from Dust and *Comings*, and all small Light Corn.

The third is the *Brewing Pan*, of some called a *Brewers Copper*, from the Metal which it is made of. This is usually set upon a *Furnace* or *Fire* made either of Brick or Stone, which is termed the *Setting of the Pan*; the top that goes out wider than the bottom, is called the *Flange* of the Pan.

CXXV. In this quarter is the Instrument used about Malt called a *Shovel*; it is to cast Malt into the *Sieve*, turn it in the *Kilne*, and is a Servant for several uses about the *Lady Ceres*; of which there are several fashions as they are set down *chap. 8. numb. 3. 4.* but this is the only and peculiar form of them and most used.

B. 2 such O. born by *Shoule*, or *Shovel*.

The second is termed a *Cooler*; it is only made flat with Boards in the bottom, and so close jointed that no Liquor can run out; the height is a Board also of about a foot high: it stands upon Posts or Pillars, under one corner of it (where the hole is to let out the Wort) is set the *Pecking Comb* into which the Liquor runs when the Brewer judgeth it cold enough, he puts *Bearn* to it to let it a working; it hath its name *Cooler*, from its Office, which is to cool the Hot Wort, and that it doth sooner by having the liquor broad and shallow, or ebb in it, than if it were altogether in a deeper Vessel.

In the sinister chief is another kind of *Water Bags*, with the *Leather* under it which covers the Horse Back, and keeps him from the continual running of the Water upon him, which might do the Horse hurt to be always wet; but by means of this cover he is very rarely wet on his Body, and when the Bags wax old, and the neck of them weak, so that they fall together, then they are kept open with two Sticks set cross the mouth of them, as the Figure sheweth.

CXXVI. He beareth Argent, a *Brewing Pan* set, with three Steps by the side of it, Gules, with Fire under it, proper. The Pan thus set in the place for *Brewing* hath many terms about it; as

To *Set the Pan*, is to compass it about with Brick or Stone, that the Fire may more speedily Boil the Liquor.

The *Bars* in the Furnace.

The *Dow* of the Furnace.

The *Furnace* or *Fire* place.

The *Great* holes and *Chimney*.

The *Furnace* hole, or place where the Ashes fall.

The *Steps* to rise to it.

The *Flange* of the top.

In the Sinister side, is a **Drawing Pipe**, of some called a **Crane**, or **Crane Pipe**. It hath one end almost twice as long as the other, let the short end be put into any Liquor, and the longer end hang lower out from it, and but suck the Liquor through the long end, and upon your withdrawing your mouth, all the rest of the Liquor will follow till it come equal to the end of the Cane which is in the Vessel of Liquors. By this means the Brewers by a **Leaden Crane**, draw their Wort from one **Cooler** to another, till it be cool enough for them to put it together for Working.

Smiths Tools.

There are such variety of these Tools and Instruments pertaining to the **Iron Workers**, and made works of Iron, that it is impossible to Learn out the Thousandth part of them; what I have mentioned before, let these out of a Candid respect to their wants, be added as a Supplement to chap. 7. numb. 1.

In the Sinister part of the square, numb. 126. is set a **Smiths Bolster**; it is a thick piece of Iron generally round, with an Hole in the middle of it; it is to ly under another hot or cold peece of Iron, that must have a hole Punched through it, to save the **Punch** from breaking.

CXXVII. In this quarter are three things very useful and necessary about a Smiths Forge, which may be thus named; He beareth Sable, a **Washer** between a **Hammer** and an **Hearth Staff**, and may be a proper Coat or Devise for him that hath risen by the Forge or working in the Fire.

The **Washer**, is a Bundle of Rushes set in an Iron, with an Iron Stail to it; with this Water is sprinkled out of the Trough into the Fire to make it burn the hotter; and also to sweep up the scattered Coals up to the Fire.

The **Shice**, is a broad Iron Plate like a Shovel, with an Iron handle; with this they shovel up Coals to the Fire, and clap the Fire close together.

The **Hearth Staff**, is a long round piece of Iron with a round head, and something sharp at the further end; it is to open and stir up the Fire, and cast out the Ashes that come from the Iron, that the Fire may burn the better.

CXXVIII. In this quarter are three necessary Instruments belonging to the **Black-Smith**, the **Hammer**, the **Screw Pin**, and the **Vice**.

The **Hammer** hath several names, according to its uses, yet all after this form and fashion: The first and best is the **Rivetting Hammer**, it is very rarely used at the Forge, unless the Work be very small; but upon cold Iron it is used for Rivetting, or setting freight, or

crooked, small works. The next is the **Hand Hammer**, which is bigger or lesser, according to the strength of the Workman; but it is a Hammer of such weight, that it may be welded or governed with one hand at the Anvil. The third is termed the **up-hand Hammer**, or **up-hand Sledge**, of some termed the **Fore-Hammer**; It is used to indifferent or middle sort of Work, wherein the under Workman, in helping to Batter or Draw out a piece of Iron, seldom lifts this Hammer higher than his head. The fourth sort of Hammer is the about **Sledge**, or the Smiths **great Forging Hammer**; he that useth this, holdeth the further end of the Hammer in both his hands, and swinging it about his head, he at Arms length lets fall as heavy a Blow as he can upon the Work that is to be Battered or Drawn out. All these sorts of Hammers have no claw or slit in the **Pen**, as those that are for drawing out of Nails, as chap. 7. numb. 1.

Parts of an Hammer.

The **Face**, that part it is beaten with.

The **Pen**, is the small end of it.

The **Eye**, the hole into which the handle is put.

The **Head**, or **Hammer Head**, is all the Iron part.

The **Cheeks**, or **Plates**, or **Tangs**, the Irons which hold the Head on.

The **Handle**, is the Wood by which it is-held.

The **Hammer**, when it is all furnished and made compleat.

A. 3 Sledge Hammers S. is born by *Farger*.

The second, is the **Screw Pin**, of some termed a **Cap**: Some Taps are made **Cap**; others not; with the help of this a Screw is forced and turned or cut in an hole of an Iron Plate, to receive a **Screw-pin**. Three such B. in a Field A. is born by *Screwer*.

The third is the **Vice**, called the **Bench Vice**, because set up very firm to a Bench that it shake not, but stand upright; this holdeth all sorts of Iron work that requires Filing. In it there are several parts and Members which are termed by Workmen as followeth.

Parts of a Vice.

The **Face**, the top part of it.

The **Chaps**, that as holds the work, which are cut rough with a Bastard cut to hold the faster.

The **Screw Pin**, which is cut with a square strong Worm or Thred.

The **Nut**, or **Screw Box**, which bath also a square Worm in it.

The **Spring**, that lyeth between the Chaps, in the lower parts, and forceth them open.

The **Shanks**.

The **Handle**, is that which turneth the Screw in the Nut.

The **Foot**, the long Shank that stands upon the ground.

CXXIX. Hath in it, in Pale, the Smiths Tools called

led the **Crooked Nose Tongs**, the **Drill**, and the **Screw-Plate**, of which in particular.

First, the **Crooked Nose Tongs**, these have their chaps placed near the Joint, because that considering the length of the handles, they hold the Iron faster than they could do, were they placed farther from the Joint: These kind of Tongs are for to hold small Bars, or such thicker work as will go between the Chaps. In these Tongs there is

The Chaps.
The Ribet.

The Joynt.
The Handles.

The second is the **Drill**, it is a shaft or long Pin of Iron with a Steel point, much like a Spear head, the other end round; on the middle of it is fastned a **Barrel** like a Jack Barrel. There are Drills of several sorts according to the bigness of the work; they are used for the making of such holes as Punches will not conveniently do, as in the Shank of a Key and such like. The **Drill**, the **Drill Bow**, and the **Drill Plate**, go all together as one entire Instrument of three parts; but for two of them see the next following Figure. In the Drill there is

The Point.

The Shank.

The Drill Barrel. The round or turning end.

The third is the **Screw Plate**, it is a Plate of well Tempered Steel, with several holes in it, of diverse sizes, each less than other, and in these holes are threads of Screws **grooved** inwards, into which grooves the **taps** or **screw-pins** respectively fit. By this Plate Screws are cut upon Iron Pins, to be screwed into any hole that will fit them. The **Cap** before mentioned is to go along with this **Plate**, being one Instrument of two parts. There is in this no more but the **Plate**, the **Holes**, and the **Handle** to turn it about.

A. 3 such in Fels the Plate parts erected B. Handles O. is born by *Lavaunt*.

In the sinister side of this quarter is a Smiths Flame, as it was anciently made in our fore-fathers days, of which you may see a very like form in *chap. II. numb. 30.* yet much differing if compared together. This I drew from a *Dutch* or *German* Coat Armour.

O. 3 such (without the middle square and half round) S. is born by *Die Schelen* of *Westphalia*.

B. the like in Bend O. is born by *Gilleis*.

CXXX. In this quarter is the Smiths **Bellows**, the **Drill-Bow**, and the **Drill-Plate**, of which in their Order.

First, the **Bellows**, or **Smiths Bellows**, or **Forge Bellows**; these are placed behind the Back of the **Forge**, where they do the Office of Blowing the Fire for the Smiths use. These large Bellows, and the small House Bellows have one and the same shape, and therefore one and the same terms in all its parts, which are as followeth.

Parts of a Pair of Bellows.

The Cars of the upper Board.

*

The upper Board.

The Leather.

The - - - - - that fastens the Leather round the Boards.

The under or lower Board, in which is placed

The - - - - - or square hole to suck in the Air.

The **flap of the sucker**, a piece of flat Leather as covers the hole in the inside, and keeps the Air it cannot go out again that way.

The - - - - - that part to which the Blow-Pipe is fixed.

The **Pipe**, is that through which the Wind comes.

A. a pair of Forge Bellows erected, between 3 Horse-shoes S. born by *Ventall*.

The second is the **Drill-Bow**, it is that by which the Drill is turned about, when it is to Drill an hole in any peece of work; it is made of a peece of well Tempered Steel, or of an old broken Sword or Rapier Blade, having a hole at one end, and a handle fastned at the other, with a String of Cats-guts fastned to it: Now as Smiths are provided of several Drills according to their work, so must they be of diverse Drill-Bows, or at least of variety of Strings, as the strongest Strings for the largest Drills, and the smallest Strings for the smallest Drills; for the **String** and **Bow** must both be accommodated to the size of the **Drill**, else the same will not be carried briskly about: But be they big or little, they have but one name, which is the thing I only take notice of, and so leave it.

A. a Drill Bow furnished with a String erected S. between 2 Drill Plates, proper. Born by *Drilborge*.

The third is the **Drill-Plate**, or **Breast Plate**, it is only a piece of flat Iron fixed upon a flat Board with an handle at it (some none) which Iron hath 2 or 3 holes punched a little way into it, to set the blunt ends according to the bigness of the end of the Drill into, when a hole is to be Drilled.

In the Sinister chief of this square, is a **Lofenge-Female**, or a **Masle Buckle Bottom**, with the Tongue fixed on a Cross Bar; this differs much from these Buckles mentioned in the precedent *numb. 37. 38. 39.* being like to none of them: This is generally termed by the name of a **Lofenge** or **Masle Shoe Buckle**; if it were called a square Buckle, then the Bar crosses the middle should go from side to side, which this doth not, but from corner to corner.

O. a Fels G. in chief such a Buckle B. is born by *Van Bodellwing*.

O. the like B. is born by *Vanath*.

CXXXI. He beareth Sable, a **Screw of a Printing Press**, Argent; by the name of **Worm**. The like things, *viz.* Azure three such Printing Press Screws Argent, is found to be born by *Van Werckhuys*. Of this see more *chap. 20. numb. 62.* where it is termed a **Spirde** of a **Printing Press**, with the names of its other parts.

CXXXII. He beareth Argent, an **Iron Climble** with

with a square Bore in it, Sable, is born by the name of *Wimble*. This is an Instrument by which Smiths use to open or widen a hole; it is all generally termed a *square Bore*, being a square Steel point or *shank*, well tempered and fitted into a square *socket* in an Iron *Wimble*; in this are these parts.

The *square Bore*, or *Steel point*.

The *Socket*, that holds it.

The *handle*, by which it is turned.

The *head of the Wimble*, in which the handle

is fastened. *O. 3 such S. born by Wimbleford in Alsatia.*

The second Figure in the chief of this quarter, is termed the *Main Wheel* and *Barrel of a Jack*, with all its appurtenances belonging to that one Wheel, which are as followeth.

The *Main Spindle*, is the Iron Rod that goeth through the Wheel and Barrel, and hath the *Pulley* at the end of it.

The *Wind up peece*, the end of the Spindle that the Jack Key turns the Barrel about withal; this is fastned into the Barrel.

The *Barrel*, the Wood on which the Rope is wound about, on the end whereof next to the Wheel, are these things fastned.

The *Barrel Plate*.

The *Tumbler*, the Center whereof moveth upon the *Center Pin*, which is fastned into the Iron Plate behind the Barrel.

The *Collar*, which is upon the Main Spindle, from which proceeds a *Tong*, this Tong serves for a Check to the Tumbler, that it cannot turn backwards.

The *Main Wheel*, wherein are the *Crosses*, the *Center*, the *Rim*, and the *Teeth*, of the Wheel, which we term the *Notches*.

The *Key*, or *Jack Winder*, in which are, the *shank*, and the *handle*. Some term the whole *Winch*.

The *Struck Wheel*, or *Pulley*, that about which the Chain or Rope goes to turn the Broach about.

These as they are in their several parts, are often found to be born in Coats of Arms, but not as they are here joined together, as

B. 3 Jack Wheels O. born by Wheeler.

G. a Fels between 3 such Wheels A. born by Lashull.

S. 3 Jack Pulleys O. a Fels between A. by Pulleger.

The third figure, is the *Worm Wheel*, or *Bevil wheel*, with its *Spindle* and *But*; whose parts are as the other Wheels, therefore shall say no more of it, only the Teeth of this Wheel are Filed Bevil, for the Worm to fall in.

CXXXIII. In the dexter side of this quarter, is the *Worm Spindle*, and its *Fly*, in which there are these Members.

The *Spindle*, the *Worm* upon the Spindle, the end of the Spindle, which turns upon a *Stud* or *Strand*; the hollow of the Spindle which turns in a *Loop*.

The *Fly*, is the cross piece, in which is the *Socket*, where it is made fast to the top of the Worm Spindle;

the *Shanks* or *Arms*, and the *Poises* or *Lead Balls* at the ends.

The parts of a Worm-Jack.

A *Jack*, when it is all fixed together.

The *Jack Case* or *Frame*, in which there are these parts.

The *Sides*, *Viz.* The *For-side*, The *Back-side*, The *Top peece*, The *Bottom peece*.

The *Stud* of the Worm spindle, is that whereon the end of the Spindle turns.

The *Worm loope*, that which holds it above.

The *Staves*, or *Back fastnings*, by which it is nailed to its place.

The *Main wheele*, The *Spindle*, *Barrel*, and the *Truck wheele*.

The *Worm wheele*, *Spindle* and *But*.

The *Worm*, *Spindle*, and *Fly*. All which are so commonly known that they need no Explanation.

In the dexter side of this quarter are two *Keys* endorsed, the Bows held together with an *Annulet*; and such a Bearing I find belongs to the Family of *Slappan*. *Viz.* Gules 2 Keys endorsed, the Bits erected, and the Bows braced with an *Annulet*, Or. See numb. 135.

On the sinister side of this square, He beareth Azure, two *Keys* in *Salter*, the *Bits* reversed and inverted, or counterpoised, Or; tyed in the top with a *Scarlet Ribbon*. Such a Coat as this I find did belong to *Gerbert*, or *Gerberi*, Arch-Bishop of *Rhemes*, Tutor to *Robert* Son of the *French King*, about Anno 1003.

The like to these in *Salter*, with the *Bits* erected and endorsed, Argent; the Bows tyed with a *Lace* or *Ribbon* in form of a *True Loves Knot*, with the ends pendant, in a Field Gules; is the *States Arms* of *Regensburg*.

CXXXIV. He beareth Argent, a *Smiths Forge*, and *Trough* before it Gules; with *Fire* on the *Hearth*, proper.

The several parts of a Smiths Forge.

The *Hearth*, or *Fire place* of the Forge.

The *Arches*, are hollow places under the *Hearth* to put things in.

The *Back of the Forge*,

The *Hovel* or *Covel* of the *Hearth*, which ends in a *Chimney* to carry the *Smoke* away.

The *Cewel*, or *Cewel Iron*, is a thick Iron Plate, with a *Taper Pipe* in it about 5 inches long, which is placed in the back of the Forge against the *Fire place*, through which the *Bellows* Blows the *Fire*.

The *Trough*, is a *Stone Trough* right against the *Fire place*.

The *Bellows*, placed behind the Forge, so as the lower Board can move neither up nor down.

The

The **Chain**, or **Rope**, or **Chong**, or **Rod**, is that as is fastned to the upper Ear of the Bellows, and so to the end of the Staff or Beam which the Smith handles to Blow the Bellows withal; called,

The **Rocker**, is that the Smith handles, which moves up and down, being fastned to another piece crosswise; called,

The **Rock Staff**, which is set between two Cheeks upon two Center-pins, in two Sockets; so that by drawing down the handle, the upper Board of the Bellows rises, and by a considerable weight set upon the Board sinks it down again; and so by this agitation performs the Office of a pair of Bellows.

Things belonging to the Forge,

The **Tongs**, with both streight and crooked Noses.

The **Slite**, it is to put Fire Coals to the Fire.

The **Whizzer**, to sweep up the Hearth, and sprinkles Water on the Fire.

The **Hearth Staff**, to stir up the Fire, and throw Cinders out of it.

The **Anvil**, **Pand Hammer** and **Sledge**, the **Seat Iron**, and **Rod** to hold it in; a **Block**.

CXXXV. He beareth Gules, two **Keys** endorsed and conjoined in the **Bow**, Argent is the Coat Armour of Van Griplan of Alsatia. The **Key** double Bitted and conjoined O. in a Field B. is born by **Keyes**. Some are so nice that they will term the **Bow** **Palke** like, conjoined and Bottomed in the corners; though it matters not whether they be round or square, except it should stand for a difference or distinction between Families.

Farriers Instruments.

13. **SOME** Instruments and Tools belonging to a Farrier, which before I was ignorant of, having now found out, I desire them to be added to chap. 7. numb. 25. as followeth.

CXXXVI. In this square are three Farriers Instruments; the first is termed an **unclenching Knife**; this loosens the points of the Nails which are clenched upon the top of the Hoof to take the Shooe off, or to remove it; the point is to raise up the Nail if it be deep in the Hoof.

A. 3 such in Pale S. is born by *Moverage*.

B. a Fels betw. 2 and a Rose O. is born by *Seldonar*.

The second is termed a **paring Hook** or **Knife**, with this the Hoof is cut when it exceeds the breadth of the Shooe.

The third is termed a **Knife**, or Farriers **Incision**

Knife; with it all sorts of Sores are Lanced and cut open in all the parts of an Horse Body.

CXXXVII. This is termed a **Cafe of Flames** laid open, in which there is six sorts of Instruments; the two outmost which are hooked are termed **Drawers**; another is a **Pen Knife**; and another with a sharp point, called a **Lancet**; and the two middlemost are **Flames**, one sharp, the other broad pointed. These are for several uses about Diseased Horses or Beasts, as the Drawers are to scrape out Corruption in a Wound or Bruise; the Knives and Lancets to make Incisions, and open Wounds and Bruises, and the Flames to let Blood.

CXXXVIII. In this square are three other sorts of Farriers Instruments; the first is termed a **Buttrize**, with this the sole of the Foot, and the Heel is pared when it is overgrown; also the bottom of the Hoof, to make the Shooe sit easie and streight on the foot. 3 such is Fels the Handle crested A. in a Field B. is born by *Buttrize*.

The second is termed a **Cautring Iron**, or a **Cautering Iron**, or **Searing Iron**; with it the parts of an Horse whose Disease requires Burning, are seared with it.

The third is termed a **Blooding stick** or **Striker**; it is an heavy piece of Wood, wherewith the Fleme is smitten or driven into the Horse Neck Vein, when he is Blooded. A. a Fels between 3 such the handle crested G. born by *Bloodman*.

CXXXIX. These are four sorts of **Shoes** used for infirm and Diseased Horses, which go Lamely or ill-favouredly; not that such are born in Arms, but are set down here for their term sake, which is the principal thing in such matters, which I aim at.

The first is termed a **Patten Shoe**; this hath both **Caukins** to secure sore Heels, and also a **Shoulder** before, to raise the foot from the ground.

The second under it, is termed a **false quarter shoe**, this hath one of the Heel Taps cut off; and is for an Horse that hath a sore side Hoof.

The third in the sinister chief, is termed also a **false quarter shoe**, with a shoulder in the side.

The fourth under it, is called a **Lunet shoe**, having both ends cut off. This kind of Shooe is used to Horses that have weak Heels.

There is another flat or **pomised shoe**, having one side thick and the other thin; and is used for flat and **pomised Hoofs**.

Also a **Cross Bar Shoe**, that hath a straight Bar from one Heel of the Shooe to the other; and is for Horses that have sore Soles.

CXL. In the chief of this square, is another piece of Smiths work, which may be termed either a **Cramp**

on Plate-flooy at both ends, having holes therein in order to its fastning. These are generally Nailed from one piece of great Timber to another, to keep them from breaking or leaving the place where set.

Such the like in Bend Sinister O. is quartered by *Van Spangheer* of *Carinthia* in *Germany*. Such the like in Fels A. by *Crampellon*.

On the dexter side of this square, is an Escochion Buckle, or rather an Orle like FEMALE, having the Tongue turned to the Sinister and broke in two in the middle, the corners Bottony. Such another A. in the Field G. is born by *Van Zeelitz* in *Switzerland*.

G. a Mafcle Buckle each point Bottony, the Tongue broken in the middle Bendwise Sinister A. is born by *Van Wallenrodt* of *Francovia*.

G. the like Mafcle FEMALE, with the Tongue parted in the middle A. is born by *Van Wallenrodt Streitar*. the difference of these Coats is one hath the Tongue Bendwise Sinister, and the other in Bend.

In the dexter side, and to the Base, is another form of a Key or Trebble Key rather, or three at one Bow, termed by some a Key Trebble shanked in Triangle; or three Keys in Triangle fixed in the head to an Annulate or one Bow.

A. the like B. is born by *Van Trikens*.

Per Fels A. and S. the like with the higher Bits endorsed, counterchanged, is born by the name of *Schlusfelder* of *Brunswick*.

Spurriers Instruments.

14 **T**Here are some few more of their Tools, which I have seen, and the Works by them made, which you may add to them mentioned, *numb. 24.*

CXLI. He beareth Argent, a Spur Rowel, at each point a Coxeure, born by the name of *Spurgall*. Some Blazon this a Rowel of six points, at each a pomell or Button, Gules. After this manner the *Netherlands* and *Germans* beset the Rowel points, with Roses, Leaves, Tufts of Grass, and with diverse other things, which are termed in their Blazoning, as above said.

The second is Blazoned, a Buckle or FEMALE, the sides adorned with Buttony heads; some term it Flooy on the out-side, and such another is born by the name of *Die Nagel* of *Westphalia*. *Viz.* Argent such a Buckle with the Tongue to the Sinister side, Gules.

The third is termed a Veel with a Spur, or Cock Spur; some call it a Spur shank, with a Nail or sharp point: such a like shank of a Spur was found in the *Watergate Street* in the City of *Chester*, in the Digging of a Cellar about the year 1670. in a Bed of Sand, which was shewed to me as a great rarity, and so it was,

*

for I laid it on an half Sheet of Paper, and scored it out according to its proportion, being as large almost as the half Sheet would contain. Surely that Sand must be brought there by the Deluge, or some great Inundation of Waters, at what time no one knoweth; but that the Spur did belong to some of the Giants in the beginning or elder days, cannot be denied; for Men were never (by any Writing known to be) so large in these latter Ages for many Centuries. Some term it a Sag Spur, others a Back Spur.

In the chief of this square is placed the Fartest Drench Horn, a Horn that they put Horse Drenches or Drinking Potions into, thereby to pour it down the Horses Throat. B. one such A. between 3 Spur Rowels O. is born by *Kubitz* of *Frankensfort*. B. 3 such in Pale A. born by *Hornby*.

CXLII. He beareth Sable, a Pier Hammer, with a rebate about or behind the face of it Argent, Dangle. This is born by the name of *Hammerbed*. This is termed, because it represents an Hammer at one end, and a Pick at the other.

G. the like between 2 Spur Rowels O. is born by *Thunmell*. A. 3 such S. is born by *Smethell*.

In the Base of this square, is the form and fashion of two other kinds of Barnacles; that on the Dexter side doth resemble some of those mentioned in *numb. 25. 29.* something varying in that it hath a Runner or Ring to make it wider or closer together, as the Runner is drawn up it.

Per Fels O. and V. in chief the like defected or cast down on the side, S. in Base 3 Roses G. is born by *Van Aschenbruch* of *Westphalia*.

That on the sinister side I have mentioned before in *numb. 31.* and by whom born, to which I shall refer you; this is the most properest Barnacle; and in most use with our Grand Farriers, and is termed the Ring Barnacle, having Teeth only on one side, the other plain.

Plummers Instruments.

15 **T**Here are some of their Tools which since my former Engraving ones I have procured, which you may please to add to the former mentioned at *numb. 50. &c.*

CXLIII. He beareth Sable, a Plummers Pincers or Sheaving Pincers, Argent, born by the name of *Plumage*. By these Pincers two edges or Skirts of Lead are turned one over the other, without cutting or bruising the Lead; this kind of Rolling of Lead one within another, is termed a Sheave.

CXLIV. In

CXLIV. In this quarter are three Plummers Instruments, the *Shave Hook*, the *Dresser*, and the *Strickle*; of all which in their places.

First for the *Shave Hook*, it is that that serapeth and cuts off the Surface of Lead, either old or new cast, to make it clean and bright, that it may thereby hold the Soder that is melted upon it, by means whereof two edges of Lead are sodered together and made one; and this is called the *Soddering of a Joynt*: Yet there is another way of joining the two edges together in one, and yet not soder them, but melt the edges by running hot Lead along it, which is termed the *Burning of a Joynt*. This is set down before *numb. 50.* but not so exactly like as this.

The second is a *Dresser*, by which Instrument a Sheet of Lead is either beaten straight or crooked, or into any form of work without bruising it; it being only a *Bat* of Wood made with a handle, flat at the bottom, and rounded off at the top-side.

The third is the *Strickle*; it is a slender Sparr, tapered in the ends answerable to the breadth of the *Casting Frame*, whereon the Plummer runs his Lead when it is new Cast; by this he beats down the Sand in the Frame, and keeps it of an even height; and when the Lead is cast over to run in the Frame, the Plummer followeth the Lead with this Instrument, to drive it forwards, and keep it that the Sheet be all of a thickness: Each breadth of a Sheet must have a *Strickle* answerable to it.

CXLV. In this is two useful Tools or things belonging to the Plummer; as the *Ladle* and the *Plaine*. The *Ladle* is made of Iron thick and strong, with a long *Iron Stale*, and an *Handle* of Wood fastned upon it; with this the Melted Lead is taken out of the *Furnace*, and put into the *Pan* for Casting.

S. 3 such Ladles A. Handles O. is born by *Ladle*.

The *Plaine*, is a flat peece of Brass or Copper with an handle of the same; with this Instrument the Sand in the *Frame* is smoothed, that the Lead running on it, may have no Pimples or roughness on the sheet.

G. 3 such as these I find born by *Van Rosen*.

CXLVI. In this quarter is three Instruments of the Plummers, viz. a *Sheming Mallet*, a *Graver*, and a *Level*.

The *Sheming Mallet* is made of light Wood, not very hard, having a square face on one end, and worked off taper to the other end; with this Sheets of Lead are Beaten or Battered, without any danger of Bruising the same.

B. 3 such O. is born by *Mallet*.

B. a Fels between 3 such A. is born by *Myrall*.

The second in the dexter Base, is termed a *Graver*, with it they usually Engrave Letters or Devices upon the Lead to Adorn their Work; it is also used for many uses about the Plummers Profession, but it is not for me to Teach their Art, but to inform you of their Terms.

*

The third is the *Level*; with it the *Frame* of the *Casting Board* is set straight and level; by the help of this Instrument also, being made a *Water Level*, that is, having a *Rigget* running straight through the bottom part of it (as in this Figure cut in the Plate you may see) by it, the level of a place at a distance from you may be known, whether higher or lower than the place where you stand; and that is by turning the bottom of the Level up; and setting a *Triangle* upon it, and looking to the place designed through the *Rigget* of the Level; and the Triangle will presently manifest whether the place be higher or lower than your Eye.

A. such a Level with its Water Level in Fels B. between 3 Plummers Plains, is born by the name of *Levelberg*.

In the Sinister Chief of this long Square is 2 Pitch-Forks in Salter, the Grains crecked, the Handles bowed and reverted O. these in a Field G. is the Coat of *Leskovetz van Lobkovich*. Some call these a *Forked Staves* with crooked *Stailles* or *Handles*.

G. the like O. is born by *Gabelkroser* of *Switzerland*.

Marshals and Gaolers Instruments.

16. UPON further Perusal of some Books and Notes, I have found some other Instruments of Torture and Cruelty, which you may be pleased to add to *numb. 92. &c.*

CXLVII. He beareth in this quarter the Instruments of Torture, Cruelty and Death. The first is on an *Hill Vert*, a *Cross Crucifix*, of some termed a *Cross to Crucify* upon, or a *Commenting Cross*, being such a Cross as is said *St. Peter* and other Primitive Christians were put to Death upon, under the *Jewish* and *Roman* Persecutions, a *Crucifying Cross*. And such a like Bearing I find belongs to the Family of *Crocoferier* in *Italy*. Viz. A. on a Mount V. such a Cross G.

The second on an *Hill*, an *Hot Fiery Furnace*, or a *Furnace* with the *Fire* and *Smoak* Ascendant. This is said to be that kind of Furnace into which the Three Children of *Israel* were cast by the Command of *Nebuchadnezzar* King of *Babylon*; because they would not Worship the Golden Image which he had set up, as it is mentioned *Dan. 3.* from whose Tyranny God delivered them, suffering the Fire to have no power of them, nor the smell of Fire to be about them. B. the Hill V. the Furnace O. Fire and Smoak proper, is born by the name of *Furnivall*. See *numb. 57.* one of another fashion.

CXLVIII. He beareth in a Field of Blood, *St. James his Club*, in Bend Sinister, Or. This is set forth to be the form of that Club or Bat, by which it is said *St. James the Lesser*, one of the Apostles of our Lord

Lord was Beaten to Death withal. This is born by the name of *Club*. A *Club* or *Rible*; it is termed in chap. 17. numb. 82.

In the Sinister base is a *Whip*, or *Lash*, it is made of a *for tail*: A thing to punish Offenders that have full Bags, whose purses do Penence for their persons; they haveing only a flap with the tail, when they deserve to loose their heads. The *Romans* term this an *Aspergillum*, a thing to sprinkle water with; an *Holy water stick*. A thing that the ancient *Roman Priests* used in their Sacrifices to besprinkle their Alters and people, as is manifest by the Medalls and Coines of those old tymes. se *Hemerius* his table n. 37.

G. 2 such in Salter throw an Annulet O. is born by *Van Eybeswaldt* of *Austria*.

CXLIX. He beareth Gules, a *Caldron* set on a flaming Fire, the *Smoke* ascendant, with *St. John* *Boyling* therein, all proper. This is born by the name of *Martyr*. It is recorded of *St. John* the Divine, that Beloved Disciple of *Jesus Christ*, on whose Breast *Jesus* leaned at his last Supper; that in the Persecutions of the Church, when Deadly Poison was given him to Drink, though Killed others, yet it did him no hurt; and when he was cast into a Caldron of Boiling Oil, yet he came out again without any sign of hurt; which made that saying good which the Disciples had of him that he should never Die; but it was their wrong Interpretation of our Saviours words to him *John* 21. 22. 23. for he died at *Ephesus Anno* 102. 60 years after *Christ*, in his Bed, when he had lived above 100 years, notwithstanding all the Persecution and Tyranny used to the Church and People of God.

B. out of a Pot or Caldron set upon 3 Feet and Rings on the sides and before on the Belly O. with a Fire of Fagots Flaming about it; a demy *St. John* Naked, holding up his Hands together before his Breast, or in a Praying Posture in full Aspect, proper; is the Town Arms of *Fach* in the *Netherlands*.

Husbandry.

17. **H**usbandry is that by which we all live, then it is good reason that nothing pertaining thereto should be omitted that tends to Honour as well as Profit; therefore I have made here an Addition of some things that were omitted in chap. 8.

CL. In this quarter is three Instruments belonging to Husbandry, a *Roof Ladder*, a *Turf Spade*, and a *Sowe*, of all which according as they lye.

First, the *Roof Ladder*, of some called a *Store Chamber*, or a *Cock Loft Ladder*; it is a Ladder usually made with broad *Ganges* to go into the higher Storyes of Country Houses, where they have not room or conveniency to set up a pair of *Stairs*; and for that end to secure them from slipping or sliding from

their Station, have Hooks at the top to hold them to the Place or Floor whereunto they are set; and from them are termed *Hook Ladders*.

B. such another in Bend O. born by *Storn Van Ostrach* of *Schwabisch* in the *Netherlands*.

S. 3 such A. on a chief G. a Tower, is born by *Kardiner ap Disnall*, Lord of *Gilvach Wen* in *Carraiganshire*.

The second is termed a *Turf Spade*, or - - - - Some term it a *Jews Cleaver*, or *Battel Are*, being an Instrument used by them for Fighting, being broad and sharp edged, set into a Wooden handle after the manner of a *Halbert*. And such is born by *Avancogin*, I suppose of a *Jewish* Extraction.

B. 3 such in Fess A. Handles O. is born by *Himan*.

The Third is called by Dairy Men a *Sow*, it is a Wooden Instrument made halt round, and the ends fastned in another streight piece, which may be taken off and put on the ends at pleasure. This Husbandmen use to put about their *Cows* and *Orens* Necks, when they tye them to their *Bosses* in the Cow Houses, or such like places.

S. a Fess between 3 such O. is the Arms of the *Dairym n*.

G. 3 such A. is born by *Melchman*.

CL. In this quarter is also the Fragments of some Broken Instruments of Husbandry, as an *Half quarter*, and a *quarter* of a *Wheel*, and whole *Wheels* conjoined by other sorts of Bearings, all which are found born in Coats of Arms.

First, for the half quarter part of a *Wheel*, I find it born by the name of *Randerjacke* of *Frankenford*. Viz. Or, a *Felloe*, and two *Spokes* fixed to a peece of a *Hawe*, Sable. Some term it a peece of a *Wheel* with two *Spokes*. Also *Truchses van Runk* beareth the same with the *Felloe* turned to the Sinister corner.

The second is a *Quarter* of a *Wheel*, and this I find to be born by several *Low Country* Gentlemen, as *Azure*; a *Quarter* of a *Wheel* Or, is born by *Van Blunckstein*. And Or, the like with the tops of 3 *Spear Reeds* on the *Felloe*, Sable, is born by *Van Kunckem*, both in *Silicians* in *Germany*.

A. the like G. born by *Van Zeutsch* of *Tyrole*.

A. the like, the *Felloe* turned to the dexter chief S. born by *Radeck* of *Switzerland*.

The third is Gules, in Bend two *Wheels* conjoined, with a *Cross* *Pattee*, Argent. This belongs to the Town or City of *Mainz*, which in *English* is termed *Mons* or *Monts*.

A. the like in Fess S. between 3 *Roses*, is born by *Wheelman*.

This is of some termed two *Wheels* on an *Acle Tree*, crossed in the middle, or an *Acle Tree* crossed with a *Wheel* at each end.

CLII. The first in this quarter is that on the dexter side which is thus Blazoned. He beareth *Azure*, a *Sickle*, the edge *Toothed* like a *Saw* Argent, the Handle Or. Born by the name of *Blackebick*.

G. two

G. two such, the **points** respecting each other, on the back of them three **Cuts of Grass**, the Handles Or. Born by *Van Liticham* of *Misnian*.

A. 3 such in Pale, the **points** reversed G. born by *Handt* of *Frankford*.

The second in the Sinister chief, is termed a *German Wheel Barrow*, or an Instrument whereby **Petards** are set to Gates over a Moat to Blow them open; for just such a Bearing as this in Bend Or; in a Field Gules, is the Coat Armour of the City of *Straßburg*, alias *Strausborow* in *Lower Germany*. If I have not given this its right Blazon let me Beg Pardon, I know not what else to make of it, except it be a **Drug**, or **Dutch Drug**, which they call a **Knecht**. See *chap. 8. numb. 146.*

The third in the Sinister Base, is the **Graines** of a **Pickel** or **Pitch-fork**; and A. 3 such S. is born by *Castil*.

I have several times informed you that all pointed things are to have their right and true points erected; if otherwise, then to mention what way the point stands.

CLIII. He beareth Gules, in Bend a **Pack** or a **Curf Spade**, Argent; the Handle Or.

G. 2 such in Salter A. is born by *Van Creit*, or *Kreit* of *Bavaria*. S. the like O. by *Heugell* of *Silitars*.

*

A demy Man clothed S. holding the like on his right shoulder with both hands A. is the crest of *Grarods* in *Rhine Palatinate*.

The second, is an **half Sieve**, or **Riddle**; the cutting off made up into a **point**, and **Bottomed**. The like A. in a Field S. is born by the name *Rideldorf*, or *Rideldorf*. Broken Riddles and Wheels are much born in *Dutch Arms*.

CLIV. He beareth Argent, three **Spade Soles** conjoined in their **Shanks**, in Triangle, Sable, born by the name of *Van Greysneck* in *Switzerland*. Some term them 3 **Spades conjoined** (or in Triangle conjoined) in the shanks.

The second in the Sinister chief, is Blazoned Azure, a **Sieve erected**, Or. Some term it a **Sieve standing on**, or set on its **Rime**. This is born by the name of *Ridler*. A Golden Sieve thus set on a Cushion with two Tassels Gules, is the crest of *Ottinger* of *Alsacia*.

The third is a **Cow** or **Dre Sow**, Or; in a **With** or **Rope imbowed** and **debused**, Argent, and fired to a **Pin**, with a demy potent head of the first. This I find to be the old crest of *Lawrence* in *Lancashire*. Some term it a **Sow fired** to a **Boolee Stake**, with a **Withe** or **Rope** turned in a round.

T O

TO

The Right Worshipful

ROBERT DUCKINGFIELD,

Of Duckingfield, Knight and Baronet.

THE End of Divine Reading and Contemplation, is for the Weal of the Spirit, and its Everlasting Happy Being, which as your Honour'd self is much conversant with and instructed in, yet it may not seem much amiss, at some vacant Hours (as a time of study, and set apart for Recreation) to cast an Eye upon the Rule and Unpolished Lines contained in this Academy, wherein is laid before you variety of Objects, things for Labour of Body, Study of Mind, and Pastimes for both: So hoping you will make a favourable Construction peruse that which with earnestness you have so highly promoted; and excusing the Errors, I shall ever Study how to serve you. In the interim I subscribe myself a Well-wisher of your Family and its happy estate, and your bounden Servant whilst

Randle Holme.

CHAP. VIII.

AMONGST all the Tools or Instruments used in Mechanical or Illiberal Arts or Trades, those of Agriculture should have precedence, it being the chief Nurse of Mans Life.

For Husbandry was in the time of the Ancient Jews and Romans, an Estate not unbefitting their greatest Kings, Princes and Dictators, as may appear by Holy and Prophane Writ. Tillage and Husbandry consists not only in Plowing, Sowing, Mucking or Dunging, Reaping and Threshing and such like; but also in Pasturage, Mintage, Planting, Pruning, with all other Terms for the increase of Cattel, or Fruit for Food: As for example, Abel was a Keeper of Sheep; and Cain a Tiller of the ground, and Noah a Planter of Vineyards, all which went under the Title of Husbandmen, Gen. 4. 2. and 9. 20.

Therefore Husbandry as it is the Ancient, so it is the most Noble, and Honorable Profession; seeing it is the very life and support of all other Arts, and Misteries, with out which they could not subsist. For where the increase

of the field is wanting, there all other occupations cease.

Husbandry.

NOW many are the Instruments belonging to Husbandry, and many thereof are found in frequent use in Coats of Arms, which take as followeth.

I. He beareth Sable, a Spade, Argent, shod, Or. By the name of Spade.

G. one in Bend Sinister S. by Van Sigenbosen.

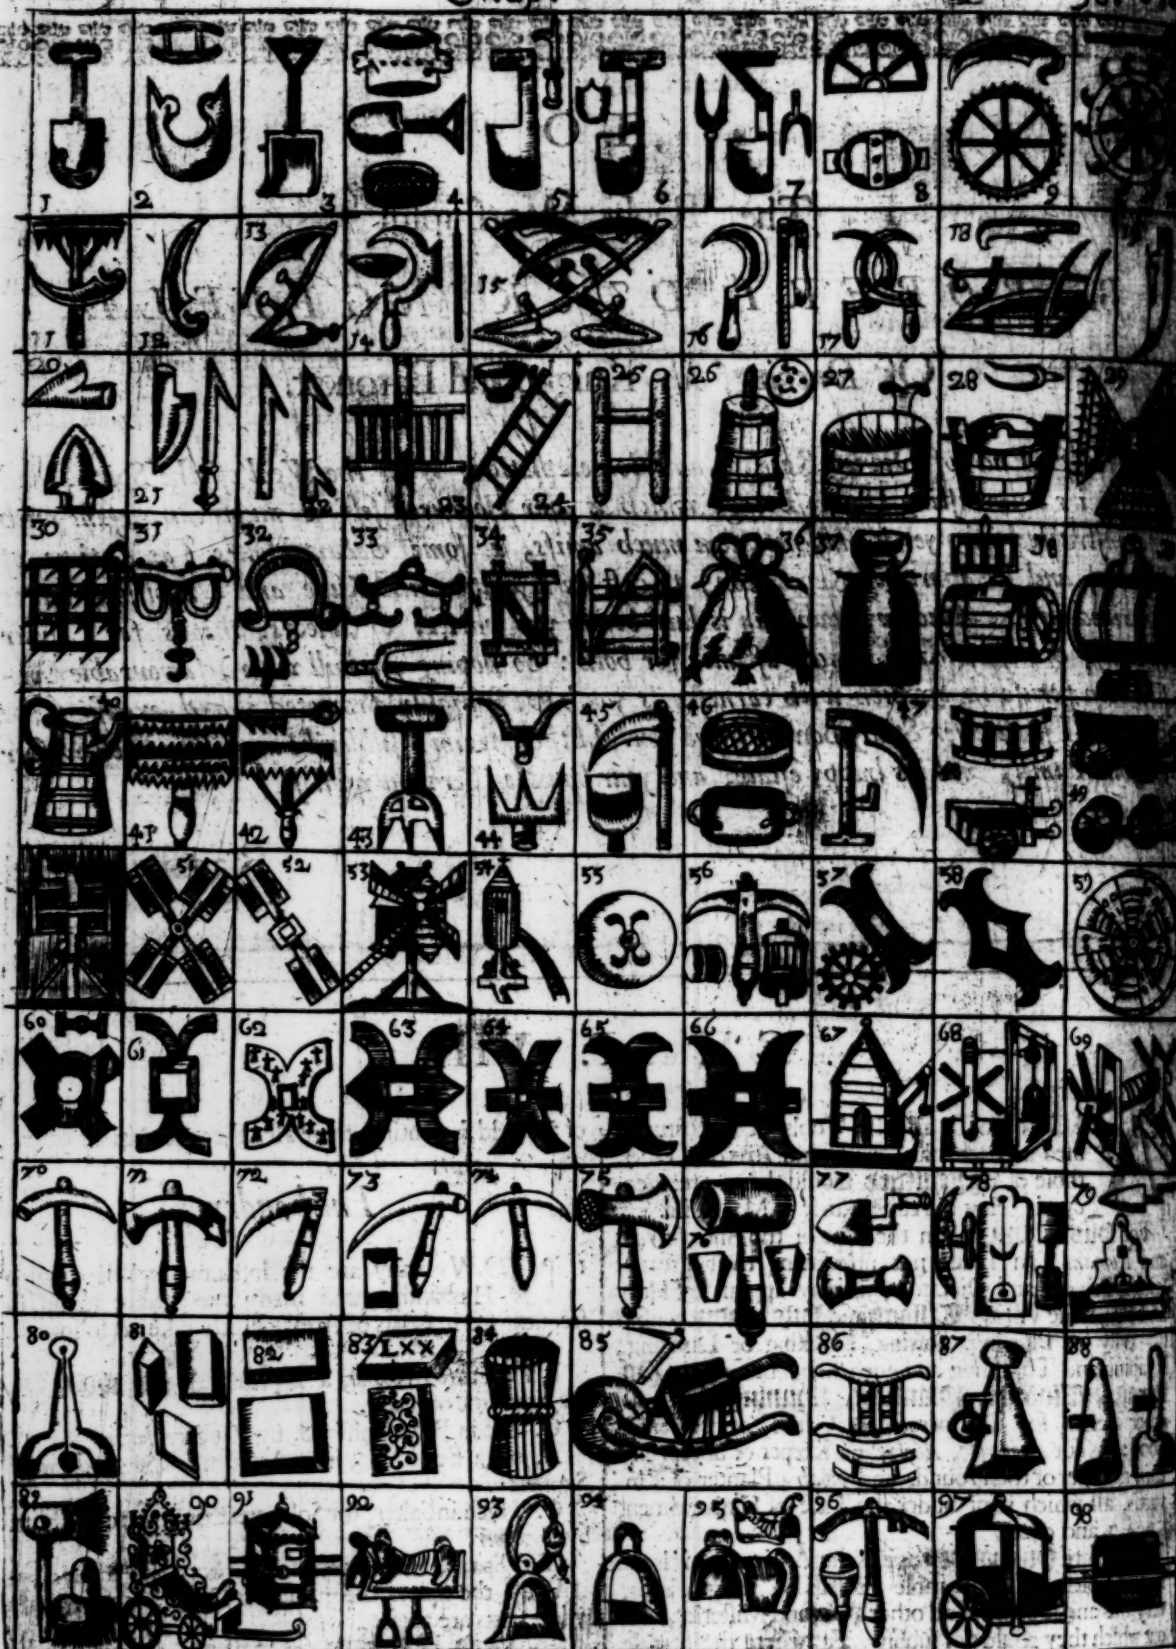

A. on a Bend V. 3 such A. born by Swettenham of Swettenham.

G. 2 such in Salter, the Soles erect or upwards A. born by Grabner.

G. a Spade, Handle reversed A. born by Van Graben: With the Spade the ground is Digged and Delved, whose parts are these.

The Head, or Handle, or Ralpe.

The

Donum Dñi: Rob^t: Duckingfeild de Duckingfeild Bar^o:

The Shank or Stalk.

The Sole, an broad part on which the Iron is fixed.

Shov, or Spade Iron.

He beareth Vert, a Spade Iron, Argent (some there for a Spade) in chief a Plain Blade, or a Spade, G. born by *Blount*. And on the dexter side a Spade Iron, O. born by *Bechton* of *Bechton*. A Slade in Bend G. born by *Schmiden* of *Schmiden*.

He beareth Bend G. born by *Vasant* of *Frankford*.

He beareth Gules, a Shovel, or a Corn Shovel, Argent, by the name of *Sho*.

Handles of these kind of Shovels used about have them over three square, or cornered, and about Iron shovels.

There is an other kind of Shovel used for Garden, hath the Handle crossways like a Spade and square with Iron.

He beareth Azure, a Round foot Shovel in Argent; between a Shole bottom Measure, & being Sieve, Or. by the name of *Granbagger*.

There is an other kind of Shovel that is Square at the rounded off at the Shank, with an Head like And two such in Salter handles reversed A. in G. is born by *Van Iberg*. See *numb. 45*.

He beareth Pale O. and B. 2 Shovels with round soles in the bottom counterchanged born by *Van Schman*.

2 Sieves, and a Measure (or Corn Measure) O.

He beareth.

Measure is also termed in diverse places an a Strike, a Bushel. This being Blazoned a Bottom Measure, or a double Measure, distinguish it from the single; this having in the middle Division, to shew that by it Corn be measured either in the top part for a full Measure, or with the bottom part for half a Measure.

The Reaving Sieve is to cleanse Corn at the time following from the dreggs of Chaff, and the small Seeds of Tares and Linets which are in it, which is termed Reaving of Corn.

He beareth Vert, an Half Spade, Argent, born by *Blount*. The like is born by *Smettenham* of *Somerford* in the County of *Chester*, viz. A. on a Bend V. like A.

This quarter being disappointed of other Room, I have engraven a Wine Hook, or a Wine Dressers Hook, this is another kind of Pruning Hook, different to that mentioned after, *numb. 14*. G. 2 such engraved with a Bunch of Grapes pendant between O. is born by *Van Gortis*.

VI. He beareth Sable, an Half Spade, with a whole Handle Argent, shov, Or. This is another way of bearing the Half Spade, which I find anciently

used by the Ancestors of *Smettenham* of *Somerford* afore-said.

In the dexter side, is a Spade Sole, the shank broken away. And three such with a Fels between B. in a Field O. is born by *Sennus Van Freidenberg*.

VII. He beareth Gules, an half round footed Shovel, and on the dexter side, a Pitchfork, (or a Pikel, or Pitchfork) issuing out of the Base, Or; the Grains Argent. This is a third way I have seen the Ancestors of *Smettenham* afore-said bear the Half Spade.

For the Pitchfork (or Pikel, which we vulgarly call it) it is an Instrument much used in Husbandry for their Loading and Stacking of Hay and Corn; and much used also in Coats of Armour, because in former times I suppose used in War, being an excellent thing for the Defence of a Wall: Some are made with a Socket for the Staff to go into; but the general way of making them is with a Tang and a Shoulder, to go into a hole made in the Staff hooped and with Iron: Examples of both is in this quarter, and *numb. 18*.

A. 3 Pitchforks S. born by *Walley* of *Middlewich*, in *Cheshire*.

A. a Pitchfork in Bend S. born by *Ramsdorf*.

A. on a Hill in Base, the like G. born by *Van Gort*.

G. a Chevron between 3 Pitchfork grains, the points dejected A. a Border O. is born by the name of *Musler* in *Alsacia*. See *chap. 9. numb. 134*.

VIII. He beareth Or, a Wheel Nabe, Gules, in chief a demy Wheel, Sable. Born by the name *Nazall*. Some Blazon it a demy Wheel and a Nave, naming them as they lie in the Field, according to the rule formerly given in the case of two things born as the charge of the Coat.

Per pale G. and A. the like Nave in Fels S. born by *Haydenaber*.

IX. He beareth Argent, a Sythe Blade, Azure; and a Cart Wheel, Sable. This is the Coat of *Sithall*.

G. 3 such Sythe Blades in Pale A. born by *Kemplex*.

O. 3 such in Pale, Backs reversed S. quartered by *Van Biberstein*.

The Wheel, hath the Rimi or Fellows of it plain, with 6 or 8 Spokes, as *numb. 8*.

The Cart Wheel, hath the Rimi set with round Nails.

The Catherine Wheel hath it set with Hooks, *numb. 10*.

The Clock Wheel is set with square Notches, called Teeth, and but 4 Spokes; see *numb. 57*.

The Water Mill Wheel, set with square Ladles, and many Spokes.

Wheels are born in Arms whole, or by half, or by quarters as the examples following manifest.

G. 3 Wheels O. this was the Coat of *Sir Payne Roet*, Knight, whose Daughter Married to the famous English Poet *Sir Geoffrey Chaucer*.

B. a Wheel A. semy de Trefoils O. born by *Poland* of *Bavaria*.

A. the like S. born by *Vargule*. And is the crest of

the Earl of Reipolitz ~~hith~~ in Germany.

A. a Cart Wheel G. born by *Handel*.

B. a Wheel A. born by *Van Rodern*.

S. the like A. born by *Syberg*.

A. the like G. born by *Creebel* of *Aljatia*. Also by *Kutchlin*: And by *Van Hoberhausen*.

G. the like A. is the Coat of the Archbishoprick of *Mainz*.

G. a demy Wheel turned to the dexter side A. by *Rufetz Ker*.

S. 2 demy Wheels endorsed O. born by *Uberacker*.

G. 3 Wheels A. born by *Kochen*.

The parts of a Wheel.

The **Nave**, the round piece in the middle of the Wheel.

The **Bushes** are Irons within the hole of the Nave to keep it from wearing.

The **Frets** are Iron Hoops about the Nave.

The **Spokes**, are the Wheel Staves, to hold all its parts together, which are twelve in number.

The **Felloes** or **Felloes**, are the pieces which compass the Wheel, the Wheel Rim, which are - - - in number.

The **Stroke**, is the Iron Rim about the Felloes.

The **Cart Nails**, great Nails with great heads, to Nail the Stroaks on the Felloes.

A **Wheel Hod**, with **Strokes** and **Nails**, a complete Wheel.

X. He beareth Gules, a **Katherine Wheel**, Or. This is a kinde of Wheel used to rent and tear in peeces grand Malefactors, and upon such an one it is said that *St. Katherine* dyed for the Faith of *Iesus Christ*, in memory of whose death it hath ever since been termed *St. Katherins Wheel*. This is born by the name of *Reden*.

O. the like O. is the Company of *Turners* Coat.

O. on a Bend B. 3 such A. born by *Rudhall*.

A. a Cross G. in the first quarter the like Wheel G. born by *Robert de Stone*.

In the Chief of this square is a kinde of **Pitch Fork** the **Grains** whereof are bent outward **Pomitted** at the end. Which is termed, the **Grains contrary Bowed**, or **Bowed and Dorsed**. The like in *Salter* Grains erected A. in a field G. is born by *Waldstromer* in the Kingdom of *Bohemia*.

G. 2 Staves in *Salter*, the head of the dexter Flory; and the top of the sinister with a Fork Grains counter-bowed A. is born by *Behaim* in *Holland*.

XI. He beareth Vert, a **Rake**, or an **Hay Rake**, O. surmounted of a Sythe blade in fesse A. by the name of *Houfbott*. Others blazon it a Rake Debrused with a Sythe Iron, the edge upwards.

B. a Rake O. a Bordure G. born by *Van Skelen*.

S. on a Hill in base a Rake erected O. by *Rechen Van Hohen Leinach* of *Switzerland*.

A. 2 such in *Salter* S. fixed on a hill out of base V. born by *Witensdorf*.

G. a Rake O. born by *Rechenberg*.

A. 2 in *Salter* G. born by *Truchses Von Wallack*.

XII. He beareth Argent, a **Sythe blade** with the **Point erected** Azure. Born by the name of *Dentura*. The Sythe is an ancient bearing, and is not only used to cut down Grass and Corn, but hath been used in the Warrs. For *Alexander Magnus* had such Engines for his Souldiers to defend themselves against the force and fury of Elephants.

V. 3 such A. with the **Points addant**, as *Mr. Boswell* blazons them, is born by *Grasmore*. But in my *Judgment* such a coat is better blazoned 3 Sythe blades in Fess, **points erected**; though some have termed them Pale-wise in Fess.

XIII. He beareth Argent, a **Sythe**, Sable. By the name of *Snayd* or *Snade*. Thus you se the Sythe completely fited and furnished for the worke of Moing, or cutting down of Grass. Whole several parts or members are thus nominated as followeth under

Parts of a Sythe.

The **Sythe**, it is that which we call the Sythe blade, or that as cuts the grass; Though when it is all furnished for the worke it is then called but a Sythe.

The **Swath**, is the long crooked Staff or Pole it is fixed unto.

The **Syth Hoop**, and **Clat**, are those that fasten the Sythe to the Swath.

The **Loggs**, are the handles of the Sythe.

The **Ripp**, is that as the Mower whetteth his Sythe withal, of some called the **Strickles**.

The **Sythe stone**, and **Horn** of Grass.

A. the like with a flower de lis S. is born by *Snead* of *Keele* in *Staffordshire*.

G. a Sythe A. born by the name of *Praers*.

A. on a Fess G. an Escallop O. between 3 Sythes S. born by *Alcock* of *Chester*.

XIV. He beareth Vert, an **Hedging Hook**, (or a **Pruning Hook**), Argent, the **Handle**, Or. Born by the name of *Hedgham*. The like Instruments are born by *Van Larisch*, as I have set it down *chap. 16. numb. 121*.

In the Sinister side hereof is another Instrument of Husbandry used by them who use Oxe Wains, it is called a **Goad**; and is nothing else but an Iron pitt put into the end of a long **Stick**, and made sharp at the end, whose use is to prick forward the Oxen in the draught. The *Philistines* when they would not suffer a Smith to live amongst the *Hebrews*, lest they should make them Swords and Spears, yet permitted them to have a File for to sharpen their Goats, which was strange (knowing that *Shamgar* not many Ages before had slain 600 of them with an Oxe Goad) that they would suffer it, 1 *Sam.* 13. 21. and *Judg.* 3. 31.

In the dexter side between the bending of the Hook is a little broad flat Dish made of Wood, called by *Dai*.

Women a **Strimming Dish**, it is to scum the Cream of the Lew Milk to Churn for Butter. B. 3 such A. is born by *Creath*.

XV. He beareth Gules, two **Sythes counterpo-
sed** and **Wheeled** one in the other Salterwise, the Blades argent, the rest Or. born by the name of *Willinger*.

B. 2 in like posture A. born by *Walbeheim*.

XVI. He beareth Sable, a **Sickle**, Argent, and a **Flail**, Or. These are two Instruments used by Husbandmen, the first to Reap or cut down Corn when it is ripe; the usets whereof are termed **Reapers**, vulgarly **Sheeters**: The second is to **Thrash** or **Thresh** the Corn, or beat it out of its Chaffy Husk; the work-
er therewith is called a **Thrasher**; To these Instru-
ments Scripture doth allude, when the Angel cryeth aloud, that the Harvest of the World was ripe, thrust therefore in the Sickle, *Rev. 14. 15. 16.* and Reap: And the Sickle was thrust in, and the Earth was Reaped; meaning thereby the end of the World, and last Judgment, where the Flail shall not only make a separation between the Chaff and the Corn, but is said to be the Judgment and Punishment of all Wicked persons, *Jsa. 41. 15. 16. Jer. 5. 33. Hab. 3. 12.*

The parts of a Flail or Threshal.

The **Hand Staff**, that as the Thresher holds it by.
The **Swiple**, that part as striketh out the Corn.

The **Cap-lings**, the strong double Leathers made fast to the top of the Hand-staff, and the top of the Swiple.

The **Wivole-Band**, that Leather Thong, or Fish Skin as tyeth them together.

A **Threshal** or **Flail**, some corruptly a **Frail**, when all complicated together.

B. 3 Sickles (or Sheering or Reaping Hooks) A. born by *Sickler*.

G. 2 endorsed A. Handles O. born by *Gridensingen*.
Per Fesse S. and A. 2 respecting each other in Base S. Handles O. by *Van Hufinden*.

A. 2 Flails in Salter S. born by the name of *Tribule*.

XVII. He beareth Gules, two **Sickles Imbraced**, Argent, the **Handles**, Or. By the name of *Slaley*.

2 such B. Handles G. is the crest of *Reichartung*.

XVIII. He beareth Vert, a **Plough**, or **Plow**, Or; the **Suck** and **Culter**, Argent. By the name of *Plouber*. And B. 3 Plows A. born by *Smeton of York-shire*.

Azure, a Plough in Fesse (as Mr. *Gwillims* terms it) Argent, is born by the name of *Kroge*.

It was wont in Ancient times, when Cities were to be Built, to limit out the Circuit thereof, by drawing of a **Furrow** with a **Plough**; so it was also used when they intended the final Destruction of a City to Plow it up, and to sow it with Salt, as we may Read *Julg. 9. 45.* But now it is an Instrument used only for Husbandry, as Agriculture or Tillage of Land.

*

The Terms of all the parts of a Plow.

The **Sough** or **Suck**, is that as Plows into the ground.

The **Culter**, is that as cuts the Clod.

The **Throck**, is the piece of Timber on which the Suck is fixed.

The **Reest**, is the Boards on the side of the Plow that turns over the Furrow.

The **Shell Board**.

The **Mould Board**.

The **Plow Beam**.

The **Sheath**, is that which holds the Beam and Throck together.

The **Buck**, is the Iron which the Horses are tyed unto.

The **Plow Cock**, is the Iron to tye the Oxen to the Plow.

The **Foot**, is the piece of Hooked or Bended Wood, at the end of the Plow, under the Suck; which is to keep it from going too deep in the Earth.

The **Plow tails** or **Stilts**.

The **Plow Handles**, are them by which the Man guideth the Plow.

The **Waster handle**, is that on the left hand, which he holdeth while he cleareth the Plow from clogging earth.

The **Plow Staff** and **Paddle**, by which he cleanseth the Plow from the said clogged Earth or Mould.

Wedges, to wedge the Culture, and hold it fast.

The **Plow Clats**, a kind of Wedge to raise the Beam higher or lower, to make it strike accordingly into the ground.

Terms used in Plowing.

Tillage, comprehends generally all manner of Husbanding of Ground.

Certillage, is a preparing of Ground to receive its Seed by stirring, tossing or turning the same.

Delvage, see **Certillage**.

Carbage, is Plowing of Ground, either Ordinary for Grain, Hemp and Line, or extraordinary for Woad, Diers Weed, Rape, Punick and such like.

Scaphage, is Digging and Delving of Ground, and preparing of Soil with Spades and Hand Instruments, for Sowing, Setting and Planting of Seeds, Herbs, Plants, Trees, &c.

Fictillage, is an ordering of Clayie ground for what use we would have it.

Fertilage, is an enriching of Soil.

Share, is the Earth next under the first Crust, turned up by Spade or Plow.

Steward, of some called **Swarth**, the Turf or upper Crust of Heath Ground.

Broovage or **Wowlage**, is feeding of Sheep and Goats.

Crust clung, or **Soil Bound**, is an hard sticking

ing together of the Earth, that nothing will grow on it.

Chapping, is ground full of Chinks and Cravises by reason of Drought.

Ducking or Manuring of Ground, is several ways, as with Ashes, Lime, Malt Dust, Horn shavings, Soot, Dang of Horses, Cows, Birds, Doves, Poultry, Mans Excrements, Sheep, Swine, putrified Litter, Chaff, Bean Stalks, Leaves of Trees laid to rot, Marl, Chalk, Fullers Clay, Oyster shells, &c.

Fallow ground, Land unplowed.

Fitches,

Forage,

Glebe Land, Land given to the Church for the Ministers Maintenance.

Intersoiling, is laying one kind of Soil or Earth upon another as Clay and Sand, or Sand and Earth, &c.

Arable Ground, that as is Plowed and Sowed.

Fats, ground having no ridges.

Tessel, in good **Tessel**, ground in good Order for Plowing and Sowing.

Pin fallow, is a Plowing twice for Pease, first in *Christmas*, then in *March*.

Compost, compound or mixt grounds.

Earing of Ground,

Bulfe, is a kind of ground lyen long untilld.

Grazing Ground, that which is eaten of Cattel.

Meadow Ground, that as is let grow for Hay.

Third Earing, the third time Plowed.

Carfe, the Ground unbroken.

Balk, waste Ground between two Butts or Ridges.

Dezy, or wet ground.

Trenches, or Water Furrows.

In the chief of this quarter is the head of an **Hedge** **ing Bill sans Handle**, which is made generally with a **Socket** to put it in; such Bearings are ever erect, though for want of room I have made it felsewise. Per pale A. and S. 2 such counterchanged born by the Count *Jorge* in Germany. See chap. 17. numb. 83.

XIX. He beareth Sa-le, a **Culture** (or a **Plow** **Culter**, or **Cooter** vulgarly; or a **Plow Knife**) Argent. Born by the name of *Culman*.

A. a Cheveron between 3 such S. born by *Leverage* of *Whelock* in *Cheshire*.

B. 2 **Culters endorfed** and points erected, O. born by *Biffin*.

A. 3 in Pale G. born by *Kohler*, and also by *Van Crofig*. The same is born with the points to the sinister side by *Aus Dem Winckell*, all Families in *Saxony*.

G. 2 in Salter endorfed A. born by *Runge*.

S. 2 endorfed points erected A. by *Von Rastelwitz*.

XX. He beareth Sable, a **Sough** (or **Suck**) the point erected, Argent. This is a **Sough** in its full Aspect, in which you may see the rising on the sides; the other Sough in the Chief, being set sideways to fight, wherein no more but the rising of the sides is visible, which kind of draught of a Sough, is termed a **Sough** fore-shortened.

A. a Sough G. born by *Mosheim* of *Frankford*.

O. a Sough in Bend sinister, the point upwards B. is

*

born by *Van Bulinz* of *Barvaria* in *Germany*.

2 erected, **coerçant**, or set together O. is the crest of *Van Krosig*. Some term it **expanded**, or set beside one the other.

XXI. He beareth Azure, a **demy Sough**, and an **Hay hook**, Argent; the **Handle**, Or. By the name of *Speedwell*.

The **Hay hook**, is an Instrument that is used in Husbandry for the pulling out of Hay made either in a **Rick**, **Stack**, or **Mow**, when they are about to Fodder their Cattel and Beasts. The *Dutch* make their Soughs flat, without any turning up in the edges.

A. 3 demy Soughs in Pale G. born by *Cobler* of *Saxony*. Also by *Van Krosig*.

S. 3 in triangle, their heads conjoined to a Rose A. by *Grölandt*.

A. 3 such points erected G. born by *Hagken*.

B. 2 Hay hooks in point, the Hooks reversed and endorfed, A. by the name of *Saurzapfen* of *Barvaria*.

B. an Hay Hook reversed, the handle after the shape of a Falcons head, and semy de Billers O. born by *Forstmeister van Geilhausen*.

B. 2 in Salter O. born for the Arms of the Town of *Hewbach*.

G. 3 Staves one in Pale the other in Salter, headed with Hay Hooks O. born by the name of *Kehling* of *Austria*.

B. 2 such in Salter, the Hooks endorfed, in Base a Shapournet shapournated O. born by *Weisen*.

B. the like in Salter, with a Forked Handle O. with the like Shapournet. Born by *Van Ploben*.

XXII. These are two other ways of drawing the **Hay hook**, which in *Dutch* and *German* Coats I have often seen so made, of whom I shall say no more, but tell you one is a **plain Staff**, the other with an **Handle made by Nature**, which is a little Branch growing out of the side Fork like.

XXIII. He beareth Azure, on a **Pole** extending from the **Chief to Base**, a **Turning Cratch**, Or. Born by *Derhud*.

O. the like G. in chief 2 Roses. Born by *Van Hobergen*.

XXIV. He beareth Sable, a **Ladder in Bend sinister**, Or. By the name of *Montesball*.

B. the like A. born by *Van Ebra* of *Thurnegram*. Also by *Wayfen*.

B. a Ladder erected supported by 2 Hands couped in the Arm, Sleeve G. turned up A. born by *Van Steige*. The like is his Crest.

In a Ladder there is only the two sides, and the overthwart pieces, which are termed **gangs**, or **staves**, or **foot staves**; the length of a Ladder is mentioned by its Staves, as a Ladder of 6, 8, 10, or 12 gangs or staves; not to say of 3, 4, or 5 yards or foot long.

In the dexter chief is a kind of Wooden Dish with a large

large round hole in the bottom of it with a Rim about it, which is by Milk Women called a **Seigh**; and having a Cloth tied about the hole, Milk runs through it, which takes away all hairs from the Milk; this in our Country is termed Seighing of Milk. B. 3 such O. is born by *Purlace*.

XXV. He beareth Gules, a **Cheese Ladder**, Argent. This is a thing in frequent use with Dairy people; and without it Cheese cannot be conveniently made, for it serveth to lay over the **Cheese Tub** for the **Cheese Fat** to rest upon, while the Dairy Woman prelleth the **Whay** out of the **Cruds** in the Cheese-Fat, into the Tub. This is born by the name of *Gratiffe*.

V. 3 such O. is born by *Litherscheffe*.

XXVI. He beareth Vert, a **Churn covered**, with the **Staff** therein. By the name of *Buttman*. That the Churn and Churn-Staff are of old born in Coats of Arms, I have shewed before, chap. 5. numb. 70.

In the Sinister chief, is the bottom of a Churn-Staff.

XXVII. He beareth Azure, a **Milk Pail**, Argent. This is the Badge and Cognizance of the Milk Maids, whom I have heard give this sort of Vessel several denominations; of some it is called a **Pail**, a **Cruck**, an **Effout**, of others a **Bouk**. This is born by the name of *Peel*, or *Paile*.

XXVIII. He beareth Sable, a **Cheese Tub covered**, Or. Born by *Van Taubman*, of Saxony.

In the chief is set a Pikel grains, with a Tang, which is only to shew you the form of both this, and that mentioned numb. 7.

All the Terms used by Dairy People about making of Cheese and Butter.

Rennet or Steep, Renish
Clotted, cruded Milk.

Cruds.
Break the Cruds.

Whay.
Thruching.

Whay Cream.

Flecting.

Sweet Cheese.

Sage, or Mint, or Mary-

gold Cheese.

New Milk Cheese.

Flet and unflet Milk Cheese.

Milk the Cows.

Seigh the Milk.

New Milk.

Scum the Milk.

Cream. Top of Milk.

Good Milk.

Low Milk.

Boni Thlobber, is good

Milk gone thick. *

Two Milk Cheese.

Flet Milk Cheese.

Faded Cheese, when it is
either Rotten, full of
Mites, or Green.

Paranazine, or old Cheese.
Thruch them in the Cheese-

Fate.

Pres the Cheese.

Salt the Cheese.

Dry the Cheese.

Turn the Cheese.

Cracked Milk.

Churn Milk. Butter Milk.

Thick Milk, is Churned

Milk gone thick.

Whigg, is the bottom or

breaking of thick Milk.

Wash the Butter.

Knife the Butter.

Salt it. Pot it.

A Print of Butter.

A Dish of Butter.

A Pot or Tub of Butter.

Whay Butter.

Cream Butter.

XXIX. He beareth Argent, three **Harrowes conjoined** to a **With** or **Wreath**, Sable. By the name of *Husbandry*. The like Coat is born by *Harroon*, viz. Erm. three Harrows conjoined in the Nombrill of the Escuchion with a Wreath Argent, and as the second, Toothed, Or; so Blazoned by Mr. *Grillim*, fol. 291. but much of his terms might have been spared, for it cannot be any where else but in the **Fesse point conjoined**, except more of them be set in the Field. Some term these **Triangle Harrows**. B. one such with a Ring at the top A. Teeth S. is born by *Eglingen* of *Bavaria*.

XXX. He beareth Vert, an **Harrow**, Argent, **pitted**, Sable. By the name of *Harromsin*. In former times Husbandmen made all these Instruments three square, as in the foregoing example; but now this form is only in use, whose several parts are,

The **Harrow Bulls**, the holes where the Nails go in.

The **Slots**, the cross pieces.

The **Harrow Tiles**, or **Pins**, or **Tushes**, are the Iron Nails.

The **Hook**, is that as fastens the Horse to them.

Couples, are when two Harrows are tyed together.

XXXI. He beareth Vert, a **Poke**, (an **Ore Poke** Or; with a **Chain** and **Hook** pendant thereunto, Argent. By the name of *Yokely*. This is an Instrument of Subjection, by which Oxen used to the Yoke are tyed together to Draw either in the Plough or Cart. It is an Emblem of Servitude and Patience, Submission and Obedience; so on the contrary, the refusing or casting off of the Yoke is a token of Freedom, as we find mentioned in several places in Scripture, as *Gen. 27. 40. Lev. 26. 13. Isa. 10. 27.* Sometimes of Rebellion and Disobedience, as in *Jer. 5. 5. Psal. 2. 2.*

Leo the Tenth bore the Yoke for his Impress, with the word **SWAVE**; to signifie that to Serve well, was to Reign well.

The parts of a Yoke.

The **Poke**, the thick piece of Wood which lyeth on the Oxens Neck.

The **Bowes**, that as compasses the Necks about and goeth through the Yoke of Wood.

The **Stickings** and **Wreathings**, are them hold the Bowes fast in the Yoke.

The **Poke Ring**, and **Ore Chain**.

XXXII. He beareth Gules, a **Top-sole** and **pitted** with its **Chain** pendant, Argent. By the name of *Coplin*.

A. a Cheveron between 3 such A. is born by the name of *Anderton* of *Anderton*, in *Lancaster*.

This is very often by old Heralds termed a **Dog-Couple**, but very improperly. I should rather take it for a **Shakle** and **Bolt**, with the Chain hanging at it, for that is *Andertons* proper Coat, though some for want of Skill, not of Ignorance, have made it thus; see chap. 7. numb. 86.

In the dexter Base of this square, is the form of a **Pelve** or **Dung Fork**, the **Tangs Imbowed**, sans fesse and handle. A. 3 such is born by the name of *Dunhill*.

A. 2 such S. the **Graves** in *Salter O.* born by *Van Hopparten of Hassia*.

XXXIII. He beareth Sable, the **Swingle Tree** of a **Coach Pole**, Argent. born by the name of *Springal*. These are made of wood and are fastned by Iron hooks stables chains and pins to the Coach pole, to the which Horses are fastned by their **Harnish** when there is more then two to draw the Coach. *Je cha. 9 num 162**

Some call this the **Pin Swingle Tree**, with its **Spring Trees**.

G. the like A. born by *Van Mengersreut of Bavaria*.

In the Base of this quarter is set a **Pskell** or **Pitchfork Grains**, with **three points**; and such an Instrument I find born with the points erected Or. in a Field Argent, by the name of *Van Der Gabell*, of the Province of *Tyrol* in *Germany*; or term it a **Pitchfork** of three **Tangs** or **Grains**.

XXXIV. He beareth Vert, an **Hatch**, (or a **Field Hatch**) Or. This is a diminutive **Field Gate**, which is placed in the Hedge to open and shut, only to let a single Beast in and out of the Field, whether Horse, Cow or Oxe, and to secure the Pasture from all Trespases in that place; Also for Milk Maids to go in and out safely without climbing or going over **Stiles**. And such an Hatch I find born in Bend Sinister A. in a Field G. by the name of *Van Haxthusen of Brunswick*.

V. 3 such O. is born by *Hatcher*.

XXXV. He beareth Argent, a **Field Gate**, (or a **Pate**) Gules, born by the name of *Cargate*.

G. a Fels between 3 such G. born by *Yates of London*.

A. a Fels between 3 such S. born by *Yates of Oxon*. Party per Chevron O. and B. 3 Yates counterchanged, born by *Yates of Middlewich* in *Cheshire*.

XXXVI. He beareth Gules, a **Setchal** or **Leather Bag**, born by the name of *Siretall*. This is the Plow Mans Pantry, in which his Provision is put, and carried on his Shoulder, when he is for the Plow and Harrow.

V. 3 such O. born by *Vaohen* or *Machen*, or *Machell*.

XXXVII. He beareth Sable, a **Sack**, or **Pough** of **Corn tyed up**, the **Strings extended** Argent. By the name of *Poughten*. It is termed a **Sack** when it contains about 4, 5, or 6 Measures of Corn; a **Pough** when it holds 1, 2, or 3; but a **Bag** when it can hold but 1, 2, or 3 Pecks.

B. 3 such A. born by *Sackell*.

Per pale A. and G. 2 such counterchanged, born by *Monsax of Bavaria*.

XXXVIII. He beareth Vert, an **Harvest Bottle**, Or. By the name of *Boule*. These Bottles are made of Coopers Ware, Timber and Hops; and such I find also to be born by the name of *Rothen*. Viz. G. 3 Harvest Bottles O. See them made another manner of way numb. 39.

In the Chief of this quarter is a **Back** of 5 **Staves**, the middle-most **Erected** and **Pointed** or **Fitched**.

Of some it is termed a **Turning Hatch**, or **Turnstyle gate**: Others give it the Denomination of a **Grid Iron**, the **Handle pointed** and **erected**: Which in my Judgment it most resembleth.

S. 3 such O. is born by the name of *Mildeck*.

The like Gold, is the Crest of *Von Der Deck* of *Frankford*.

XXXIX. He beareth Argent, a **Leather Bottle**, Sable. Some term it an **Harvest Bottle** of **Leather**. This and the foresaid are kind of Bottles, which Reapers and Mowers use to carry their Drink or Milk in, when they are about such Harvest Work. This is born by the name of *Leatherbottle*.

A. a Chevron V. between 3 such S. by the name of *Voydall*.

In the base of this square is another form of an **Harvest Bottle**, with a kind of **Ridged Top** towards the drinking place; and thus the *Germans* make them; for *Van Vohenstein*, in a Field A. beareth 3 such O.

XL. He beareth Gules, an **Harvest Tankard**, or **Harvest Can**, Or. born by *Harvister*. Some blazon it a Tankard with a **Mouth peece**, or **Mouth pipe**, because by it Harvest people may drink with more ease then by lifting the whole vessel to their heads.

S. 3 such O. is born by *Tankerville*.

XLI. He beareth Sable, a **Curry Comb**, or an **Horse Comb**, Argent; the **Handle**, Or. by the name of *Curryeume*. Also *Maner*, or *Mainere*, beareth G. 3 of them A. handles O.

Parts of a Curry-Comb.

The **Barrel**, or **Back** of the Comb, The **Plate**, that part which is plain without teeth. The **Teeth**. The **Shank**, that which holds the Barrel to the Handle. The **Handle**. The **Ring**, that as it hangs by.

XLII. The Field is Azure, an **Open Curry Comb** Argent, **Handle** Or. born by *Horslen*, or *Horsell*.

This is an other way of drawing the **Horse Comb**, having no back, and but one rowe of Teeth. That also in the Chief I take to be an other sort of **Curry Comb** used by *Grooms*, and *Osiers* of **Stables**; to comb and lay smooth the horse Manes and Tails: And therefore is fitly termed the **Grooms Mane Comb**, or an **Horse Mane Comb**.

G. 3 mane Combs in Pale, Bendwayes Sinister, A. born by *Spetten* a *Duch* family.
B. 3 such Erected A. born by *Pallat*.

XLIII. He beareth Argent, a *Worthing Forke*, or a *Dung Fork*, Gules; *Shooed* or *Pointed*, Sable by the name of *Worthingford*. This is an Instrument by which Husbandmen *Veron* or *Veron*, that is, cleans their Stables, and Cowe houses from the Beasts dung, casting it out to the Muck hill: And from thence with the same Forke, or *Pelve*, (or *Evill* as some call it) cast it into Carts to carry it a way to muck, or manure the ground that is for either Pasture or Tillage.

Parts of a Yelve.

The *Barr*, or *Cross Bar*. The *Tangs*, or *Forks*
The *Socket*, for the *Stail* to go in. The *Staille*.
The *Kalpe*, is the top part on which the man holds.

There is an other sort of these *Dung Forks* with only two ends or points, and without a *Kalpe*, or *Potent*, on the head. Which I find thus blazoned, G. 2 *Dung forks* in *Salter*, the *Irons* *Bi-forked*, *Barred* and *Socketed*, A. the *Stailles*, O. Born by the name of *Van Gabelthofen* of *Bavaria*. See it in the chief of *num* 44

XLIV. He beareth Or, two *Dung forks*, sans handles; as some term them. But I should rather give them the names of one, a *Dung Iron* with 2 *Forks* or *Points*; else a *Pelve Iron* with two *Ends*. And the other *Treble pointed*, and *Erected*.

A. on a *Pile* G. a *Dung Iron* of 2 forks (or a *Dung fork Graines*) of the first. born by *Van Gabelentz*.
O. 3 such S. born by *Byforke*.

A. a *Yelve Iron head* S. born by *Beastire*.
G. 3 such points erected O. born by *Maxmaine*.

XLV. He beareth a *Shovell bottome erected*, and a *Pick* or *Pioneers Pick*, Or: in a field Sable. born by the name of *Minr*. These are also distinct coats of themselves as

V. 3 such *Picks* O. is born by *Fotner*.
G. a *Pick* A. handle Q. born by *Dilling*.

Per pale A. & B. a *Shovell Bottom*, or a *Shovell sans shanke*, square at the foot and round above B. is born by *Hochfleter*.

G. the like erected party per pale A. & B. is the Coat & Crest of *Schutensam* of *Frankford*.

G. 3 such O. born by *Count Meggam* in *Germanie*.

XLVI. He beareth Argent, a *Sive* or *Ridle*, the *Rim* Or, *Bottomed* Sable, and an *Hoop Tenne*, handles Azure. Born by the name of *Winnomist*. this is also termed a *Bushel*, *Measure*, or a *Winchester Measure*, or *Strick*.

A. 3 *Ridles* S. is born by the name of *Weisen*.
S. an *Hoop measure* O. handles A. born by *Iustice*.

Sives or Riddles.

There are severall sorts of *Sives*, and all have a Denomination from the Bottoms which are put in them, and to the fineness or coarseness of the things to be sifted through them. as for example,

The *Coale* or *Lyme Sive*, hath wide square holes made in the Bottoming, that a mans finger may be thrust throw each hole, and the bottom made of Split wood.

The *Garden Sive*, it is Bottomed with strong wyer the squares being as large as the former. These two are generally termed *Ridles*, and so are all wide bottomed *Sives*.

The *Beebeeing Sive*, of it see *num*: 4.

The *Heale Sive*, or *Bolting Sive*, it is bottomed with a kinde of fine haire cloth which is so wide in the holes, that meale or fine flore of ground corn will go throw it, but the coarse Bran remaine behind.

The *Fine Sive*, or *Silke Sive*, it is so fine a tiffinie bottom, that nothing but the pure Dant of corn ground will go through it, all maner of Bran staying behind within the Rim.

The *Searce*, or *Searcer*, it is a fine Sieve with a Leather cover on the top and bottom of the Sieve Rim, to keep the Dant or Flower of any Pulverized Substance that nothing be lost of it in the Searcing.

Corn Measures.

A *Pint*, or *Cup*, or *Can*. is the least of dry measures.

A *Quart* measure, is two *Pints*.

A *Pottle*, is two *Quarts*. A *Gellon*, is 2 *Pottles*.

by these all greater Measures are Measured, as

An *Halfe Peck*, of old it contained 5 *Quarts*, but by *Winchester Measure* to which by the Statute of the Land all others now conforme, is but 4 *Quarts* and a *Pint*.

A *Peck*, is 2 *Gallons* and a *Quart*. In some parts of the Kingdom it is called a *Bushel* of which 4 maketh a Measure of any kinde of graine.

A *Measure*, an *Hoop*, or a *Strick*, is 4 *Pecks*, or 9 *Gallons*. Yet some reckon but 8 gallons to the Measure, which in some places is also called a *Bushel*.

A *Bushell*, is 4 Measures of Corn, and 5 of Oates, with our countrey people.

A *Quarter*, is 8 Measures, or 2 *Cornocks*.

A *Choldron*, is 36 Measures &c. But of these see more in *lib*: 3 *chap*: 5 *num*: 144.

The *Strickles*, is a thing that goes along with the Measure, which is a straight Board, with a Staffe fixed in the side, to draw over Corn in measuring, that it exceed not the height of the Measure. Which measuring is termed *Wood* and *Wood*.

Now seeing we ate entered the discourse of these dry Measures, it will not be amife to set down in this place, the names and quantities of the *Hebren*, *Greek*, and *Roman* Measures, with what proportion they bear to our *English* *allizes*, either for Weight, or Measure.

Hebrew Measures.

The *Kab*, is a quart *English*.
 The *Omer*, is three pints and an halfe.
 The *Seah*, or *Satum*, a gallon and halfe.
 The *Ephah*, halfe a Bushell and a pottle.
 The *Lether*, 2 Bushell, 6 gallons and a pottle.
 The *Cor*, or *Homer*, is 41 gallons. *viz.* 10 Ephah's or 20 Stata's.
 The *Log*, is halfe a Pint.
 The *Hin*, is three Quares.
 The *Bath*, or *Bathus*, is 4 gallons and an halfe.
 The *Cadus*, is 10 or 12 gallons, or 6 Congius's.
 The *Mad*, or *Madat*, is 12 congius's or 72 sextaries:

Greek Measures.

A *Tetarton*, the 4 part of a *Sextarius*. a Gill.
 A *Pifex*, is a Pint. or a pint and an halfe.
 A *Cotula Attica*, the halfe of a *Xestes*. *viz.* halfe a Pint and a quarter.
 A *Cotula Georgica*, is 20 ounces & 19 graines.
 An *Oxybaphon Attica*, the 8 part of a *Xestes*.
 An *Oxybaphon Georgica*, is 2 ounces an halfe and four grains.
 A *Cyathos attica*, is 2 charats 15 graines and an halfe.
 A *Cyathos Georgica*, the 6 part of a *Cotula*.
 A *Medimnos Attica*, a Bushel 1 gallon 3 pints & 18 penny weight.
 A *Medimnos Georgica* a Bushel 7 gallons 5 ounces 3 quarters 2 Charats and 8 graines.
 A *Chaenir Attica*, a pint 8 ounces 1 charat and 19 graines.
 A *Chaenir Georgica*, a quart, also 6 ounces 2 charats 18 graines and an halfe.
 A *Mettrates*, or *Mettrata*, is a firkin gallon 3 pints & 18 penny weight. also 118 pounds. It is diversly taken by Authors for 10 12 or 13 gallons.
 A *Chus Attica*, is 3 quarts. *viz.* 6 *Sextarius*'s.
 A *Chus Georgica*, is a gallon & a pint.
 An *Amphoreos Georgica*, is 5 gallons and a pint.

Roman Measures.

A *Cotyla*, or *Cotula*, is half a *Sextarius*, *viz.* a Pint, or a pound weight *Troy*, that is 12 ounces.
 A *Sextarius*, is 2 *Hemina*'s, a Quart, or a Pint according to the place, *viz.* 20 ounces.
 A *Hemina*, is 4 *Acetabulum*'s. or *Semi Sextarius*. *viz.* 10 or 12 ounces.
 An *Acetabulum*, is halfe a *Cyathus*, or 2 ounces and an halfe ounce.
 A *Cyathus*, is 4 *Lygula*'s. or the 6 part of a *Cotyla*. *viz.* halfe an ounce a *Drachma* or *Drame* and a *Scruple*.
 A *Ligula*, is 3 *Drams* and a *Scruple*.

A *Sextarius Castrensis*, is in the Camp or Army a Quart. But *Sextarius Urbicus*, is in the City only a Bint or 2 ounces 3 quarters.

A *Quartarius*, is the 4 part of a *Sextarius*. or a *Congius*. *viz.* an halfe pint.

A *Charat*, maketh an ounce weight.

A *Drachma*, or a *Drame*.

A *Scrupulus*, or *Scruple*.

A *Congius*, is a Pottle a quart and a pint. also 5 ounces and a quarter in weight.

A *Modius*, is a Bushel, or a Peck. It containeth 26 pounds 8 ounces.

A *Semodius*, is 8 *Sextarius*'s or 13 pound 4 ounces.

A *Trimodius*, is 3 Bushels.

An *Urna*, is 3 gallons 1 pottle and 1 pint. also it is 9 ounces in weight.

An *Amphora*, is 7 gallons 1 quart 1 pint & halfe.

A *Culeus*, or *Culleum*, is 14⁸ gallons 1 pottle and a quart.

A *Comcha*, is 2 spoons full, or 6 drams.

The *Chalchus*, is 2 graines. or 36 part of a dram.

The *Siliqua*, is 4 gr. or 6 part of a scruple.

The *Semibolus*, is 6 graines.

The *Bisiliqua*, is 8 graines.

The *Obolus*, is 12 gr. or 6 part of a dram.

The *Scrupulus*, is 14 gr. or 3 part of a dram.

The *Semidrachma*, is 36 graines.

The *Drachma*, is 72 gr. or 8 part of an ounce.

The *Tremissis*, is 32 gr. or 18 part of an ounce.

The *Sextula*, is 4 scruples. or 6 part of an ounce.

The *Siclus*, or *Sicilius*, is 2 drams, or the 4 part of an Ounce *Troy* weight.

The *Duella*, is 2 drams & 2 thirds of a dram, or the 3 part of an ounce.

The *Assarion*, or *Assarius*, is half an ounce.

The *Valia*, is an ounce, or 8 drams.

The *Sextans*, is the 6 part of a pound *Troy*. 2 ounces.

The *Quadrans*, is the 4 part of a pound. *viz.* 3 ounces.

The *Triens*, is 3 part of a pound, or 4 ounces.

The *Selibra*, or *Semisus*, is half a pound, 6 ounces.

The *Bes*, *Bessis*, is 8 parts of a pound, *viz.* 8 ounces.

The *Dodrans*, is 9 ounces, or 3 quarters of a pound.

The *Dextans*, is 10 parts of a pound, or 10 ounces.

The *As*, *Assis*, or *Libra*, is a pound weight.

The *Mina*, or *Nona*, is 12 ounces & an halfe.

The *Zygomatica Libra*, is a pound of 16 ounces.

The *Xesta*, or *Sequilibra*, is a pound & an halfe.

The *Diponarium*, is 2 pound weight.

The *Tressis*, is 3 pound weight.

The *Quadrussis*, is 4 pound weight.

The *Quintussis*, is 5 pound weight.

The *Decussis*, is 10 pound weight.

The *Vicessis* is 20 pound weight.

The *Tricessis*, is 30 pound weight.

The *Quadrucussis*, is 40 pound weight.

The *Semicentussis* is half a 100. or 50 pound weight.

Their *Centussis*, is 100 pound weight.

The *Quingenarius*, is 500 pound weight.

The *Mille Pondium*, is 1000 pound weight. &c.

In the reducing of these ancient Measures into our English Aflize, I have had respect only to this proportion *viz.*

Half Gill, which is 4 Spoonfulls. Gill, or
Quadrant, is 4 to a pint. Half Pint, is 2 gills. Pint
is 4 gills. Quart is 2 pints. Pottle is 2 quarts. &
Gallon is 2 pottles, &c. as aforesaid. *se chap. II n. 91*

And so of Weights, I have had respect to that of Troy
only, as a Graine, which is the weight of a Wheat corn,
which is sometimes divided into halves, quarters &c.

A Charat is 6 graines, or 4 part of a scruple.

A Scruple is 14 graines, or 3 part of a dram.

A Penny Weight is 24 graines.

A Dram is 72 graines, or 8 part of an Ounce.

An Ounce is 20 penny weight, or 24 charate, or 24

scruples, or 8 drams, or 576 graines.

A Pound is 12 ounces Troy.

The Strickles go along with this Measure, which
is a straight board with a staffe fixed in the side, to draw
over the Corn in the measuring, that it exceed not the
height of the Measure.

XLVII. He beareth Purpure, a German Sythe, Ar-
gent, the *Wandle* or *Staffe*, Or. Born by the name
of *Van Delough*.

This I term a German Sythe because they draw them
in their books of Heraldry, after this forme. Else you
may term it, an *Ancient Syth*, with the end of the
Swath, and one *Mogg*, *Potent*. Some only give
it the name of an Old fashioned Sythe. *se others much*
like this. chap. 9 num. 135.

XLVIII. He beareth Gules, a *Slade*, Or, and a
Cumbrell, Argent. These are things used by Car-
ters and Husbandmen, for the carriage of Commodities
from place to place.

The first is drawn along the ground by the strength of
horses, from whence it is termed a *Slade*, or *Sladge*,
because it Slides away. Some call it a *Plow Slade*.

The *Dragg*, is a thing also for carriage, and is of
the same nature to the *Sladge*: only it hath a Back of
cross peeces to stay any thing on it from slipping off, when
the forepart is raised up. For the two side peeces are so
long, that they will reach to the sides of an horse, where
the ends are made fast to the *Trill saddle*, and *Collar*:
That when the horse goeth forward it will Dragg after
him, from whence it tooke its name. Of the Welsh men
that follow husbandry it is much used, because they can
goe on the hills with them, where Wheels cannot turn.
It is like a Wheel Barrow without a wheel, some I
have also seen with two small wheels as the hinder end
of them iust under the back.

The second termed a *Cumbrell*, or *Muck Cart*,
or an *Horse Cart*, it is the least sort of Carts, it hath
two wheels, of which I have spoken before *num. 9.* the re-
maining part of such Carts are these.

*Parts of a Cart or Tumbrel, and Wain
or Team.*

*

A *Cart*, is when it is drawn by horses, and hath two
sides called the *Trills*.

A *Waine*, or *Oxe Waine*, when drawn by Oxen,
and hath a *Waine Cop*.

The *Trills*, or *Sides* of the Cart, which the horse is
to stand between.

The *Waine Cop*, that part which the hinder Oxen
are yoked unto to draw the Waine.

The *Trill Hooks*, and *Back Band*, which hold
the sides of the Cart up to the horse.

The *Belly Band*, which is fastned to one of the sides
and goeth under the horse belly to the other side.

The *Axle tree*, that on which the Wheel turneth.

The *Axell tree Pins*, two long Irons with round
heads, which holdeth the Axell tree to the Cart body.

The *Clouts*, or *Axell tree Clouts*, the Iron plates
nailed on the end of the Axell tree to save it wearing.

The two *Cross trees*, which holds the Cart sides
together.

The *Washers*, are the Rings on the ends of the Axell
tree. The *Linn Pin*, is to keepe the wheel on the
Axell tree.

The two *Cart Raers*, the Railes on the Cart top.

The *Cart Staves*, are those that hold the Cart &
the Raers together, which maketh the Cart Body.

The *Cart Body*, is all that part where the loading
is layd for carriage.

The *Cart Lathers*, are the Crooked peeces set over
the Cart wheels to keepe Hay and Straw from off them.
In an Oxe Team they are termed *Croopies*.

The *Slotes*, are the vnder peeces which keepe the
bottom of the Cart together.

The *Waine Cop*, is the long pece that cometh out
from the Cart body to which the Oxen are fastned.

The *Cop-lie* and *Pin*, are Irons that fasten the
Chain with other Oxen thereat to the end of the Cop.

A *Trigen*, is a thing to stop the wheel of a Cart
when it goeth down a steep place.

*Things that belong to Carts and Wains
for Horses and Oxen.*

Seeres, or *Chains*, are the generall terms for all
things that belongs to draught horses or oxen.

The *Trill homes*, are the peeces of wood made
fast to the collar about the horse neck, to which hooks
and the chains are fixed.

The *Homes*, are the wooden peeces themselves.

The *Collar*, is that put about the horse neck, made
of Canvis and Leather stufed with straw or wooll.

The *Chains*, or *Ropes*, are them as all the Horses
or Oxen draw by, all the length of the draught.

The *Street Staffe*, is the Staffe fixed between the
Chains or Ropes, to keepe them from gauling the Horse
sides. The *Throat band*, and *Buckles*.

The *Back band*, and *Belly band*.

The *Trill* or *Cart Saddle*, is that on the Hinder
horse, on which the Back-band of the Trill resteth to
hold up the Cart.

The *White*, or *Carters Whip*, a lash of Leather
and small Cord, ryed at the end of a long stick, to whip
forwards his horses.

V v 2.

The

The **Goad**, is a long stick with an Iron point set in the end of it. By this the Oxen are pricked to go forward. this is only used for an Ox-teame. *see n. 14.*

The **Fore-horse**, that as leadeth the rest of the drawing Horses. The **Trill Horse**, that next the Cart, and beareth the sides up with a Back band lying on the **Trill Saddle**.

A **Good Teame**, or a **Bad Teame**, are terms used according to the goodness, or badness of the Horses or Oxen, which draweth the Cart or Waine.

XLIX. He beareth Argent, a **Waggon Sable**, and the **Wheels** and **Carriage** of a **Waggon** of the same. Though I have set these in one square, yet they are two distinct Coats, as for example.

A. the Waggon G. Wheels S. is born by *Wagner*.

O. the Waggon Carriage S. is born by *Hirmane*. Some call this a Coach Carriage, but then it ought to have but one Pole.

A. 3 such in Pale to the Sinister S. born by *Kirberg*.

The several parts of a Wagon.

The **Shafts**, are the two pieces which the hinder Horse beareth up.

The **Welds**,

The **Slates**, the cross pieces which hold the Shafts together.

The **Boisier**, is that on which the fore-Wheels with the Axle-tree turn in Wheeling the Waggon a cross Road.

The **Chest** or **Body** of the **Waggon**, having the Staves and Rails fixed thereon.

The **Bushes** or **Hoops**, which compass the top.

The **Tilt**, is the place covered with Cloth in the end of the Wagon to sit in, and keep from foul Weather.

All the remaining parts about the Wheels and Axle Trees, are termed as before in the Cart or Wain.

Millers Instruments.

FROM the Instruments of Husbandry, which are useful for the increase of Corn, we proceed next to the **Millers Instruments**, which bruise and grinds the Corn, to make it useful for the good of Mankind.

L. He beareth Argent, a **Wind Mill Post** erected and supported with **Laces** or **Binding Beams**, **Sable**. This is born by the name of *Milposse*.

A. the like G. is born by *Van Millerberg* of *Alsacia*.

LI. He beareth Gules, the four **Sails** of a **Wind Mill** in **Salter**, Argent. Born by the name of *Windall*.

Parts of a Wind-Mill Sail.

*

The **Sail Rods**, the 4 long Poles which are fixed a cross in the Mill Shaft.

The **Rails**, or **Shrouds**, on which the Cloth is spread forth.

The **Sail Cloths**.

LII. He beareth Vert, the two **Shafts** of a **Wind-mill Sables** in Bend, Or. by the name of *Sailsch*.

On a Cap B. turned up A. 2 Wind-mill Sable Shafts S. is the Crest of *Durven* part of the *Rhine Palatinate*.

LIII. He beareth Azure, a **Wind-mill Or**, **Sails Displayed**, or **Spread** Argent, fixed on an hill issuant in base Vert. by the name of *Windmille*.

A. a Wind-mill S. born by *Miller*, or *Molendinare*.

The parts of a Wind-Mill.

The **Sill**, on which the Mill Post is fixed, lying cross on the ground.

The **Spurs**, them as support the Mill Post.

The **Mill Post**, or **Main Post**, that on which the Carcase or Body of the Mill stands and turns.

The **Stairs**, **Lather** and **Wheel** to turn the Mill about.

The **Stair Tree**, is the Post on which the Wheel turns.

The **Body** or **Carcase**, or out-side of the Mill, as *numb. 54.*

The **Sides**.

The **Port** or **Porch**.

The **Sail** or **Wind end**.

The **Cover** or **Roof**.

The **Fall**, to shew how the Wind blows.

The **Shaft**, that on which the Sail Rods are set.

The **Cog Wheel**.

The **Rowne Wheel**, that turns the upper Mill-stone.

The **Mill-stones**.

The **Bandet**, or **Mill-rinde**, a cross like Iron laid in the upper Stone to turn it.

The **Spindle**, which is fixt in the Mill Rinde and the Rown Wheel.

The **Hopper**, that holds the unground Corn in.

The **Sho** or **Shough**, the Corn by its shaking drops down into the Mill.

The **Back-staff**, that shakes the Shough.

The **Ring**, the Wood as keeps the Corn in grinding between the Stones.

The **Spout**, the place where the ground Corn cometh out.

The **Troagh**, which receives the Corn ground.

The **Lift**, that which raiseth the Mill-stones higher or lower.

LIV. He beareth Argent, the outward **Carcase** or **Bulk** of a **Wind-mill Sable** this is born by *Schiden*. Or blazon it a **Wind-mill Sans Sails**, or having lost it Sails, or without Sails. I have heard it termed a **Decayed Wind-mill**. B. the like O. is quartered by *Von Muelbiber* - *bach* of *Straßburg*.

IV. He

LV. He beareth Sable, a **Mill-Ston** Argent. By the name of *Millstone*.

B. 3 such A. is born by *Milinton of Milinton*.

G. one such A. born by *Ermreicher of Franckford*.

A **Peacock's** tail on the top of a **Millstone** A. is the crest of *Metlich of Saxony*.

The like A. set with a **Plume** of 6 Feathers contrary alling and interchanged G. & A. is the crest of *Spiler*.

LVI. He beareth Argent, a **Mill-Dick** Sable, and a **Rounce Wheel** of a **Mill** Azure. These severally I find born in coats of Arms of diverse families, as

S. 3 **Millpicks** A. by the name of *Maullesley*, or *Mosley*, alias *Pidon*.

The same with a **Chevron** betw. is born by *Mosley of Mosley in Lancashire*.

A. 3 **Rounce wheels** S. born by *Cogge* or *Coggey*.

B. one such O. is born by *Hickack*.

In the dexter base of this Square are erected two **Mill stones** one by the other, turning to the Sinister; which I find thus Blazoned. Two **Mill stones** to the Sinister, **Coerectant**, or **Covertant** A. in a field S. which is born by the name of *Erbach*.

Two such with a **Plume** of 3 Feathers between them on the higher sides, one contrary - posed to the other, G. and A. is the crest of *Van Eberspach*.

LVII. He beareth Azure, the **Inke** of a **Mill-stone** in **Bend**, Or; and a **Mill Wheel**, or a **Clock Wheel**, Argent.

This and the succeeding **Inke** of a **Mill** being things of length cannot supply the whole contentant of the Escuchion, therefore are very often removed to and fro therein, according to pleasure, and serve in place of a **Bend**, a **Pale**, or a **Fels** between other Charges; as for example, the Gentleman as beareth it, hath it in **Bend** between two **Martlets** Argent, by the name of *Martmille*.

A. the like in **Bend** S. between 2 **Martlets** G. born by *Mollin*.

There is some difference between a **Water Mill Wheel**, and a **Clock Wheel**, the first having many **Spokes** to make it strong and firm, whereas the latter being all **Steel**, **Iron**, or **Brass**, hath never more than four, which stand directly cross in the middle of the circumference of them, whose **Nave** is generally square, see numb. 9. and squares at the joining to the out-rim, as numb. 169.

B. a **Water Mill Wheel**, or an **Under shot Water Wheel** A. is born by *Mulner of Brunswick*.

G. 3 such O. born by *Watermille*.

V. a **Clock Wheel** O. born by *Maller of Alsatia*.

O. the like S. born by *Van Wedel*.

G. the like A. by *Muller Van Aspach*. The like Wheel is the Crest of *Loselin*.

LVIII. This is another form of drawing the **Inke** of a **Mill-stone**, which our modern Heralds call the **Inke** or **Rinde** of a **Mill**. Millers term it in English a **Brant** or **Mill Rinde**.

LIX. He beareth Azure, the **Wheel** of an **Over-shot Water Mill**, Or. This is termed but erroneously by a **Water-Mill Wheel**; in which Blazon we cannot understand what sort of **Water-Mill Wheel**, for there is a great difference between the **Wheel** of an **Over-shot Mill**, and an **Under-shot Wheel**; the first having the **Ladles** of the **Wheel** within the **Rim**, and made close like so many **Wooden Troughs** fixed about to retain the **Water**, by the weight whereof it is forced about. But the **Under-shot Wheel** hath the **Ladles** or **Scopes**, set on the out-side or top of the **Rim** of the **Wheel**, and stands open, as all the **Spokes** and **Fallows** of the **Wheel** do; so that in short, one is a **close Wheel**, and the other an **open Wheel**. This is the Coat Armour of *Nicholas de Moline*, a Noble Senator of the State of *Venice*.

LX. He beareth Argent, a **Ferre de Moline Rote** (or rounded) Gules. This is born by the name of *Mollin*. This is also termed a **round Mill Rinde**, or **Inke** of a **Mill**, and cannot have a better term than **round**, given it; because it is both pierced and formed round, and is the antientest of any of these forms that ever I read of, or saw depicted, which was also thus of old Blazoned, a **Sautter Ferdon**, **couped** and **pierced**.

In the chief of this square, is fixed another kind of **Mill Rinde**, **Nowy** in the middle pierced, the ends **Potent**; and therefore may fitly be termed the **Inke** of a **Mill stone Fels** ways, **Nowyed** and **Potent**.

B. 3 such in **Pale** A. is born by *Zachines of Venice*.

A. the like erected S. is born by *Van Koten*.

LXI. He beareth Argent, a **Quadrant Ferre de Moline**, Sable. This may well bear this Blazon, because of its quarter piercing; being also of a four square form of making. This is born by *Quatormoll*.

A. 3 such S. is born by *Ferrall*.

LXII. He beareth Sable, a **Cramp Mill Rinde**, Ermin. This is so termed in respect of the resemblance it hath to an **Iron Cramp**, another Instrument used amongst **Mills**. Some call it a **Cramp Salter** like; this is very Ancient, and is born by *Milrine*.

A. 2 **Mill Picks**, and such a **Cramp Rinde** S. is quartered by *Halme of Holme*, in *Redish*, in *Com. Lanc.*

LXIII. He beareth Vert, a **Crab Ferre de Moline** Argent. Born by *Malcrab*. So termed from its likeness to the **Crab Fish**; in which respect it may be also Blazoned, a **Frog Ferre de Moline**, because of its resemblance to that Creature; these are all of the old way of depicting them, the modern are these as follow.

LXIV. He beareth Azure, a **Ferre de Moline**, Or. Born by *Molynex*. This is one way of drawing the modern **Mill Rinde**, or **Inke** of a **Mill-stone**; and is of all others the nearest in form to the true **Mill Rinde** used by **Millers**, according to the which all Heralds ought to delineate those, whom they at any time to come, have occasion to make.

B. 3 such O. born by *Molynex*.

Er. one such B. by *Molynex of Yalers.*

LXV. He beareth Gules, the **Inke of a Mill**, **hooked**, Or. So I have seen it termed, but I take this to be of no great note, worthy observation from the other; if there be, in preciseness of Blazon, then let it be called a **Mill Rinde molined**, because the ends turn like the Crois Moline.

These are also born Barways, or traverse the Escuchion, as G. 3 *Per-de Molins* Barways S. which is a *German* Coat, and quartered by the name of *James of Halsborow* in *Kent*.

LXVI. He beareth Sable, a **Mill Rinde pointed**, Argent. This is way of the modern drawing of them.

Now here it is to be noted, that these **Ferte de Molines**, **Mill Rindes**, **Inkes of Mills**, or **Mill Wandlets**, call them which you will, all which names signifie one and the same thing; they are ever pierced square, but that you need not to mention in their Blazoning, because it naturally belongs to them.

Builders Instruments.

NOW for a few Instruments and Tools belonging to Labouring Artificers, as **Masons**, **Bricklayers**, **Pavers**, **Slaters** and **Plasterers**.

LXVII. He beareth Azure, on a **Ground Plot** fixed to the **Dexter Vase**, Vert, an Engine called a **Crane**, Argent. This is a thing like a Wind Mill House, fixed near to the Key of a great or Navigable River, by the help whereof great and massy weights are taken off the Shoar, and laid in Ships; and so on the contrary from the Ship to the Land, by the strength of one Man.

LXVIII. He beareth Argent, an Engine called a **Turne**, or the **Turne Engine**, Gules. This is another thing by which great Weights are lifted up, and is much used for the taking up of large **Mill-stones** of the Mill, when they are to be new Picked.

LXIX. He beareth Vert, a **Windlass**, Argent. This is a third sort of Engine, used much by **Masons**, **Carpenters**, **Plummers**, **Brick-layers**, and such like Artificers, for the lifting up of massy Weights to the top of Houses, Churches and Steeples, by the help of Ropes and Pulleys fixed on high.

LXX. He beareth Argent, a **Pick** Azure, **Handle** Sable. This is also termed a **Pavers Pick**; and of some a **Pick-Axe**. It hath a long head and back part, that it may strike deep into the ground: There are other sorts of them as they have been made of old, as *numb.* 72, 73, 74. but this is the modern shape of them.

S. 3 such A. born by the name of *Pigott*.

A. one such S. **Handle** O. born by *Newenstein*, of *Francford*.

S. the like, A. born by *Reinsperger*.

G. 3 such A. **Handle** O. by *Stoltzen*, and *Van Bickelheim*.

LXXI. He beareth Azure, a **Mattock**, Argent, **haume**, or **Handle**, Or. This is an Instrument by which Labourers do dig and sink into the Earth withal, when it is hard and stony, or of a Clay like substance; the one end of it being broad, and the other sharp pointed. This is born by the name of *Mattock*.

Per Fess A. and S. 2 such counterchanged, born by *Diggerall*.

LXXII. He beareth Argent, a **Pavers Pick**, Azure, **Handle**, Or. This is an Ancient **Pavers Pick**, having the handle to go into a socket at the head end of the Iron. Three such as is before Blazoned is born by the name of *Van Parvarge*.

And A. 3 such S. **Handles** O. by *Pickall*.

LXXIII. He beareth Argent, an old fashioned **Pavers Pick**, with a short flat face, Sable. This I drew from an old Coat but could not learn the name of the Bearer.

In this square I have caused a **Billet** to be set, of which I shall say more, *numb.* 82. This is by Mr. *Gwillim* taken to be a **Paper** folded up in form of a **Letter**.

G. 10 **Billers** O. by the name of *Cowdrey*.

A. **Biller** S. by the name of *Belvale*.

A. 4 **Billers** G. born by *Stoltzen*.

LXXIV. He beareth Gules, a **Pavers Pick** pointed at both ends Argent, **Handle**, Or. This much resembles the **Mill Pick**, only this difference there is, that goes through the **Stock** or **Handle**, and is there wedged; this the handle goeth into the **eye** or **socket** of the Iron, and is secured there that it move not.

S. 3 such A. with a **Chevron** between charged with 3 **Mullets**, is born by the name of *Maullesley* of *Staffordshire*.

LXXV. He beareth Azure, a **Slaters**, or a **Plasterers Hatchet**, Argent; the **Handle**, Or. This is a kind of **Hammer-Hatchet**, the one end being made like the **Hammer-face**, cross nicked, like a rough File, and the other end like an **Hatchet**; so that it is made both to drive Nails, and cut Laths or other small Timber. An Hand holding such an **Hammer-Hatchet**, **Sleeve** Gules, turned up Argent; is the Company of **Plasterers Crest**; they bear the like also in their Coat, as you may see *numb.* 89.

LXXVI. He beareth Argent, a **Masons Mallet**, Gules; between two **Wedges**, Sable. By the name of *Maulmege*.

A. 3 **Mallets** G. by the name of *Forte*.

O. 3 such S. born by *Gamull* of *Chester*, a **Worthy** Family there, the last of the principal Line was Sir *Francis Gamull* Knight and **Barronet**, Governour of that Loyal City for the King in the Wars 1643.

The **Mallet**, when it is large, and a long **Stail** or **Handle**,

Handle, is termed a **Maul** by Wood Men; but a **Commander** by Masons and Stone Getters: Also that **Carpenters** give it, who use it with an handle about 3 foot or more long, to knock on the corners of framed work, to set them into their places.

LXXVII. He beareth Gules, a **Crowel**, Argent, handle, Or; and a **Wick-Axe** of the second. By the name of **Brickman**. The Brick-layers have several names for this kind of Axe; it is called a **Salter**, a **Cutting Axe**, with the denomination of Bricklayers added thereunto; else by the term, it would be taken for a contrary thing.

G. a Chevron between 2 Bricklayers Salters A. and a Mallet O. is the Company of *Masons* Coat.

LXXVIII. He beareth Gules, a **Brick-layers** or **Masons Plumb-Rule**, Argent; with **Line** and **Plummet** pendant, Sable; between one of their **Joynters**, and a **Cutting Axe** or **Salter**, Or. These are all Instruments and Working Tools belonging most especially to Brick-Men.

The **Plumb-Rule** sheweth him whether his Walling doth both range straight, and stand upright; which is manner, there may be a timely mending.

The **Joynter**, is to make smooth the Joints between the laying of each Brick or Stone. And 3 such A. in a Field G. is born by *Joynter* or *Joyner*.

The **Salter** or **Wick-Axe**, or **Cutting Axe**, is to cut the rough and knotty places of Bricks, to make them lie flat and even in the Bed of Mortar; but more especially it is used for the **Camphering** or cutting of Bricks, for **Cornishes** and **Splaving** of an **Angle**, or **rebating** of a **Corner**, and such like, where Bricks are sometimes cut half or quarter round, sometimes square, &c.

B. a Chevron O. between 2 Brick Axes A. and a Bunch of Faggots of the second; in chief a Flower de lis of the third, is the Arms of the Company of Brick-layers in the City of *Chesler*.

LXXIX. He beareth Or, a **Level**, Gules; with its **Line** and **Plummet**, Sable; in chief a **pointing Crowel**, Azure; handle, Or. This is called also a **Water Level**; the use is to lay all ground Plots straight and even, and therefore much esteemed by Carpenters, Pavers, and other Trades-men, which have occasion to lay any **flats**, that they may be laid without swellings or fallings.

A **Pointing Crowel**, is long and narrow in the flat or face part, with which Joints and Creeks and Crevices, are filled with Plaster and Mortar. A. 3 such points erected G. is born by *Tromell*.

LXXX. He beareth Azure, a **Level**, Or, with the **Line** and **Plummet** pendant, Sable. This is the only Level without any other Addition or Substraction, being an Instrument that will plainly declare the fall and rising of the parts it stands upon, thereby to make it even with less difficulty. This is born by the name of *Leveller*.

*

LXXXI. In this quarter I have placed three sorts of **Billets** or **Stones** for Masons work, as I have seen them drawn of old, which for distinction may be thus termed.

The first a **square Billet**, or a **square Stone Billet**, or a **square Ashler**, because it is four square in its breadth, and being long makes it to be Blazoned a **Billet**, which is any thing, be it Paper, Wood, or Stone, or any Metal that is square and long; or a long square.

The second is a **Billet**, or a **Stone Billet**; Masons and Brick layers in their terms will call it either an **Ashler**, or a **Wick**, or **Wick-Bat**, because the breadth is larger than the thickness, and the length more than the squareness.

The third is a **Billet** made after the old manner, rather square than long; and hath been termed, as thus it stands, both a **Billet**, and a **Stone Billet**. This is by Artists called a **Parallel side Billet**, or a **Bevil Billet**, because the sides are of an equal length, but the ends run askew.

LXXXII. He beareth Argent, a **Wick** and a **Tile**, Gules: These are severally termed by Work-men, both ancient and modern, as

The first is called a **Wick**, or a **Wick Stone**, or **Wick-Bat**, whose thickness is not half that of the breadth, being a long square, having the Angles right but not of equal length, the sides oblong to the ends.

The second is a **Tile**, or a **square Tile**, whose superficies is of an equal breadth, but much shorter of it in the solid or thickness.

Some term this a **D life**, because of its squareness, but in a **D life** there is nothing of a thickness to be seen as there is in this: for in these things you are to take notice that there is a great difference in things of thickness or substance, and the like things which carry no thickness at all; as in this of the **Tile** and a **Deisse**, a **Fels couped** and a **Plummet**; as lib. 1. cap. 4. numb. 53. 64. and of a **Billet** and a **Stone**, and a **Billet** or an **Ashler**, as numb. 73. 81. 82.

LXXXIII. He beareth Argent, a **Roman Tile** and a **Stone-Billet**, Gules, the latter charged with an Imbossed Work of Flowers and Branches.

The first is termed a **Roman Tile**, by reason such have been often found in the Earth with *Roman* Letters upon them, made as is very certain by the *Roman* Legion Soldiers when they inhabited these parts: Several have been found in Vaults and Cellars in *Chesler*, having these Letters moulded thereon, I EG. XXV. V. signifying *Legio*, *Vicesimus Quintus*, *Victrix*; that the 25 Legion called *Victrix* was Quartered here. These Tiles are generally a foot or 14 inches square.

A. 3 Roman Tiles G. born by *Roman*.

The second is a **Stone Billet** adorned with **Carved Work**, which kind of Billets are often born by the *Germans* and *Dutchmen*: As Argent, three Stone Billets, Carved, Gules. Born by the name of *Billetting*.

O. such

O. such a Stone-Billet G. born by *Bellgerve*, or *Van Bellgeron*.

LXXXIV. He beareth Azure, a *Falce*, or *Bundle*, or *Bunch* of *Laths*, Or. By the name of *Falser*. See *lib. 2. cap. 3. numb. 86*. How this is severally termed according to the Coat it belongeth unto.

B. a Cheveron between 3 such O. is born by the *Slaters Company*.

LXXXV. He beareth Argent, a *Wheel-Barrow*, Gules. This is an Instrument used much by Workmen of the Trowel, for the Transporting of their Materials (for the work) from place to place; and though the thing carried be of a great Burthen, yet by the help thereof, and the Labour of one Man, it is with much ease brought to the place designed.

In the chief of this square, is another kind of *Pick* than what is mentioned formerly, having nothing but a sharp point; and an eye at the contrary end to fix an *Handle* in; this hath the only term of a *Pick*, and no more. Three of these A. in a Field S. is born by *Pigott*.

LXXXVI. He beareth Argent, a *Barrow*, Gules. By the name of *Barrow*. This is also termed a *Bearing Barrow*, because Burthens are carried on it between two persons: Also an *Hand-Barrow*, being supported by hands, to distinguish it from the Barrow that runneth upon a Wheel.

S. the like between 3 *Roses* O. is born by *Bearwell*.

G. 3 such in Pale A. born by *Corbuz*.

LXXXVII. He beareth Azure, a *Pavers Mault*, or *Mault*, Or; the *Staple* and *Ring*, Sable. This I found among a parcel of *Dutch Coats*, by the name of *Van Stoufou*: And I could give it no fitter a term, seeing it hath the near resemblance of the *Pavers Maults* used in our Country; if it be any other thing, pardon my mistake; as I take it, they term it *Houten Beytel*, or *Houten Hamer*, a *Wooden Mault* or *Beetle*, by means whereof the *Paved Stones* are beaten and driven close together into the ground.

LXXXVIII. He beareth Argent, a *Pavers Mault*, or *Mault*, or *Mallet*, of some termed a *Diver*.

Here I have set two forms of making them, the one a solid piece of Timber with a handle set on the side, for the more easie lifting of it, having a place on the top for the other hand, to hold it also by.

The other being a *Chub* or *Log of Wood*, with a *Staple* or *Stake* fixed therein, and a *Handle* on the side, to lift it up thereby, but the former is more used.

A. the like S. born by *Mauilet*.

G. the like O. is born by *Paverheim* of *Holland*.

LXXXIX. He beareth Gules, a *Plasterers Whitening Brush*, Argent. These kind of Artificers have generally two sorts of *Brushes*, the one set crooked or bending on the end of a *Staff*, which is put into it,

according to that length the Work-Man is to reach.

The other is an *Hand Brush*, having an *Handle* about half a yard, or longer (for shorter they are not to use) by which they lay *Whiting* and *Russet*, within their own compass or reaching, which kind of Brush is here set in the second place of this quarter, and belongs to their Coat, *Viz.* Azure on a Cheveron Argent, a *Rose Gules*, and two *Flowers de lis* of the first, between as many *Hammer-Hatchets* and a *Whiting Brush* of the second, their *Handles* Or. See *chap. 9. numb. 160*.

Sadlers Instruments.

4. THE next is the Ingenious *Sadler*, whose Workmanship and Tools by which such Works are wrought, shall follow in their order; some here, the defects will be made up in the latter end of this Chapter, with what hath been short of other Trades, already spoken of.

XC. He beareth Gules, a *Triumphant Chariot*, Or. This kind of open Chariot, the *Roman Emperours* and *Generals* were wont to Ride in, when they had their solemn *Triumphs*, after the obtaining of great Conquests. This is born by the name of *Victor*.

B. 3 such O. is born by *Verblyden*.

XCI. He beareth Argent, a *Sedan*, with its *Poles* or *Staves* in their places, Sable. This is a thing in which Sick and Crazy persons are carried abroad, which is born up by the Staves by 2 Lusty Men. This is quartered by *Voyten* of *Barbaria*.

A. 3 such (sans Staves) S. is born by the *Sedan* or *Coach-makers* of *London*. Some call them *Carrying Chairs*.

XCII. He beareth Sable, a *Saddle Stirroped*, Or. By the name of *Sadler*. The Saddle is very often born in Arms without the *Stirrops*; as the *Stirrops* are without the *Saddle*; and therefore when both are fixed together they are to be mentioned. Now if the several parts be of diverse colours, then Blazon it thus, a *Saddle* of such a colour; the *Seat* such a colour; the *Pommel* and *Stirrops* so or so; for in the Blazoning of them, there is no more parts used of contrary colours in Armory.

A. 3 such Saddles Stirroped S. born by *Gwalchmai* of *Wales*.

O. a Saddle the *Pommel* to the *Sinister* G. born by *Sattel'n*.

B. a Cheveron between 3 Saddles Stirroped O. is the Company of *Sadlers* Coat of Arms.

The Ancient *Romans* had no such use as *Saddle* and *Stirrops* for their Horses, as we have, neither was any put in practice until the time of *Constantine*, Anno 341 as we may learn of the *Greek Historian Zonaras*, who (throughout

(throughout his whole History) maketh not any mention of a Saddle for a Horse, before such time as Constantine seeking to deprive his Brother Constantine of the Empire, made head against his Army, and entering into the Squadron where himself was, cast him beside the Saddle of his Horse.

As for Stirrups, termed in Latine *Stapedes* and *Staphia*, the Antient Romans had never any knowledge of them, as to contain and keep a Man fast on Horseback: but such of them in Rome, as were Noble Men by extraction and Knights, and others besides, that made use of Horses Service in Actions of War; they never had any Stirrups whereby to mount upon their Beasts, but leapt up lightly upon their Backs, without any other help or advantage. This was termed a Mount on the Corde.

The several sorts of Saddles.

A **Riding Saddle**, is a small one with round Skirts.

A **Buffum Saddle**, hath the Seat plain, and the Skirts plain and straight.

A **Pad Saddle**, of which there are two sorts, some are made with Burs before the Seat, others with Bristles under the Thighs.

A **French Pad Saddle**, the Burs of it come wholly round the seat.

A **Portmanteau Saddle**, hath a Cantle behind the seat to keep the Portmanteau or other Carriage off the Riders back.

A **War Saddle**, hath a Cantle and Boulster behind and before; also a Fore-Boulster.

A **Back-saddle**, see numb. 95.

The parts of a Saddle.

The **Tree**, or **Saddle Tree**.

The **Tree**, is the Sinews glewed on the Tree to strengthen it.

The **Gullet Plate**.

The **Binder Plate**.

The **Bags**, are little Staples fastened to the Saddle Tree, to hang the Stirrups, and the Leathers to Girth.

The **Stirrups**.

The **Straps**.

The **Web** fixt on the hollow of the Tree to keep the Seat up.

The **Seat**.

The **Skirt** of the Saddle some are round others square.

The **Crupper Buckle**, or **Crupper Loops**.

The **Pommel**, or fore-part of the top of the Saddle.

The **Pommel**.

A **Pad**, a soft Seat fixed on the Saddle for old Men to Ride upon.

The Appendances of a Saddle.

The **Girths**, and its **Buckles**.

The **Crupper**, its - - - - - and the **Trappings**.

The **Stirrups**, and **Leathers** and **Buckles**.

The **Breast Plate**, with its **Pendell**.

The **Bridle**, with all its Appendments, as Bit or Snaffle, the Head Stall, the Filler, the Throat Band, the Nose Band, the Rains with its Button and running Button and Loop.

XCIII. He beareth Gules, a **Stirrop**, Or; **Leathered** and **Buckled**, Sable. By the name of *Stirropach*.

B. 3 such O. born by the name of *Gifford*.

G. the like O. born by *Scudamore* of *Overtown*.

XCIV. He beareth Azure, a **Stirrop**, Or. By the name of *Hirronbough*. Three such in the like Field, is born by the *Stirrups* of *Cheshire*.

G. 3 Stirrups A. both by *Stafast*.

B. 3 such O. born by *Onely* of *Onely*.

XCV. He beareth Gules, a **Back-Saddle**, Argent. Born by the name of *Carrier*.

S. 3 such O. born by *Malbeck*.

In the chief of this square, is the form of a Saddle, which Saddle term a **Pad-Saddle**, or **Cravelling Saddle**, of which form the *French*, *Dutch* and *German* make all their Saddles in Coats of Arms; whereas we generally make them after the mode of the **Great Saddle** or **War Saddle**, which is accounted the chief of Saddles. G. 3 such O. is born by *De la Damppe*.

XCVI. He beareth Sable, a **Saddlers Hammer**, Argent; the **Hammer**, Or; on the dexter side of it, a **Buckling Awl** of the second, the **Head** of the third. By the name of *Hammerall*.

S. 3 such Hammers A. Handles O. is born by *Sandamer*.

G. one such A. is born by *Kekell*.

B. 3 Buckling Awls A. Heads O. born by *Pennall*.

XCVII. He beareth Argent, a **Shaloon**, or turned to the sinister side, Sable. This is a kind of **Diminutive Coach**, which runneth upon two Wheels, and holdeth two people; it is drawn with one Horse, and is guided by him that sits in the Shaloon, by a long pair of Reins, from the Horse's **Bridle Bit**.

XCVIII. He beareth Or, an **Horse-Litter** fixed in its **Carriage**, Sable. This is a thing to carry Sick and Infirm people in, from place to place; it is supported and carried between two Horses. This, thus in Fesse is born by *Lottor*.

The like S. between 2 Martlets, and a Dog G. in a Field A. is born by *Walsch*, or *Van Walscher*.

XCIX. He beareth Or, a **Wagon**, Sable. This is a thing to carry heavy burdens, it is supported and carried between two Horses. This, thus in Fesse is born by *Lottor*.

T O

His Dear Kinsmen

Mr. WILLIAM BIRD, of London, Merchant.

A N D

Mr. THOMAS BIRD, of the City of Chester, his Loving Brother.

TO whom the Dedication of this second Plate of the eight Chapter of the Academy of Armory, as contributes to so great a Work, is most heartily Presented, from him who is their Loving Cousin in the first degree.

Randle Holme.

C H A P. VIII. Plate 2.

Weavers Tools.

5. **I**N the fifth Chapter of this Book there is an omission of some Instruments belonging to the Weavers and Sho-makers, which I thought good to put in the latter end of this Chapter before I proceeded to other Societies.

XCIX. He beareth Sable on a round foot or stand of two heights Argent, a pair of Broad Parringle Blades at each end and in the middle, the pins heads in form of the leaves of a Flower de lis, Or. This is born by the name of Curry. This is of some termed a Cross Parringle, the Pins flat.

Out of a Crown the like Cross with Flower de lis pins, Or, is the Crest to the Duke of Burgundy in France. This is also Blazoned a Salter coupe, perforated through the middle with a round headed staff, fixe on a Block of two Gules; at each end a Leaf of a Flower de lis, Naissant.

C. He beareth Sable, a Weavers Warping Trough, Or; in Base a Shearmans Burling Iron Feilways Argent. The Weavers Trough is that in which he puts his Clews of Yarn, when he runs them

off for Warping; it is a long Box or Chest, with 19 Partitions in it, with 3 Standards or more, and two over-crofs peeces, to which is fixed as many Rings as there is partitions, through which the Yarn runs.

CI. He beareth Azure, a Weavers Raeth capped, Or; between 2 Shearmans Burling Irons, Argent. Born by the name of Goodaker. The Raeth is a thing like a Rake, with the Teeth set upright, and the Cap is a Staff full of holes in which the Teeth of the Raeth are put: The Raeth keeps the Yarn in Warping, that they shall not tangle or twist one with another; and the Cap keeps the Threads of the Beere from flying out of their places.

The Burling Irons, are kind of Crooks, which fly open of themselves, with them Knots and other large Threads are picked from the Cloth by the Shearman before he do any other kind of work at it. The Irons are made of three several fashions, all which I have set down under this and the precedent Figure.

S. a Chevron between 3 Burling Irons A. is born by Burland.

G. 3 such A. is born by Burler or Burlinger.

CII. He beareth Argent, a Weavers Temple in Feil,

Fig. 1. Fig. 2. Fig. 3. Fig. 4. Fig. 5. Fig. 6. Fig. 7. Fig. 8. Fig. 9. Fig. 10.

Fels, Or, between a Ribbis in chief, and a Brush and a Centry Hook in Base Argent. These are Instruments of two Trades.

The Ribbis belong to the Weavers, and are two Staves with broad ends set with sharp Pins, which being laid together, may be stretched out to any reasonable breadth as Cloth is made; and by the pins putting into the selving of the Cloth it is kept open while it is in Weaving.

Shearmans Tools.

The Ribbis, is a piece of Plate Iron, cut with Teeth like a Saw; with it the Cloth Worker lays the Wool of the Cloth by drawing it over the same.

A. 3 such the Teeth reversed S. is born by Ribbis.

The Weavers Starching Brush, is a long square Bristle Brush; with it he Starcheth the Yarn to make it work the better.

A. 3 Brushes G. Bristled O. is born by Sexew.

The Centry Hook, is a Nail with a crooked head, yet sharp pointed, that it may strike into any thing hung upon.

A. 3 such Hooks S. is born by Tentrym.

CIII. He beareth Gules, a Clothiers Frise Board, and his Whisk defaced or cast down, Or. By the name of *Wisk*.

The Frise Board, is that by which the Cloth after it is sheared, hath a Nap or Curl put upon it; from which kind of Working, the Cloaths so wrought, are termed Frises, or Frise-cloth.

A. 3 such S. born by Frisball.

B. 3 such Whisks erected. Born by Wiske.

The Whisk is a kind of White Rod made of Birch, or other small Twigs stript from its Rinde or Bark, and bound up close together, with this kind of Brush any Dust or Hair, or such like, will sooner be Beaten or Whisked away, than with any other sort of Brush. See chap. 7. numb. 92.

G. a Whisk O. born by Haslings.

S. one such A. born by Wiske.

CIV. He beareth Azure, a pair of Clothiers Shears, Argent; and the Shear handle Or. Though they be here set in one quarter, yet they are distinct Bearings: For B. the like Shears with the ends erected A. is the Coat of *Van Hagen*.

A. two pair of such, points erected G. is born by *Die Marschalek van Gosmanshausen*. And A. the like two pair S. is born by *Van Kekech*.

O. a Salter between 4 pair Clothiers Shears G. born by *Gennep*.

The Handle of the Shears is much used in Arms, and if they be but narrowly looked into, I believe there will be but little difference found between the old fashioned *Clarion*, or *Rest*, which some take for this thing, and others for that, and many for I do not know

what; whereas if I may declare my Judgment, it should be absolutely for this, there being nothing more like to it than the Shear handle, which is bound upon the back of the Shearing side, that the Work-mans hand may be preserved from the back edges, which would soon fret and gall the hand most grievously, if it were not hereby secured.

S. 3 such Handles A. born by *Sarrait*.

G. 2 such and a Rose A. is born by *Martymars*.

CV. He beareth Gules, a Clothiers Hand book for his Shears, Argent. This is used by the Shear-Men, and is fixed to the Shears, thereby to ease him in the weighty handling of such large things.

CVI. He beareth Vert, a Centry or a Clothiers Centry, Or; the Hooks, Sable. The Centry is for the drawing out of the Cloth after it hath been Milled; being an help to the Work-man to pull it out again, if through neglect of the Mill he hath over thickened it. This Trade of Milling or thickning Cloth is termed Fulling, the Workman a Fuller, and the Mills Fulling Mills.

CVII. He beareth Argent, a pair of Wool shears, Azure, or a pair of Wool Shears, the points reversed and extended in form of a Chevron. Born by the name of *Cubeck*. See chap. 6. numb. 28. 35.

A. a Salter between 4 such reversed G. Born by *Mekern*. The like Coat only changing the Colours, is born by *Spannerback* of the nether Rhine.

CVIII. He beareth Sable, on a Clothiers Pirch Or, a peece of Cloth pendant, Argent. Born by the name of *Rower*. Some term it a peece of Cloth Pirched, ready for the Rowing.

There are several sorts of Cloth made of Wool, which according to their making, have several names, as

Flannel, or Glannen.	Drap de Berry,
Bays,	Fustian,
Kersey,	Bumbast,
Penyston,	Linsley Woolsey,
Frise,	Cloth Serge,
Broad Cloth,	Sey,
Spanish Cloth,	Crape,

Cloths made either of Silk, Hair, or Jersey, or mixt together.

Housewives Cloth made of Hemp or Flax.

Course Cloth.	Sack cloth,
Reedings,	Tick for Beds,
Canvice,	Dowlas,

Scotch

Scotch Cloth,
Callicoe,
Kencing,
Muslin,
Cambric,

Lawne,
Holland,
Tiffany,
Gawle,
Birds Eye,

CIX. He beareth Jupiter, a peece of Cloth over a *Pard*, Sol. This was the Coat or Devise of *Saldach* Emperour of *Turky*. Other Masters of the Art, Blazon it a *Pard* in chief, with a peece of Cloth cast over it, and pendant towards the Base.

CX. He beareth Argent, a Wheel Feathers or Fly, with its Quill and Wharve fixt on the Spindle, Gules. By the name of *W'horse*. This is a part of the Spinning Wheel, of which I have formerly spoken *chap. 6. numb. 11.*

CXI. In this square are two sorts of Peggs, the first is termed a Bone Lace Peg, with which Bone Lace, Flanders Lace, and Silver and Gold Lace is Woven upon round Cushions, by Bone Lace Weavers sitting on the Breech.

The second is a Bobbin Peg, with which all your Bobbin or round Laces are Woven, whether they be of Thread, Silk, Silver or Gold:

S. 3 Bone Lace Pegs O. is born by *Bonlace*.

G. 3 Bobbin Pegs O. Hooks S. is born by *Peggs*.

Shoemakers Tools, or St. Hugh's Bones.

6. **L**ET not any of my Fellows or Masters of the Gentle-Craft, take it in ill part, that all their Tools were not set together, seeing *St. Hughes Bones* ought not to be separated; for I do declare, it was not mine, but the Informers Fault, that gave them to me so mincingly, as if he had been afraid I should have robbed him of his Art; in which I did rest satisfied, till a more Ingenious person informed me of the whole, which take as follows.

CXII. In this quarter is, the Shoemakers seat fixt on a ground Plot in Base. On this seat upon the right hand of the Work-man, is made several Divisions, whereof one is for his Wax and Thread, another for his Awls, and another for the rest of his Tools, so that what he wants he can easily put his hand to without confusion or tumbling of the rest.

In the chief is the Shoemakers Measure, by which he taketh the length or size of all feet, whether Children, Men or Women: As for the Terms of each length I have spoken of them elsewhere, *chap. 3. numb. 36.* to which place I refer you, only here shewing you the said Measure, which is so made that it runs one piece into another, that the Feet at each end coming together, makes one perfect Shooe.

*

S. the like in Fels between 3 Awls O. Blades A. is born by *Measure*.

In the Sinister Base is a Punch, which is only to make holes in the upper Leather for Shooties or Buckles, to make the Shooes fast on the feet: There is two sorts of them, the common, of which this is a figure, and the more gent and neat Punch, of which you have the shape of one, *numb. 114.*

G. a Cheveron between 3 such A. born by *Puncher*.

S. 3 such A. born by *Holer*.

CXIII. In this quarter are three sorts of Hollin Sticks used by *Cordwainers*; not that they are made of Hollin Wood, but a peculiar name so given them, with them they burnish and polish the upper Leather, and files of the Sole Leather; also by the sharp ends they run Riggets, and score the Leather with what Devils they please.

B. 2 Hollin Sticks O. and a Ball of Wax A. born by *Stitchell*.

In the Sinister chief is a Ball of Shoemakers Wax, to Wax their Thread, which they call stitching Thread, and Stitching or Catching ends; without which they cannot work, or let a Stitch in a Shooe; only this perplexity it hath with it, in the Winter it is so hard that it works none but before a Fire, and in the Summer it is so soft, that it must constantly be kept in Water.

CXIV. He beareth Sable, a pair of Pincers, or rather Nippers, and a Punch, Argent. These are to be termed Shoemakers Nippers, being contrary in the Stacks to common Pincers, as having a sharp point in the end of one; and a flit in the other, to strain up a Tack or Nail: There are two sorts of them, as in the text, *numb. 115.*

In this square is the Figure of the genteel Punch, of whom I spoke before *numb. 11.* and this may not unfitly be born by the gentlest Subject, being an Emblem of Safety, for by the help thereof both Samuels and Shooes are made secure on the feet, by which means we may Go, Run, or Leap, without Jeopardy.

CXV. He beareth Gules, a pair of Pincers, or Hammer Pincers extended or laid open, Argent. Born by the name of *Pinch*. This kind of Instrument (as the Nippers above said) doth perform the office of an Hammer, both to drive a Nail with the flat place at the pinching part, and also to pull out a Nail or Tack by the bottom nicked part; so also it can with its point either Bore a hole, or prize up a Nail sunk too deep into the Sole or Last, besides the pinching part which is Toothed for diverse uses, as to draw out the Leather, force out a Tack.

S. the like extended in form of a Cheveron A. between two Awls, and a Rowl or Knot of a Catching Thread, is the Arms of the Company of Journey-men Shoo-makers in the City of *Chester*.

In the Sinister chief is a pair of Wedges, these are

to raise up a Shoe in the in-step, when it is too straight for the top of the foot: **Shoemakers** love to put Ladies in their Stocks; but these **Wedges** like Merciful Justices, upon Complaint soon do ease and deliver them.

In the Sinister Base, is placed the **Lead or Cistern**, that being filled with Water, and set in a cool place, keeps their Balls of Wax from running about, and makes them so indifferent hard that they may be wrought with.

CXVI. He beareth in a Field Azure, three Wooden Tools of the Shoemakers in Pale, viz. the **stitching Stick**, the **fore-part Stick**, and the **long Stick**; all three useful for them, but seeing I can find none such in Arms, I pass them over.

CXVII. He beareth Argent, an **High Peel shoe Pinked Sable**, **Soled**, Gules. Born by the name of *Shoe or Shone*. This is a Shoe of the Gentlest fashion, which I have set amongst the Tools, because my Engraver did not do his part, in making those Shoes in chap. 1. n. m. 96. B. 3 Spanish Leather Shoes A. born by *Calshie*.

A. a Fess G. between 3 such S. Soles and Pinked of the second, by the name of *Pinderf*. That is termed the **Pinking** of a Shoe, when the grain of the Leather is raised by a sharp pointed Tool, that the inner part is seen; which is done in a certain order, and also into Roses and Flowers, as they fancy.

In the Base of this quarter, is placed the **Shoemakers Creps**, they are for the stretching out of the leg of a Boot that pincheth, or is too straight for the Leg and Calf; it goes with a Running **Wedge** in a **Rigget**, between two other peeces of Wood cut in the shape of a Leg.

Tanners Instruments.

7. **WE** shall give you some examples of the **Leather Canner**, and the Instruments by which such Works are performed.

CXVIII. He beareth Vert, a **Tanners Working Knife**, and a **Pilling Knife**, Argent; **Handles**, Or. These are severally born in Arms, and therefore a word of each of them.

The **Working Knife** is a crooked Knife with two straight out handles, having a thick back; this raiseth the grain.

The **Fleshing Knife**, is of the same form and make, only this Knife hath no back, but is edged on both sides: This takes off all the Flesh that the Butchers leave on the Hide. 3 such in a Field S. is born by *Pillerheim*.

G. a Chevron between 3 such A. Handle O. born by *Tanner*.

*

The **Pilling Knife**, of some called a **Pilling Iron**; this takes off all the Hair of the Hide; being a four square Iron set in two **Handles**, **Hooped**, B. The like in Pale (or erected) between 2 Lions rampant endorsed A. the handles O. is born by *Wallerbach*.

CXIX. He beareth Argent, a **Tanners Mill**, or generally called by them the **Ring and Mill**. It is for the grinding and crushing of their **Bark**; being a round large Wooden Trough with a large Stone set on the edge, or turning part, with sharp strong Knives Leaded into the Stone, which Stone being turned in the Trough with its Weight causeth the Irons to cut the Bark very small.

CXX. He beareth Azure, a **Tanners Pooler** (or **Poler**) a **Fisher**, and a **Lyme Hook**. These are three Instruments used about Tanners Pits; the **Pooler** to stir up the **Duse**, or Bark and Water; and when it is sufficiently soaked, and the strength gone out of the Bark, then comes the **Fisher**, which is an Iron with Nett-work, made from side to side of it with strong Iron Wyers, with this the Bark is taken out of the Water; and the **Lyme Hook** to draw the Hides out of the Pits.

B. a Tanners Fisher, and Lime hook in Salter A. is born by the name of *Fish-lime*.

CXXI. In this quarter are three other useful Instruments belonging to the Tanners Trade; the first is a **scutching Knife**, by it all the roughness and exorbitances, and filthy excrescences growing to the outside of the Bark, are cut away, and the Bark is also by this Knife cut into smaller peeces to go into the Mill-Ring, to be ground to small peeces.

The second is a **shaving Knife**, by which Tanned Skins are shaved and cleaned from their filthy Excrecencies of Flesh, Hair, and end of the Skins.

S. 3 such in Pale A. Handles O. born by *Shaving*.

The third is a **Hewing Knife**, and used for the Hewing of the Bark small, and to prepare it for the Mill. Azure 3 such erected, Argent; **Handles**, Sable. Is born by *Doddrell*.

CXXI. * He beareth Argent, a **Tanners Mill-stone**, O. set with its **Knives**, S. This hath been a late device of setting sharp Iron or **Steel Knives**, upon the edge of the Mill-stone to cut the Bark, which doth perform that work in less time and with more ease than formerly it was done only by the weight of the Stone, sans Irons. They have been here in use with us not above a Dozen years from this time, 1688.

Fletchers, or Arrow-makers Tools.

8. **THE** most Skillful Archer may not always hit the Mark, and the best Artist hath his intervals,

which is the only end to inform us, that in this Life there is no perfection of parts, or satisfaction of Tools, for what is in use to day, may be cast aside to Morrow as useless, through the invention of a more fit and ingenious Instrument found out for that purpose, as is seen by many Antient Tools, now laid aside by several Trades, by reason of others new found out, that are more profitable or more active in their Operations: However as I find them, take them, new and old together.

CXXII. In this square are three **Arrow-makers Tools**. The first and chief is termed a **Flote**, it is an Iron Instrument all Teeth on the lower side, streight cross the same (as in the **Curriers** Instrument shewed *numb. 129.*) with an Iron crooked handle on the top: Its operation is for the working off the Timber, to make it in the shape of a **Bow**.

S. on a Chevron between 3 such O. 3 Mullets S. is the Bowyers Companies Coat.

S. 3 such A. born by **Flote**. And also by **Floterage**.

The second is termed a **Piercer**, it is a kind of a square Head Bit, and is set in a **Bush**, and is to be used in a **Brace**, (as the Joyners use their Bit and Brace.)

B. a Bend between 2 such crested A. the Bushes O. is born by **Pierce**.

S. 3 such crested A. Bushes O. born by **Mampeerccer**.

The third is a **Polisher**, which is to set a gloss and brightness upon their work.

CXXIII. In this is two Instruments, the first is termed a **framing** or a **sitting Saw**; a slender Saw set in an **Iron frame**, with an **Handle** to take off and on; with this the Notch or Nick in the Arrow, for the Bow String to go in, is made. This Argent, with the handle reversed, Or; in a Field Vert, is born by the name of **Bayner**.

S. the like in Fels between 3 Roses A. Handle O. is born by **Sarnich**.

The second, is a kind of a small half round Plain, of which the Fletchers have two sorts; the first is termed a **Ripper**; it is to make the rough work something fashionable, and put it in some form; the next is the **Shasse**, or **Hollow Shasse**, it worketh the same smooth and round, and fit to be made up into an Arrow.

CXXIV. He beareth in this square, first a Tool of theirs called a **Graber**; it is a long smooth Iron like a **File** set into an **Handle**, one of the sides thereof having Teeth like a Saw throughout the flat side, as I shewed you before in the **Flote**.

G. a Fels between 3 of these A. Handles O. is born by **Van Gravenberg**.

The second is the form of a **Cross-Bow shaft head**, such as was used in old Time: Of this Bearing I find one **Healy** to give for his Coat of Arms; Gules, three such Shaft heads Argent, the points crested.

*

G. a Fels O. between 3 such A. born by **Shafsted**, alias **Shafthead**; see more in *numb. 130.*

CXXV. He beareth in this square two kinds of **Roman Quivers**, for the Archers to keep their Darts and Arrows in: I call them **Roman Quivers**, because I find them so Coined on the Antient **Roman Medals** or **Monies** then in use; for in the Victory obtained against the **Armenians**, in the time of **Augustus** and **Claudius Nero**, these Quivers were stamped thereon, as a Memorial of their Captivity with this Writing **ARMENIA CAPTA**, which for distinction sake we may term the **Armenian Long Quiver**, and the **Armenian or Parthians Round or Bottle Quiver**, with Springs to hang them on their Shoulder. See others of another fashion *chap. 17. numb. 76. 77.*

CXXVI. He beareth Azure, a **Cuck-stool**, or a **Ducking Tumbrel**, Or. Born by the name, or rather known for the Cognizance of a **Scoler**, being an Instrument to cool Hot Fiery Tongued Women, which have their Tongues set on Fire by the Devil, which nothing can Tame except it be well Ducked.

Curriers, or Leather-Dressers Tools.

9. **WE** come now to the **Currier**, or **Dresser of Tanned Leather**, from which Profession arose that Proverb, *I will Curry your Hide*; when one Threatened another to Beat him sufficiently, to his own Hearts Content.

CXXVII. He beareth Vert, a **Pin Block**, Argent; by the name of **Owlerhead**. This is a Block set full of Wooden Pins, about 2 or 3 inches high, upon which they beat their Leather to make it pliable and gentle, being routed up.

CXXVIII. He beareth Sable, a **Whetting Steel**, between a **pareing Knife** and a **Smoother**, Argent; the Handles Or: Born by the name of **Curriers**. That in chief is termed a **Curriers pareing or shaving Knife**; it is edged on both sides, streight and broader in the Blade, than any of the Leather Workers before-mentioned; the handles stand one contrary, or cross to the other. S. a Cross Engrailed Or, between eight such Knives 2 and 2 in Salter, A. the handle of the second, is the Coat Armour of the Company of Curriers in the City of **London**. Some term the Cross between 4 Salters of (or composed of) **Curriers shaving Knives**.

The second lying in Fels, is called a **Curriers Steel** or **Whetting Steel**; it is round and set in a **Hast Hooped**; with this they whet or sharpen their **Shaving Knife** when it is dull; as the Butchers do their **Knives** on their **Steels**. S. 3 such A. Hais O. born by **Sharple**.

The

The third and last of this quarter, is termed a **Smoother**, with which all their Leather is **slickened**, as they call it, that is made bright and shining; it is all of Iron with a round top or handle to hold it by, and a flat smooth bottom, but not very broad. G. 3 such A. born by *Slickner*.

CXXIX. He beareth Gules, a **Graining Board**, Or; the **Handle**, Argent. This is a Board with Nicks in after the manner of a **Saw**, if you look sideways at it, but turn it up and you will perceive the Nicks, Teeth or Riggers (call them which you will) run quite athwart the Board, it hath a Leather fastened on the top to put the hand through, thereby to hold it more steady, and to work with it the more easie. 3 such in Pale is born by the name of *Grainberg*, as the Blazon is aforesaid.

The second Figure in this square is the fore said **Graining Board** turned up side down, which I caused to be set so, that you may see how the Teeth run streight through it. If it be born after this manner, which is a good Bearing, then term it a **Graining Board Transposed**.

CXXX. In this square is the **Bowyers Flote** with the Teeth side outward, or to sight; and the **Fletcher's Cissars**: Of the first I find the **Flote** thus made, and born by the Company of Bowyers in the City of *Chester* about the year 1579, and is the properest way of making it, that the Teeth or sharp Rigger thereof may be seen as they are; which some have Blazoned a **Flote created** and in full Aspect. Viz. Gules on a Cheveron between 3 such A. as many Bows stringed proper.

The second is the **long Cissars**, with which the Feathers of the Arrows are cut streight and even; and that Cissars are born in Arms will not be disputed, but whether such long cutting Cissars as these are, I will not take upon me to satisfy that curiosity; see chap. 6. numb. 33.

V. 3 pair of Cissars open A. born by *Van Schaerkens*.

Joyners and Carvers Tools.

10. **W**E come now to **Joynery**, which is an Art Manual, whereby several pieces of Wood are so fitted and joined together by streight lines, squares, Miers, or any Beville Line, that they do seem one intire piece.

CXXXI. He beareth Sable, a **semi-circle**, with its **Line** and **Plummet** set upon a **Standard**, Or. This is an Instrument by which true Levels are taken; as also Heights and Distances; the semi-circle is generally made of Brass, being divided into 90 equal parts from the line of Level, to each side where the Sight holes are fixed. The Standard is made of Wood, being three feet, which are so framed in the head, that they may be set wi-

der or closer together, according as the place requirereth.

CXXXII. In the chief, or front of this square, is placed one of the Joyners working Plains, called a **Plow**, which is a narrow **Rabbit-Plain** with some Additions to it, viz. two square Staves, let stiff through two square Mortesses in the Stock, which are about 7 or 8 inches long, and stand streight and square on the further side of the Stock, which have shoulders on the out-side of the Stock reaching down to the Wooden sole of the Plain, to the Wooden sole there is added an Iron sole of the thickness of the Plow Iron. The Plow is to make a narrow square Groove on the edge of a Board or Rail.

The parts of a Plow.

The **Plain Stock**.

The **Sole of Iron**.

The **Plow Staves**.

The **Mortesses**.

The **Shoulders**.

The **Fence**, is that as sets the Plow at his distance from the Iron plate of the Plow that you intend the Groove shall be off the edge of the Board in which you intend to make it.

The second in this square, is termed a **Joynter**, which of some is made after this manner, contrary to that described chap. 9. numb. 19. but all the difference is in the **Cote** or **Handle**, which every Workman maketh according to his own Fancy, all other parts in the Stock agreeing.

The **Strike Block**, is a Plain shorter than the **Joynter**, having its sole made exactly flat and streight; and is used for the shooting of a short Joyn, because it is more handy than the long **Joynter**; It hath neither Handle or Cote on it, but like the Smoothing Plain, in numb. 134.

CXXXIII. He beareth Argent, a **Pit Saw** in a **Frame**, Azure: This kind of Pit-Saw with a Frame, is not in use with us, but in the Up Countreys, it is altogether made use of, but for what Fancy I judge not, but think it much easier and better without it. This is born thus by the name of *Smyers*, or *Savers*. See more of this kind of Saw chap. 9. numb. 2.

CXXXIV. In this quarter is set three other Instruments necessary in Joyners Work. The first is a **Joyners square** of another form than what is mentioned chap. 9. numb. 15. It is made of two adjacent sides of a **Geometrical square**; that is two pieces of Wood, the one about an Inch thick, the other a quarter of an Inch, the one is fastned into the other with 4 Mortess with Glew and Wooden Pins, so as the two out-sides and the two inner sides stand at Right Angles one with another.

B. a Cheveron between 3 such O. is born by *Richard*.

The second in the Sinister chief, is called the **Joyners**

Bench Hook, or the **Work Bench Hook**, which is an Iron with a long Tang to go through a hole in the Bench, and a flat half round head, with Teeth on the straight side, to hold any thing that should be set against it: So that in it there is the fore-
part, *Viz.* the Tang or tail, the Head or flat, and the Teeth, and all but one Bench Hook.

The third thing that is placed in the Base, is termed **Smoothing Plain**, one of a contrary fashion to the following, *chap. 9. numb. 21.* this having a more **fairer bottom** and turned down in the ends, each Workman using his own fancy in the fashion of the **Sticks**.

CXXXV. These are three sorts of **Chissels**, the first is the **Paring Chissel**, this hath a very fine smooth edge; its office is to follow the **Former**, and to pare off the Irregularities the **Former** doth make; but of this see more *chap. 9. numb. 1.*

The second is termed a **Former**, it is a Chissel used before the **Daring Chissel** in all works, even as the **Foxe Plain** is used before the **Smoothing Plain**, when it is used the Helve of it is knockt upon with the **Ballet**, to drive the edge of it into the Stuff: There are several Sizes of these kind of Chissels, from a quarter of an Inch, to an Inch and half broad.

The third is another kind of Chissel of the nature of a **former**, only it is broad at the **Basil** or edge part, and groweth taper all along after till it comes to the **shouldering**; of these there are diverse Sizes, from half or quarter of an Inch, to an Inch and half, and have their terms according to their breadth, as an half Inch Former, an Inch Former, &c.

 The proper posture for these kind of Tools are to have their edges or cutting part downwards, if otherwise then to be mentioned.

A. Hafts, O. born by the name of *Former*.

XXXXVI. In this quarter in the first place, is a **Skew Former**, having the edge deeper down in one part than another: It is seldom used by Joiners, but for the cleansing of acute Angles, with its acute angles on its edges, where other angled Chisells will not so well come, and also for making of long and narrow Mortises in Rails, Stiles and Muntins, &c.

The second in this quarter, is termed a **Gouge** which is a **Chisel** having a **round edge**, and is for the cutting of such Wood as is to be rounded or hollowed: Of these there are several sorts from a quarter of an Inch Gouge, to an Inch and half, some being almost half round, others more open, as in the next Figure. G. 3 such A. Hafts O. by the name of *Gougers*

CCCCVII. The first Instrument or Tool in this
square, is called an **Inch Gauge**, without any **Dan-**
die or **Belver**, with these sorts and sizes of Chisfels Joynt
ers are accommodated to do all kinds of Works both
big and little. S. 3 such A. Handles O. is born by
Gower.

The second Tool is termed an **Auger Bit**, says **Handle**; it is an half round Tool in the working or cutting part of it, with the bottom edge turned inwards, one corner thereof being set a little above the other, which occasions the sinking or cutting deep into the Wood, and so by degrees cuts a hole through.

The third Tool is the **Saw Wreſt**; it is an Inſtrument of Iron, either ſet in a handle or not, for it may be uſed as well without; in the edge of it are made three or four, or more Nicks; with this (the Joyner having Filed the Teeth of his Saw) he ſets the ſaid Teeth; that is, he puts one of the Nicks or Notches of the Wreſt between the firſt two Teeth of the Blade of the Saw, and then turns the **Wreſt**, and it will turn one Tooth to you, and the other from you; and ſo do all along the Saw: This ſetting of the Teeth of the Saw (as Work-men call it) is to make the Kerf wide enough for the Back to follow the edge; and is ſet ranker (that is, more bending outwards) for ſoft and courſe cleap Stuff, than for hard and coſtly Wood.

A. 3 such B. the Handle erected O. is born by
Shawrest.

CCXXXVIII. The first Tool in this square is termed a **Biter square**, of a contrary form to the following, mentioned *chap. 9. numb. 17*. It hath an **Handle** (or top part) an Inch thick, and three broad, with a **Tongue** of the same breadth, and for length 5, 6, or more inches, according to the breadth of the Work: it is to be Glued into the Handle, by a Mortels and Pinned. V. 3 such O. is born by *Mutterall*.

The second Instrument is a **Sage**, or **square Sage**, from the square piece that runs upon the Staff; but of this see more *chap. 9. numb. 18.* The parts of it are these, the **Staff**, the **humer end** of it; the **fore-end** in which the **tooth** is, the **Tooth**, and the **square** or **oval**, which is that as slips up and down upon the Staff. B. 3
such O. a Chief A. is born by *Gager*.

The third is termed a **Witer Bar**, it is composed of pieces of Wood, of an inch thick each, then nailed together, the one an upright piece, and the other a bottom piece, and on the upright piece, on its upper side are the **Witer Lines** stricken with the **Witer Square**, from the middle to the right hand, and on the left, which are sawed down to the bottom of the said upright piece. This is a way used by joiners that make many Frames, to save themselves the Labour of drawing out of **Squares**, **Witers**, and several **Bevis** upon their Stuff.

CXXXIX. In this quarter is set forth the form of the **Joyners Working Bench**, with all the **Appurtenances** belonging thereunto, as

First, the **Plank** or Board for the top, in which are made several round holes for the **Bench Hook** and the **Hold Fast**, as they have occasion to hold the Work on it.

The **Bench Feet**, those of the Workmans side being made full of holes, in which are Pins put for the Board or other thing to rest upon, while its edges are

to be wrought, either by shooting with the Plain, or otherwise, which Pins are to be removed to higher or lower holes, as the breadth of the Board shall require.

The **Bench Screw**, set on its higher side, screw Boards to the Bench side, while their edges are planing or shooting, that they shake or tremble not, but remain steady while they are in working.

The **Hold-Fast**, which is to keep the Work fast upon the Bench while the Joyner either Saws Tenants, or cuts Mortelles, or doth any other Work upon it.

The **Bench Book** in it, which is to stay or hold Boards, or any other Stuff that is laid flat against it, while they are Trying or Planing.

The **Double Screw**, is sometimes fixed to the side of the Bench, and sometimes the farther Cheek is laid an edge upon the flat of the Bench, and fastened there with an Hold-Fast, and sometimes two are fastened to the Bench, to hold fast some sorts of Stuff; that are to have their edges wrought.

The **Mallet**, it is always to rest or ly on the Bench, because of its continual use.

CXL. In chief lyeth that which is called the **Bench Screw**, it is made of Wood, the out part flat, which lieth or is nailed to the Bench side, the other part opened by degrees or steps wider and wider, to fit Boards of all thicknesses that shall be put between the Bench and it, through the higher **Tang** or **Lip** is put a Wooden **Screw**, the same being screwed through the hole, its end holds the Board fast to the Bench side.

That in the Base is called the **Glew Pot**, it is commonly made of good thick Lead; that by its substance it may retain a heat the longer, that the **Glew Chill** not, (as Work-men say when it cools) when it is to be used: It hath a strong Bended Wyer put through two holes in the sides of it, by which it is transported and carried from one place to another. A. 3 such B. born by *Glew pot*.

CXLI. In this quarter in the chief part of it are the fashion and forms of two sorts of **Joyner's Mallets**, made and used by Joyners, the one **square**, the other **Bevil wrought**; Of this see more *numb. 76. and chap. 9. numb. 4.*

In the Base, is a thing called the **Sawing Cressel**, or a **Cressel**, which Joyners and Carpenters use to lay large and great pieces of Timber upon, when they have occasion to cut them into Tenants, or for other kinds of peccings, or if they purpose to cut it into lesser or shorter pieces: It is two pieces of Joyce set Salterwise, whose Ahgles will hold any thing fast being put between the two upper ends.

CXLII. These are the forms of the **double Screws**, mentioned before in the Joyner's Bench, *numb. 139.* they are made of Spar, the Screws are fitted with holes or **Screw Bores** in the Spars fit to receive them, which being turned, the two pieces are drawn together so

*

hard, that they hold firmly any thing set between them.

In the Sinister Base is set the form of a **Plain Iron**, (such Plains I mean) as are to plain Boares smooth; for other Plain Irons are cut with squares and half rounds and after the form of an  according to their Operations.

CXLIII. In the chief of this quarter is an Engine called a **Whetting Block**, or a **Block to Whet**, or **File a Saws Teeth** in: It is an end of a Spar, or such piece of Wood, with a Bevil or taper Groove, or Mortels cut from side to side, and in depth half through the Wood; to which is fitted a **Wedge** answerable to the Groove or Mortels; Into this Groove the Blade of the Saw is put, which is wedged hard in, that it cannot play or quaver under the File, when the Teeth are Filing sharp with a three square File.

The Figure in the Base of this quarter is termed the **Waving Engine**; it is a thing wherewith **Waved Work** is generally made upon small Frames for Pictures and Looking Glasses, and such like work; and is in the bottom a long Plank of about seven inches broad, and an Inch and half thick: On the middle of the Plank runs a **Rabbit**, and upon the Rabbit rides a **Block** with an **Handle** through it, of about an inch in the diameter; and at the further end of the Block is fastned a **Wice**, or a **Great Hand Wice**. At the other end of the Plank is erected a square strong piece of Wood about six inches high, having a square Mortels in it on the top, and bound about with an **Iron Collar** somewhat loosely fitted on, having two **Male Screws** fitted in two Female Screws, to screw against that part of the Wood unmortelled, thereby to hold the Iron that worketh the Moulding, whose lower end is cut into the form of the said Moulding you intend the work shall have. On the other side the square wooden piece is fitted another **Iron Screw** having a round Plate fastned at the end of it; and at the farther side is placed a Wooden Screw called a **Knob**, with a flat piece of Iron coming through the farther and higher side of the square piece standing edgewise with the higher edge rounded off or Filed round.

The several parts of the Waving Engin.

- a the **Plank** or bottom of the Engine.
- b the **Block** with a Groove on the bottom.
- c the **Rabbit** on which the Block runs.
- d the **Handle** to draw the Block by.
- e the **Hand screw**, with its Key to wind the screw.
- f the two **Screws** Male and Female.
- g the **square upright piece** of Wood, with the Mortelle on the top having a square flat Iron Collar on the higher part.
- h the **Iron** which cuts the Waves, whose bottom is cut into the form of the Moulding the work is intended.
- i the **Wooden Screw** or **Knob**, on the farther side of the square piece of Wood, with a flat piece of

of Iron about 3 quarters of an inch broad, and a quarter of an inch thick, standing an edge, coming through the sides.

The **Iron screw**, with its Nut, having a round Iron Plate made fast at the end of its shank.

The **Rack**, is a thin flat piece of hard Wood about an inch and quarter broad, and as long as the Rabbet.

The **Mouth**, is a square hole in the fore-side, and through the square piece of Wood, under the Iron which hath its end cut according to the moulding, through which the Board to be moulded is drawn.

The **Riglet**, is the Board either Moulded, or prepared to be Moulded.

Carpenters Tools.

II. **THE** Rules and Tools which **Joiners** and **Carpenters** work by, are so near the same, that I need not here again to describe them; only there is this difference, the **Carpenters Tools** are made somewhat stronger for their use than they need to be for the **Joiners**: Yet there are many Tools requisite and proper for a **Carpenter** (especially a **Master Carpenter**) that a **Joiner** need to take little notice of. Therefore I shall here describe such Tools belonging to that Trade, which are not expressed among the **Joiners**.

CXLIV. In this quarter are three Instruments used by the **Carpenter**, two whereof are never mentioned to be any ways belonging to **Joiners**: The first is the **Level**, of these there are used several bignesses, even from two to ten foot long, that it may reach over a considerable length of the Work; its use is to try whether a Floor be exactly streight and even, and that one part be not higher than another; for if the Plumb-line hang just upon the Perpendicular line, being set flat upon the Work, then the Work is level, else not.

In the **Level** there are these parts. The **Level**. The **Plummet**. The **Plumb-Line**, and the **perpendicular Line**, which is marked from the top to the bottom of the Board; all which things are so common, that there needs no further explaining of their parts.

The second that lies in the Base, is called a **Crow**, or an **Iron Crow**. Some are made of this form, others directly round in the shank, only with a pike end, or a flat end: This is used by them as a **Lever**, to lift up the ends of great Trees and heavy Timber, when either a **Bauk** or a **Rotler** is to be laid under it. The parts, as Workmen term them in this form of **Crow**, are the **Claws**, the **shank**, and the **Spike end**.

The third in the Sinister chief is used by both **Joiners** and **Carpenters**, and is termed a **Joiners Saddle**. It is an end of a Spar or Joyce cut into the side with an indent or Beveled on each side, so that any square piece will lye steady in it with one of its edges up.

CXLV. The first is the **Hammer**, whose chief use is for the **driving Nails** into work, and **drawing Nails** out of work. Of the several parts of the **Hammer**, see chap. 7. numb. 128.

The second is a **Carpenters Chissel**, or a **socket Chissel**, as most Chissels used by **Carpenters** are, because of strength; this is to have a **Wooden head** put into it, which some call the part as goes into the socket the **Spig**; of these **Socket Chissels** they use several sorts, yet not severally distinguished by names more than to call them an half inch, three quarter inch Chissels; inch, and inch and half, two inch, to three inch Chissels.

The third is termed a **Jack**; it is an Engine used for the removing, and commodious placing of great Timber: By the help of this, the side of a Timber House shrunk from its Mortises are raised up again to their places. It is a **Wooden Case** with a large Mortise in it, wherein is placed a **Rack**, which mounteth up any thing placed upon it, by the help of a **Rut wheel** on a **Spindle**, and turned about with a **Windlass**.

CXLVI. He heareth in this quarter several sorts of Engines used by **Carpenters**. The first are two **Levers** in the chief; these are **square** or **round Poles**, some call them **Waves**, by which the **Rotler** of the **Crab Engine** is turned about, to draw up heavy Timber to a considerable height: They are termed also **Windlasses** or **Hand-spikes**.

The **Ten Foot Rod** or **Rule**, is an Instrument of Wood like one of these, being no other than the **Rib** of a slit Deal plained streight, by which **Ground Plots** are measured, for the laying of Foundations of Houses; it is divided into ten parts, each containing a Foot.

The second Tool, which is set on the dexter side is termed a **Ripping Chissel**; it is a **Socket Chissel**, about an inch broad with a blunt Edge, not having a **Basil**, as almost all other Chissels have, and therefore would more properly be termed a **Wedge** than a Chissel; but most commonly **Carpenters** use an old cast off Chissel for a **Ripping Chissel**. Its Office is not to cut Wood, but to rip or tear 2 pieces of Wood fastened together from one another, by entering the blunt edge of it between the two pieces, and so forcing them asunder, by Blows with the Mallet.

The third, which is in the Fess point, and standeth Bendways, is termed a **Drig**; it is an Engine set upon two Wheels, made somewhat like a low narrow **Cart Bottom**. It is used for the Carriage of Timber, and then it is drawn by the handle by two or more Men, according as the weight of the Timber may require. Gules, the like to this in Bend Or, between two Pheons Argent, is born by *Don Lazallo* a Spanish Family.

The fourth in the Sinister chief, is a **Pulley** hung by the **hook** in the **House of a Rope** out of the chief. This being single is termed only a **Pully**, but

if it have more than one turn or little Wheel in it, for the Rope to run in, it is termed by most a **Snatch Block**, or **double Snatch Block**; but of the several parts and terms belonging to these Drawing Blocks, see chap. 15. numb. 45.

CXLVII. In this quarter on the dexter side, is an upright **Pole** of strong Timber set an end, having many **Pins** put through it, made of sound Wood, or else of Iron. This is an appurtenance belonging to the **Crab**, mentioned numb. 148. and is to hang a **Pulley** or **Snatch Block** thereon, by which heavy Timber is drawn to a considerable height. Such an Engine as this with **Pins** all along it, was in former times used for to scale or clime up an Enemies Wall, and thereby to surprize a Town or Fort.

A. 3 such in Bend Pale-wise S. is born by *Comm. n. l. v.*

The second is a **Snatch Block**, or a **double Snatch Block**. With this Engine, with the appurtenances belonging to it, as **Ropes** and **Lines**, great Trees of Timber are drawn up to a considerable height.

CXLVIII. He beareth Argent, a **Crab Engine**. Or. This is born by the name of *Crabbe*. This is an Engine used in Carpentry for the management of their heavy Timber, and to ease an hard Labour: It is only a square Frame of strong Timber, with a thick Plank 4 or 5 inches thick, fastned on the top of the frame, and the like on the bottom, through which goeth a strong **Roller**, which is turned in the holes of the Planks, by the help of **Hand-spikes** or **Levers**.

CXLIX. In the Dexter side is an **Upright** instrument, holding of a **Plumb line**, with a **Line** rowle, at the end of it. This is the coat of Arms of *Plumbly*, being in an Azure field. This is a way that Carpenters use to try the upright standing of Posts, or other works that are to stand perpendicular to the ground plot; by holding the end of the line between the finger and the thumb, a little distance from the corner of the post, or work, and if the line and corner of the post be parallel to each other, the work is upright, else not.

The Second figure is a paire of **Great Screws**, of some called **House Screws**, for by the help of them, an house whose sides stand crooked, or have the **Wall Plates** sunk, are raised up and set streight, by screwing up every peece into the place from whence it is fallen. *See numb. 142.* are the like for form, but in these the screw goeth through but one Plank, the other plank the Screw ends, only turn in a round hole made Concave.

In the Sinister side, is another manner of Engine, and I suppose made for the same use as that mentioned in numb. 145. though it be of an other fashion, on the top. Such a **Jack Engine**, with a **Bended Head**, I find to be an ancient Badg belonging to the Earle of *Oxford*.

Turners Tools.

12. **A**S There are different Matters, and Substances to be Turned, so there is also diverse ways, & different Toolles to be used in each different Matter; As Soft wood, Hard wood, Ivory, Brasse, Iron, &c. Each of which I shall successively discourse upon each of their working Toolles.

CXLIX*. The **Lathe**, it is the **Turners**, or **Thro-ers Engine**, by which they make all their Turned Works. This Machine Instrument is so vulgarly known, though it cannot be described in a Draught so as all its parts shall appear at one single view, yet I have set down enough of it to give you the names of its several members and their uses.

Parts of a Lathe.

The **Leggs**, or **Stiles**, are two thick Square peecees of timber about 3 Foot long, and 6 Inches broad, which are set upright, to them the other parts by mortises are fastned; Having **Braces** at the bottom by which they are fastned to the floore.

The **Cheeks**, or **Sides**, are the two side peecees, fastned on each side the Leggs at the upper end by **Tennants** and so pinned; or else by a strong **Iron Screw**, made with a square Shank at the head, to go through the Cheeks and Stiles, and so by turning on the end of it an Iron nut, the two Cheekes will be drawn close to the Tennants, or upper ends of the leggs.

The **Puppets**, are the square peecees of wood round- ed of at the head, which have the **Pikes**, or **Iron Pinns** in, upon which the work is turned. At the lower end each hath a **Tennant** to slid between the two Cheeks, with a **Mortels** throwe them, for to put **Caper wedges** to keep the Puppets close to the Cheeks.

The **Screw**, and the **Pike**, are the two Irons upon the points whereof the centers of the works are fixed, & after screwed hard that the work slip not off. The Screw hath a **Nut** in the Puppet, and an **Iron handle** fixed into the hinder end of the Screw by which it is turned forwards and backwards as the use of it shall require.

The **Rest**, is a Square peece of timber one corner of it rounded off: upon this the workman layeth his toolles in working to keep them stiddy while he is using them.

The **Stays for the Rest**, are two peecees of wood fitted and fastned under the **Shoulders** of the Puppets, upon these the Rest is set at any distance from the Pikes, by the meanes of **Wooden Screws** set in wooden **Nuts** against the Rest.

The **Side Rest**, is a Rest disjunct from the Lathe, and used by Turners, when they turn the flat sides of Boards, which standing athwart the Pikes they can the more conveniently rest their Toolles upon it. It is a peece of Oaken plank firmly nailed on a square peece of timber standing upright, which as a Tennant slideth into an **Iron Collar** that reacheth through the Cheeks

and

and is wedged under as the Puppets are.

Some Turners to the square tennant set on one end of a long round Iron **Cylindrick Socket**, into it is put a long round **Iron Shank**, on the top whereof is made the **Side Rest** which turneth any way in the Socket, and kept fast therein by a **Screw Pin** going through the side of the Socket.

The **Tredde**, and **Cross Tredde**, are peeces of Timber which are nailed to the ground with a Leather that they may rise and fall, to the other end is the String fixed which goeth to the **Pole**.

The **Pole**, is a peece of timber that will bend and go to it place againe, by this the worke is turned about in the Lathe.

The **Pole Rests**, are Sparrs or other timber nailed to the top of the Seiling, with an overthwart peece from them on which the Pole playeth.

The **Rowler**, is a round peece of wood made use of when the Rome is not high enough for a Pole to play up and down. It is moved on two **Iron Pins** fastned at both ends, with a **Pole** set either before, or behind the Lathe, with a **String** from it to the Rower.

The **Bow**, which is an Archers Bow, and is used by some Turners that work in small, and that seldom remove the Puppets of their Lathe. It is fastned over head and from the middle of the String another hangs down so comes to the Tredde.

The **Great Wheel**, it is used when heavy worke is to be turned, such as the Pole and Tredde will not command. The Wheel is set in a moveable **Frame** consisting of wooden **Standards**, **Lying**, **Overthwart**, & **Cross peeces** mortised together. The String lyeth in the Groove of the wheel and turned cross is put into a Groove of the worke, or a **Mandrel** or **Pin** fixed to the side of the worke, and is turned about with one or two **Iron Handles**.

The **Tredde Wheel**, is a wheel made of a Board with a grove in for a string, which goes cross to the grove in the worke. It is under the Lathe on an **Iron Axis** with a **Crooke** at one end, on it is hung the noose of a Leather thong, and the other end fastned to the Tredde, which by exact treading on, carryeth the wheel about without intermission.

The **String**, it is made of the Guts of Beasts as sheep though the generall name of it is **Cats Guts**.

The **Seat** of the Lathe, it is made of wooden Bearers, with an overthwart peece, with **Iron pins** at the ends to hold it against this the workman supports himselfe to stand the stidder to his worke. In the sted of this Seat some Turners make use of a strong **Gerth web**, fastned to the Leggs of the Lathe, against which he stays himselfe **holding him steady** at his work.

The **Horn**, is the tip end of an Horn, hung on the out side the puppet, or else a round **Wooden Bar**, pinned under the Cheek to hold, oyle or grease in, to liquour the centers of his work to make it run easie.

CL. Turners have several sorts of **Mandrels**, and the sizes of them also differ, according to the sizes of the Work; however their Names are, yet their principal fashions are these.

The first and principal is that as lyeth in the Base, which is termed the **Broad Flat Mandrel**; it is set

on the broad side with 3 or 4 **Iron pins** or **pegs**, near to the Verge of it flat; these are used to be fastned into the backside of a Board while the other is turning or working upon. Behind the back of this flat (and indeed in all Mandrels) is fitted a long **Shank** or **Rowler**, for the String to be wound about while the Work is Turning. In the Mandrel are these parts.

The **Face**, or round Flat of the Mandrel.

The **Rowler** or Shank.

The **Shoulder** of the Rower, to keep the String from slipping off.

The **Pegs**, or Points, or Pikes.

B. 3 such in Plate O. the middle having the Pike contrary pointed S. born by the name of **Mandrell**.

The second is that in the chief, which is termed the **Screw Mandrel**; the **Shank** or **screw** is made of Iron having the two ends round, and in the middle between the round ends a square the length of the Rower, and this square is fitted stiff into a square hole made through the middle of the Rower that it turn not about. In each flat end of this Shank or Spindle is made a center hole, whereinto the Pikes of the Puppets are pitcht when this Mandrell is used. By this severall Screws of diverse Diameters are made; that next the end of the shank is the smallest, which makes a **Male screw** of the **finest Thread**; the next a **Male screw** of a **coarser Thread**; and the third makes a **Screw** coarser than it; so that you may make the shank as long as you will, thereby to make more variety of sizes for screws.

The **Sockets** or **Chocks** belonging to the **Screw Mandrels**, are so many as there are severall sizes of screws on the shank; these hollow Sockets have female screws in them made before the Notch to slip over the male Screw; which being fitted one to another, are pinned with a pin, put through two opposite holes made for that purpose in the Cheeks of the Wooden Sockets that it shake not. The parts of a Socket are these.

The **Socket** or **Check**.

The **Wooden pin**.

The **Stay**.

The **Notch** to slip over the Male Screw.

CL. In the chief is another sort of Mandrel called a **Pin Mandrel**. This is made with a long **Wooden Shank**, to fit stiff into a round hole that is made in the Work that is to be Turned. These are also termed **Shank Mandrels**; which Mandrels with Iron Shanks are much used by Turners that turn **Bobbing** and such like Work; because a Wooden Shank to fit the small hole through the work, would not be strong enough to carry the work about.

There is another Mandrell called an **Hollow Mandrel**, it is both hollow, and used to turn hollow things in it: It hath but one center hole belonging to it, which is at the **Rowler end** or **Heck**, but it hath a Shank that supplies the office of another Center hole, which is put into one of the holes of the **Joint Collar**, described in numb. 153.

The second Instrument in this quarter is termed a **Sweepe**, or a **Mathematical Instrument** called a **Sweep**. It

It is a long Bar of Iron, and is termed the **Beam** of the Sweep, which hath in the center point of it (in a **Center hole**, made in a square Stud of Metal) a center fixed; also a **Socket** to ride on the Beam, which is removed at pleasure, nearer or farther from the Center; to this is fixed a Tooth of Steel with such roundings and hollows in the bottom of it, as is intended there shall be hollows or rounding in the work; then removing the **Socket** till its Tooth stand upon the intended place, on the Verge of the work, is there screwed fast on the Beam, it is prepared for the work, which if the Workman hold the head of the Center in his left hand, and with his right draw about the Beam and Tooth, it will cut and tear away great Flakes of Metal, till the thing worked upon hath received the whole form of Mouldings the Tooth will make.

The same Instrument with a Moulding Plain fixed on it, will do the same work on Wood, making round Mouldings.

CLII. There are several sorts of fashioned **Collars**, of which these two in this quarter are apart. The first on the dexter side is termed a **Round Collar**, so called from the roundness of the head of it, it is to be fastened in a Lathe by a Wedge as the Puppets are under the Cheeks; **Hollow Mandrels** are often turned in the Collars of this form, but then the Spindle is made of Iron, and hath a Screw just at its end, upon which is screwed a Block with a hollow in it, made fit to receive the Stuff to be worked upon.

The second in this quarter hath the simple name of a **Collar**, without any other Addition, except you call it a **Turners Collar**, to distinguish it from other things termed **Collars**. It is also made fast in a Lathe by a Wedge, as the former is to be.

CLIII. This is termed by Turners, a **Joynt Collar** which is made of two **Iron Cheeks**, which move upon a **Joynt** with a **Button**, so that they may be set close or open, like a Joynt rule; on the inner edge of each Cheek is formed as many semi-circles or half round holes as the length of the Cheeks will conveniently bear, they are made of different Diameters that they may fit the necks or shanks of different sized **Mandrels**. Near to the top of one of these Cheeks is fastened with a center pin, a square Iron Collar with a small handle or button to it, which is to put it on and take it off the Cheeks when they are to be opened. This holds them so fast together that they cannot start asunder, and yet is made so fit that it may easily slip off and on. In this Instrument there are these parts.

The **Cheeks**,

The **Joynt** at the bottom.

The **Semi-circles** in the Cheeks.

The **Diameters**, circumferences or round holes in which the Cheeks are closed.

The **square Collar** that holds the Cheeks together.

The **Handle**, by which the said Collar is taken off or put on.

The **Center pin**, on which the square Collar turns.

*

CLIV. In this square are five sorts of Turners Tools, useful in their way of Turning either of soft or hard work, round or hollow, whose names are Gouges in general, but more particular.

The first is termed a **Grooving Hook**, or a **single pointed Grooving Hook**, or the **Point Grooving Hook**; this cuts on the side or flat of a Board a fine hollow circle or swage; these Hooks or Tools have their Teeth of different forms according to the fashion of the groove to be made on the plain of a Board; for sometimes their Teeth are flat edged, sometimes round edged, sometimes a point only, and sometimes two points, or of other forms; all which sorts of **Blades** are made much stronger than the **Gouge** or **Chisel**, and have the sides of their edges more obtuse to make it the stronger; also they are 10 or 12 inches long without the Handle.

The second is called a **Gouge**; now Gouges do the Office in Turning (as a **Fore-Plane** in Joinery, and the **Jack-Plane** in Carpentry) they serve only to take off the Irregularities the **Hatchet**, or sometimes the **Draw Knife** leaves after the work is Hewed or drawn pretty near the round; and that it may commodiously do it, the **Blade** is formed about half round in the edge, and the two extrem ends is a little sloped off: They are in their Blades of a long Size, with long Handles (as all other Turning Tools are so long, that the Handles may reach (when they use them) under the Arm-pit of the Workman) that he may have more stay, and steadily manage them. The **Blade** of the Gouge is of several Sizes both for length and breadth, some as long as the Shank, others shorter, even from an inch to 3, 4, or 5 inches in the length; and from a quarter of an inch to a whole Inch; and sometimes for very large work two inches over: Most Gouges have in them these several parts, as in other Joiners Chisels and Gouges.

The **Basil**, is that part as is ground to an edge.

The **Blade**, the roundish part above the Basil.

The **Shank**, the long Iron Stail.

The **Shoulder**, that as the Haft rest upon.

The **Tang**, that part as goes into the Haft.

The **Haft**, the Wooden handle.

The **Hoop** or Brass about the bottom of the Haft.

The third is named a **Grooving Hook** or **Tool**; or the **Triangular** (or three Tooth) **Grooving Hook**.

The fourth is termed a **round edge Grooving Hook**.

The fifth is called the **three pointed grooving Tool**.

§ All these Tools when born in Arms are to have the edge or Basil, or working part erected, because they are so in their proper place; if otherwise, then to be mentioned, either reversed, dejected, &c.

CLVI. In this quarter are three other sorts of Tools useful for **Chowers** both for smooth and Engine work.

The first is termed by the name of the **two pointed Grooving Tool**.

The

The second by the name of a **Growing Tool**, or the sharp pointed **Growing Tool**, or triangular pointed growing Tool.

The third by the name of a **Chissel**, which is a Tool that follows the **Gouge**, making smooth the extuberances, and irregularities lying upon the work, which the **Gouge** hath left; from whence some call it the **Smoothing Chissel**: Both the **Blade**, **Shank** and **Handle**, are near twice the length of those used by Joiners for the reasons aforesaid.

CLVII. In this Square are three other Tools used by the same manual occupation, which by Artists are termed thus.

The first is called a **Square Hook**.

The Second is termed an **Hook**, Now as the **Gouge** and **Chissel** is used to work that which lyeth before the workman: So this tool, and the precedent, are used to work that as stands on the right, or left side of the workman, as the flat sides of Boards, which must be turned unto, and upon.

The third is termed a **Chissel**, or a **Flat Chissel**, for it is to be noted, that the edge of all Turners Chissels are **Bashed** away on both sides, so that the edge lyeth in the middle of the tool. Of these flat Tools there are severall sorts, from a quarter of an Inch broad, to one two or three Inches broad, according to the largeness of the Work to be done.

CLVIII. In this quarter is also three other Throwers, or Turners tools. The first whereof is a **Gouge**, or a **Grooving Gouge**, with the Blade bended.

The Second is named a **Hook**, but is of an other fashion then the other in numb: 157. that being in a manner round, and this not above a quarter round, with the tip end a small thing bent.

The third hath the Denomination of a **Throwers Round Gouge**, or **Groove Gouge**.

All these sorts of Chissels, Gouges, Hooks, &c. used by Throwers or Turners, I have caused to be engraven here, more to shew their fashion, then any use I have observed or seen them in Honorable Arms; therefore cannot say much for them, either *pro* or *con*.

CLIX. This Instrument is used by some Turners, and called a **Drill - Bench**, being only a board about two Inches thick, with two Stiles placed upright upon it, in the higher-most Stile is a **Collar**, and in the further Stile is a peece of Steele with a **Center hole** in the middle of it. Between is a **Rowler** which hath a **Steele pin**, and a **Piercer bit** fastned therein. When it is used it is made fast in the Cheeks of the Lathe with a wedge as the Puppets are. This Drill is for the turning or boring of an hole in wood of what length they please.

The parts of a Drill-Board.

The Drill board.

*

The Stiles, or Standing peeces.

The **Collar**, is the hole in the higher-most Stile.

The **Square flat Steele**, with it center hole in.

The **Rowler**, with its **Aris**.

The **Steele pin**, and **Piercer bit** at the end.

The **Iron Collar**, at the bottom of the Board.

The **Wedge**, to fasten it to the Lathe Cheeks.

CLX. He beareth Sable, a **Turners Chopping Block**, Or. born by the name of **Chopping**. this Block is made of **Elme tree**, or some other Soft wood set on three feet. Some Turners use in stead of it a peece of a trunk of a tree of a foot and halfe high or more from the flore.

CLXI. In this Square are two Instruments usefull also for Turners, for their cutting and cleaving of wood to what thickness they have occasion to make it.

The first is that in the Chief, which they terme a **Cleaving Knife**, it needs no further description then the figure; being a kind of **Cleaver**, with a strong and thick back, able to abide blowes of the Maule: haveing an **Handle** of the same mettle.

S. 3 such in pale A. is born by **Cleft**, or **Cleave**.

G. 3 such erect A. born by **Peylingberg**.

In the Base is the other called a **Maul**, being no other but a thick peece of wood, with an **Handle** to make it the more handy and quick to use; which is to knock & unknock the **Wedges** of the Puppets. Also to beat on the **Cleaving Knife**, when they split their wood for their worke. Use hath made it more ready then a **Mallet**.

B. 3 such O. is born by the name of **Maul**.

V. a Cheveron betw: 3 such Handles erected O. is born by **Van Mouselsheim** or **Barbaria**.

CLXII. In such a small Lathe as this Figure expresseth, they use to work small work in Metals; it is made either of Iron or Brass; and is by Work-men termed a **Turn-Bench**, or rather a **VICE Lathe**, because when it is used, it is Screwed into the Chaps of a **Vice**, and having fitted the Work upon a small Iron Axis with a Drill Barrel fitted upon a square shank; with a Drill Bow and String carry it about with the Drill Bow in the left hand, and the Tool in the right hand: The Tools for these small Works are commonly a **Graber**, and sometimes a **Scalper**, both pointed, round, and flat; also great and small.

The parts of a Turn - Bench, or Vice Lathe.

The **Aris**.

The **Drill Barrel**, fitted on its square Shank.

The **Drill Bow and String**.

The **Wrest**, with its Screw.

The **Puppets**.

The **Screws** with their Pikes.

The **long Bar**, on which the Puppets are fastned by the Screws, or else are to slip further or nearer together, according as the work requireth.

CLXIII. In

CLXIII. In this quarter is presented to your view the **Head** of the **Turning Engine**, for the turning of **Dial Work**, **Rose Work**, and **Swath Work**, with other kind of Work not yet named, because not found out, for no Man hath yet thought out the depth of that Instrument, or what it can or is able to perform. It hath so many parts that I know not either how to describe or tell their use; only as in other Tools I shall give you what names each Member hath, if I be rightly informed.

The parts of the Turning Engine.

The **Bow**, which is a strong Steel Bow fastned to the middle part of the farther side of the **Puppet**; having a **Gut String**, and to the middle of it, a Noose is fastned another strong Gut String with a Noose at the end of it.

The **Moving Collar**, is an Iron Collar fastned on a Center pin on the fore side of the **Puppet**; this moves between the **Iron Shackle** and the fore side of the **Puppet**, though properly the **Collar** is only the hole in which the **Aris** is set. The **Beck** of the Collar is that part under the **Shackle**.

The **Socket** in which the **Collar** is moved; some term it the **Shackle** round hole.

The **Stop Screw**, which is to take out when the hollow **Aris** moves in the moving **Collar**; else it holds them together that the **Collar** moves not.

The **Hollow Aris**, which is hollow, having a shoulder on it, on which is fixed all the **Guides**.

The **Head**, or **Cape**, or **Bar**, in which is contained the several **Guides**, which is hollow, and termed the **hollow in the Puppet**.

The **great Diameter of the Guide**.

The **small Diameter of the Guide**.

The **Aris of the Guide**.

The **Center head**.

The **Button**.

The **String Pulley**.

The **Wheel Pulley**, is the Pulley to which the String comes from the **Credle Wheel**, called also the **Pulley of the Aris**.

The **Credle Wheel**.

The **Guide Pulley**, this is slipped on any of the **Guides**, as the Work-man pleaseth; it is of Brass, having a Groove in the edge of it to receive the edge of the **Guide**, which turning together with the assistance of the strength of the **Steel Bow**, forces the **Guide** and the **Hollow Aris**, to move backwards; and then an edge Tool held to the work in the **Handzell** screwed in the hollow **Axis**, will describe the same Figure on the work, as is on the outer edge of the **Guide**.

CLXIV. In the chief of this quarter is the figure of a **Draw Knife**, an Instrument used by both Carpenter and Turner; it is a Knife with two handles turned down to the edge, much like in form to **Wet Glovers Fleshing Knives**, when they use it, one end of the work is set against a Wall, and the other to his Breast, and then with both hands draws Chips off the work till it be brought to their shape, and then smooth it.

S. 3 such Draw Knives A. Handle O. born by *Chip*.

In the Base of this square is placed a **Book-binder** **Riow**, or cutting Knife by which the leaves of Books are cut even and smooth. It consists of these parts.

The two **Stocks**, one having the Knife on it, the other movable by the turning of the **Screw**, which hath a Groove or square hollow in the sole of it.

The two **square Staves**.

The **Screw** and **Handle** to turn it.

The **Knife**, which is held to the sole of the **Stock** by an **Iron Pin**.

The **Iron Screw**, and its **Nut** with **Ears**.

The **Iron Screw**, and its **Nut** with **Ears**.

Dry Glovers Tools.

13. **T**HERE are many Instruments of Working belonging to the **Dry Glover**, which because they are described in other Trades I shall say nothing of them here; besides the giving of their Names, referring you to such places where they are more fully spoken unto; only such as are peculiar to their Trade, accept of here in this ensuing Discourse.

The **Shears**, or **Glovers Shears**.

The **Chimble**.

The **Needle**.

CLXV. On the dexter side is a **Glovers With**, fixed to a **Post**. This is a square Iron, writhen (as it were) like a **Wreath** and made fast with **Nails** and **Iron Staples** to a strong **Post**. Upon this they use to rub and fret their **Leather Skins** to make them soft and plump; which kind of work from the name of the Instrument, they term **Withing**.

In the Sinister side, are the **Glovers Stretching Sticks** in **Salter**; these they use to thrust into the **Thumbs** and **Fingers** of **Gloves**, to make them wider for the better fitting of them who are to wear them.

G. 2 **Stretching Sticks** in **Salter** O. between 4 **Roses**, A. is born by the name of **Stretch**.

Mathematical Instruments.

14. **H**AVING had some perusal of Books of **Astronomy** and **Geography**; I had the good Fortune as to find some **Mathematical Instruments**, which formerly I was ignorant of, which I shall set down in this place, to which may be added those mentioned in the succeeding chap. 9. numb. 46. 47. &c.

CLXVI. In this square, in the dexter chief, is placed an appurtenance of the **Globe**, whether **Celestial** or **Terrestrial**, without which there can no right Judgment be

be given of several things; It is by all or most Artists nominated or called the **Hour Circle** and its **Index**; it is a small Brasen Circle, fixed on the Meridian of the Globe, whose Center is the Pole of the World; it is divided into 24 hours of the Day and Night, and each is again divided into halves and quarters, which in the Revolution of the Globe are all pointed at with an Index, which to that purpose is fixed on the Axis of the Globe. The use of this Hour Circle, is for shewing the time of the several Mutations and Configurations of Celestial appearances.

G. 3 such O. is born by the name of *Circle*.

B. 3 such O. is born by *Index*.

In the Base of this Square, is the **Globe's Quadrant of Altitude**, it is a thin long Bras Plate divided into 90 Degrees, and marked upwards with 10, 20, 30, &c. to 90. It is Rivetted to a Bras Nut, which is fitted to the Meridian of the Globe, and hath a screw in it to screw on any degree of the Meridian: When it is used, it is screwed to the Zenith; its use is for measuring the Altitudes, finding Amplitudes and Azimuths, and describing Almucantaraths.

In the Sinister chief is another sort of **Quadrant**, with a **Shining Index**; they are generally made of hard Wood, as Box, but the best are of Brass, whose use is to find out the Altitude of either Sun, Moon, or any Star, by holding the lower side Parallel to the Horizon, and moving the Index till the Object be seen through the holes or slits of the sight placed on the Index, and where it falls then on the Figure of the Limb, that is the elevation required.

B. the like with the Center erected (or the Index pendant) O. is born by the name of *Quadrant*.

The parts of a Quadrant.

The **Center**, the Angle where the Label is fixed.

The **Sides**, the streight which makes the Angle.

The **Limb**, the round part on which the Figures and Lines are made.

The **two Sights** fixed on the moveable Index.

The **Index**, or **Label**, that which moves on the Center pin.

The **two Sights** for observing the Horizon, them on the side.

The **Handle**, that by which it is held.

The **Pin** of the Index.

The **Figures** and **Altitude Lines**.

CLXVII. He beareth Azure, an **Astrolabe**, Or, born by the name of *Astrol*. This is a round Instrument made of Brass, with a Level and Perpendicular pieces fixed in the middle thereof, wherein is a Center with a moveable Label or Ruler, whereon is placed two Sights; upon one of the flat or plain sides of the Circle is described or divided into 360 equal part or degrees, 6 in each quarter; upon the Perpendicular, on the out-side the Circle is fastned an eye with a Ring in, by which the Instrument hangs, with the line of Level parallel to the Horizon: The use is to take Altitudes or

Heights, by moving the Label so that the Sun Beams may pierce through the upper and nethermost **Plane** or Sight at one time, and where the points of the Label lies on, is the degree and part of the degree that the Sun is high above the Horizon. The further use of this Instrument is set forth at large by Mr. Wright, in his division of the whole Art of Navigation, annexed to his Correction of Errours.

G. 3 such O. is born by *Astrolbergheim*.

S. 2 Stars and one such O. is born by *Horizon*.

The parts of an Astrolabe.

The **Circle** or **Ring**, about which the Figures are made.

The **Perpendicular Line**, the Down Bar in the Circle.

The **Level Line**, or **Horizon Line**, the over-cross Bar.

The **Degrees**, the Figures and the Lines about the Limb.

The **Center**, the middle of the Circle.

The **moveable Label** or **Ruler**.

The **Sights** or **Planes**, the holes to look through.

The **Points** of the Ruler.

The **Eye**, that in which the Ring hangs.

The **Ring**.

CLXVIII. In this square is the shape of two Sun Dials, which are generally cast in Brass.

The first is called an **Hoop**, or **Circle Dial**; it hath the hours of the Day made within the Hoop, and on the out side the Days of the Month, and the Months, with an Eye and Ring to hang it by, which are moveable, and will be set to any day of the Month, where the hole for the Sun to shine through, being placed, the Sun will cast a light through it upon the Figure, which is the absolute Time of the day.

B. the like O. is born by *Van Hoopsdall*, of *Rumford*.

The second is called an **Horizontal Sun Dial**; it is made of Brass after the manner in all respects to the aforesaid Hoop Dial; with this addition to it, of a Meridian or Horizontal line of Brass fixt in the middle of the Hoop from one side to the other, in the Center whereof is set a moveable Needle, like the Needle of a **Mariners Compass**.

S. the like O. is born by the name of *Panfello de Alvo*, a *Spaniard*.

CLIX. In this square are some **Geometrical Instruments** which are to be transmitted to the next chapter, as

First in the dexter Chief is another form of a **Jacob Staffe**, This is an Instrument diversly made, them only and chiefly made, doth consist of a Staff about a yard long and about an Inch square, upon it is fitted a **Plane**, (or sometimes two or three) so as it may slide pretty stiff upon the staff, and stand at any of the divisions it is set too. The use of it is for the taking of **Altitudes**, which is done by putting the end of the cross-staff

Z z

(whica

(which is next 90 degrees) to your cheek, upon the outer corner of your eye, and holding it there steadily with your right hand, and with your left, you must move the Vane, or Cross piece till you see the Horizon joined or Level with the lower end thereof, and the Sun or Star with the higher end; Then the degree and part of the degree, which the Vane cuteth upon the Staffe, is the height of the Sun or Star. *se chap. 9 num. 48.*

V. one in fesse O. betw. 2 Castles A. is born by the name of *Distance*.

S. 3 such erected O. is born by *Crossaffe* or *Crossstaffe*.

The Second in the Dexter base; is termed the *Balance Wheel* of a *Clock*, this is the *Primum mobile*, the first moving wheel by which all the others are set on going; If it stand, the Clock is silent. Some call it the *Mauch Wheel*, or *Motion Wheel*.

A. 3 such S. is born by *Van Hanters Wisse*.

B. 3. Such O. by *Greenpenberg*.

G. on Such O. by *Van Turmile*.

O. Such a Wheele B. is the Coat of *Die Payer Im Hof* in *Switzer-land* in *Germany*. Such a Wheel with teeth is born for the Coat and Crest of *Beschen*, or *Berschen*.

The third is an Instrument used for Draft, or drawing; and is termed a *Paralaligreme*: by the several motions, and moving of the Pins of this Instrument, and the observation of its station; it will do several kinds of works in drawing of Figures: either bigger then the patern, as big as the patern, or less then the patern, to what degrees in each (as bigger or less)

ter) is the Workman pleaseth. It hath several parts which I shall name onely.

Parts of a Paralaligreme.

The four Rules, which are marked with figures Holes.

The four Pins, that holds them together.

The four Nuts, that holds the Pins in their places.

The Center Pin, which is an Iron pin made fast in a place that it comes not out, but let the Ruler turn upon it.

The Black lead Pencil, which is to draw on a fair Paper which it is moved too, it is fixt at the end of one of the long Rulers.

The Point, being an other wooden Pin with a sharp end: The Instrument being thus fitted and fixt; if you lay a Printed draught under the Point and trace the figure over, what you do on the print, the other end with the Black lead will draw the like on a Paper layed under it, which an Artist or any person by sight, with a litle Instructions may be able to draw any thing by a Patern, big or litle as I have aforesaid.

In the Sinister chiefe is a *Semi Circle Instrument*, with a *Plumet* and *Line* fixed to it, with this, as well as with the *Quadrant*, *Levels* *Heights* *Depth* and *distances* of places are taken and known; of which See more *chap. 9. numb. 46. 47.* This is also called a *Geometrical*, or *Mathematical Semi-circular Instrument*.

T O

T O

The Right Worshipful

EDWARD LEGH, of Bagdaley, Esquire.

SIR,

IN this Treatise you may reasonably expect to have some delight in the Reading, and to be informed in the Knowledge of things; therefore to avoid all curious Flowers of Eloquence, I made it my whole Business to please you and other Readers with an abundance of variety of Excellent Fruits, and that in a brief and Laconick Stile, that so there might be seen Magnum in Parvo, many things in one Tract; which as you were very Instrumental in its Publishing, so I hope will receive satisfaction in every particular, without the Trouble and Charge of a great Library, which hath been the only aim of your most abundantly Obligated Servant.

Randle Holme.

CHAP. IX.

IN the beginning of this Chapter we shall give you all sorts of Instruments and Tools used in Armory pertaining to the several Trades of Joyners, Carpenters, Mill-wrights, Wheelwrights, Turners and Coopers, &c. or whatsoever other Trade, whose use consisteth, and is exercised in working or framing of Timber, or any sort of Wood.

I. He beareth Gules, a Saw (or Hand Saw) the point dejected, between a Gimblet or Hand Bit, and a Paring Chissel, Argent, the handles, Or; of each of which in particular.

The Hand-Bit, of some called a Gimblet, a Piercer, or Nail Piercer, it hath a Worm at the end of the Bit, or half round with sharp edges like the Auger, some for small holes are square in the Bit; of these there are several Sizes.

A. 3 such S. is born by the name of Gimblet.

G. a Chevron between 3 A. Handles O. born by Van Holler.

The Saw, called also a Hand-saw, or a Board-saw; is used by Joyners and other Wood-men, to cut

or slit small Timber, as Boards, Spars, Rails, &c. though indeed the Saw cannot properly be said to cut or slit, but rent, break, or tear away such part of the Wood as the points of the Teeth strike into.

B. a Saw A. Handle O. born by the name of Sawyer.

The Paring Chissel, is a Chissel with a broad flat, which is not used to be Knockt with a Mallet, but is taken in the hand by the Shank near the top of the Flat, and the top of the Haft or Helve is placed against the right Shoulder, which being pressed hard upon the Haft causeth the edge to cut and pare away, and smooth the Irregularities of other working Chissels: These are much born in Arms, and have several terms for their several parts, of which see chap. 8. numb. 154. to which add these two.

The Flat, is all the broad part of the Chissel, which is ground away by often Whetting.

The Head, the top of the Handle.

G. a Chissel between 2 Roses A. the Helve O. born by the name of Chisselrose

Comun Ja: Anyon Alderm signi = fabri Cuius Gestr:

There are again three other sorts of Saws, which are used by Wood-men.

The first is a **Tenant Saw**, this is a thin Saw, and therefore hath a Back of Iron to keep it from bending; it is for one hand use, and cuts forward, as all other Saws do. Some term this sort of Saw, a **Faneering** or **Intaring Saw**, being so small and thin that the Plate of the Saw is only a flatted Wyer cut with Teeth, which is termed also a **Bow Saw**.

G. the like in Bend A. Handle S. born by *Malkes*.

The second is a **Lock Saw**, whose use is to make Key holes in Doors, and to Saw any hole in the middle of a Board where other Saws cannot get in; Some are made thus with a bended or square shouldering; others are straight to the handle.

This kind of Saw is by some Artificers termed a **Compas Saw**, because it is used to cut a round or any other Compas Kerf, and therefore the edge where the Teeth are is made broad, and the back thin, that the Back may have a wide Kerf or Nick to turn in.

O. a Stags Horn to the Sinister S. and such a Saw to the Dexter Barways G. is the Town Arms of *Winlingen* in *Germany*.

The third is a **Pit Saw**, or **Sawyers Saw**, with which great Timber is slit or Sawed into Boards, Rails, Spars, Joyce, or any other sort of Building Timber: This Saw is managed by two Men who stand one upon the Timber (called the **Top-Man**), and the other under the Timber in a Pit, or laid upon Tressels, above Mans height (called the **Pit-Man**), where with this large Saw they rent the Tree into what manner of Stuff the Work-man pleaseth; having an Instrument fixed at the end of the Saw, to take off, and put on at pleasure, called a **Bor**, by help whereof he doth with ease pull the same down, and lift it up in Sawing. The **Frame Saw** see chap. 8. numb. 133.

III. He beareth Sable, a **Frame Saw**, or a **Framing Saw**, Argent, the **Checks**, Or. The use of this Saw is to cut Miter and Beville Squares for Frames and Cornishes on the top of Wainscot. The use of the Checks to the sides of this Saw, is to keep and strain the Blade straight, which of it self is thin and slender, and cannot do its work without such an help. It is also termed a **Bow Saw**, and a **Tenant Saw**.

IV. He beareth Sanguine, a **Joiners Mallet**, Argent. By the name of *Mallet*. There is much difference between the Masons, and the Joiners or Carpenters Mallets; the first being round and heavy; the others square both in the face and sides; though in this place my Graver hath not performed his part; yet elsewhere you may see the true shape of them chap. 8. numb. 141.

S. 3 Mallets A. born by *Von Schleyer* of *Alsatia*.

A. 3 such G. born by *Van Falcken*.

V. He beareth Argent, an **Hatchet Azure**, the **Hatome** Or: The Bearer goes by the name of *Hatcheface*.

S. a Fess between 3 Hachets A. born by the name of *Wrey*.

*

B. 2 such endorsed O. born by *Sturmfeder* of the *Rhine*.

G. one in Bend O. born by *Trzinsky*.

The use of the Hatchet is to hew the Irregularities of such pieces of Stuff, which may be sooner Hewn then either cut with Chissels or Sawn; for that end it is used as an Instrument of Execution for the Beheading of great Offenders, and Rebellious and Irregular Livers: The right side of it (in its use of cutting) is ground down to a Bevil, or edge, which is afterwards set or made more sharper, with a Whet-stone, as other Working Tools.

VI. He beareth Vert, an **Hatchet Head**, Argent. Some term it an **Hatchet sans Hatome**, or **Halbe**.

O. the like, the Basil or edge erected G. born by *Frankenstein*.

A. the same in Bend Sinister G. born by *Finchen* or *Fincken*.

VII. He beareth Argent, an **Axe**, (or **Carpenters Axe**) in Bend Azure, the **Hatome**, Or; between a **Sinnet** and an **Auger** of the same: These are three Tools used principally by the Carpenters of which in their order.

First, the **Axe** used by the Carpenter, is the same in form to the **Hatchet**, only larger in the head, and longer in the **Hawme**, because it is to be used with both hands, and is for Hewing and Squaring of great Timber, to make it fit for use.

The **Sinnet** is used to cut and take off Irregularities in all sorts of work lying under hand or flat, which the **Axe** or **Hatchet** cannot be handled to touch: Some term it an **Addice**, or **Adz**.

Of these **Sinnets** or **Addices**, there is another sort also used by Carpenters, which hath its Blade made thin and somewhat arching (as this doth) but the other end is faced or headed like to a great Hammer. These Instruments as they have their edge adwart the Handle, so their Grinding to a Basil is on the in-side to the out-edge, which is the cause, when it is Blunt, it cannot be ground, unless the **Helve** be taken out of the **Eye** of the **Addice**.

B. 3 such with a Fess between A. the **Hasts** O. is born by *Ginnett*.

G. 3 such O. born by *Froburgh*.

The **Auger**, or **Augre**, or **Oger**, as some call it, hath in it, the **Handle**, which is of Wood, and the **Shank**, and the **Bit** which Boreth; its office is to make great and round holes suitable to the rotundity of the Bit; and when it is used, the Stuff worked upon, is commonly laid below under you, or set equal to your Breast; that ones strength may be the easier used for the twisting the Bit about by the force of both hands.

There are several sorts of them from a quarter of an Inch Bore, to 4, 5, or 6 inches in the Diameter, but big or little, their form and make is all one and the same.

A. an **Oger** B. **Handle** O. born by *Neber*.

A. 3 such S. **Handles** O. born by *Oger* or *Auger*.

VIII. He

VIII. He beareth Argent, a **Pair of Compasses**, Sable. This is born by the name of *Compassale*.

A. a Cheveron engrailed between 3 Compasses S. is the Coat Armour belonging to the Company of Carpenters; the same is born in the Joyners and Masons Arms.

Some Blazon them **Compasses dilated**, or **opened**; but that term needs not; because in Coats of Arms, they are ever one of three parts, or thereabouts, opened to their extension.

The **Joynt** is the place where the Compasses move and turn.

The **Cheeks of the Joynt**, is where they go in one to the other.

The **Shanks**,

The **Points**.

IX. He beareth Gules, a **Pair of Sliding or Circle Dividers**, Or. These are Compasses which open upon a Brass semi-circle, and by a small Screw is made fast at any station.

B. 3 such O. pointed S. is born by *Bonny*.

G. one pair of such O. born by *Bartzen*.

X. He beareth Gules, a **Pair of Screw Dividers**, Or, **Pointed**, Sable. Born by *Distance*. These are Compasses opened and shut with a screw, so that there is no danger of their moving from their station. By all these foresaid Compasses, are described Circles Ovals &c. and also Distances are measured and set off from the Rule, or from any other divided Rod or Staffe, to the thing to be wrought upon.

V. a paire of Dividers A. born by *Port*.

A. 3 such S. born by *Dividend*.

XI. He beareth Or, a **Paire of Callipers**, Sable born by *Diminuer*. As common Compasses are for measuring Distances upon a plain Superficies; so the Callipers measure the distance or Thickness of any Cilindrick or Orbicall body, either in their extremity, or any part lesse then the extremity. So that the juft Diameter is known by the distance of the points of the Compass, be the same either Feet or Inches.

A. 3 such S. born by *Scalper*.

XII. He beareth Sable, a **Ioyners Bevil Square**, Or. Born by *Bevill*. of this kind of bearing in Arms, see more *lib. 1. chap. 9. numb. 78*.

B. 3 such O. is born by *Reffen*.

In the base of this square is a **Pair of Callipers** with their **Points Crossing** one another, Sable; in a field Argent. is born by *Van Slogan*.

XIII. He beareth Gules, a **Ioyners Rule**, or a two Foot Rule, Or; and a **Carpenters Square**, Argent. The Rule is equally divided into two foot, which is againe subdivided into 24 Inches, these also brought into halfe and quarters of Inches; And are for the best use, generally made of Box or Pearce tree, or some other hard wood. This may also be termed a **Geometrical Staffe**, or a **Pard**, when it is thus divided.

The **Carpenters Square**, is made generally of

Iron, the shorter part being a foot, and the longer part two foot, both ends being divided into Inches, half and quarter inches. Its use, besides Measuring, is to strike or draw streight Lines, and to try the squareness of the work, whether it be true or not.

An Hand and Arm holding such a square O. Sleeve G. turned up A. is the Crest of the Carpenters Company of the City of *Chester*.

A. a Cheveron between 3 such S. born by *Atlow*.

XIV. He beareth Azure, two **Carpenters Squares** endorsed and issuant, Or. By the name of *Getzell*.

XV. He beareth Vert, a **Ioyners Square**, Or; it is made of two pieces of Wood, the one Mortised into the other, and so shot exactly streight as to make a square within, and by the help of the side lying Parallel to another streight piece, either a streight Line or a square Angle may be drawn.

The **Handle**, is the Mortised piece.

The **Tongue**, is the piece put into the Mortise.

The **outward Square**.

The **inward Square**.

There is another way of making the Joyners Square, whose Figure you may see *chap. 8. numb. 134*.

B. 3 Squares, 2 endorsed, the 3 to the Sinister A. born by *Vetzer of the Rhine*.

XVI. He beareth Gules, a **Bevil moving square**, Or; or else a **moving Bevil square**: This square upon the moveableness of the **Tongue** upon a Center, may be set to strike Angles of any greater or lesser number of degrees; according to the opening it, too or from the Handle; when as all other fixed Bevil squares take the Angles at 45 degrees only, as in the **Miter square** following.

S. 3 such O. a Border A. is born by *Movere*.

XVII. He beareth Sable, a **Miter square**, Or. This square hath also an **Handle** and a **Tongue**, as that mentioned *numb. 15*. whose use is to strike either square or Miter Lines according as you apply the ends of it to the out-sides of the Quarter or Batten you are to work upon: By the help of this, Miter or Bevil Lines are Cut or Sawed so exact, that two being joined together, it will make an Angle; thus square Frames for Pictures, Looking Glasses, and such like are commonly made.

S. the like points reversed O. in Chief a Lion passant A. born by *Parly*.

XVIII. He beareth Argent, a **Gage**, or **Dual Gage**, or **Ioyners Gage** (of some termed a **Storage**) Gules. It is made of either a square, or fix square piece of Wood, fitted by a square hole through the middle very stiff upon a **Staff**, that it may be set nearer or farther off the **Tooth** at the side end of the said Staff. Its office or use is to strike a Line Parallel to any streight side; it is used for the Gaging of Tenants, or any Stuff to be Cut or Plained to an equal thickness.

Some Gages have a **Screw** through the square, that if it slip too easie on the Staff, the Screw by turning

ing it to the Staff doth keep it from moving.

XIX. He beareth in this quarter two sorts of **Joynter-Plains**; that in the chief is termed a **Joynter**, which is the largest sort of Plains by them used, it is perfectly straight from end to end; its office is to follow the **Fore-Plain**; and to shoot those things perfectly straight, and to take off those irregularities which remain in the first taking off the Saws roughness in Boards or any other sorts of Timber: It is also used to try all sorts of **Tables** great or small, by Plaining them **Traverse**, **Angularly**, **Cornerwise**, as well as with the grain, that the Workman may be well assured of the flatness and straightness of the work. Carpenters term this their **Long Plain**.

V. such a Joynter in Fels between 3 Flowers de lis Or. is born by the name of **Joynter**.

The parts of a Joynter Plain.

The **Stock**.

The **Sole**, is the bottom of the Stock which shoots upon the work.

The **Handle**, by which it is held and thrust forwards. The **Cote**.

The **Bitt**, is the Iron as cuts.

The **Wedge**, it keeps the Bitt fast in its place.

The **Mouth of the Stock**, is the hole where the Bitt is wedged.

The **Breech of the Stock**, is the end from the hole or mouth.

The **Head of the Stock**, from the handle to that end it is at.

The **Cote**, or **Dote**, is the handle abovesaid.

A **Plain**, when all its parts and Members are together.

The second sort of Plain is called the **Fore-Plain**, and of some the **Former**, or the **course Plain**; because it is used to take off the roughness of the Timber before it be worked with the **Joynter**, or **smooth Plain**; and for that end the edge of the Iron or Bitt, is not ground upon a straight as other Plains are, but rises with a **Convex Arch** in the middle of it; and is set also more Ranker and further out of the mouth in the Sole of the Stock, than any other Bits or Irons are.

The **Jack Plain**, called so by the Carpenter, is the same that Joynters call the **Fore-Plain**.

XX. In this quarter is first the **round Smoothing Plain**, whose Sole is not straight but convex.

The second is the **Rabbit Plain**, which hath the sides of the Iron not inclosed in the Stock as the foregoing Plains, but the Iron is full as broad as the Stock is thick, that the very Angles of the Iron edge may not be born of the Stuff it is to cut; nor doth it deliver the Shavings at a **Mouth** on the top of the Stock, as the other Plains do; but it hath its mouth on the sides of the Plain, and delivers them there; the Iron is about an Inch broad in the flat, but is much thinner

because of its wedging in the Stock; its office is to cut a Square down into a Board or other Timber, for another like piece to fall into it; also to strike a **Facia** in a piece of Molding.

XXI. He beareth Gules, a **Caper Bit** in traverse, Argent; the **Head** and a **Smoothing Plain**, Or. Born by the name **Plainbale**. Of these Instruments more particularly.

The **Caper Bit**, is for the making of a small hole wider and larger, being in the mouth half round whose edges are sharp, and by reason of its being taper as it goeth into a hole with the small end and is turned about therein, the edges cut it wide by taking shavings or pairings from the hole side.

S. 3 such is born by the name of **Tapler** or **Tapley**.

The **Smoothing Plain**, is a little short Plain, which hath its Iron set very fine, and to take off very thin shavings, because its use and office is only to smooth the work from those Irregularities which the **Fore-Plain** and the **Joynter** have left behind them. There is another way of making them with a straight flat **Sole**, as in other Plains.

A. a **Cheveron S.** between 3 such proper, born by **Smoothes**.

The several sorts of Plains.

The **Strike Block**, is a Plain shorter than the Joynter, having the Sole made exactly flat and straight, and is used for the shooting of a short Joint; because it is more ready for the hand than the long Joynter: It is also used for the fitting and framing of **Miter** and **Bevil** Joyns.

The **Miter Plain**.

The **Rebate Plain**.

The **Scurging Plain**.

The **Moulding Plains**, are for the working off of several sorts of Moulding works, which Plains have names according to their several Operations; as

The **Hallow Plain**.

The **Round**, or **Half Round Plain**.

The **Belection Plain**.

The **Dgee Plain**.

The **Back Dgee Plain**.

The **Cornish Plain**.

The **Phalister Plain**.

XXII. He beareth Argent, a **Morters Chissel**, Azure, the **Helve**, Or. By the name of **Chizell**.

This is a Chissel broad in the sides and thick in the face part, so consequently stronger than other Chissels, that it may abide heavier Blows with the Mallet; it hath a deep **Basil**, and is used to cut deep square holes called **Mortises** in a piece of Wood: They are of several bignesses answerable to the breadth of the Mortises they are to make.

XXIII. He beareth Or, a **Spring Bitt**, Sable; **Handle**, Argent. Three such is born by the name of **Hile**. This is a thing like an **Awle**, having a four square

Square Blade, with which holes are made in thin and narrow Stuff, to drive in small and slender Nails called Sprigs; Nails without heads.

XXIV. He beareth Azure, a **Brace and Bit**, Or. This hath several denominations as I find amongst Workmen; for of some it is termed a **Brace**, others a **Wimble**, others a **Wimble-Brace**, and a **Clam-brace**; in London it is generally termed a **Piercer**. It is used in Boring of Holes to drive Wooden Pins through Mortises and Tennants in Joiners work.

Two such **Braces** erected and endosed, or conjoined with a Girdle Gule, is the **Crest of Bracegirdle**, of *Bracegirdle Green* in *Cheshire*.

The parts of the Brace and Bit.

The **Head**, is the round top, flat Button, which turneth in a hole in the Stock.

The **Socket**, of the Brace head, the place where it turns, and the Bit is fixed.

The **Handle**, is the part which the Workman holds, and is made of Wood or Iron. The **Bush** or **Pad Hole**, a four square hole in which the Bit is placed, so as it cannot turn.

The **Stock**, is all the turning part of the Brace.

The **Bush** or **Pad**, is the square piece of Wood in which the Bit is fixed, which is taken out and put into the **Brace** as often as it is used.

The **Bit**, is the Iron as bores the hole, which that you may see the parts more exactly view the next Figure.

XXV. He beareth a **Bit**, fixed in its **Bush** or **Pad**. The **Bushes** being made fit for the square hole of the **Brace** may serve for several sorts of Bits, both to make small and large holes, also ebb or deep according to the length of the **Shank** of the Bit. The **Bush** hath its **hold**, which is the square; the **Shoulder** for the **Brace** to rest upon; and the **round** or **bottom**, where the Bit is put in.

XXVI. He beareth Sable, a **Cording Augre**, (or **Auger**) and **Pin**, Or. These are Instruments of Wood, whose use is only for the Cording of Beds, to strain the Ropes straight, for Matts and Beds to ly upon. The Carpenter useth such a like Pin to this of Iron, or sometime of Wood, which is called an **hook-pin**, whose office it is to pin the frame of a Floor, or frame of a Roof or Wall-plate together while they are fitting each piece to its place; it is taper in the **shank**, therefore easily taken out of the hole, with a **Hammer** striking either under the hook, or at the bottom of it.

XXVII. He beareth Argent, an **Hold-Fast**, and a **Gimblet**, Sable. This is another fashioned Gimblet in the head, than that formerly mentioned *numb. 1.* that having the handle round and cut off at each end, but this hath the handle direct oval or like an Egg; the **Bit** being in the end like the Bit of an **Augre** or **Dger**.

*

The **Joiners Hold-Fast**, is an Instrument of Iron, which being put into a loose hole of a **Joiners Bench**, and the **Beak** set upon any piece of Timber, with the **Knock** of an **Hammer** or **Mallet** upon the head of it, will cause the Work to ly fast upon the Bench till the Work-man either **Saw**, **Tennant**, **Mortels**, or **Plain** it; in the **Hold-Fast** there are these several terms.

The **Shank**, which is round, and goes through the hole of the Bench.

The **Head** is the square, on which the **Mallet** striketh.

The **Beake**, the flat end which is crooked downwards, the very point being either round or square, is made flatish, which is called the **Beak end**.

XXVIII. He beareth Sable, a **Stock of a Tree** in **Bend**, couped at both ends, Or; cut half through with a **Whip** or **Framing Saw**, Fels wife, Argent, **handles** of the second. This is a **Dutch Coat** born by the name of *Van Saugesbergh*. This is also Blazoned thus, a **Whip Saw** sitting or cutting in two a **Stock of a Tree couped** in the ends; but the first is much better termed.

The **Whip Saw**, of some termed a **Framing Saw**, is a long Saw used between two persons to Saw such great pieces of Timber or other Stuff that the **Hand Saw** will not easily reach through; when they use it, the Timber is laid upon a **Trussel**, and the Men stand on either side of it, and so Saw it through; he to whom the **Teeth** of the Saw points, draws to him, the other thrusts from him.

The remainder of the Joiners Tools for working, you will see *chap. 8. numb. 132. to 143.* to which place I must now refer you and fall to another employ.

2. THE next to Joiners; fall (according to the course of the Engravers work) the Instruments and Tools belonging to the Art, Mystery, and Science of Painting; of which I shall say little here, but give you the form of several Instruments used by them; having already given their terms in the third Chapter of this Book.

Painters Instruments.

XXIX. He beareth Argent, a **Drawing Desk**, Gules. This is a kind of open Desk by means whereof any unskillfull in the Art of Drawing, may draw the exact form of any thing printed from copper plates, be it man or beast, or any Sollid Image, or figure of a thing; and that with great facility. It is a frame made with hinges joyned to an other board of equall breadth to it, having two **Stays** at the top to raise it higher or lower as need shall require.

The manner of using it is thus, fasten the printed figure fast upon the frame of the Desk; upon it fasten a sheet of clean paper, which upon the raising of the frame up upon the

the draught, you will see on your white paper the whole draught of the print so perfectly; that with your pen you may draw it as accurately as any Limmer whatsoever.

XXX. He beareth Azure, a **Drawing Frame**, Or; Luteo, Sable. This is a square Frame fixed upon a round foot, made and crossed into equal squares (as many as you please) with Lute Strings, or fine Pack Thrid which is to be figured at the end of each String, with figures alike; as the two sides to have the same, and the top and bottom answerable. Also there must be a sheet of paper (or less, as you intend your draught) divided by lines drawn cross it, with just so many equal squares as the frame containeth; having the like figures at the end of the Lines, as is upon the frame.

The use is thus, lay the frame on any printed figure as a man, woman, bird, beast or landskip &c. then with a black lead Pen, draw the same by little and little on the paper, passing from square unto square, with the same lines, as you see the Strings of the frame cross the lines of the Print, or Picture, you are drawing after. It is used also to be set before an Image, or the face of a man, or woman, to take the direct dimensions and proportions of them. And also to draw little shapes from big ones, by making the Squares less on the paper to be drawn; and so on the contrary.

XXXI. In this Quarter in the Base is placed a **Painters Grinding Stone**, with a **Muller** upon the surface thereof. By these two said Stones all sorts of Painters colours are ground fine, either for water or oyl painting; not by Rubbing the colour by the strength of Arms, but rather by a slight manangement of the muller upon the Grinding Stone.

The other in Chief is the **Painters Pallet**, with several sorts of **Colours** layd thereon; with a quantity of **Pencills** fixed on their **Sticks**, set in the Hole of the Pallet, or holding place thereof. After this manner a Painter when he riseth from his **Castell**, or Work, he ever puts his Pencills and Pallet thus together, till he take them into his hands again.

The **Pallet**, is a thin peece of Board, of Cedar wood, Walnut, or Pear tree, or of Horn; about a foot long & 8 or 9 inches broad; almost like an Egge, at the narrow end of which is made an hole to put the Thumb of the left hand in, near to it is cut a Noche on the outside, by means whereof he may hold both the Pallet on the thumb and the **Pencills** and **Rest** in the fingers of the same left hand, without trouble. It is used to hold, mix, and temper colours upon, as the Painter hath occasion to use them.

A **Pencil**, is a small quantity of Hair, either of Fiddlers, Squirrels, or Hogs hair, and such like stuffe, tyed orderly up, and put into Quills, which quills have Sticks (termed **Pencil Sticks**) put into, them of several lengths according to their uses, by which the pencil is held to work withall. Of these **Pencills** there are of all bignesses, from a small Pin, to the compass of a finger or a thumb: what exceeds are generally known by the name of **Crenches**, **Coils**, and **Laying**

Brushes, according to their making.

XXXII. The first is a thing called a **Stay** or a **Rest**, of some termed a **Hot stick**; it is a slender or thin stick made round, either of Brazill, or the like, of a yard long, having at one end thereof a little Ball of Cotton, fixed in a peece of Leather of the bigness of a Walnut; its use is, when you are at work, you are to hold it in your left hand, and laying the end which hath the Leather Ball upon the Cloth or Frame worked upon, you may rest your right Hand or Arm upon it, for the more steadiness thereof whilst you are at work.

The second is termed an **Castell**; it is a Frame made of Wood (much like a **Ladder**), somewhat broader at the bottom than at the top, having a **Stay** at the back, the sides flat and full of holes one even with the other, for which there are to be two Pins of Wood to set your work upon, and to raise it higher or lower at pleasure; if the work or frame be small that it will not reach the Pins, then there is a narrow Board laid over the Pins, and so the work rests upon it.

The **Castell**, is altogether.

The **Stay**, is that as sets it more upright, or sloping.

The **Pins** or **Peggs**.

The **Castell Board**.

XXXIII. He beareth in this quarter, a **Stenchall** between a **Priming Knife**, and a **Painters Laying Brush**, but of these in their Orders.

First, the **Stenchall** is a thing made of Tin, about 8 or 10 inches long, and as broad as you please (according to the number of Pencils laid in it) Three sides of it is raised and the fourth is turned downwards, by means whereof in its standing it is raised up higher on one end than the other, which doth make the Oyl put into it, to run all to the lower end: Now the use it is for, is to keep all those Pencils which have been wrought in Oyl soft and molliable; by laying of their points in Oyl contained in the said Tin, which otherwise lying but of Oyl would soon dry and grow hard, and so become good for no use.

The **Priming Knife**, it is a kind of Knife with a broad Blade, and about a Foot or 10 inches long, made slender and apt to bend; from the Blade cometh a crooked Handle (much like a **Crowel**), on which is fixed a **Velvet** or **Past**. By this Instrument are all sorts of Cloths laid over with their first colour, which is called **Primer**; from whence this is termed a **Priming Knife**.

The **Painters Laying Brush**; it is of a contrary nature to **Pencills**, they being made of fine Hair pointed, and put in Quills or Pins: But these Brushes are made of a wood in a round end of Hogs Bristles tyed up together about a **Handle** or **Stick** to hold them by, while the Colour is laying; of these there are several sorts, of big and little, answerable to the work they are to do.

V. a Priming Knife between 3 such Brushes O. by the name of *Painter*.

Per Bend B. and A. on a Bend G. 3 such Brushes A. Handles O. born by *Van Borstell*.

XXXIV. In this quarter is set a *Cross pair of Compasses*, a *Passill*, and a *Cleansing Pot*, of which in their order.

First, the *Cross Compasses*, of some termed *Cross Dividers*, and so called because they are contrary to other *Compasses*, which are pulled open by the Tangs, but these are opened by squeezing of them together at the head.

S. the like O. is born by *Whirley*.

G. a *Chevron* between 3 such A. is born by *Darlington*.

The *Passill*, is that which is set on the dexter side of the *Compasses*, it is an Instrument used in drawing the first or rude draught of any designed piece before it be coloured; some make them of Chalk, others of Tobacco Pipe Clay, others of *Plaster of Paris*, or of *Alabaster* Calcined, and with Water made into a Paste then rolled into long pieces (like *Black Lead Pencils*) and dried in the Air, and when you use them, scrape them to a point with a sharp Knife.

Passills are thus made of several colours to draw withal upon *Gold*, *Silver*, or *Parchment*; adding that colour you desire to the forehead composition, which in water washes the Faces of Men and Women, the Colours of Clouds, Sun Beams, Building and Shadows.

The *Cleansing Pot*, is either made of Glass, Earth, or Tin, and hath Oyl in it at all times, to be ready for the Makers use, and is principally for to cleanse and purify Pencils from the Dregs of such Colours as remain in them after Oyl work; which is by dipping the ends into the Oyl, and then gently drawing the same between your finger and the edge of the Pot or Cup; and the Oyl will loosen the Colour out of the Pencil, and by degrees make it as clean as if no colour had been in it.

XXXV. He beareth Argent, a *Desk*, or a *Writing Desk*, with an *Open Book* upon it, all proper. Born by the name of *Student*. The Desk is not only to Write and Read upon, but also to keep things in; having a *Drawer* in the end, or side thereof, in which is the *Standish* for *Ink*, the *Quill Box*, and a place for *Pens*, *Pen-knife*, and *Quill*, &c.

B. the like O. Book A. in each 3 *Escrolls*, born by *Vigilant*, or *Vigilancy*.

Tanners and Glovers Instruments.

3. THIS Section Treateth of Coats of Arms, made or formed of Artificial things, wrought by the Wit and Industry of these several Trades and

Occupations to whom they belong, viz. *Tanners*, *Glovers*, *Curriers*, and such like, whose employments are in and about ordering of Leather; the Instruments and Tools of which said Professions in some part I shall give you here, the remainder are to be found chap. 8. numb. 118. &c.

XXXVI. He beareth Azure, a *Glovers Flething Knife*, Argent, the *Handles*, Or. Though I mention but one Knife, yet in this quarter I have placed two, only to shew the several ways I have observed them to be drawn, especially in the fixing of the *Handles*, some letting them streight from, others cross to the Knife. Some term them *Glovers Scraping Knives*, or *Working Knives*, or *Codding Knives*.

S. 3 such A. Handles O. born by *Flethings*.

XXXVII. He beareth Argent, a *Cleaving Knife*, Azure, *Handle*, Or. This is generally made with a thick Back, and the edge made with an hollow, as in the next example.

B. the like A. Handle G. born by *Van Schaben*, of *Alsatia*.

A. 2 such, the Tangs sans *Handles*, erected and endorsed, G. born by the name of *Winfelden*.

XXXVIII. He beareth Sable, upon a *Tanners*, or *Glovers Beam*, an *Hide* or *Skin*, Argent; with a *Flething Knife* cross the middle of it, proper. This is fixed upon the *Beam*, just as if the Man were working at the same in full prospect before you, as you may see chap. 3. numb. 31.

XXXIX. He beareth Gules, a *Runge way*, (or *Runge Pole*) in Bend Sinister, surmounted of an *Hook*, (or *Tanners Line Hook*) Or. By the name of *Poller*.

XL. He beareth Azure, a *Runge* (or *Glovers Runge*) Or. This is a Vessel (like a large Tub) with two Ears or *Stouks*, (as some call them) having a round hole in each, through which a long *Weight* or *Pole* is thrust, and so it is born between two Men. It is to carry Water in for the Benefit of their *Washing*, and filling their *Pans*.

A. 3 *Runges* S. Hooped O. born by *Rungen*.

Book-Binders Tools.

4. NOW the *Stationers* and *Book-Binders* Instruments, or Tools, of their Occupation are next to be handled, of which except of these few, all I be better stored with the rest.

XLI. He beareth Argent, a *Writing Desk*, proper, Lined or covered with *Green Cloth*, or *Leath*. Vert. The use of this I have said before numb. 35. several parts of it may be said to be these: The Back and Sides.

The

The **Ledge** or **Stay**, to hold any thing on it.
The **Slide Drawer**, to keep the Writers Neccessaries

The inner part, for to keep Writings and Papers therein.

The **Drawers** within, fixt to the back part.

The **private Drawers**, to keep Rings, Jewels and Money in.

XLII. He beareth Argent, a **Binding Press**, proper. This is for the Binding and Stitching of single Sheets of Paper into Books.

Parts of a Binding Press.

The **Bottom Board**.

The **Passage**, the place through which the Bands are put.

The **Press Keys**, those which make the Bands fast under the Board.

The **Bands** of Leather, to which the Book is sowed.

The two **Screws**.

The **Nuts**, that turn on the Screws to streighten the Bands.

The **Over-cross piece**, with its eyes, through which the Screws run.

XLIII. He beareth Gules, a **Stationers**, or **Book-Binders Screw-press**, Or. When the Books are stitched together, then these do their office, which is to press on their covers, and keep them together for cutting.

Parts of the Screw-Press.

The two **Screws**, the heads of the Screws with their cross holes.

The two **Cheeks**, with their two Female Screws apiece through them.

The **Press Pin**, an Iron to turn the Screws.

The **Cutting Boards**.

The **Pressing Boards**.

The **Plow Stay** or **Riglet**, on which the Plow runs freely.

XLIV. He beareth Argent, a **Stationers Cutting Knife** or **Plow**, proper; and a **Folding Stick**: The first being to cut the Leaves of the Books even and smooth; and the other is used for the folding of the Leaves to prepare them for the Press, it being nothing else but a flat piece of Ivory or hard Wood with sharp edges. Of the Plow or Cutting Knife, see it better Engraven and farther described, *chap. 8. numb. 164.*

In the chief is the form of the Knife belonging to the Book-Binders **Plow**, it is made of Steel, square, with a square hole in the middle to hold it; from the out-side of which square, proceeds a Tang which ends in a three square, being Bafled off to a sharp point, and two edges, which cuts the Paper Leaves as it runs along with the Plow, on the Rigget of the Press, in

which the Book is held or screwed to be cut.

XLV. He beareth Argent, a **square Beating Stone**, Azure; with a **Broad Faced Hammer** upon the Superficies thereof, Sable, the **Handle**, Or. This is born by the name of **Beater**.

S. 3 such A. Handles O. born by *Ruten*.

Mathematical Instruments.

5. FROM the Study of Books we shall proceed next to those Noble Sciences which are gained by their Instructions, which though but a Dead Letter, yet gives Life to all manner of Arts. Now the Instruments which we shall treat upon, are principally such as do measure forth to us both Place and Time; and such as these are used and made for Astronomy, Astrology, Geometry, Navigation, the Art of Dialling, and Clock-work.

XLVI. He beareth Azure, a **Quadrant**, Or; the **Line** and **Plummet** pendant, Sable. This is of some called the **Compass Quadrant**, or **Geometrical Quadrant**, because the same hath its circumference quarter round, and divided into 90 parts or degrees, being the fourth part of a circle; by the help of this Instrument the height, depth and distance of places are taken and certainly known, and that either by the Plumb-line, or shadow of the Sun.

B. 3 such corners erected O. is born by *Quadrant*.

XLVII. He beareth Azure, a **Quadrangle**, or a **Geometrical square**, or **Quadrant**, Or. The **Lines**, or **Degrees**, & **Plummet**, Sable. In this Instrument there are three principal Lines, all the rest are called the **scales** or **degrees**.

The first is the **Line of Level**, which is the Line where the Plummet hangs, and so down the side.

The second is the **Line of Height**, and is from the Plumb hole to the opposite corner of the Angle, or runneth cross the Quadrant.

The third is the **Line of Height upright**, which is from the Plumb hole, to the corner against it, all along the Line, where the Sight holes are.

The **contrary Shadow**, is that from the corner of the Line of Level to that of the Line of Height.

The **Left Shadow**.

The **Right Shadow**, is the distance between the Line of height, and the Line of upright.

The **Sight holes**, are two small Brasses with each a hole in, to see through, set on the edge of the Quadrant.

The **Scale** or **Degrees**, are the dividing of the circular compassed Lines, and the quarter lines, each into 12 parts, called degrees.

XLVIII. He beareth Gules, a **Jacobs Staff**, or a **Cross Staff** in Fess, Or; and a **semi Quadrant**,

A 2 2 2

of

of some called a **Demi-Quadrant**, or an **Half Quadrant**.

The **Jacobs Staff**, of some Writers called the **Profitable Rod** or **Staff**. It is a Princely Instrument being set forth in its Perfection; it is a Rod four square, about 3, 4, or 5 foot long, divided into inches all its length; having another cros peece on it, about a foot or two foot long, having a square hole in the middle, to move too and fro on the long Rod or Staff, and made to tarry on any division, as occasion requirereth. By the help of this Instrument, heights, lengths, and breadths of places are taken, see *chap. 8. numb. 169.*

B. a Jacobs Staff in Bend between two Estoiles O. born by *Higall*.

In the Base is another sort of **semi-Quadrant**, or **Octodrant**, which I have seen drawn in Mathematical and Geometrical Tables of Instruments; it contains the fourth part of a semi-circle, but of its use I have not yet read.

XLIX. He beareth Sable, a **Circular Weather Glass**, Argent. This is a Glass of two pieces, the **Shank**, which is divided, is put into a **Neck** in the middle of a **Circular Glass**, which being three parts filled with a Water made by Art (as Mr. *Bate* describeth *pag. 35.*) and rarified in the head of the Glass, both being well Luted together, and hung up by a String; then the Water will in Cold Weather ascend the Glass or Shank divided, to 8, 9, or 10 degrees, and with heat it will descend the Shank and mount into the horns of the round Glass.

L. He beareth Argent, a **Perpendicular Weather Glass**, Azure, set in a **Frame**, Sable. This is a like Glass with a long **shank**, and a round **head**, which shank is put through the hole of the Frame, on the top, and so is fixed and Luted into another, at the bottom or foot of the Frame, which is broader below than above; the compound Water (as aforesaid) being rarified in the head of the Glass, will ascend and descend, according to the temperature of the Season.

There are **double** and **trebble Glasses**, made and set in one Frame, and according to the composition of the Water and rarifying the Air, some Waters will ascend in Cold, and others will ascend in Heat.

LI. He beareth Gules, a **Sun Dial** with its **Gnomon**, or **Cock**, Or. There are several sorts of Sun Dials, some for Pillars or Posts, others for Walls, as the following example.

LII. He beareth Azure, a **Sun Dial** for a **Wall**, Argent, the **Cock** or **Stile**, or **Gnomon**, Sable.

Of the sorts of Sun Dials, and the Terms used about them.

An **Horologigraphian**, a Dial maker.

Horologigraphy, is the Art of Dialling.

An **Horizontal**, or **Spherical**, or a round hollow Dial.

*

An **Erect South Dial**, declining Eastward or Westward.

A **South and North Erect Declining Dial**.

An **Erect North Dial**, declining Eastward or Westward.

A **South, North, East, or West Erect Direct Dial**.

A **Polar Dial**.

A **Horizontal Dial**, is such a Plate as cuts no Angle with the Horizon; this is termed a **Plain Dial**, a Dial for a Pillar or top of a Post.

A **Declining Dial**, is such Dial Plates as behold not some part of the World directly, are called **Declining**.

A **Reclining Dial**, is when the Plate stands not upright, but maketh an obtuse or blunt Angle with the Horizon: now it is said to Recline according to its degrees of Reclination.

An **Inclining Dial**, is when the Angles which the Plate maketh with the Horizon, be acute and sharp, which Inclination is known by its quantity of degrees.

A **Reclining and Declining Dial**, or a Declining and Inclining Dial.

A **Direct Reclining** or Inclining Dial.

A **Dial on the Ceiling of a Room**, where the direct Beams of the Sun never come.

A **Ball**, or **Globe Dial**, to shew the Hour without a Gnomon.

A **Glass Globe Dial**, whose Axis shall cast a shadow on the hour of the day.

An **Equinoctial Dial**.

The **Stile** or **Rod** of the Dial by which the Shadow is cast, it hath one end directly placed towards the North, and the other end to the South. See **Gnomon**.

The **Sub-stile**, is the Line or place over which the Stile or Gnomon of the Dial hangeth; and the space between the Stile and Sub-stile is just the height thereof.

The **right and equal Angles**, is when one Line in a Dial cutteth another squarewise.

The **Contingent**, or **Touch Line**, is that which is drawn by any point of another Line or Circle, so that it toucheth the same; and this Line commonly in all Dials is drawn squarewise to the Sub-stile.

The **Quadrant Line**, is the fourth part of a Circle.

Parallel Lines, are those that are every where off at a like distance one from another; as in the East and West Dial all the Lines be Parallel.

Erect, is when the Plate stands upright, and maketh a right Angle with the Horizon.

Direct, is when the Plate stands full upon the East, West, North, or South, and toucheth no other point; such is termed an **Erect Direct North** (or South, &c.) Dial.

Elevation of the Pole, is the knowledge of the degrees, or height the North Pole Star is at such or such a place required.

The **Center**, or Center of the Stile.

The **Gnomon**, the **Cock**, or **Stile**, which casts the shadow of a Dial set flat on a Pillar or Post.

The **Equator**, is a semi, or whole Circle drawn about

about the Stile, Center, or Horizontal Line, to mark the Hour Lines by.

The **Hour Lines**, are those from the Center to the Figures, which shew the hours of the day both morning and evening.

The **Equinoctial Circle**,

The **Meridian Line**, is the middle day or 12 of the Clock Line, over which the Stile is placed.

The **Horizontal Line**, is the Line which goeth cross the Dial, on which the Center is made for the end of the Stile or Gnomon to be fixed in.

The **Sine** of the Complement of the Declination.

The **Sine** of the Complement of the Elevation.

The **Ark of the Stile**, or the Ark whose Complement is the height of the Stile, or the distance of the Line of the Sub Stile from the Meridian; the height of a Circle.

Declination, a Bending or Declining to some one point of the Winds more than another.

Reclination, a Bending downwards, or leaning forwards towards one side, or to such a point of the Compass.

Inclination, is a Bending to, or inclining to such or such a point or part of the World, whether East, West, North, or South.

An **Equal Hour**, or **Vulgar Hour**, is an hour consisting of 60 minutes; at the Equinoctial the day consists of 12 equal, and 12 unequal hours.

An **unequal or Planetary Hour**, is meant the twelfth part of a day, be it a long or short day. These be called also the Hours of the Planets; so that in the Winter Solstice the unequal hours are less.

Equidistant, at even distance one from the other.

Gnomonical Semi-Circle, a semi-circle set in a declining reclining Dial Plate, whereby to make the Stile its true height.

They that desire the Studying of these things, and to be proficient in the Art of Dialling may peruse these Authors.

Jo. Moxons *Tutor to Astronomy and Geography*, Lib. 5. *Art of Dialling*.

LIII. He beareth Gules, the Minute paces of a Clock set on a Stand, Or. By the name of *Pastime*.

3. on a Hill in Base O. the Stand and Minute Paces A. is born by *Van Virmahell*, or *Virmahl*, as they Spell it in *Bavaria*, where the Family abideth.

LIV. He beareth Vert, a Meridian Spherical Dial, of some termed a *Planispherical Sun Dial*.

The use of this Geometrical Instrument, besides the telling of the hour of the day by the height of the Sun, is farther described by Mr. Moxon in his *Tutor to Astronomy*, Lib. 5. to whose Works you are referred.

This is another sort of pendant Dials, which are hung by the hand, and turned towards the Sun, that by his Beams darting through small Pin-holes made for that purpose, the hour of the Day or Night may be found. These are commonly called Equinoctial or Universal Dials, and are most used by Sea-Men and Travellers that oft shift Latitudes.

LV. He beareth Sable, a Clock, or an House Clock, Or; the two side Lids or Windows open, the Finger Board or Figure plate, Argent. This is born by the name of *Clockman*.

The Clock consists of two parts, viz. the Watch part, which is always in motion, and the striking part, which only goeth about when it striketh the Hours, of which several parts take the denominations of them from the Watch, as in *numb. 57*.

LVI. He beareth Vert, an Hour Glass, Argent, Frame, Or. By the name of *Time*.

Per Chevron O. and G. 3 Roses counterchanged, Slipped V. on a Chief G. 3 Hour Glasses O. born by the name of *White*, a Doctor of that name who was Bishop of *Winchester*.

B. 3 such O. Glasses A. born by *Currier*.

LVII. He beareth Gules, a Watch, (or an Hour Watch,) with its Cover open, and the Key in Base Chained to the Watch, Or.

The parts of the Watch outwardly.

In the upper Plate side.

The Ballance.

The Cock.

The Cock Screw.

The Rock Wheel.

The Silver Plate to raise the Spring by.

The Endless Screw, one sort hath a Catch; another hath a Spring, the other a Worm Screw.

The Steel pieces,

The Steel pieces Screw, and back hand and Screw.

The Count Wheel,

The Rock Wheel, the Nut for its Stop.

In the Dial Plate side.

The Dial Plate.

The Finger, or Hand, or Slide Wheel, the Dial Wheel and Axel Tree,

The Housh Wheel, or Slide Wheel.

The Motion Wheel, between the Pillar Plate and Dial Plate.

In and between the Pillar Plates.

The Pillars and Pin.

The Movement, is all the work set together, as

The Main Wheel, its Axel Tree, Cleck, Cleck Spring, Fusce, Catch of the Fusce, the square which it is wound up by; the Pinion report or Mouffoot.

The Barrel, its Axel Tree, Spring in the Barrel, and Catch to hold the Spring.

The second Wheel, Axel-Tree, Pinion or Wrongs.

The Countred, or Counter Wheel, its Axel-tree, its Pinion.

The Ballance Wheel, its Axel tree, and its Pinion.

The Ballance Spindle, and the two Pellets on it.

The Pottance, or Main Pottance,

The

The **Counter Pottance**, which stands in the countred Wheel.

The **Follower**, which is fixed in the Counter Pottance, for the end of the Ballance Wheel to go in.

The **Gard Cord Stud**, and the Gard Cord, which stops the Fulce from over-winding.

The **Gard Cord Spring**.

In the Clock or Striking part.

The **Main Wheel**, Axle-tree, and Cleck.

The **Cleck Spring**, and the Fulce.

The **Barrel**, the Axle-tree, and main Spring.

The **second Wheel**, the Pinion and Pins of the Wheel to catch at the Hammer.

The **third Wheel**, and the Pinion in it.

The **Warning Wheel**, and the Pin to catch at the Detton.

The **Wind Fly**.

The two **Dettons**, with their **Notches**, that strike into two Wheel Detton Latches.

The **Quarrier**, the Hammer Spring, the Gard Spring to keep it off the Bell.

The **Hour Wheel**, with twelve points.

The **Bell**, and one Screw.

*Note, that all the Nicks or Notches in the Wheel are termed **Teeth**, and those in the Pinions are called **Clutongs**.*

Incase or Box and Cover.

The cut cover, or **Lunett**, the **Lining**, **Hook** and **Detton**.

The **Inner Case**, or **Box**.

The **Joints** or **Hinges**.

The **Pendant**, that as it hangs by.

The **Ring of the Pendant**, which the Key and Chain hangs at.

The **Scallop**, as covers the Winding hole.

The **Key**, and its **Bow**.

LVIII. He beareth Sable, a **Mariners Card**, or **Compass**, Argent; signed with the names of the four principal Winds, viz. North, East, South and West, Gules.

The Compass contains four principal points, East, West, North and South, one opposite to another, and these are again subdivided into as many more parts, which makes 8 points, and they are North East, South West, North West and South East; each of which points are again subdivided into 3 parts, which 8 times 3 being added to the former 8 makes 32 points, the whole number of the Compass, the names of each see in the next.

LIX. He beareth Gules, on a **Table with a Frame** Argent, a **Mariners Compass** with all its points, Sable. Some Blazon it in short a **Mariners Compass**, or a **Chart** of all the points of the **Wind**; which points are by Navigators and Sea men said to be 32 in number, which they name thus, beginning in the North, and so turning round by the East.

The names of all the Points of the Compass.

- | | |
|------------------------------|-----------------------------|
| 1. NORTH | 17. SOUTH |
| 2. North and by East. | 18. South and by West. |
| 3. North North East. | 19. South South West. |
| 4. North East and by North. | 20. South West & by South. |
| 5. North East. | 21. South West. |
| 6. North East and by East. | 22. South West and by West. |
| 7. East North East. | 23. West South West. |
| 8. East and by North. | 24. West and by South. |
| 9. EAST. | 25. WEST. |
| 10. East and by South. | 26. West and by North. |
| 11. East South East. | 27. West North West. |
| 12. South East and by East. | 28. North West & by West. |
| 13. South East. | 29. North West. |
| 14. South East and by South. | 30. North West & by North. |
| 15. South South East. | 31. North North West. |
| 16. South and by East. | 32. North and by West. |

Where note that the two Poles North and South, have the greatest denominations of all the other points, being each eleven, viz. the full North, and 10 Northerly points; and the full South and 10 Southerly points; whereas the East and West have their full points, and each four Easterly and Westerly points.

LX. He beareth Sable, a **Perambulator**, Or, with its **Needle** and **Wheel**, Argent. This is an Instrument used by Geometritians, by which they measure the distances between place and place; for the Man as runs the Wheel before him hath this observation; that the Wheel hath such a Compass, and at every hundred turns of it, is such a distance, at which time the Finger of the Compass Board, shews by its pointing at the Figures on it, how many times it turns.

LXI. He beareth Azure, a **Circumferentor**, Or, Figured Sable. This is an Instrument that is constantly used with the Perambulator, and is carried in the hand of him that is the Geometritian or Cosmographer, to note upon it the several turnings and distances of places as the Wheel of the Perambulator gives an account of. This I suppose is so called, because it is fit and easie to be carried about with one.

LXII. He beareth Azure, a **Mirror** or **Looking Glass**, Argent; the **Frame** and **Handle**, Or. This thing hath several denominations according to the use it is put unto; as for example if it be looked upon, as to see the Face in, it is Blazoned a **Mirror**, a **Seeing Glass**, or **Looking Glass**, in Latine *Speculum*, and so it is termed when held by a Maremaid, as *lib. 2. chap. 16. numb. 2.* and *chap. 7. numb. 58.* when looked upon by a Tyger.

It is called a **Magnifying Glass**, when looked through to behold another thing behind it; in which respect these kind of Glasses (being thick in the middle and thin in the sides) will make any thing on the farther side of it to appear twice or thrice, or more times, bigger.

bigger than they are; of this Nature are Spectacles which are made for Old Ages.

It is termed a **Burning Glass**, being held at a certain distance from any combustible matter, and in a direct Line between the Sun and the said matter, it will in a short time Fire the same.

Several sorts of Seeing Glasses.

- Looking Glasses**, to see ones Face therein.
- Spectacle Glasses**, Eyes for Old People.
- Perspective Glasses**, to see things afar off.
- Optick Glasses**, which represents things several ways.
- Magnifying Glasses**, that makes things great.
- Diminishing Glasses**, that makes things seem small.
- Multiplying Glasses**, that makes one things seem many.
- Prismes Glasses**, which represent things of diverse colours, as red, green, yellow, like a Rain-Bow.
- Burning Glasses**, that Fires any thing by the Sun.
- Conver Glasses**, which shew things upside down.

LXIII. He beareth Gules, a **Multiplying Glass**, Argent. This is a Glass cut or ground into so many squares as it will contain, which Glass being fixed in a Box of Tin, or Wood, or the like, being narrow at one end, and broad at the other; if you put your Eye to the narrow end, and look through the Glass at any thing; that you look at, will appear to your sight, as many more as there is squares in the said Glass.

LXIV. He beareth Sable, a **Mathematical Square**, Or; the **Sights**, **Line** and **Plummet**, Argent. This is called Mathematical, because of its Sights, Line and Plummet, otherwise it is no other than a **Carpenters Square**; by the help of these things added to it, and for want of other Instruments, a shift is often made to take the height of places, with the distance, breadth and depth of them.

In the Sinister side is a pair of pointed Compasses, with a sliding semi-circle; these though they be termed pointed, yet they are contrary to them mentioned in the 10. those having a Spring Head, and this a revolved Head, besides the Shanks are rebated, having points set in them.

A. the like reversed, or points erected G. is born by Giffelden.
The same with the semi-circle to the Dexter side, is born by Petzinger of Bavaria.

LXV. He beareth Vert, a **Mathematical Rule**, Or. This is no other but a Joyners Rule, or two Foot, brought into a Mathematical order, and by the help of the Sights, a Line and Plummet, having a **Quadrant** drawn on the side of the Rule, it is made a Geometrical Instrument; by means whereof it is used to take heights, breadth, and distances of places, as before is said of the square.

A **Gunners Scale**, one side being divided into inches, quarters, and half quarters, with a Gunners Quadrant described upon it; the other side having the names of all sorts of Ordnance, Length, Diameter, and Weight of Ball and Poudre to charge each Peece. It is made of Box or Brass, and not above 8 Inches long.

The second thing in this square, is called a **Prospective Glass**, but more properly a **Prospective extended**, or drawn out at length. This is a thing in the outward shape round like to a Cylinder, running one degree into another, for 3, 4, or 5 lengths; at the utmost ends (being drawn out) are two Glasses fixed, through which if one look at a thing for a Mile or two distant from us, we may discern the same as perfect as if it were at the end of the Glass.

There are **Prospertives** that are used by Marriners, and are of such a length, that they will discover any thing at 7, 8, or 9 mile distance, having three Glasses, one at each end, and one in the middle, when drawn at length. These Prospective Glasses have two contrary properties, and that according to the ends looked through; one end contracts a great distance into a little space, making the object appear at the end of the Glass; the other end looked through at a thing near at hand, maketh the same appear both small, and at a great distance, yet seen perfect in all its proportions.

LXVI. He beareth Azure, a **Concave pair of Callipers**, Or. These are Compasses having the points bending outwards, as the Callipers bend inward; the use of these are to take the Diameter, or distance of places in any Concave, or hollowed body, having a sliding Compass, by which the thing required is made manifest, as the Figures on the first circle doth note. Some of them have no sliding Circle at all, but are made plain.

LXVII. He beareth Gules, a **pair of double pointed Compasses**, Or. These have been drawn amongst other Mathematical Instruments, and Geometrical Tables, but for what use they are I am yet to be Taught, neither have I ever found such to be born in Honours Armory.

LXVIII. He beareth Sable, a **Scheme**, or Figure of the **Houses of Heaven**, Argent. The Houses are in number 12, which are 12 equal parts; but in an Oblique Sphere they are unequal parts, and that more or less, according to the quantity of the Obliquity.

By these Astrologers Calculate Nativities, foretell Future Events, and do many wondrous things through that Art, and by the course of the Stars, which are said to work strangely on the Bodies of Men and Women.

The names of all the Houses in a Scheme

The Twelfth part of the Heavens considered in the situation of the World, is called an House.

nomers divide the whole Sphere into four equal parts, by the Meridian and by the Horizon, and each of these Quadrants are again sub-divided into three other parts, thereby making 12 Divisions of the whole, which are called Houses, and reckoned in Order, contrary to the motion of the *Primum Mobile*.

The 12 Houses of Heaven are numbred from the Ascendent or Angle at the East downwards, as the Figures 1, 2, 3, 4, &c. doth shew.

The four Houses called Cardinals, are the 1, 10, 7, and 4.

The Ascendent, is the first House, or Angle of the East, being the first Cardinal House.

The *Medium Coeli*, or *Culmer Coeli*, is the second Cardinal, or Tenth House, called also the Angle of South.

The Descendent, is the Seventh House, or Angle of West, and third Cardinal.

The *Imum Coeli*, is the Fourth House, or Angle of North, and fourth Cardinal.

The second House, Succedent to the first.

The third House, Cadent.

The fifth House, Succedent.

The sixth and eighth Houses, Cadent.

The ninth and eleventh Houses, Succedent.

The twelfth House, Cadent.

The *Horoscope*, is here taken for the Ascendent or first House, but more properly the Sign and Degree on the Cusp of that House, or that part of the *Ecliptick*, that lies in the East.

The Cusp of each House, is the beginning or first point of each of the 12 Houses.

The *Eclipticks*, are here meant to be the several lines which cut one another, of which the Houses are composed, and stand in position one to another.

The Cadent Houses, are them next from the Angles of an Astrological Figure, as 3, 6, 9, 12.

The Succedent Houses, are them as follow the Angles in a Celestial Figure, as 2, 5, 8, 11. So the 12 Houses are distinguished by semi circles of Position.

LXIX. This is another manner of drawing a Scheme, or an Astrological Figure, by which results are given concerning Questions proposed; but of this I have spoken before; it being no business of mine to talk of such Mysteries, which of all other Arts I have least minded to read: But if any desire a further reason for this division of the Heavens, and why such a signification is ascribed to each House, he may apply himself to these Authors or the like.

Eland his Tutor to Astrology, or Astrology made easie.

Geometrical Terms for Lines.

6. THE definitions of the Principles of Geometrical Lines are here next to be described, and these

teach the Drawing, Measuring and Proportion of Figures, with all their terms and denominations; for there is no Figure but it hath its certain bounds and inclosures of Lines; and every Line is begun or ends at some certain Prick; therefore it is needful to know these smaller parts of a Figure, that thereby the whole Figure may be better judged and distinctly named a-funder.

a is a **Point** or **Center** of any circumference; it is a thing that hath neither breadth nor length in it: A Prick or small print of a Pen or Pencil which is not moved from its first touch.

b is a **Line** which hath length in it, but no breadth, and called a **pricked Line**, when thus if numbred, called a **Linear number**.

c is a **Parallel** or **Parallel**, or **equi distance**, or **Genovue Lines**, they are lines as run together at an equal distance one from the other, whether they be straight or crooked; termed **Bought Lines**, when one end is wider than the other, thus =

d is the **Superficies**, or out side, or overmost part of any thing; it hath length and breadth, but no thickness, termed a **plain Platfo:m**.

e the meeting of two Lines cross, **Lines Centingent**. see *b*.

f is a **perpendicular** or **plumb Line**, a Line down right. And an **Oblique Line**, which runs Byas, or a-thwart.

g is a **right Angle**, or straight corner, a square angle, it is composed of a ground line, and a perpendicular or plumb line.

h is an **obtuse Angle** or corner, having one Line running backwards from the corner. A **Blunt** or **Broad Corner**.

i is an **Angle recti-linear**, an Angle made of right or equal lines, a sharp angle or corner, being less than a square Angle.

k is an **Angle curvi-linear**, or **curvi-linea**, an Angle made of two crooked Lines bending inwards or outwards.

l is an **Angle curvi-Linear**, having the crooked Lines bending outwards.

m is an **Acute Angle**, having the Lines longer than their distance between the two ends, therefore called a sharp Angle, and the reason is because one Line is often straight, and the other Bevil inwards.

n is an **Angle mixti-Linear**, or an Angle composite, having an Angle made of a straight line, and a crooked one bending inwards, after the same manner there is

o an **Angle convex**, or an Angle composed of mixt Lines, straight and bending outwards.

A **Secant**, or a **point secant**, are the points where cross Lines do generally meet, and interchive places.

Now as of many Pricks is made a Line, so of many Lines are made diverse forms of Figures and Plat-forms; as in example.

p is a **crooked Plat-form**.

q is a **mixt Plat-form**.

r is a **Trigon**, or a **Triangle Origone**, and a **Triangle equilateral**, when the Lines are of an equal length, and make 3 sharp angles.

Triangle Hosielle, a Triangle made of two lines, and one longer than the other.
Triangle Scalene, it is a Triangle composed of 3 uneven Lines, each longer than other, which make 3 unlike corners.

Tetragone, or a **Quadrangle**, a **Square**, it hath all the Lines even and of one length, therefore called a four square; a **Square superficial**, having breadth but no thickness.

The **Diagonal Line**, is the prick which goeth from corner to corner of this or any other cornered figure, whither it run transverse, oblique, or perpendicular; called also the **Diagone Line**.

is an **Oblong square**, or a **long square**, that hath its angles right but not equal in length; the sides longer than the ends.

is a **Parallelo-grame square**, or a square side figure, the sides being Parallels, but the ends having oblique corners.

is a **Triangle Rect-angled**, as having a right angle in one part of it. It is also termed an **Orthogone**, or **Rectangle Trigon**.

is a **Triangle Ambigone**, when it hath an oblique Angle, which is drawn into a Triangle, by a long Line to the points of it.

is a **Trigonal Pyramid**, a Pyramid of three squares.

is a **Gnomon square**, which is the excess, or rising of the Parallelo-grame square, upon another of the same; framed upon a **Diagonal**, as the Hatched part is, and doth demonstrate.

is a **Rombus**, a **Rhomb**, or a **Lozenge** or **rhomb**, this is a quadrangle having equal Lines, yet have two oblique angles or corners sharper than the other.

The **Diagonal Line**, is the prick Line as runs from corner to corner, of which I have spoken in the figure f. It is also called the **Axis**.

is a **Romboid square**, **Rhomboides**, a kind of square that hath two equal sides; but the opposites are Lines of unequal lengths.

is a **Trapeze square**, this is composed of two equal Lines, and the other two unequal to them and themselves.

is a **Trapezode square**, or a square made all of uneven or unequal Lines.

is a **Paisine**, a square which hath breadth, length, and thickness.

1. is a **Spiral Line**, or **Worm Line**, a Line that begins in the Center, and turns round, going further off as it doth turn.

2. is a **Wolute Line**, or a **Twist Line**, it is like the Worm of a Screw.

3. is a **Crooked Line**. These are **Crooked**, also **Parallel**: Of these sorts of Crooked Lines there are innumerable diversities, whereof these are some Examples following, which have no Angles.

4. is a **Composed Line**, a Line that is almost half round.

5. is also termed a **mirt** or **Composed Line**, a

Crookwise Line, it bends contrary ways with the two ends: These are oft drawn Parallels, and termed **Semioves Crookwise**.

6. is a **Circular** or **Waved Line**.

7. is a **Mirt Line**, that is part streight and part crooked.

8. is a **Circle**, a **Circumference**, a round.

The **Diameter**, is the Line that goeth from side to side, through the center or middle part.

The **Axis** or **Altitude Line**, of some termed **Radius**, the **Raie** or **Spoke**, is the Line as runs from the center to any part of a circular body.

The **Cord** or **String Line** goes cross the circle, but not at the center.

The **Sine Line**, in Geometrical Rules is called the half of the Cord or String Line, or right Lines in a center, as those Lines which make a square are termed **Sines**; those which exceed it and run to the edge of the round, are termed the **Versed Sine Lines**, or **Sine compleat**.

The **Tangent Line**, is when a Line in a circumference runs from the center to another Line in the circumference not at the center, and only toucheth it and there ends.

The **Secant Line**, is that as runs through or crosseth other Lines in the Round, or the parts of the circumference it self.

9. is a **Semi-circle**, a **Demy-circle**, the **Horizon**; if it be less than the semi circle it is called a **Cantell**; as the **Greater Cantell**, the greatest part; and the **lesser Cantell**, the least part of it.

The **Arch** or **Bow Line**, is the Compass Line of the Cantell of a Circle.

10. is a **Concentrical Figure**, that is when many Lines are drawn by the means of one and the same center; in like manner may many squares be drawn one within another by the help of a **Diagonal Line**. This is also termed **Parallel-Circular**.

11. is an **Eccentric Figure**, that is when one or more Lines are made within one another, by means of diverse centers.

12. an **Eclipse** or **Egge Oval**, is a long round, having one end more sharp than the other: If long and small at both ends alike, then it is termed a **Cun Oval**, or **Cun Form**; if sharp at both ends, an **Eye Form**.

13. is an **Oval**, it is an oblong round, that is longer than broad; it contains in length three half circles, and in breadth but little more than the circle.

The **Are Line**, or **Are Tree**, is the Line drawn through the middle either length or broad ways.

14. is a **Sector**, which is either a streight or Parallel Line, or such as are square, made within the compass of a semi-circle, or over or under the Diameter Line, as you see in this round. The bottom part taken out of the Circle, is termed a **Hook**, or **Hook Cantle**.

15. is an **Octagone**, an eight square, a round having eight corners or points.

16. is a **Seragone**, **Peragone**, or **Exagon**, is the same having six squares.

Pentagone, is a circle of five squares or corners.

B b b

Dep.

Heptagon, or **Septagon**, a 7 square, or having 7 corners.

Hexneagon, or **Enneagon**, that hath 9 squares or angles.

Decagon, a square of 10 corners.

Endecagon, that hath 11 corners.

Dodecagon, a twelve square, or that hath 12 corners.

Polygon, or **Poligon**, a general term when the Figure hath many corners; and sometimes **Multi**

Lateral, a square of many sides.

And as many Lines make one **Plane**, which are Figures or Shapes without depth or thickness, being only long and broad; for many **Planes** is made a body, which containeth length, breadth, and depth.

Depth is to be understood the thickness or solidity of the substance it containeth; not depth as in a Well or Cup, but the breadth of its sides.

By **Bound**, is meant the beginning, end, and side of any solid form, or substance; as much and more than the Eye seeth at a time, the rest understood.

By **Form**, **Figure** or **Shape**, is meant that thing that is inclosed within one Bond or Bound, or many Bounds, so that you understand the shape that the eye discerneth, but not the substance of the Body.

17. is a **Globe**, a **Sphere**, a **Ball**, or a **Bowl**; any thing that is round. **Globical**, round as much one way as another.

18. is an **Oyle**, an **Hoop**, or any round body that hath not the like in thickness.

19. is a **Cylinder**, a **Rowler**, or **Rolling Pin**, a thing round and long. **Cylindrical**, any thing like such things.

20. is a **Cube**, **Die-like**, four square every way; a **Square Solid**.

21. is a **Turno**, or **Top-like**, broad at the top, and taper towards the bottom.

*

22. is a **Cone** or **Conick**, a **Spire**, any thing broad at the bottom, going **Caper** towards the top.

Conical or **Spiral**, is any thing like to such a Figure.

23. is a **Pyramide**, a **Tetragonal Pyramide**, or a **Tetrahedron**, any thing four square below, and so riseth to a pointed square at the top.

24. is a **Decahedron**, or a square of 8 triangles.

25. is a **Pentagonal Pyramide**, a **Spire** that riseth up in five corners or squares.

26. is an **Icosahedron**, a **Ball**, or round of 20 Triangles.

Decahedron, is a round of 6x Triangles.

Decahedron, is ten Triangles.

Dodecahedron, is 12 Trigon or Triangles.

Polychedron, a Ball with many Trigon upon it, a Ball of many three squares.

27. This is a figure of an half round, yet hollow, each side with Artists, hath its particular term, as

The **Conver**, is the outward round of any Globical Figure.

The **Concave**, is the inward part, or hollow of such things as have no substance within them, called the **Concave Superficies**, and the **Conver Superficies**.

28. is a **Regular Figure**, or a Figure of an equi-angle, that is alike in all parts.

29. is an **Irregular Figure**, a Figure unequal, having both the angles and sides unlike.

They who desire a farther in-sight into these Geometrical Lines and Figures, may peruse these Books.

The Worshipful

EDWARD BRERETON, of Bursham, in the County
of Denbigh, Esquire.

And to Edward Brereton, his Son and Heir.

SIR,

As you have been a promoter of Loyalty and Justice in your County, so you have also given your self to the Study of Antiquity and Arms, which make a Gentleman Compleat; therefore as a Token of your Worth, I do herewith Dedicate the ensuing Plate, and Discourse upon it, to your Serious Consideration: Subscribing my self

Your Obliged Servant

Randle Holme.

CHAP. IX.

Pewterers Tools.

THE next Trade is the Pewterers, whose Instruments both for Shape and Variety are not short of any; it being a Trade that requireth many Tools, because from it proceeds much invention, as also diversity of shapes.

LXX. There are two sorts of Burnishers used by Pewterers. The first in Chief, is termed an *Hand Burnisher*, it is the least sort, and is used with one hand, the work being held in the other, while it is Burnishing.

The *Graver*, is an Instrument or Tool directly of this form; but it is much larger, having a double edge, or edged on both sides, one Basill standing contrary sided; and the handle is of a great length.

S. 3 Pewterers Burnishers, erected in Fels A. by the name of *Burnishers*.

The second Tool in the Base, is termed an *Patoka*

Bill Burnisher; and such is used for all Crooked work both inward and outward.

LXXI. In this quarter is set forth two sorts of Pewterers *Studdys* or *Anvils*, of which in particular, as they are set in the Field. The first is termed a *Buffing Studdy*, or *Stiddy*; it hath a square taper end, with a shoulder at the foot of the Shank, to be set either on a Block or Bench (as all other small Anvils and Stiddy's have, that are removed from place to place, and one used after another, as the work requireth) and a round head to work upon.

G. one such A. born by *Arnoul*.

S. a Fels between 3 such A. is born by *Stiddy*.

The second is an *Hollowing Stiddy*.

The third is a *Flat Anvil*; on this is Planished any kind of Plate, to make the same lye even and flat.

LXXII. On the Dexter side, is an Instrument called a *Swage*, or a small *Strage*; of these they use several sorts big and little, so that they give them names

Bbb 2

accordingly.

accordingly. This O. in a Field B. I find born by the name of *Anulfe*.

The second is a **Planishing Stake**; of this kind of Anvil I find nothing in Arms.

The **Raising Stake**, is like unto this in the shank, but the face instead of being flat is round, it hath a round top.

The **Bullet**, or **Basting Stake**, hath a round top, but it is longer and smaller than the **Raising Stake**.

LXXIII. In this quarter are also three Tools very useful for the said Occupation. The first on the Dexter Base side, is a **Spoon Stamp**; on this they beat out and hollow Spoons.

The second is called a **Beak Iron**.

V. a Beak Iron in Chief, between 2 Roses A. is born by *Bellisaire*.

The third is termed a **Boug Hammer**; this is round at one end and flat at the other, tending towards an edge, but of a roundness.

The **Bordering Hammer** is the same in shape, but much larger.

LXXIV. He beareth Azure, a Pewterers Instrument, or kind of Spuddy, called a **Calfs Head Stake**, Argent. Three such as these I find born by the name of *Van Promstakein*.

LXXV. In the chief of this quarter, is a Tool called a **Flotte**, or **Flote**; it is an half round Iron with Teeth like a Saw all the breadth of the out-side of it. 3 such in Pale A. the Field S. is born by *Birsin*, or *Basin*.

S. a Flote in Fess A. between 3 Beazants, belongs to the name of *Crokley*.

The second is the **Pewterers Sodering Iron**; it is made directly three square in the place where the handle is fixed, and so runs tapering to an end or sharp point, all in a three square, the handle is streight, with a little turn at the further end, like a Button.

A 3 such Sodering Irons points erected G. born by the name of *Samcocks*.

LXXVI. He beareth Gules, a **Pewterers Raising Hammer**, Argent; the Handle Or. Born by the name of *Nick Sans*. 3 such in a Field B. is born by the name of *Spooner*.

The **Spoon Hammer**, is made after the same form, but it is larger than the raising Hammer, for their way and use in working.

So that in Blazoning things of this nature having names (not from the shape) but, from their bigness, may be termed either after the bigger or lesser.

A 3 such B. Handle S. is born by *Bosson*.

*

LXXVII. He beareth in this quarter a pair of **Clams**, with a **Wedge** in them; they are Iron Checks, with a **Rivet Pin** to hold them together; between which if a **Wedge** be put, it will hold any thing so firmly in the upper Claws, that it cannot be moved out.

LXXVIII. This is another fashioned pair of **Clams** which they use, and is made fast together in the **Lips**, or place where it holds, by running down of the **Leather**, but principally of an **Horn Hoop**, which the nearer it goes to the end, the faster it holds the thing put between the Lips.

LXXIX. In this quarter, in the chief thereof, is another Tool of the Pewterers, called an **Hollowing Hook**; this in the Hook part is of the middle flaps, being longer than round; for some of these **Hollowing Hooks**, are in the Bent just half round, others are longer than this; some are three square in the Bent, and some are only sharp and long having no breadth; which is the most proper term for the **Hollowing Hook**, the foresaid being either round or square **Hollowing Hooks**, and so are to be termed.

B. 3 round **Hollowing Hooks** in Pale, the middle counterpointed A. Handles O. is born by *Bosgaft* of *France*.

S. a Fess between 3 square **Hollowing Hooks** erected A. Handles O. born by *Hollow*.

S. an **Hollowing Hook** in Fess A. between 3 Flowers de lis O. born by *Carmicus*.

In the Sinister side of this square, is an **Hanging Candlestick**, with its **Branch** to the dexter, proceeding out of the mouth of a **Leopards face**. The forms and fashions of these kind of **Wall** or **Hanging Candlesticks**, which in some Countreys in *England* are termed **Scouces**, are numberless; some having them with Faces, others with Birds, Beasts, Fish, Trees and Flowers; some with round or oval imbossed works, swelling out according to the fancy and ingenuity of the Workmen. S. the like O. with a **Candle** burning in the Socket proper, is the Badge of the *Scoucemakers*.

LXXX. In this quarter, is a kind of **Spuddy**, called by the Pewterers an **Horse Head**, fixed upon a **Plane** or **Block** set upon four feet. This is now as it ought to be fixed or set up for the Workman, the Tang or square point at the bottom of the **Shank** being set into a hole fit for it, where it stands firm to work upon.

As this is set, so the lower Tangs of all the foresaid **Anvils**, **Stidys**, **Smages**, **Beak Irons**, and the rest, are fixed on **Blocks** or **Benches** to work upon, before they can be used.

LXXXI. This is the form of the **Pewterers Wheel**, by which he polisheth his Dishes, and other works of his.

LXXXII. He beareth Sable, a pair of **Snuffers**, or a pair of **Coppers** extended or opened Or. By the name of *Snuffer*. These are Instruments by which the

exor

exorbitant and over-burnt Wick in a Candle which make the Flame dim and dark, is taken away, that the Flame may give a more clear and pure Light.

Lapidaries and Jewellers Instruments.

8. IN this Section I shall present you with such Tools and Instruments I find usually used by Stone or Jewel Cutters, called **Lapidaries** and **Jewel Workers**, or makers up of Stones into Rings, Lockets, Jewels, and such like, which Trade is termed a **Jeweller**.

LXXXIII. In this quarter is four things useful in Jewelling, the first and that in chief, is termed the **Corn Tongs**.

The second is the **Enamel Grinder**, or the **Enamel Pestel**, or **Enamel Muller**, it bears those names, and is no other thing than an Agate Stone set in a Brass hoop or socket with a wooden handle; it is to Grind all sorts of Enamels in a **Flint Mortar**, there being no other and safer way to Grind it.

The third is a **Flint Mortar**; it is a piece of Flint about the bigness of an ordinary Apple, having a round hole cut in it and polished; in it Enamel is ground.

The fourth is a **Boysling Pan**.

LXXXIV. Also in this quarter are likewise four other sorts of Tools used by Jewellers. The first lying in chief is a **Setting Hammer**.

The second in the Fels part, is termed a **War Stick**.

The third in the Dexter Base, is called a **Bufler**. It is a long square piece of Copper Plate turned direct half round, standing like an Arch.

The fourth is a **War Box**, with a **seven Stone Ring** set in it.

LXXXV. In this is first, the **Using Stone**; it is a flat smooth Stone shooting out into two angles or points on each side.

The second is the **Inamelling Bridge**; it is a long piece of Copper about an Inch or more broad, and three or more on the top, having the ends bent down into a perfect square, and then bent out again for its more steady standing.

The third is, the **Inamelling Tongs**.

LXXXVI. In this quarter are three Instruments in Base, and one occupying the room of the chief, which I shall first name, and is by the Artist termed an **Enamelling point**; It is for the ordering and setting Am-

mell (when ground) in its place, upon the Ring to be Enamelled.

The first in the Base is termed a **Simmon Stick**; it is an handle with a round head, turned flat, yet hollow inwards, which hath a certain Simond clapt upon it, or into it; in the same a Signet Ring is put, or on it a Plate is fixed, while any thing is to be Engraven on the same; it being not to be held any other way.

The second in the Base is a **Brush**, or a **Bistle Brush**, such as Old Men formerly were wont to Brush their Beards with.

The third in Base is termed the **Hook Wiper**; of some the **Hook Wiper**.

LXXXVII. In this square is a certain Engine or Mill, called the **Lapidaries Polishing Mill**.

The parts of a Lapidaries Polishing Mill.

There belongs to it first a strong **Plank Table Cover**, four square, set upon a strong **Frame** with four feet.

Under the Table is two round **Wheels** with Ridges on the out edges, to keep the Wheel string in, that turns cross from one Wheel to the other.

The **Axis** of the **Left Hand Wheel** comes through the Table, and is turned about with the Lapidaries left hand, with a **Winch** fitted on the end of it.

The **Right Hand Wheel**, hath also an **Axis** which comes through the top of the Table, upon which again is fixed another round **Wheel**, or rather a round flat piece of **Lead**, fitted into a round cavity upon the superficies of the Table, where it turns, having the higher end of the Axle-tree set in a round **Socket** of **Iron**, which bends from it after the manner of a Glibet, and so is seated firmly on the Table, that it waver or shake not in its running about.

About the **Table Mill** is fixed a **square Frame**, about an inch and half high, which is only to lay Stones to be ground therein, that thereby they may not be scattered abroad on the Table in time of working.

LXXXVIII. He beareth **Gules**, a **Lapidaries Sand Box**, or **Dust Box**, covered, Or. Born by the name of **Musbox**, or rather **Musk-box**. In such kind of Boxes with covers, Lapidaries keep their fine Dust of Diamond, or of other kinds of Stones made into a kind of Sand, by which with the help of their Mill and Water or Oil, they cut or grind a Stone or Diamond into what form or fashion (used in Rings and Jewels) he pleaseth, afterwards he polisheth them.

Also in Boxes covered after this or any other fashion, the Jeweller keepeth several sorts of Stones for his work, not singly but promiscuously, of all sorts, sizes and colours mixt together.

Comb and Card-makers Instruments.

THE Card-makers Trade is next to be handled, whose Tools though they be few yet several Coats of Arms have made them Honorable, to which I will now proceed. Yea though the mistake was great yet shall not be a mistake in me, but I shall inform you in each particular Trade, what are their particular Tools, though in general in the Daughters of the Plate. **LXXXIX.** In this square are three Tools belonging to the Card-maker. In the first are the **Cutting Sheers**, or the **Wyer Sheers**, by these the Workmen cut the points of Wyer many double together.

The second is the **Card-makers Gutter**, it is a polished Iron or Steel, set in an Hooped handle.

G. 3 such erected in Fels A. Handles O. by the name of *Van Graverdofse*.

The third is the **Card-makers Pickell**, being two sharp points of Wyer set at a little distance, on the flat of an Handle made of Hard Wood; with this he maketh holes in the Leather to set the Teeth in.

G. 3 such O. points A. is born by *Prickett*.

XC. In this quarter are three sorts of Tools belonging to the **Comb-maker**, that in chief is termed a **rounding Saw**.

S. 3 such Saws in Pale A. is born by *Redferne*.

The second is the **Comb-makers Shave**, it is a Tool with a roundish edge and a streight back, with two handles turning to the edge.

S. one such in Fels between 3 Trefoils A. Handles O. is born by *Di Ion*.

The third is termed a **Comb-makers Border**, an Iron streight on the one side, and then flay, and roundish on the other side, with the ends turning up hook like.

XCI. In this square are three other Tools belonging to the **Comb-maker**; the first in the chief, is a **Wier**; it is like the Blade of a Saw, with the farther end of it turning up half round in a sharp point, with an handle bending as in Country Saws. This in Bend A. the Field G. is born by *Ebles*.

S. 3 such in Fels erected O. is born by *Didier*.

The second is termed a **Redishing Knife**; it is a Knife with a long Blade, and sharp pointed like a Scotch Bibby, with a little bending in the back towards the point.

The third is termed a **Rounding Knife**, being a short yet broad Blade, with the end like to a *Turkish*

Saw, a straight back, and a short strong handle.

XCII. In this quarter are three **Comb-makers Tools**; The first is a **Card**, an Instrument three square, whereof the smooth side is up, and one of the Teeth side seen; thus it is drawn with the back up. S. 3 such in Pale A. Handles O. is born by *Clodgill*.

The second is the **Card** with the **Back down-wards**, where you may see the Teeth of two sides meet in a point both in one upon the third corner, or acute Angle. S. one in Bend, the Back reversed A. between 2 Eagles displaid O. by the name of *Cogan* or *Cogan*.

The third is a **Comb-makers Grail**; it is a long, flat, and broad Tool on the Back, and the other side wrought into Teeth like a Saw, the whole breadth from one side to the other, and set with a Tang into a strong handle streight out; and such an one in Pale (or erected) O. between 2 Plates in a Field G. is born by *Bar-nard*.

XCIII. In this square, is first the form and fashion of the **Comb-makers Hatchet**.

The second is an Instrument called a **Guanett**; it is flat backed, and toothed on the other side, like to the Grail; only the **Handle** of this turns backward, over the Back of the Tool where the handle fells. O. 3 such in Pale, the middle contrary pointed S. Handle G. born by *Erson*.

XCIV. In this quarter are also these two Tools belonging to a **Comb maker**, viz. the **Turn File**, and the **Staddow**. The first is in the chief, called a **Turn File**; it is like a Joiners smoothing, or paring Chissel, but with a thick back rising up three square, with a thick strong hooped Handle.

The second termed a **Staddow**,

XCV. In this quarter, is a pair of **Gangs**, which belong to the Trade of a **Comb maker**, and a **Cent-ing Pipe**, and a **Card Board**, belonging to the **Card-maker**.

The first is in the Fels part, that is termed the **Gangs** which is two pieces of Wood, square at top, and rounded off below, with an Iron Pin through both, yet so as they may widen a little; in the square way Horn is held fast, if a Wedge be put in at the bottom and worked up into a Comb.

The second in the Sinister Chief, is termed a **Cent-ing Pipe**, it is a round Socket of Iron set in a thick and round handle of Wood, which the Card-maker useth for

The third is a **Card Board** or **Leaf**, only brought from the Wood-man that made it, being as yet without Leather or Teeth set upon it. V. 3 such O. is born by *Carboard*.

XCVI. In

XCVI. In this quarter is the **Card-makers Tents**, or a pair of **Tents**, as they term it, is two **Boards** having two **Screws** going through them, with two **Screw Nuts**, which draws one Board to the other, or further off the other, according to the breadth of the **Leather**, he puts on the **Centre Hooks** fastened in the **Boards**.

XCVII. In this part of the Plate is engraven three Tools of the **Card-maker**; the first in the dexter chief, is termed a **Cutter**, by the help of this, the **Wyers** for the making of the **Card Teeth**, are cut all of an even length. It is of **Iron** for the hollow square, the rest being **Wood**.

The second in the Sinister chief, is termed a **Double**, with this the **Wire** is bent into the form of a **Greek Π**, the top part is a **Plate** of **Iron**, nailed on a piece of **Wood** rounded, for the ease holding of it in the hand.

The third in the Base, is called a **Crooker**; by the help of this a double Bent is put upon the foresaid **Wire** which is in the form of a **Π** with two ends put into the two holes of this **Place**, and with the **Thumb** bent down to the **Plate**, makes it have a four-fold bending, at which time it is prepared for the **Setting**, as they term it, that is putting it into the **Pitchelled Leather**.

Glasiers Instruments.

IO GLASS wrought by the **Glasier**, doth not so much benefit an **House** by **Light**, as with that **Light**, freeing the place, with its in-dweller, from **Stormy Winds** and **Rain**; Therefore as the benefit is double, so let us Praise the **God** of **Lights**, that we enjoy not only **Light**, but live in **Safety** in it; I mean the **Gospel** the **Word** of **Light**.

XCVIII. In this square are three **Glasiers Tools**; the first is in the chief, which is termed a **Laperkin**. It is a short piece of **Wood** made streight on one edge, but the contrary side edented, or rounded, or how the **Work-man** pleaseth for an adornment: With this, being a kind of **Ruler**, he cuts **Quarries** of any **Size**, and how he will, to fit them for the place he intends to set the same.

The second is a **Soddering Iron**, by which the **Leaden Joints** in a **Pane** of **Glass** are **Soddered** together. In **Soddering**, there is used a **Cise Stone**, or any such thing a little hollow, having a little **Rosin** on, upon which the **Soddering Iron** is often rubbed, to make it take up the **Sodder** on the point of it.

The third in the Base, is termed a **Glasiers Chisel**, or a **Working Knife**; it is a piece of a **Knife** ground round at the end, and set in an **Hast** short and strong,

with an heavy **Leaden Hoop** about it; with the **Blade** the **Turned Lead** is cut off to its length in the sewing of the **Glass** in the **Lead**; and also by the weight of the **Leaden handle**, **Nails** are driven into the **Bench** to keep it in, till it be **Soddered**; also with it **old Lead** is opened, to take out broken **Quarries**, and put in whole ones, from which employ it is termed a **Stopping Knife**.

XCIX. In this quarter is the **Glasiers Moulds**, they are made of **Iron** with long **Riggets** in, for the casting of the **Leads** for to be drawn out by the **Vice**; the **Leads** thus cast in these **Moulds** are termed **Cams**. Also the partition score between this and the next square, is placed an **Instrument** used by the **Glasiers**, being a **Working** or **Stopping Knife** at one end, and a **Ripper** at the other, and is termed a **Knife**, and **Working Iron** conjoined in one. See numb. 105.

C. In this quarter is the **Glasiers Clams**, or **Woods**. It is a square bended **Iron**, set in a strong **Woods**, by help whereof it is held and made to squeeze the two sides of the **Moulds** close together, that no **Lead** run out of the sides.

The second is the **Rosin Box**; it is a long **Wooden Box** with a hole in the cover, wherein is a **Quill** set. It is filled with **Pulverised Rosin**, which is **Knocked** out of the **Box** through the **Quill** upon the **Joints** in a **Pane** of **Glass** when they are to be **Soddered**.

CI. In this part of the Plate, is the form of a **Quarry Mould**; it is a **Blew Slate**, whereon are drawn the several sorts or sizes of **Quarries** of **Glass**, either **Diamond Quarries** or **Pointed Quarries**, with their direct halves; the **Sizes** of their **Quarries** are from **Eighteens** to **Tens**; **Eighteens** being the least sort of **Quarries**, and **Twelves** and **Tens** the largest sort of **Quarries**.

CII. In this square, is that thing which the **Glasiers** call their **Cleaving Board**; it is a streight smooth **Board**, where 3 or 4 pieces of **Iron** are set up an edge, near the **Verge** of the **Board** on one side; at each end is a **square Iron** with a **Screw** through it, which runs too and fro in an **Iron Rigget**, which being set at their distances (according as the breadth of the **Squares** or **Quarries** are to be cut out of the **Table** of **Glass**) are **Screwed** fast that they cannot be moved; and so the **Screw shanks** are a guide to keep the **Ruler** to his due breadth of the **Glass**.

CIII. In the chief of this quarter is the **Glasiers Diamond**; it is that by which he cuts his **Glass**, both out of the **Tables** into **Lengths** or **Cliffs**; and from such long pieces or **Cliffs**, into shorter pieces, as **Squares** or **Quarries**; or otherwise, according to the form of his work.

In and joined to the Base is another **Cutting Board**, used by the **Glasier**, which he terms a **Flinting Board**, or a **Cutting Board**: On this **Glass** according

ording to its largeness, is cut into several forms, as Square, or Quarry, or Fret-work, &c. It is a flat Board with a long square piece of Iron in two Riggers to move up and down, further and nearer, and to be fastned with a Screw (as in the other Board.

CIV. In this square are the two Engines by which the Glasiers Vice is set on work, the first on the Dexter side is the **Handle of the Vice**, which turns it about when it draws the Lead. It hath these terms in it.

The Eye.

The Shank.

The Handle.

The Rivett and Iron at the end of the handle.

The second, is the **Vice Key**; it hath an eye 6 or 8 square, by which with the help of its **Handle**, are screwed on all the **Nuts** upon the Spindle ends, which keeps the Case altogether.

CV. In this quarter is the **Glasiers Vice**. It is made all of Iron work, and covered with a **Case** of the same; so that it cannot be set forth by any draught: however I shall give you the Terms of all its parts and members, as workmen say.

The **Case**. The **Coggs**, of which there are two.

The **Wheeles**. The **Spindles**. The **Cheeks**.

The **Stapes**, the Irons that hold the Vice to the Board. The **Vice Board**.

The **Nuts**, are those that screw on the ends of the Spindles to hold the Case fast together.

The Second thing in this quarter is the **Oyle**, or **Simmoning Brush**. By the helpe of this Brush, the Leading of the glasse is not only oyled and Simmoned to keep out foule weather, but old glasse new leaded is clenfed and purified from filth, but made bright as if it were new: This way of clenfing old glasse quaries, is of some Glasiers termed **Rubbers**.

In the sinister base of this square is the forme of a **Double Crozier**, and a **Stoping Knife** all in one peece; a devise for curiosity, but for much imply a meet Drough: for he that worketh hard with it one day, will cast it aside next. Such an other-like toole you have engraven on the partition score betw: numb. 99 & 100.

CVI. In this square are set forth the severall ways that old Glasiers worked, or Leaded their glasse Panes, whether great or small, which they termed as followeth.

1. **Quarfe Worke.**
2. **Square Worke.**
3. **Frett Worke.**
4. **Prospective worke.**

CVII. In this square are foure other sorts of Pane work to which they gave these denominations.

1. **Dimon, or Loseng Worke.**
2. **...**
3. **...**
4. **...**

Glasiers Terms of Art.

A **Load** of Glasse, is 2 Kribbs.

A **Kribb**, is 100 or 150 Foot of cut Glasse.

A **Case** of Glasse, is 16 Bunches of broad Glasse.

An **Halfe Case**, is 8 Bunches.

A **Bunch** of Glasse, is 3 Tables.

A **Table**, is a broad peece of Glasse neere a yard, some more square. it is also called a **Tablet**.

A **Quarry** of Glasse, is a square peece [of any size from twenties to twelves as they call them] set Arras like with the point upright.

A **Square**, is a peece set with the flat side upwards.

An **Halfe quarry**, is that part cut perpendicularly from point to point. these are called **Halves**.

End halves, are the over thwart tops and bottoms of Quarries.

A **Snip**, is the upper halfe, and sometyms a quarter or lesse of a Quarry, Three Snips goes for a quarry.

Fretten, is waste cut, and broken glasse fit for noe worke. Castaway glasse.

A **Pointed Quarry**, is one much higher then broad.

Cleeveing, is the cying of the Tables of glasse into long peeces the length of the Glasse.

Flinting, or **Cutting**, is the cutting of the Clift glasse into Squares or Quarries.

Casting, is the melting of Lead and poureing it into the Moulds to make Caums Calves, or Bands.

Caums or **Calves**, are the new cast Leads before they be put to the Vice.

Bands, or **Eyes**, are those Leads as hold the Panes to the Window rods.

is the cying away the rough Skirts or Selvages from the sides of the Calves, or Bands.

Drawing, is the runing of the lead through the Vice.

Stretching, is to pull the drawn lead streight out.

Glazing, is the working of flat glasse into any kinde Panes, or window lights.

Clozeing, **Setting**, or **Leading**, is the making of the cut glasse up into Panes.

Joynt, is the crossing of the lead at every corner of the glasse in a Pane.

Sodering, is tying the Joynts fast together with hot melted Pewter being first Roslined.

Simmoning, is the rubing of the Pane all over with burnt Allablaster & oyle mixt, that the Joynts may keep out raine and other kinds of foule weather.

Pane of Glasse, is (be it great or litle) as much Cloted glasse as is set between two window Stages.

Querke, is a nook shoren Pane: or any pane whole sides and top run out of a square form.

Calindow, are severall Panes set together in a range with Stages of Wood or Stone set between them.

Casements, are Panes of glasse set in frames of wood or Iron, and hung on hooks or hinges to open & shut.

Pinning of Casements, is the Sodering the Panes fast in the frames.

New Leading, is seting old decayed Panes of glasse with new turned Lead.

Stoping, is the putting of whole Quarries in a Pane in the place of broken ones.

Rubbers, are old Panes or Quarries made cleane.

Knots, are the Soder Joynts of an old glasse Pane, cut from the other Lead.

Cope Lead, **Knot lead**, or **snapping lead**, is the old lead remaineing after the Knots are cut away.

Heart of the Lead, is the middle of it after the turning thereof in the Vice.

The **Cover**, the Sides of the Turned Lead.

Setting up, is the nayling or fastning the Panes in their places where they should be.

Smelting, or **Refining**, is drawing of Lead from its Dross, and Ashes, &c.

Felt-makers Instruments.

II. IN this Section I do present you with some few more Tools and necessary Instruments, which are used, and very behooveful in the Trade of an **Hat-maker**, whether they be Felts, Casters, or Beavers, which should have been mentioned before in chap. 6. numb. 36. but I confess my self (at the Engraving of that Plate) to be ignorant of them, and many other Trades-mens Tools, which now are come to my Knowledge.

CVIII. In this quarter are the **Felt-makers**, (or more generally termed **Hat-makers**) Instrument called a **Stamper**; It is made of Iron after the manner of a Rowl or Scrowl; one part turned in, the other out.

The second is the **Hatters Mallet**, a thick short round Wooden Mallet.

CIX. He beareth Argent, an **Hatters Mail Can**, Sable. This is born by the name of *Shetland*. This is a Can by which the Felt-maker beats his Lead from the Furnace to the Bench, as he hath occasion to use it. A. 3 such S. is born by *Walcanberg*.

CX. He beareth Argent, a **Felt makers Stripping Brush**. This is born by the name of *Fellingworth*; The Field Or, with three such Sable, is the Coat Armour of *Watson*.

CXI. In this quarter is the **Hatters rounding Trencher and Knife**, this is an Instrument by which the Hat-brim is cut directly round after it is Blocked; it is only a square Board, with an half round cut out of the side of it; and a Knife thrust through it at such a distance as the Brim is to be broad; so turning the hollow of the Board round the Hat Crown, the Knife cuts the edge of the brim round, at its due breadth.

CXII. In this square is the form and fashion of the **Hatters Shears**, as they are fixed in the hole of a **Narrow Plank**; these cut the Wood small, before it goeth to the **Hatters Burdle**, to be **Boned**, or beaten into a dawy substance.

CXIII. He beareth on the Dexter side a pan or pot of Coals fired, and out of the Bale conjoined to the Sinister side, the **Baloning Furnace**. But of these in particular.

The first is only an Earthen Pot, or Pan Mugg, filled with Coals, and a spark of Fire put under them, which being set in the Wind, and open Air presently takes fire; This is to save Prentices a labour in making and blowing the Fire under their Furnices; this doing it to their hands, only putting it into the fire place.

A. 3 Such G. Coals fired proper by the name of *Van Muggel*.

The Second is the **Baloning Furnace**, it is a close square place made of Brick and Clay, with a Fire and vent hole made in the side, to put the aforesaid fired Coals therein; on the top it hath a round hole upon which is laid and made fast a round large Iron Plate, near 2 foot in the Diameter, which receiving heat from the Fire; *Balons* (as they term it) there Hats: that is,

Needle-makers Instruments.

12. UPON finding out of the **Needle**, proceeded the Invention of many curious works; before which time our Fore-fathers are said to make use of an **Pay-thorn**, or a **Thorn Prick**.

CXIV. In this square is a **Needle-makers Instrument** called a **Marking Staple**. It is a thing like to an Iron Staple that is square, having a flat and smooth face, with divers round incisions made into it. Of these marking Staples they have two sorts, the one narrow and long, with long deep Shanks, and the Incisions small. The other marking Staple is thick and deep, both in the Face and Belly, the Shanks thick and short, tapering; having the incisions deep and broad, as the two examples in this quarter will further manifest.

CXV. In this quarter are two other working Tools of the **Needle-makers**. The first is their **Stock Shears**, with these they cut the Wyer to that length as the Needle is to bear.

The second is termed by them a **Guttering Knife**, with this the small **Gutter** (in which the Eye is placed) is made: which is made for the more ease threading of the Needle, by the gliding of the thread into them, which if they were not, it would be more difficult to perform. B. 2 such in pale to the Sinister. A. handles. D. is born by *Van Emerick*.

CXVI. This Instrument is termed, a pair of **Guttering Tongs**. They are made after the form of a pair of **Smiths Pincers**, but the holding part broader. It hath an **Iron ring** fixt to a long peice of Iron, and Revetted to the end of the **Shank**, but with liberty to move: the said Ring being put over the end of the other Shank into a **Nick** or **Gutter**, which is fast together with what it hath between them.

at the end of the line to the end of the line

In the dexter base lyeth the **Needlers Punch**: It is made after the form of a long Willow leaf, tapering from the **Shoulders** to the **head**, with a flat **Face**; and from the **Shoulders** to the **Point** long, yet tapering. With this Tool the Eye of the Needle is made: S. 3 of these in *Fesse*. A. is born by *Dimais*.

CXVII. He beareth in this Square, the **Needlers Anvil**: It is four square in the **Face**, from whence it grows taper in the **Shank**, till the four sides end in the point. G. a bend. O. between 2 such. A. is born by *Gaudier*.

The Second is an **Hammer**; It is a kind of a round thick **Crunchen head**, with two flat or **Face** ends; the handle indifferent long; they may be termed **Iron Mallets**, or **Mallet Hammers**, if they were used in any other profession. 3 such. S. the *Field*. A. is the Arms of *Gijick*.

CXVIII. In this Quarter is two other Instruments of the **Needle-makers**; the first is a **Streightning file**. It is a long peice of Iron or Steel, with a thick back, and an edge bending something: It is fixed in a strong **hooped Welve** or **Handle**. B. 3 such in pale, to the Sinister. A. handles. O. born by *Landryg de la Tour*, a French Family.

The Second is a **Washing Tub**: It is made in form of a **Churne**, wider at bottom then the top; being strongly hooped; having cross peices at each end, through which goeth an **Iron Spindle** upon which it rests in two **Socket holes**, or **Semi-circles** cut on the ends of two standing or upright posts, upon which it is turned about with a **Winch** or **Winder**. When they Wash or Boyl their Needles; their rubbing one upon an other, in the turning about of the Tub, doth scoure themselves.

CXIX. In this Quarter is set forth the form of the **Needle-makers Grinding Stone** and **Wheel**. As for the **Wheel**, it is a large strong **Wheel**, turned about with a **Winch** as it is set in middle of a four square frame, turning on the over-thwart peices, fixed to the uprights, or standing peices; at a distance from this **Wheel** stands the **Grinding Stone**; of which there are two sorts, the one of a **fine Greet**, or **Free-stone**, and the other of **Wood**. Which with oyle and **Trisillo**, or such like, hardens it so, that any hard substance may be burnished upon it, and not in any considerable tyme wast it. By the side of this **Grinding Ston** and **Burnisher**, is fixed on the same **Spindle**, a **Pulley** (like a **Jack Pulley**) to it there comes a **String** from the wheel which causeth it & the **Grinding-stone** to turn.

CXX. I have here caused the true form of the **Grinding stone** and the **Pulley** to be drawn for the fore-sight, that you may see how it is fixed on the **Spindle**. This is termed a **Grind-stone** (or **Grindle-stone**) and its **Pulley** on a **Spindle**.

CXXI. In this Quarter is the **Needle-makers Engine** termed the **Scouring-block**: this is for the Scour-

ing and cleansing of the Needles, when they are all made and finished, as to the working part of them. It is only a **Plank** or **Cressel**, about half a yard or more broad set upon three or four strong feet; on this is laid another **Plank** or thick **Board**, with two **Handles**, having a long peice of **Timber** fastned with a **moving twerl** or **hinge**, to the top of the work-room, coming down to the middle of the board, and fixed there in a **Block**, or thick piece of **Timber**, and stayed with two **Side-risers**. Now Needles laid between these boards, or planks, and two persons shuffling the higher boards two and again, by the ends handles; will in a very short time scowr and cleanse a great quantity of Needles.

CXXII. He beareth in this Square two sorts of **Needle Drawers**, or **Boxes**, in which the Needle-maker puts his several sorts and sizes of Needles, that he may with dexterity find any sort that is required of him, of which there are several sorts, as ye may see in the Trades mentioned in Chap. 3. Numb. 33.

Ink-horn-maker.

13. Since the use of Pen, Ink, and Paper, or Parchment, the Ink-horn hath not been uninvented: and that the first making of them was of **Horn**, is evident from its name; for let it be for Gallantry, made of Gold, Silver, Pewter, Lead, or Tin; yet it is but an **Ink-horn**. Now the Tools of these **Ink-horn-makers**, as of **Horn**, are these.

CXXIII. In this Quarter are four Tools belonging to the **Turner of Ink-horns**: the first on the dexter-side is termed a **Boer**, it is a Tool in form of a **Lofeng**, with a long **Shank** set in an handle, the point is **Basiled** both side the point, to make it have an edge.

S. 3 of these. A. handle. O. is born by *Boer*.

S. a *Fesse* betw. them. A. is born by *Bierberg*.

The Second an **Hollin Chisel**; this is a Tool having a square on one side the end of the **Shank**, which is **Basiled** to an edge on 2 sides, and so set in a long **Handle**. This O. in pale, betw. 2 Ink-horn makers **Spindles**. A. in a *Field*. G. is born by *Corrind*.

The Third is nominated, a **Spindle**, it is a leaflike Tool, set in a **Handle** with edges on both sides of it: the **Handle** hath a round head. V. 3. Ink-horn-makers **Spindles**. A. handle. O. is born by *Woodlford*.

The Fourth is called, an **Hollin Hook**: It is a kind of a hook, as it is set to a long **Shank**, having a **Basile** or grinding to a sharp edge on 2 sides of the crooked square: the end of the **Shank** is fixed in a round long handle.

CXXIV. In this Square are three of the said Tradesmens Tools, useful for their turning. That on the dexter

side is termed a **Point**: being broad and flat in the tool, yet ending in a sharp point, three square-like, so put hath a small **Tongue** into a long **Handle**.

B. 3 such in pale, A. is born by *Flocaute*.

The Second or middle, hath the name of a **Round tool**; yet it is all along 3 square to the **Shank** that goes into the **Handle**.

The Third is called, an **Hollin round tool**. Having a long **Shank**, with a quarter round circle at the side of the end of the said **Shank**: and an **Handle**.

CXXV. In this Long-square, are the Figures of five useful Tools belonging to the **Ink-horn Turner**. The first on the dexter side, is called a **Turning Tool**. It is made with a long four square **shank**, hook'd in the end, with a sharp edge the breadth of the **Shank**; and is set in an **Handle** by a **raug**.

The Second is termed a **Flote**, or **Screw-Rasp**. It is three Square, smooth on one side, and toothed like a Saw on the other two; and set in a handle like a three square File.

V. one such A. between 2 Ink-horn hold-fasts. O. born by *Schrenstait*.

The Third hath the name of a **Chisel**; the **Blade** and the **Shank** are much more longer than the **Wood Turner**.

These in the drafts of the **Plate**, having their handles and Shanks made too short for the **Blades**, which ought to have been drawn much longer, as to the true proportion.

S. 3 such in pale bend-wise. A. handles. O. born by *St Le. ou r*.

The Fourth is the Ink-horn-makers Tool called a **Gouge**; but the **Shank** and **Handle** should have been made longer and slenderer.

For both in this, and the foregoing **Chisel**, the **Flats** are about twice the length of the **Shank**; and the **Shank** and the **Handle**, to be much about the same length. And Note also, that the **Flats** of all the Tools, aforesaid, are to be much longer, then the **Plate** for their proportion sets them forth.

The Fifth is termed an **Hand-screw**. It hath a long **Shank** set in an **Handle**, the further end bent two ways, over thwart, and then streight forwards again; which last bent is wrought into a kind of a **Screw**.

CXXVI. In this Square are two other Tools of the **Horn-turners**; the first is called an **Hollin Point**; whose **Shank** must be much longer then the bending part. It is set in a long round handle of Wood.

The Second is called a **Claw-foot**. This is a piece of turned **Wood** with a flat top in which are fixed three peices of Iron with broad flat heads; which, being fastened in any piece of work holds it to be turned, the string in the **Leth** running in the hollow part of it; as is doth in the **Hold-fast** following.

CXXVII. In this is the Figures of two Instruments for working in **Horn**: The first is named a **Steel**, being a broad flat Tool, like a **Joyne's Pairing-Chisel**, but without a **Shank**, it is Bayled on one side in all the three edge; having a thick short handle.

O. one of these B. handle. S. is born by *Dumery*.

The Second is an **Hold-fast** for an **Ink-horn**: It is hollow, into which the **Head** of an **Ink-horn** is put, for the turning of it hollow, and to the **Work-mans** purpose.

CXXVIII. He beareth **Argent**, a **Running Screw** **Azure**, the **Handle** **Sable**, born by the name of *High-ban* and **Gules**, three such **Argent**, handles **Sable**: is born by the name of *Nichola*. By this Instrument **Screws** are made in any sort of **Ink-horns**, that have a **Screw** to go into them.

CXXIX. This is the form of an **Engine**, or Instrument, which **Horn-Turners** use to Turn **Horn** in; which they call a **Coiler**. It is the **Head** part of the **Leth**, where the **Horn** turns in while it is working.

Lanthorn-maker.

14. THE Lanthorn, as it is a good guid for them as walke in darkness; so the makers Tools may give Instructions to the **Armorer**, that each particular thing may receive its proper terms, now his Tools are these which follow.

CXXX. In this square is the figure of a **Beetle** between two **Wedges**: The **Beetle** is a kind of a **Wooden Ball**, or **Bullet**, being eight square, and the length of it is as long, if not longer then the **Handle**; the work this is put unto, is to drive in the **Wedges** into the **Press**.

G. 3 such. A. is born by *M. al*.

A. 3 such. S. is born by *Beetle* or *Beetle*.

There are two sorts of **Wedges** used by them, the **Wedge** (as they call it) that is the larger **Wedge**, and the small **Wedge**: these are used to wedge the **flut Horn**, made hot, between the **Plates** fast in the **Press**; thereby to make the **Horn** lye open and flat.

A. 3 **Wedges**. S. born by *Wedge*.

CXXXI. In this Square are three Tools in much use with the **Horn-maker**; the first is the **Streightening Conges**: by these the **Horn** is made streight. G. the like in bend, with the **Stay** or **Holder** **Pendant**, **Argent**, is born by *Lurber*.

The Second is termed the **Roasters**, or **Roasting Conges**: These should have been drawn much longer in the **Fork** part, before the points do open. A. 3 such.

S. Handles. O. is born by *Quacke*.

IXX

The Third is called the **Smooth Shaving-knife**. It is a long flat Iron tool, set in an **Handle** at one end, and **sharpened** at the other, at both sides worked off into a **Basile**, which shaveth of the thickness of the Horn.

S. 3 such in pale, proper is torn by *Macaire*.

CXXXII. This is the form of the **Horners Shaving-knife** with which they shave their opened Horns, till they be clear, and transparent. 3 such proper in a Field. B. is born by *Mormol*.

In the Base of this Square is the **Horn-workers Press**, in which **Wedges** of Iron between each **Wedges** are driven, by means whereof the Horns being slit, are made to lye flat and streight out. I can give you no other Description of it, you may see the Figure, which is ever made in the ground, so that the

Work-man needs not to fear the bursting out either of sides, or ends, with over hard wedging.

CXXXIII. In this Square is the form of their Instrument, which holdeth the Horn in it, while it is working thin with the Shaving knife; this they call the **Clamis**; and of some work-men called a **Rough Shaving board**. It is two Boards, a long and a square one fixed together by a loose playing Iron, or Wooden Pin, between which towards the top, if you thrust in a Wedge, it will bind the two Boards so fast together that they will hold any thing secure between them, as the thing itself doth manifest; between which is held an Horn: it hath a Triangic slit made in the bottom Board or Plank, to hold it stedfast to a peg driven into the Ground.

The rest of the Horn-workers Tools, see Chap. 19. Note 79. I having not room in this Plate to set them together.

Hande Holme

T O

The Worshipful

DAVID PARRY of Llwynyn in the County of Denbigh, Esq;

SIR,

Considering the many favours I have received from you and your Dear Father William Parry, and your Grandfather Gabriel Parry Esquires, and their Vertuous Conforts; doth oblige me to the Dedication of this Plate and Chapter to you, who am

Your Obliged Servant

Randle Holme.

CHAP. IX.

15. Courteous Reader, I pray thee add these few Husbandry Tools to *h.p. 8. numb. 15.* they coming after those to my hands.

Husbandry Instruments.

CXXXIV. In this quarter are four Instruments, or things pertaining to Husbandry; the first which is in the dexter side, is termed a **Caper Ladder** or **Stair**. It is a kind of a Ladder, or Cheese Rack, having one end wider or broader open than the other. Some term it a Ladder broader at the Foot than the top part.

A. such a like in Pale S. is born by the Family of Die Vogt van Castell in Switserland.

B. the like O. is born by Van Malen Lord of Cornthorpe.

G. the like with two Talbots rampant to the sides of it A. Collared and set with Forks S. is born by the name of Van der Leiter zu Behrn, a Dutch Family of great Account.

The second in the middle of the Chief is an Instrument that is termed **round Scalipers**. It is two crooked Irons with sharp points revired together at the broader end, so as that they may turn one upon another; they are for the taking the circumference of any round body. Such I find born in Arms.

A. such an Instrument S. is born by Van Flossel.

The third in the Sinister side is termed a **Carpenters long Sinnet**; some call it a **Turf Spade**; it is to cut and flay up the surface of any thing flat, or of the Earth into Sods, Turfs or Fleeces, to lay on the Ridges of Thatched Houses in Country Towns or small Cottage, when they are first cut out by a Shovel. This Instrument is like the Carpenters Adds, for as that Chips the Wood, so this flees up the Earth both with Moss and Grass, and Moorish ground. See *chap. 16. numb. 140.* another form of Turf Spade.

V. the like in Bend Sinister the edge reversed A. Handle O. between 2 Turfs or Billets of the second. By Dig.

The fourth in this quarter is that as lieth in the Base, which is called a **Socket Pickfork**, or **Socket Pitchfork**. Such an Instrument Azure, the Stail or Staff Or, is a **Pick Gules**, is born by the name of Curry.

B. such in fesse O. is born by Holmest.

CXXXV. In this square is also foure other Instruments belonging to husbandry, some of them though they beare the name, and something of the shape of others mentioned in *chap. 8.* yet upon perusal of both, there will be found a difference in them; therefore ought according to their beareing have a distinct term used for them, that thereby one be not taken for the other.

The first is a kind of **Dutch** or **Germane Sorth**, much like to that *cha: 8 numb. 47.* Yet there is some difference.

difference. I call that a *Germane* or *Dutch Sythe*, by reason these *Heraulds* draw them so; this also being of the same workmen, may then for distinction sake be denoted, a *Sythe* with a *Flag*, or *Handle* on the contrary side of the *Swath*, *Potent*. Some call it a *Sythe* with one *Flag* (or *Contrary poled*) *Potent*. Others a *Socket Sythe*.

Such a *Sythe* A. in a *Field* V. I find born by the name of *Die Weisnagé*.

The Second in the same quarter, is termed by most a *Woodmans Cleaving Knife*, By the strength of it and weighty blows to force it in, great trees are rent and cloven through, the length of the *Handle* assisting to pull and forcing them to fly open. It hath the resemblance of a *Pioners Pick*, mentioned *chap. 8 numb. 45.* or the *Pavers Pick*, as anciently it was made; set down in the same *chap. 8 numb. 72.* Yet this differs from both having an edge on the inner side, with a *Socket* for the *Hamme*, or *Staille* to be fastned in; and being much more streighter within. The roundness of it only appearing on the outside to make the back the stronger, and the point or end the sharper.

B. the like A. betw. 2 *Beazants*. is *Manning's* coat.

The third is termed an *Hoppet*, or *Hobbet*, It is a Vessel of wood to carry corn in, by him that soweth the same. Being made of one entire broad hoop nailed to a bottom, having three Feet to stand on, and an *Handle* to hold it by.

S. the like A. is born by the name of *Hobbert*.

The fourth Instrument represents the Similitude of the first in this quarter, and is termed a *Socket Sythe*, with a *Square Handle*, only contrary-poled on the *Swath*. And such a *Sythe* A. the *Swath & Handle* O. in a *feild* S. is born by the name of *Seyffen*.

CXXXVI. In this quarter on the dexter side is a *Shovel* with a *Spade Handle*, it is of some called a *Flat* or *Streight soled Spade*. Two such in *Salter* Argent, in a *feild* Gules is born by *Van Rolsbarzen* of *Alsatia* in the Empire of *Germanie*.

The Second is a *Spade* without a top or *Handle*, and is born as a part of the Coat Armour of the State or Town of *Schorndorf*, in the *Neiberlands*. viz. G. 2 such in *Salter* the soles erect. O. on a chief. O. a *Stags Horn* *Felleways*. S.

The Third is a *Lubom*, this is a *Dutch* and *German* bearing, and I give it their term.

S. 2 such endoursed. O. is born by *Van Lubowsker* of *Silisiars*; the like is for his Crest on a *Crown* party, per pale G. and A. 2 such endoursed counter changed, born by *Graffinger* of *Thorald*; and the same with the crook head reversed, is born by *Van Zollock*.

The Fourth and that on the sinister side, is termed a *Beater*, it is a broad plank, with a *stail* put into it, whose office it is with the help of a *Labourer*, to beat smooth and even *Garden Walks* and *Alleys*, or any other uneven Grounds.

*

The Fork lying in the base, is termed a *Dung-Fork* with 2 points, or a *square Working-Fork* with 2 points. Some term it a *double barred Dung-Fork*; and a *flat Pelue*; because on the top or square part (as on a *Spade*) a man may set his Foot to force it the better and deeper into the *duck-hill*. This is of a contrary form to the *Yewet* before mentioned, *Chap. 8 Numb. 33.* Some call it a *Socket pickel double barred*; or a *square Dung-Fork*.

B. 3 such in *Fesse*. A. *Staves*. G. born by *Ravenel*. S. the like in bend. born by *Van Hammet*.

CXXXVII. In this Square are four other sorts of Instruments, most appertains to the good Ordering of Grounds, used both by *Gardeners* and *Husband-men*. The first on the dexter side, is by the Artists termed a *Paring-Spade*, or *Dividing Iron*, and such a *Spade* Argent handle Or. in a *Field* vert, is born by *Spade* of *Spade-bill*. This is termed also a *Curt-Spade*, the *Bit* or *Spore* being twice as broad as our ordinary *Spades*, and broader at the weather end, or point, then at the upper end by an Inch.

The Wheel on the sinister side is termed a *Mullen Wheel*, it hath a *square Hame* for its Axis, and for Spokes like the *Ballance Wheel* of a *Watch* or *Clock*, on the rim of the Wheel are placed triangular pieces much after the manner of *Cogg-Wheels*. But *Mullen* ends, as the examples in the following square will shew.

O. Such a Wheel. S. is born by *Van Mulnen* of *Wanblish*; the Crest the same on a *Corronet*, party per *Fesse*. S. and O. the like counterchanged, born by *Mulner* of *Nunberge*.

The Third is termed, a *single Wheel Trenching-Plough*; This is an Engine by which Trenches and Furrows are made in *waterish* Grounds, thereby to drain, or draw away the Water. It is made of a piece of Wood about the bigness of a *Spade Stayl*, somewhat straight, but bending a little at the neather end, in which part must be placed a *Coulter*; the *Sole* plated with Iron, through which the *Coulter* must come, and be fastned with a *Cotter*, through a hole made in the side of the Wood and *Coulter*; the use is to cut out one side of a Trench, and then the other, and so turn up the sod, or turf with a *Spade*. This is made with a small *Brass* Wheel about 4 Inches high, which will make the Foot to run more pleasantly. Some have these *Trenching-Ploughs* without a *Wheel* and some have them *double Wheelled*, as in *Numb. 140.* whose use is the same to this, therefore shall I say no more of them, than only give you their names and Form.

In the Base is the fourth thing of the Square, which is called a *Gardeners Cleaving Dog*. It is made with a *Taper Fork*, and a *Cross bar* of Iron, some six or eight Inches above, and then hath a strong *Socket*, into which is fixed a *Staff* with a *Spade Head*, as thick or thicker then the *Spade Shank*. The cross is for the Foot of the Workman to force it into the Earth, on one side a strong *Weed Root*, and so having hold of it, draws it out of the Ground, as an *Hammer* draws out a *Nail* by the Head.

V.3

1. Such O. is born by *Thick*
 2. The like Dog. is born by *Naylheim*, also by *Dog*.

XXXVIII. In this Square are two sorts of Millstones, one Mill-stones; yet by reason of several positions are diversly to be termed so the first a Mill-stone with three square Galtrops, equally dispose, or set in triangle on the edge thereof, and such a like I find born by *Van Gehenbach of Schilars*. viz. Azure, such a Mill-stone Argent. On a Coronet. O. a Mill-stone. O. with 5 Tufts of Grass on the edge of it; is the Crest of *Ermsheimer of Frankford*.

The Second is a Mill-stone set with Noches, much like the Cannons nile mentioned *Chap. 8. Numb. 119.* only this hath a Rigger cut into it for an Ink, or Polye to be fixed in it, which the other hath not. G. such a Mill-stone. A. is the Coat Armour of *Van Lichtenhan of Thuringen*.

XXXIX. In this quarter is two Instruments of Husbandry. The first is called a Trenching Couge, this is made after the manner of a Spade, but that it riseth up in the sides, and is Round in the Sole or Hoop. The use of it is the very same to the use of the Trenching Spade, to make trenches in Morish and wet lands to draw away the waters, as in the next Square 140.

The Instrument on the sinister side is termed an Hay hook with an Eagles head, this is an adornment only added to the handle to make it the more prosipuous, as in the handles of things of this nature, workmen are apt to do, else I take the Hay hook mentioned *chap 8 numb 21 22*, to be the same for use as this is.

These kind of beautifying works, with men, women, Lions, Apes, and such like heads cannot properly be said to alter, but rather Illustrate the Bearing, as is often seen in the Harp and other muscally Instruments.

B. Billersee & the like with the hook reversed O. is the coat of *Die Forstmeister van Geilhausen*. B. 3 such in pale A. heads O. is born by *Wendeck*.

CXL. In this Square are placed foure sorts of Husbandry Instruments by which their grounds are Drained, & got into good Tessel. The first is a Turse Spade, or a Turbing Spade.

The second is a Plain Trenching Plough, or Coulter. This hath only a Flat sole to run on the ground without any other thing but it Coulter fixed in a Cottrel hole by an Iron Cottrel.

The third is the Trenching wheel Plough, or the Two wheel trenching Coulter. But of these (only to give you here their form and shape) I have spoken else where, *numb. 137*.

The fourth is the Bottom, or Shooe of a Trenching Spade. It is all Iron and put on the Staffe or Stalle, with a good strong Socket. The Spade shooe must be made with two sides or Langets up from the end of the Bst, as if they were two Strong Knife

Blades, set to turn or look upwards with their points upon a common Spade, from the end of your Spade bir, as the figure sheweth. If it be made exact, with the force of a man pushing it forward, it will work forth the Coar and Furrow clearly, and make a Trench at one tyme.

Masons Tools.

16. I Cannot but Honor the Fellowship of the Masons because of it Antiquity; and the more, as being a Member of that Society, called Free-Masons: In being conversant amongst them I have observed the use of these severall Tools following, some whereof I have seen born in coats Armour.

CXLI. In this Square are three Free Masons tools very usefull in there trade. The first is a Shovel: It hath a square bottom, and sole, else it is in all other parts like the Spade. With this their Morter is tempered, and foundations for Walls are digged. This is an honorable bearing, A. one S. shood O. born by *Sabrait*. B. 3 such O. shood A. is born by *Shoreberg*.

The second is the Hand Hammer, which is both long and strong in the head, with an Iron hoop on the end of the handle to keep it from bruising or wearing, because the end is very oft used by them, as well as the hammer part. This may be well termed a Masons Hammer, because there is no other tradsmans like it, having the face long, and the hinder part flat and broad to the Halve side.

S. 3 such A. handles O. born by *Masover*. G. 2 such A. halves O. & a Rose. by *Strongmaine*.

The third is the Chissel, now this is a Chissel contrary to all others used in loynery or Carpentry, for this is all Iron strong and thick, the edge not very sharp but well made, and of good tempernd Steel. Of these they have severall sorts, big and little, according as the nature of the work requireth.

G. 3 Masons chissels A. born by *Chissett* or *Chisle*. S. one betw: 3 Martlets A. born by *Dabell*.

CXLII. He beareth Gules, a Masons Pick, or Pick Axe, between a Former or Cienfer, and a Punch, Argent; the Paum and Pandies, Or. By the name of *Nason*. The Axe, it is the first tool they use in ston work, which is for the taking off of all irregularities of the ston, and to bring it into some forme for what it is intended before other tools are used.

The Cienfer, or Former, is a broad ended Iron Plate, or Old Chissel, with a broad bottom, set in an Handle; with which Tool they smooth and make even the Stone after it is cut into that form and Order, as the Work-man will have it.

The Punch is a sharp pointed Iron, or Steel, set in D d J

an **Handle** with this they draw out lines for to cut their Work by.

CXLIII. In this square is three other **Free Mallets**. Tools the first is the **Mallet**; which is a round piece of heavy Wood with an **Handle** put through it; the Chisel though not very sharp, yet with the weighty blows of the Mallet cuts any part of the Stone, as he pleases; or worketh any sort of Figure, or Mouldings; that he is capable of performing, that this is born in *Armes I* have shewed before, in *Chap. 8. Numb. 76.* and *Chap. 9. Numb. 4.*

B. 3 such O. with a Rose between. A. born by *Mauleburg.*

The Second is the **Mattock**: It is an Instrument for the breaking up of Ground, or lay Foundations; and also is much used with **Stone Cutters** in Quarries. Some Mattocks have one end like a **Pick**, and the other end broad, the same turning to the Handle.

The Third is called a **Cranel**; it is a flat Iron of an Oval form, having a sharp point proceeding from one part or end of it, and the like from the other end, but one turns up in the point, like to a square, or **Centry-Pick**.

CXLIV. He searcheth in this Quarter four **Masons Instruments**, or working Tools; the first is called a **Commander**; which is no other than a great **Mallet** with a long handle, some call it a **Maul** or **Mate**; the Mallet being the diminutive of it. This is used in Quarries, for the getting of Stone, it driving in (with the Help of the great Hammer) wedges into the clefts of the Rocks.

G. the like. A. betw. 2 Lions Rampant Combattant (or supporting it) O. is born by *Maillon*.

The Second is the **Triangle**; it is an Instrument made of a Board, cut into a triangular form; which by the help of a **Line** and **Plumbet**, gives instructions to the Work-man, whether his work be true, either on the flat, or in the upright.

The Third is an **Are**, or **Masons Are**; this having a broad sharp end, doth cut away and make smooth the Stone, from all its irregular blows and dents made by the **Pick-Are**, in hewing it to its form, that it should be, the first working is termed, **Broching**; the latter **Areing**. V. 3 such A. Halves, or hawme O. is born by *Mayax*.

The fourth is termed a **Square**: It is made generally of Wood, by the use of it all Stones are cut square, so that one may lye by an other, and joyn to an other, either in Floors or Walls, in a fit decorum; that these are in Coates Armour, see *Numb. 13. 14. 15.*

CXLV. In this quarter are four Instruments of the **Masons**: The first is in the dexter side, and is termed a **Rule**, or a **Ten foot Rod**; the use of this is to measure the length and breadth of a ground plot into feet, and if there be odd Inches they are measured with a two Foot Rule; thereby to order the model of the building, it is also for divers other uses.

The Second is the Instrument in chief, which is called the **Plater-level**; it is a long **Rule** with a **Bigget** in the middle of it, from one end to the other: by the means of this, with a **Level** set upon its the height of a place may be known at a distance, and whether it be higher then that place from whence you take your aim.

The third and fourth are termed **Temple Moulds**; they are Boards cut in that for as the Stone is to be cut, for Example, a **Mould** that is **convex**, having the swellings outwards, make the Stone the same; if it be **Concave**, the Stone is cut away inwards, this under Mould being a fit one for a **Gutter-stone**.

CXLVI. These are two other sorts of **Moulds**, for the cutting of **Mouldings** in Stone work; the first is a square with a **swelling Frize**. And the second is a square with a **swelling Frize**, and **rebaile**, with a square Foot.

CXLVII. This is a moulding that hath in it two Squares, or one **Square** and **fillet**; a **swelling Frize**, with a **Square Foot** and two **Fillets**, or **Annulets**.

CXLVIII. This is the moulding of another sort of **Cornice**, which is termed (beginning at the bottom as all workmen) **Arche-trave**, **Frize**, and **Cornice**. But more particularly for the names of each part, we will begin at the top, and come downward, where there is a **Square**, a **Fillet**, and an **O.G** moulding for the **Cornice**; two **Fillets** or **Squares**, for the **Frize**; and a **Plain** with a **Square** for its **Arche-trave**; these are the plain and ordinary term amongst the Vulgar sort of Hewers of Stone, that know no better things: but the more ingenious, and learned work-men, have other terms, for which I shall refer you to *Chap. 13. Numb. 65. 66. 67. 73. 74.*

Slaters Tools.

17. **T** Here is four sorts of Trades, that formerly used to cover Houses, that they might be kept dry, viz. the **Plumer**, with **Lead**; the **Cyler** with burnt Clay; the **Shingler** with clift Wood; and the **Chatcher** with **Reed**, **Rushes**, or **Straw**; to which we may now add the **Slater**, which though the last in time, yet the best for duration, considering the cheapness; his Tools are these which follow.

CL. In this square is contained four of the chief Instruments belonging to the **Slater**, for twice as many more, he scarcely useth. The first on the dexter side is, a **Pinning Iron**; this is a long four square pointed Iron for in an **Handle** over cross it: This is for the opening of an hole in the **Slate** to put the pin into it. B. 2 such and a **Slaters Hatchet**. A. Handles. O. is born by *Slater*.

The second is the **Slaters Hatchet**, it is both an

Ham-

Hammer with a **File-like Face**, and an **Hatchet**, and serveth to beat in Nails; and also to cut off the ends of extravagant Laths in the Lathing of the tops of Houses to Slate upon.

The third extended in Fesse, is termed a **Stone measure**, or a **Lathing measure**; by this measure Slates are all fitted to their sizes, and so laid together, for their readyness to work.

The fourth in the base is termed a **Setwing Knife**, it is made after the form of a **Mear Knite** in the blade, but at the **Haft** it turns up after the manner of a **Crowel**; with this he squares, and cuts his Slates to what breadth and form he pleaseth, according to the measure aforesaid. V. 3 such in pale to the sinister pointed. A. handle. O by the name of **Hewer**.

CLI. In this quarter is placed on the dexter side, the **Slaters pick**; it is crooked long and sharp pointed at both ends, and set in a **Handle** as an **Hammer**; with this is only the hole made in the Slate for steeping, it serves for no other use in the Trade. A. 3 such with a bend betw. S. is born by **Morbit**.

Brick-maker, and Brick-layers Tools.

18. **T**HIS was a very ancient Trade, for it took begining in the begining of the second world, or age of the world. For no sooner was the flood gon from off the face of the earth, and men begun to multiply thereon, but come (say they) let us build a City, and a Tower, whose top may reach to Heaven, that we may get us a name: and this they made of Brick burnt in the fire, as we may read *Gen. 11. 3. 4.* And those famous **Piramedes** built in **Egypt** by the **Israelits**, in the tyme of their bondage (which are said to remaine to this day) were all made of **Brick**, as may appeare from *exod: 5. 7. 8. &c.* Now the Instruments of a **Brickman** are these which follow.

CLII. He beareth Argent, a **Brick Hammer** between two **Brick Axes**, Azure, handle Sable. is born by the name of **Briaxe**. The **Brick hammer** is longer in the **hee part**, and much stronger then other tradesmens hammers, having a long pick at the contrary end of it, and a strong wooden handle.

The two **Brick Axes** are of two contrary formes which I caused to be set soe, that the Reader may se the several wayes they are drawn, to which may be added others mentioned in *chap. 8. numb. 77, 78.*

CLIII. In the chief is a **Bricklayers Tointer**, this is to rub and polliish the loynts of brick work, after the wall is made, to make it look fite and trim. This is a long peece of Iron about a quarter of an inch thick, and smooth in the end from the haft, it turneth up; the handle is fixed on an Iron proceeding from the middle of it, bending back like to that of a **Crowell**. se an other fashion loynter, *chap. 8. numb. 78.* *

G. a cheveron betw. 3 such A. handles O. by **Thiery**

In the base is a **Brick**, or **Brick bate**, as some term it; others a **Ston Billet**, as *chap. 8. numb. 81, 82, 83.* The size for making of Brick are 10 Inches long, 5 road, and 3 thick; and some tymes a little either over or under that measure, as the Maister of them pleaseth.

A. a rose betw. 3 such G. born by **Bricks**.

CLIV. In the Dexter chief of this quarter is two **Line Pins**, with a **Line lapped** or **rased** about part of both: or a **Bricklayers line rowled** upon the **Pins**, on each a part. By the help of the line the Bricklayer runs or layeth the range of a wall by the severall courses.

On the Sinister side is a **Brickmakers Moulding Board**, with the **Crub** by the side of it; upon fitch a like board, with a **flay** upon it, to keep the **Brick Mould** from slipping away, down the Brickmaker mould bricks.

In the Dexter base is the **Brick-makers Plain**, or **Slize**, which is a streight peece of a Board: with it he striketh over the top of the Mould when it is filled with Clay, thereby takeing away all that is superfluous, or lyeth higher than the mould.

CLV. In this quarter is a pair of **Brick Moulds**, in which Bricks are made; work men term the several parts of them thus. **Brick Moulds** when all compleated, if they be plated, they are **Moulds shod**; if otherwise they are **Bare-foot Moulds**.

CLVI. He beareth Gules, on **Pod Argent**, by the name of **Hadder**. The **Pod** is a kind of three square trough made up at one end, and open at the other, having a stiffe fixed to its bottom. Within this Clay is usually carryed from the Pit to the moulding board, or else **Brick** or **Morter** is brought in it by a labourer to him that worketh them.

In the dexter base, is a **Criss mould**; such **Criss** as we use to lay upon the **Ridges**, or top parts of **Slated houses**, to secure the first pieces, from the weather.

In the Sinister base, is a **Brick-makers Tub**; which they call the **dropper**, or **dropping Tub**: It is nothing else but an **Hophead**, or **Terse Barrell**, cut through the middle, which makes two of them. A. 3 such. G. is born by **Brickman**.

CLVII. He beareth A. on a **Mount** in Base. V. a **Brick-kiln** of four **Cumstils**, **Benchs**, or **Stories** high, one above and less than another. G. in the corners of the second and top, a **flame fumant**, proper. Some term it a **Brick-kiln** of 4 **Crieces**; the sides and top **flamant** and **fumant**, others 3 **Vapours** of **smoak**, this is born by the name of **Brickill**. A. the like **Brick-kiln** with 2 **Tubbs** in chief. G. is the **Arms** of the **Company** of **Brick-makers** in the **City** of **Chester**. In some places these heights are called **Arches**.

CLVIII. He beareth A. on a **Mount** in Base. V. a **Brick-kiln** of four **Cumstils**, **Benchs**, or **Stories** high, one above and less than another. G. in the corners of the second and top, a **flame fumant**, proper. Some term it a **Brick-kiln** of 4 **Crieces**; the sides and top **flamant** and **fumant**, others 3 **Vapours** of **smoak**, this is born by the name of **Brickill**. A. the like **Brick-kiln** with 2 **Tubbs** in chief. G. is the **Arms** of the **Company** of **Brick-makers** in the **City** of **Chester**. In some places these heights are called **Arches**.

Plasterers

Plasterers Tools.

19. **I**N the Eighth Chapter of this Book, I gave a touch of some Tools of the Plasterers, but here take them more at large, being as many as I can find out that belongs to them in particular, and not to other Trades; others they have, but they are set down in other places.

CLVIII. In this square are three Tools belonging to the Trade of Plastering, and Daubing: the first whose Head is in chief, is termed a **Pick-Hammer**, and 3 such Argent, Handles Or; in a Field Sable, is born by *Mosby of Mosby*.

The second on the dexter side, is the **Plasterers Hand-brush**; it is made of Hogs Bristles, whose **Staille**, or **Handle**, according to the Statute, it is to be a yard long, and that they may by these, and such other, as are described in *Chap. 8. Numb. 89*. Whitten, Russet, or Black any Posts, or parts of an House within or without, in water Colours only, but not to meddle in Oyl.

B. 3 such. A is born by *Aigleberg*.

The third is the **Plasterers hand-board**; or a round hand board belonging to the Plasterer: These kind of Boards are by them, made either round or square, and therefore it is necessary to mention of what fashion or form it is; in the middle of it is fastened a Wooden Pin, or handle, by which it is held; on this board they use to temper and turn their Plaster, before they clap, and spread it with their Trowel on the Wall, or what place soever is to be Plastered.

CLIX. In the chief of this quarter is the **Plasterers Beater**; it is a long piece of Wood cut after the manner of a **Slice**, which Deary-women use about their Butter, or a **Wooden knife**; having a broad Back and declining toward an edge; with this the Labourer beats his Lime and Hair together, till they be well mixt, and fit for working.

The next is the **Beating-board**, which is either 3 or four boards joynd together, or some old door, or such like, laid upon Stones or Timber beating height, upon which the Morter (as aforesaid) is beaten with the foresaid Beater.

CLX. This is the form of a Plasterers Mould, called a Round and Fillets, it makes a moulding in Plaster that is an half round with a Fillet or Square on each side.

In the partition score between this square, and that of *Numb. 159*. is placed the form of a **Plasterers whitening Brush**, such as he useth with a long staff; and this I conceive to be the Brush that should be set in their Arms,

*

and not that with an handle, it being rather an House Painters Brush, see *Chap. 8. Numb. 89*.

CLXI. This is an other sort of Mould by which a cornice is run about a Room, or Mantle-trees of Chimneys. It is termed an O. G. Mould with Fillers, or Squares. See *Numb. 147*.

Sadlers Tools.

20. **I** Have in the former Chapter spoken to some things of the Sadlers work, as **Saddles, Bridles, &c.** but of their working Tools I was then Ignorant, save the **Hammer and Aul**; which you may see *Chap. 8. Numb. 96*. the rest follows in this place.

CLXI. * He beareth Argent, a **Coach Sable, Wheels** and the **Back Rails**, Or. this is the Coat of Arms belonging to the Coach-makers.

CLXII. In this quarter are three Instruments of the Sadlers; the first on the dexter side is termed a **Strainer**; it is made of Wood, with a triangular piece to fit into such a like hole, made in the middle of it, which is hung by a thread, that it lose not; having a Leather loop in the handle of it, only that hangs it up by; with this the **Girth web** is fastned, and drawn streat upon the **Saddle trees**; or in such places, where the Girth requires straining.

The second in the chief is termed the **Pannel Aul**, or the **Pannel Bodkin**, and such I find born in the coat of *Taffy*. viz. S. 3 such Pr. Also G. 1 such reversed A. and a chief O. is born by *Pannel.orf*.

The third in the base is called a **Pricking or Garnishing Aul**, this is for to make holes to adorn and to garnish Saddle Skirts with Silk, Silver, or Gold thrid. G. an Annulet betw. 3 such erected O. is born by *Van Solagest of Holland*.

CLXIII. He beareth two sorts of **Auls** in this quarter, The first hath the name of an **Aul**, or **Sadlers Aul**, because they have broder Blads than the Auls used in other Trads. Its use is so common, that I need say no more of it. B. a cheyeron betw. 3 such points reversed A. hafts O. is born by the name of *Aules*.

The second is termed a **Buckling Aul**, in the blads these differ but little, but the hafts are much contrary one to the other; the first being a **slender**, this a **strong** haft, such as is fit to abide a blow on the head of it, when in the working with it, a necessity urgeth, and a force is required.

V. 2 such the blades Saltered A. hafts O. is born by *Don Tassillon a Spaniard*.

CLXIV. Within this square is foure usefull tooles for the adorning of the Sadlers work, three in chief, and one in base, we shall first give the names and use of them

* *Chap. 3. Numb. 147*

and that according to their position towards the dexter part. The first is named a **Pegging Iron**, it is a kind of an **Iron Punch** having five points all in a straight line; there is of them that have only two points, some three, some four points, according as the work is.

S. 3 such A. is born by the name of *Peggings*.

The middlemost is termed a **Large Scallop Iron**, these have broad handles, rather flat then round, being a kind of **Punch** to cut Leather Scallop wise, but more squared. one such A. a chief O. in a field V. born by *Dunny* or *Dunnys*.

The third is of the same nature, only differ in the bigness of the compass of the **Scallop**, and in the handle, for generally all the handles of the smaller sort of **Scallop Irons** have them either round, or six square.

The fourth which occupieth the base part is termed a **Scoaring Iron**, it is an Iron with three dents in the edge of it, having a long Iron **Stail**, which is fixed in a wooden handle, or **Paft** hooped with Iron. With this Iron being a little heated, they Scoare and run Veines on the Leather which is about the Sables, and also on bridle reins, and head-stalls, to make them look handsome, & pleasing to the eye.

A. 2 such in falter S. handles O. is born by *Narcey*.

CLXV. In this quarter is three necessary Tools belonging also to the Sadler; the first in the dexter cheif, is called a **Scallop pegging Iron**.

A. 3 such B. is born by *Round*.

The Second is termed a **Cressa**, or **Uehning stick**: It hath one end round with a nick therein, one side of the wood being broader then the other; the contrary end hath it round on one end, and sharp at the other: the name of this Tool tell you the use of it, viz. to Vein and Score Leather, to adorn it for the sight of the Eye.

The Third is named an **hair hook**, or a **Stuffing Iron**: This is a long slender Iron, with an Hook at one end, and a kind of a Fork at the other: As it hath two names, so it hath a double Imploy, the one to hook or draw out the old stuffing of a pannel; and the other end, to put new Hair again into it, or to any part of it.

S. 3 such in pale A. is borne by *Harehook*.

CLXVI. He beareth Sable, a **Sivett** in it plate Argent. This such is borne by the name of *Civett*. The **Sivett**, is a square barr of Iron, or square **Burle**, without a tonge, set to the sides of the Saddle-tree, with a plate of Iron: Both to hang the Straps at for the Girth; and the Leathers for the Stirrops.

CLXVII. In the dexter side of this quarter, is a **Girth-Buckle pendant**, cooped or cut off below the hanging of the web to it. This is broken, or cut from the **Girth-web**: And such I find borne by *Girtback*, viz. 3 such O. in a field G. Also G. a chevron between 3 such tongs erected: O. is the Arms of the **Buckle-makers**.

The second, is the **Sadle-Tree**, which is all made of Wood, which according to the terms of the framer and maker thereof, hath several parts in it.

B. 3 such O. is the **Sadle-tree-Makers** cognizance.

In the Base of this square, is a **Sliding seat**, or a **Sliding chair**, a thing much used in Frosty-Countryes for Gallants, and the great Gentry of the Country to sit in, while others draw them along the Ice: they are usually drawn either by Men or Horses.

A. the like S. is born by the name of *Van Schlisted* of *Ba. aria*.

CLXVIII. He beareth Argent a **Side-Sadle**, or a **Moman-Sadle** with Skirts Gules, Imbrauchered and fringed, Or. This is borne by the name of *Van Rabotter*.

In former times the Side-sadle had only a Pillen fastened upon the Tree of the Saddle, all the other parts of the Saddle being furnished up as the Mans Saddle is: over which Pillen and Tree was cast a **Sadle-cloth** called a **Side-sadle-cloth**, or a **Pillen-cloth**, which covered the Side-saddle, and hung down below the Horse belly. But of latter time there hath been a better and easier way found out (especially for the Horse) by covering the Pillion, and setting Skirts to the Tree after the manner of a Mans Saddle, as the example doth demonstrate.

The several parts of this Saddle you may see, if you look back to Chap. 3. Numb. 34.

CLXIX. He beareth Sable, a **Roman S. Wreath** in the middle, with **Leaves** proceeding therefrom, & a **Scarfe** flourishing, Or. Born by the name of *Goddiscar*. Some term this an S. adorned with **Leaves**, and wreathed with a **Scarfe**, the ends floatant in fesse. The Roman Letters are usually thus made, and born adorned with Wreaths and Leaves in their straight, or the bending parts of them.

O. an S contrary turned, (or to the dexter turned) wreath & scarfe thus, A. is born by *Van Dobritsch*.

CLXX. He beareth Argent, a **Roman S. Sable**, Imbossed in the middle, and the ends turned into leaves Or. This is born by the name of *Shank*.

Such an S. the ends converted into Leaves: A. field G. is the coat of *Seybold* or *Branswick*.

CLXXI. He beareth Azure, a **Roman S.** rebated in the back, and the ends turned into Leafage Argent. Born by the name of *Camell*, as it is vulgarly termed. For the adorning of these Capital letters I have often seen them drawn with **Rebatement** in the sides, but especially in the broad ends, to make them look either strange, more promising, or to shew the fancy and devise of the workman.

Chirurgions

CHIRURGICAL INSTRUMENTS.

Chirurgical Instruments.

21. **T**HERE being an omission of some of the Instruments in the succeeding Chapters, I did think good to treat of them in the latter end of this, which may be added to those mentioned in chapters 11. & 12.

CLXXI. In this square is first a Chyrurgical Instrument called the **great speculum Matricis**, this is used to take out a dead child out of the womb, or cut it, or else to view some Ulcer that lyeth within the Belly.

The second in the sinister chief of this square is termed a **Draught**, or **Draughts** with a **screw**, this is an Instrument to draw out aching teeth; it is a more later way of drawing with this than that mentioned *chap. 11 numb. 29.* by reason the screw keeps it at that distance that the ends of the draughts shall not upon the fast holding cut the tooth, which the other Draughts are apt to do, especially if the tooth be much decayed.

CLXXIII. Within this square in the chief is a **Stitching Quill**, This is an Instrument by means whereof a wound that gapeth is drawn together, or **stitched up**, as they term it, or sewed up, to keep it as much as may be from being a scar in the flesh, and to heal it the sooner.

The second instrument in the base part is called an **Infuser**, or a **Glass Body** with a **long neck**, and a **string** the ends fixed thereto, and fretted. This is also named a **Diffillatory** with a **Round Body** and **long Neck**, see *chap. 11 numb. 4. 6.* But I rather take it to be some kind of a **Ventosis**, or **Cupping glass**, the like in this Station, or rather **Desecant**, A. in a field G. is born by the name of **Hoboner**.

CLXXIV. He beareth Azure, a **Barbers Chafer** Or This is a small Chafer (which they use to carry about with them when they make any Progress to Trim, or Barb Gentiles at a distance) to carry their sweet water (or country mansbroth) in; the **round Handle** at the mouth of the Chafer is to fall down as soon as their hand leaves it. This is born by **Truchses Van Vtingen**.

A. the like S. is born by **Truchses Van Dieffenhofen**: Also by **Pferstern** in **Germanie**.

A. the like with 3 feet S. is born by **Balsbosen**. The like **fang** handle, A. set on a square Cushion tasseled G. with a tuft of grals out of the mouth of it; is the crest of **Lobenstein** in **Bavaria**.

CLXXV. Within this square are four Chyrurgical Instruments for the Barber Station, that in the sinister chief is termed a **Single Beak Pellican** with a screw, of some it is called a **Screw'd tooth Forcer**, it is an instrument to draw out corrupt and faded teeth.

The second which is under it, is termed a **Single tooth Pincer**, of some a **Forcer**, or **Puller** with a **tooth Leviter** at the contrary end, this is also to draw aching teeth, and if they chance to break in the pulling, the Levitor helpeth to prise out the roots.

The third lying in the base is nominated a **Chyrurgions Graver**, it is used sometimes to scale and clean bones, and old corrupted teeth.

The fourth in the sinister chief is a **Barbers Wide tooth Comb**, or an **Horn Comb** with single teeth, or toothed on one side, this is for the combing and readying of long thick and strong heads of hair, and such like Perriwigs. S. 3 such A. born by **Combey**.

CLXXVI. Upon the dexter side is a **Filter**, or **Distilling bag**, with two **Rings** in the open of it. This is something contrary to that *chap. 11. numb. 13.* where, on the use of this, you may read more.

B. such a like. O. is born by **Die Fabler** or **Pfabler** of **Bavaria**.

The second is a **Potion Cup**, or a **Cup** with a **Physicians potion** in it, covered with a **Napkin**: and such a bearing I find by the name of **Teller**, viz. G. the Cup, O. Napkin. A.

The like is the crest of **Truchses Van Vtingen**.

G. 3 such, O. is born by **Sturffen**.

A. on a hill **Shapournet**. B. the like Cup with 2 covers over it at an equal distance. G. born by **Van Starck** of **burg**.

CLXXVII. He beareth Sable, a Pair of **Barbers Cisers** opened **Salterwise**, Argent. Some only say a pair of **Cisers** in **salter**, but there are many sorts of Cisers, so that they ought (by reason of their diverse shapes) to be named what kind of cisers they are, whether **Hair cisers**, such as these are, or **Beard cisers**, with short nippers, and large handles; or **Caylors cisers**, with blunt points, which they carry in their pockets to cut out their measures, or any small thing; or the **Seamsters cisers**, which for their smallness differ from both, some cisers having the ring for the thumb onely for to fit it, and the contrary Ring or Bow to be so large as two or three fingers may go into it, see *ca. 12. h. 13.*

A. 3 such opened B. born by **Majorianbergs**. B. a cheveron betw. 3 such A. born by **Walden**.

CLXXVIII. He beareth Azure, a **Druggist Basket** Argent, wreathed about the middle, having an **Annulet** or **Ring** on the sinister side; Or This is born by the same G. **Van Stotzen** gen of **Schlabach** in **Germanie**. This or the like made of **Wickers** or **Oser twigs** is much used by **Druggsters**, **Apothecaries**, **Chyrurgions** and the like, to keep empty **Pots**, **Bottles**, **Boxes**, &c. in them, to be ready for their use: But some take this for no other than a kind of **Bakers bread Basket**, which he carryeth on his shoulder by the help of a strap that is made fast about it, and the string to hold it by.

CLXXIX. Within this quarter are three Instruments of the **Barber Chyrurgions**. The first on the dexter

side is a **Carole stick**, it is a wooden turnstile, having a **Socket** in the straight pece, and another in the cross, or over-thwart pece: this he sticketh in his **Arms**, **Griffin** on his left side, or breast when he useth to **fight** in the field.

The third is called a **Tooth Pincer**, this instrument usually pulls out teeth, when the **Politian**, or common **Pincers**, or **Draughts**, cannot take hold of them. See another fashion of their making. ca 11 n 20.

CLXXX. This is an Engine used by a **Peruque** **Maker**, which he calleth by the name of **Cable** or **Boath Screws**, or their **Holdfast**, this they use to draw the rone and upon the edge of a table, and in the other screws locks of haire, while they comb them out to put them in sorts to guile.

CLXXXI. In the chief of this quarter is an instrument called a **Paire of Lizars**, or **Cutters** with a spring. With these the Artist cuts away **Gristly** and **Brawny** parts that disturbeth the Patient, or hinders the cure of any place grieved or diseased.

The second that lyeth in the base is termed the **Bar-nacle Pincers**, or **Pincers** that fasten themselves, by it (with a pen knife) an Incision is made for a **Seton**.

The third is a **Point**, or **Tag**, to which is fastned a long round **Line** or **Seton**, (as they term it) this is to run throw a wound, and be ryed in it, for the corruption to be drawn out, which causeth the swelling of that part.

CLXXXII. He beareth Vert, a **Castle wall** with 2 **Towers**, over the gate a **Square Watch tower**, Argent; **Roofed**, Azure: between an **Hook** to take out **Bullets**; and a **Turning Pen-knife**, with a **Crooked Blade**, of the third, **Patts**, or **Pandles**, Or. By the name of **Gibbins**. But of these more particularly.

Some term this a **Castle wall** with a **Square chamber**, or **Gate house** upon it, between (or conjoynd to) two **Round towers Battelled**. And such a bearing belongs to **Koburger of Brunswick**, viz. Or. on a fesse G. such a Wall and Towers A.

A. the wall plaine, or a wall with one **Battlement** over the Gate, conjoynd to 2 towers G. by **Welhsesen** a Plain wall cornished betw: 2 towers B. is the crest of **Van Warburge**. a plain wall, is without **Basoning**.

The second thing is the **hook**, which may be termed the **Forked hook**, this is used to take **Bullets** out of the flesh, and such as stick in the bones of those as have received any small shot from **Musket** or **Pistol**.

The third is a **Crooked Pen-knife**, which is used to lance wounds, and cut out dead flesh, and for many other uses besides; it is set in a **Foulding** or **Turning** **hilt**, after the maner of a **Rasor**.

Houses and Towers.

FROM the **Chyrurgions Instruments** it is necessary I should now wander a little astray, to give you some other examples of **Building**, which I have since the engraving of the Plate for the Twelfth chapter, found out amongst the bearings of some ancient coats. Which I desire may be added to them in their places mentioned in **Chapters 12. & 13.**

CLXXXIII. He beareth Argent, a **Comb stone** **Gules**. Three such is born by the name of **Albon** or **Albin**. Such a bearing I find in the coat belonging to the **Bishoprick of Chichester**, viz. **Saphire**, a **Priest** sitting on such a **Tomb stone**, a **Mound** in his right hand, his left extended, **Topaz**: with a **Sword** in his mouth, proper.

This was the ancient maner of laying a **Tomb stone** over the bodies of deceased friends, whereof many are extant to this day; others, tyme and malignant persons, have devoured and destroyed.

In the chief of this quarter is placed an instrument of the **Chyrurgions**, called a **Thorax pipe**, and its **Stile**; the stile when used is to be put into the Pipe, and so thrust up the **Yard** to ease such who are troubled with the stone in the bladder.

CLXXXIV. He beareth Argent, on a **Peragon Mount**, or **Bull-work**, vert: a **Tower Towered**, **Gules**, born by the name of **Hiltre**, or **Hiltre**, as I find in an old Booke of Armes. B. the like in Base. A. having an **Escuchion** on the **Hill**, per fesse B. and G. a **Spurr rowel** of six points. A. is the **Town Arms of St. Joesburg** in **Germany**.

CLXXXV. He bareth Sable, a **square Tent**, the **Curtains** for the entrance, **doubled** or **turned up**, Argent; is the Coat and Crest of **Von Hatt zu Herffsch** in **Bavaria**; by the name, it should seem the **Dutch** and **German**, term this an **Hut**.

In the Sinister side of this quarter, is a **Tower** with **Battlements** and a **Roof** with a **Ball**, or **Globe** on the top, and a **Pile** at the **Foundation**. Such a **Tower Gules** (Impaled with Or, a bend Gules) is a field Or. is the coat Armour of the city or States of **Friburg** in one of the united Provinces.

In the chief of this square is placed a **Cataract needle** and its **Case**, this is a sharpe Needle with a screw towards the head of it to keep it fast in the **Case**. it is used to draw up the **Cataract** off the sight of the eye while it is cutting away.

CLXXXVI. He beareth Argent, the **Fore-front** of a **Sleeple**, with the out lets of the **Roof** of the Church and **Wall** to the sight of the eye, **Gules**; covered Azure. This is born by the name of **Van der Wenge**.

Wenge, of *Westphalia*. This is also termed the *West-End* (or side) of a *Steeple* and *Church*; for no more can be seen of a *Church*, when you stand to look at it, before the *Steeple Dow*. This I have seen Blazoned also, a *square House*, with a *showering* on each side.

CLXXXVII. He beareth *Gules*, a *Turret* in a *Turret*, *Argent*. This is born by the name of *Van Harthem* of *Francia*. This is also termed a *Tower* in (or on) the top of a *Tower*; and a *Tower* in a *Turret*, for a *Turret* is the proper term for the top *Battlements*, or walk about a *Tower*.

The second example of Bearing of Towers in this square, is thus Blazoned: He beareth *Argent*, on a *Mount Vert*, a *Wall* creniced, with two *Towers* upon it, *Gules*. Born by the name of *Day*. Some Blazon it two *Towers* on a *Wall*, set upon a *Hill*. And others, on a *Mount*, a *Breast Wall* before two *Towers*.

G. only the *Wall* and *Towers* A. is born for the *Coat* and *Crest* of *Koslowsky*, of *Silittars*.

O. a *Wall* with a *Battlement* at each end, with one *Tower* on it B. is born by *Rupersperg*, in the *Palatinate* of *Rhine*.

O. two *Towers* conjoined with a *Wall* imbatelled, behind a *Breast Wall*, between three *Mullets* of six points in chief G. and a *Mount* issuing out of *Base* V. born by the name of *Fridberg* of *Switzerland*.

In the *Dexter* *Base* is another form of bearing *Towers*, which is a plain *Cornish* of a *square*, and *fillets* on the top of an *Arch*; whereon is fixed two *Gyres* or *Steps*, between as many *Towers*. And such is born by the name of *Van Rumrodt zu Holzheim*, of *Alsatia*. Viz. O. an *Arch* Cornished, whereon is two *Gyres*, between two *Towers*, S.

CLXXXVIII. He beareth *Argent*, a *Wall*, (or a *Breast wall*) with three *Arched doors* and a *water table* in it *basis*, and a *cornish* on the top; before an *Hexagon*, or six square gate house, between two square towers *Gules*; *Roofes* over *seiling* (or with *Eaves*) *Azure*. is the *Arms* of the *Town* of *Speyr* in *Germanie*. Some term it a *Wall* with 3 *windows*, a *cornered tower* or *chamber*, between 2 square *turrets* all *loover roofed*.

CLXXXIX. He beareth *Or*, on an *Hill* or *mount* *Vert*, a *Round tower*, between and advanced above two other, *turreted*; (or *Imbatelled* on the tops) *Gules*. born by the name of *Tonrhill*.

G. on an *hill* in *base* *treble headed*, 3 such towers A. is the *Stats Arms* of *Prag* in *Germanie*.

B. on the surface of an *hill* in *base* V. (an *escuchion* A. charged with a *Lion rampant* B. crowned O.) 3 towers A. the *Turrets* *roofed*, and on the top or *spires* Ca-

*

itals, or round balls G. this is the *Arms* of *Immenhausen* a place of great account in *Germanie*.

CXC. He beareth *Argent*, a *Columb*, or *Round Pillar* with its *basis*, fixed on the middle of a *triangular Pedestal*, or three square *Foundation*; the *Chapter* *pyramid* *wise*, after the form of a *Pine apple*, *Gules*. born by the name of *Colin*. Some term it a *Pillar* fixt on a *Triangle* or three-corner stone; *Capital* *battled*, the head adorned *Pine apple* like.

A. 3 such G. born by the name of *Eger*.

G. a *Pillar* mounted on *Gyres* *triangular* *wise*, A. the *chapter* *spired* like a *Pine apple*. O. is the *Town Arms* of *Lutich*. Some take this for a *Tower*.

CXCI. He beareth *per fesse* *Argent* and *Vert*, on a *Bridg* of three *Arches* extended throughout the field, as many *Round Towers*, *hoveled* or *Roofed*, *Gules*; the *water* *transluent* (or proceeding therefrom) divideth it selfe (or runs to the *base*) in three *Streams*, or *chanells* proper, by the name of *Towerdon*. This is the *Blazon* I finde with this coat, yet it may be done shorter, as thus, on a *Bridg* in *fesse* of 3 *Arches*, as many *Towers*, the *Streams* divided there after, to the *base*.

G. the like A. *Streams* B. is the *quartered* coat belonging to the *town Arms* of *Zwischen* in *Germanie*.

CXCII. He beareth *Argent*, a *Gate* or *Port* in a *Wall*, with a *Pedement* *Imbatelled* between two round *Towers*, with top *Turrets*, *Gules*. In chief a *Chirurgions Instrument* *Felswise*, called a *Cataract Needle* with two points, by the name of *St. Leonide*. This *Instrument* is two *Silver Needles* or sharp points, set at each end of an *Handle*: Its uses are to put down a *Suffusion*, which is the first beginning of a *Cataract*, and seems to be little *Clouds*, *Moats* or *Flyes* before the *Eyes*, which after grows to a thin skin over the *pupil* of the eye, and so hinders its sight, which by the help of this *Needle* is taken away. See *numb.* 183.

G. 3 such *Handles* with *Needles* in *Pale*, A. is born by *de le Lotaire*, a *French Family*.

The *Town* of *Ravensburg* beareth such a *Wall* with a *Port*, *fans* *Gates*, between two *Towers* B. *Portcullice* S.

G. on a *Wall* *Battelled*, with a *Port* *fans* *Gates*, between 2 *Towers* A. a *demie* *Woman* holding of a *Lawrel Garland* in her right hand, the left upon her side, *Habired* B. is the *Town Arms* of *Magdeburg*.

A. a *Chevron* S. between 3 *Walls* with *Pedements* *Imbatelled* with *Towers* conjoined G. born by *Van Glarburg*.

In the *Sinister* side of this *square* is another *Instrument* of a *Chyrurgion*, termed a *Crow-Bill*; it is a kind of *Forceps* or *Pincers*, with a sharp point like a *Crows Bill*, from whence it hath the name of the *Sur-gions Crow-Bill*; it hath a *Spring* between the *handles*, that keeps it open in the *Beak*; its use is for to take out *Splinters* and pieces of broken *Bones* that are in *Wounds*.

TO

T O

The Worshipful

EDMUND JOYDRELL, of YARDSLEY, Esquire.

And EDMUND his Son and Heir.

SIR,

Though by others I am like to run the risque of Rubs and Fubs, and go under hard Censures for my Undertakings; yet I shall little care for an Army of incensed --- but resolutely stand their Legions of Pik's and Swords under your Protection; and I hope through your Fortitude to Laugh at their feeble Weapons, which can do no more hurt than Pot-guns make a noise to no purpose. Sir I shall say no more, but shew'd my self under your favourable Aspect in the perusing of this ensuing Treatise, which is most humbly Dedicated to your serious Consideration: And I shall ever give you that due Reverence, and pay you that Devotion that becomes him who is

at your Service, whilst

Randle Holme.

CHAP. X.

LETTERS and Learning are the Foundation of all Arts and Sciences, neither could they Flourish, till the same were perfectly found out. The first knowledge thereof was derived unto us from the Jewish Tongue, which we must acknowledge to be the Original of all humane learning; And Letters were so highly valued by them, that the mistaking of a Letter in the SACRED WRIT (as they say) destroyeth the World.

The Jews, and also the Phœnicians, and the most Eastern Parts, do Write from the left to the right hand; all the Western Parts of the World, do Write from the right to the left; and the reason as some give, is because the first were left-handed men, and the latter Men that used the Right hand in all exercises.

But the Ethiopians, Chinesians, and those parts of the Globe writ down from head to foot. The Caballists of the Jews Trading most in numbers; and the Massages in Vowels and Accent; the Egyptians in Hieroglyphicks; the Greeks in Letters; and the Europeans in Arms

and Ensigns of Honour, the first Letters being those that God writ with his own hand.

Pliny thinks that Letters were always with the Assyrians, yet believes they were invented in Egypt by Mercury. Athanasius thinks that the Phœnicians were the first Inventers thereof. And Pliny concludes that Cadmus first brought them into Greece. Josephus is of the mind that Letters were before the Flood.

I. Is the Roman Alphabet; which Letters are of great use in all the Western parts of the World, and were dispersed abroad by them during the Government, and Rule of the Roman Monarchie. Now as to our purpose, I shall set down each particular Letter which are born, or used in coats of Arms. Secondly, what each Letter signifieth as to Names, or Words, or Numbers in Antiquity. And lastly give some notes of Abbreviations of words with their explanation: For it was the Roman way to use great Letters for proper names, for names of Arts, for places of Office and Dignity; and for

E c c

whole

whole Sentences, which Rules we after their Copy followed, as will be manifested.

A IT is the first Letter of the Roman Alphabet, amongst them it was the Letter of Absolution and Salutation; and the Germans bore it in their Arms, as Gules the Letter A. on a Fels Argent; born by the name of Albann.

G. on a Fels A. the word AVE. born by the name of Nadler. Here I do not mention the colour of the Letters, for they are ever Black, except they be in a coloured Field.

The Signification of A. in Notes of Antiquity.

A. signifies Augustus. Aulus. Affolet. Annus. Absolvo. Absolutio. Agit. Aiant. Aliquando. Aus. ecc.
A. C. Augustus Caesar. Alius Cere. Acta Causa.
A. A. Augustus. Augusta. Augustalis. Apud Agrum. Ante Audita. Es Alienum.

 D. V. Devotus Vir. Dns Volentibus. Dies Quintus.
 DV. or DVS. Devotus.
 DVL. DOL. or DVLC. Dulcissimus.

E THE fit Letter in the Roman Alphabet, and is of like shape to the Greek Epsilon, the fit letter in their Language. That it is used in Arms I have shewed before in the letter A also I finde that G. on a cheveron A. betw. 3 trefoiles O. 3 Roman E's. is born by Elfoile.

E. Eff. Ejus. Ens. EE. Esse. Ex edito.
 E. B. Ejus Bona. E. AE. Ejus Aetas.
 E. C. E. Comitio. E. Capitolio.
 E. D. Ejus Domus. or Dominus. E. F. Ejus Filius.
 E. H. Ejus Hares. Ex Heredibus. or Hereditate.
 EIM. or EIMO. Ejusmodi. E. L. Edita Lex.
 EM. Ejusdem. Ejusmodi. E. M. Ex More.
 E. N. Etiam Nunc. Est Noster. Et Non.
 EOR. Eorum. E. P. Edendum Parce. E. Publico.
 EP. M. Epitaphium. E. P. M. Epistolam misit.
 EP. Epistola. Epulatio. EPS. Episcopus.
 EQ. Eques. Equestris. EQ. P. Eques Publicus.
 EQ. R. Eques Romanus.
 ER. Erit. Erunt. E. R. Ea Res.
 E. S. E. Senatu. E. T. Excellentia Tua.
 ET. Etiam. ET. NC. Etiam Nunc.
 EV. Ejus. EX. Ejus. Exigitur. Exactus.
 EX. B. Ejus Bona.
 EXC. or EX. C. Ex Consuetudine. Ex Concione. Ex Condiuine.

F IS the sixth Letter in the Alphabet, it is a diminutive of the E having the foundation Stroke taken away, and is like a person of Worth yet is Eclipsed in a part of his ancient Inheritance.

A. a rose betw. 3 Roman F's is born by Flaur.

B. on a fesse A. an F is the coat of Effheim.

F. signifieth Filius. Flavius. Felix. familia. fides. sust. fecit seria. sur. Festa. figura. &c.
 FA. Filia. FD. fides. FD. M. fides mundi.
 FC. or F. C. Fidei Commissum. fiducia causa. fides causa fraudis creditoris. faciendum curavit.
 F. being thus inverted was anciently written for V.
 F. E. Filius ejus. factum est. fundaverunt. fortum. fama.
 FEA. Femina. FEB. Februarius.
 F. F. Frater filius. F. FA. filius familias.
 F. I. Fieri Iussit. FL. B. Fide Bona.
 FID. Fides. FID. D. Fide Dignus.
 FID. SER. Fidelis Seruus. FL. Flavius. flavus.
 F. M. Fieri Mandavit. factum memoratum.
 F. M. I. Fati munus Implevit.
 FN. Fines. F. N. Fides nostrae.
 F. N. C. Fidei nostrae Commissum.
 FO. Forum. FOR. Fortuna. forat. forte. fortis.
 FR. Frater. frater scum. * F. R.

F.R. *Forus Romani. Firmus Regundorum.*

F.V.C. *Francus Ve Calsa.*

FVNC. *Funustus.*

FV. *Fraudisue.*

G is the seventh Letter in the Alphabet: It hath a various Sound according to the word it is in.
G. a Roman G. Argent, born by the State of Goting and the State of Glogaw in Germany.

G. *Gaudium. Gratia. Gens. Genius. Gellius. Garus. Gajus.* GENS. *Gentes.*

G.F. *Gula Filiorum.* GG. or GS. *Gesserunt.*

GEN. CORN. *Gente Corneliorum.*

GER. *Germanicus.* GL. *Gloria. Gaius.*

GL. P. *Gloria Parentum. Gloria Patrie. Gloria Populi.*

G.M. *Gens Mala.* GN. *Gens. Genus.*

G.I.E.D. *Gloria in Exelsis Deo.*

GL. P.R. *Gloria Populi Romani.*

G.P. *Gula Parentum.* GOTH. *Gothicos.*

KS. or K. S. *Calende Sextilis.*

L is

*

*

L THE eleventh Letter in the Alphabet, it is a Numeral, and stands for Fifty. It was born in the Ensigns of the Lacedæmonians, as saith my Author, but I rather take it to be the Greek Letter *Λ* or *Lambda*, which answers the Roman *V*. reversed thus. *Λ*

L. Quinquaginta. Lucius. Lelius. Libens. Libertas. Locus. Lector. *L.A.* Lex Alia. *L.A.N.* Quinquaginta Annis. *L.D.* Laudandum. *L.D.D.* Locum Diis Dicatur. *L.DIV.* Locus Divinus. *LEG. N THE middle Letter of the declining part of the Alphabet. It being Transposed, will convert it self into a *Z*; but in Germany it is born in its own situation; the Field being parted Per Fess Gules and Argent, in chief the Roman Letter *N*. of the first. Born by the name of *Kladrubsker*.

G. 3 Annulets Bottomed round *O*, in the first an *N* and second an *S*, over all an Escochion of Pretence quarterly *S*. and *A*. is the Town Arms of *Norwenstun* under *Aysch* in the Netherlands.

N. signifies Num. Nec. Non. Nomen. Nepos. Natus. Noster. Nostri. Nostrum. Numerator. Nota. Numisma. Numerum, &c. *NO.* Nobis. Nostrum. *NBL.* Nobilis. *N.L.* Non Liqueat. Non Licet. Nominis Latini. Non Longe. *NEG.* Negotiator. *NEP.* Nepos. *NVS. E. P.* Natus Est Puer. *N.F.C.* Nostræ Fidei Commissum. *N.F.N.* Nobili Familia Natus. *N.H.* Notus Homo. *N.C.C.* Non Calumniæ Causa. *NOBB.* Nobilibus. *NOB. G.* Nobilis Generatus. Nobilis Genere. *NOB. F.N.* Nobilis Familia Natus. *NON.* Nonarum. *NON. APR.* Nonis Aprilis. *NON. DEC.* Nonis Decembris; and so of the other Months. *NOR.* Nostrum. *N. P.* Nobis Potest. Non Potest. *NQ.* Nusquam. Neque. Nunquam. *NR.* Noster. *N.S.E.* Non Sic Est. *NT.* Nominatus. Nostrum Testamentum. Nostra Tempora. *N. V.* Non Vis. Non Vocat. Non Valet. *NV. or NVP.* Nuptias.

O THE first after the middle, and the fourteenth in the order of the Alphabet: It is a Letter of great signification. For in Arithmetick it stands for a Cypher; In Geometry for a Circle; In Astrology for the Sun; And in Heraldry for an Annulet. To the first you may add what you please, in the second there is per-

reason: The third is a Symbol; And in the fourth it is an Honor both to Princes and Nobles, Knights and Esquires. And that it is frequently used in coats Armour, I have formerly shewed chap. 2 numb. 44. to 50.

O. Omnia. Ob. OB. Obriacum. Orbem. Obiter.

Q IT is a Letter of small use, and put only in stead of C. in such Words as V followeth with an other Vowell, which makes the Pronunciation easier than with C. I have not yet found it born in any Coat.

Q. signifieth Quintus. Quintus. Quastor. Quintilius. quiritus. quartus. Quartarius. quantum. quare. Quandoque. qui. que. &c.
QV. Quartus. QM. or Q. M. Quomodo.
Q. AM. Quomodo. QV. ES. Quastor.
Q. S. S. S. Quae Supra Scripta Sunt.
Q. N. A. N. Quandoque neque ais neque negas.
QVIR. Quirites. QVR. BF. Quare Benefactum.
Q. E. R. E. Quamvis ea res erit. Q. F. Quamvis filius.
Q. B. M. V. Quae Bene Mecum Vixit.
Q. L. Quinti Libertus.

R IS the seventeenth Letter in the Alphabet, it is a letter of Ire; much like a Dog that Snarleth but biteth not to hurt, except it be filed in the hand of a Runagado Rogue.

Quarterly Gules & Or, in the 1 & 4 a Roman R Argent, in the 2 & 3 an Olive Branch. Born by the name of Die Reding of Switzerland.

R. signifieth Roma. Rabbi. REG. Regio.
R. C. Romana Civitas. R. D. Regis Domus.
REI. M. Rei Militaris.
R. F. E. D. Recte factum esse dicitur.
R. F. E. V. Recte factum esse videtur.
RGF. or RG. F. Regis filius. R. R. Re Rustica.
R. P. Res. Publica. R. P. Regis Professor.
R. P. C. Rei Publicae Constituendae.

S IS the eighteenth Letter in the Alphabet, and is of great Dignity, being the Knights Ensigne in the Collar of S. S. Denoting them to be Sirs, that is Heroes, or Great Lords, and Men of Renown.

A. a Roman S. triparted Sable, Argent and Gules. By the name of Van Meseenan.

G. the like A. born by Seyboltrage.
S. Sanctus. Senatus. SEX. Sextus.
SC. Sacer. S. C. Senatus Consultum.
S. O. Sine Occasione.
S. P. Spiritus Sanctus. Sine Pater. SP. Spuria.
S. P. D. Salutem Plurimum Dedit.
S. P. Q. R. Senatus Populusque Romanus.
S. S. Sacro Sanctus.

S. TR.

S. TR. Signati *Trepus*.
S. V. L. M. *Salutem Populi Lubens Merito*.

T is the 19 Letter in the Roman Alphabet, it is a mute Letter, and sounded through the Teeth. This Letter is often born in Arms, and is used for the Crofs Commis, or Crofs Tau, vulgarly called Saint *Anthony's* Crofs.

O. an Eagle displaid S. on her Breast an Escochion G. charged with a Roman T Argent. Born by the Town of *Tull*.

A. on a Chief V. 3. such O. Born by *Drury* of *Norfolk*. Some make it a Taw between 2 Mulletts.

T. signifies *Titus*, *Titius*, *Tutillus*, *Tutilla*, *Tutor*.

TI. *Tiberius*. T. C. *Tua Clementia*.

T. VES. *Titus Vespasianus*.

T. M. *Tantum*, *Terminus*, or *Therma*.

TR. P. *Tribunitia Potestate*.

TR. *Trans*, *Tribunus*, *Tribunitius*.

V IS both a Vowel and Consonant; in the latter it hath for the most part the sound of F: It is a Numeral Letter, and stands for Five.

B. the Roman V. reversed between 3 Cups covered O. by the name of *Christians*, of the *Ile of Man*.

B. the same reversed A. in Base a Mullet of 6 points O. by *Preischurch*.

O. the like between three Crows. Born by *Hombrecht* of the *Rhine*.

V. signifies *Valerius*, *Vitellius*, *Victoriat*, *Quinarii*.

Quinque. Vir. *Vidor*. *Viti*.

VV. *Kaleria Victorin*.

V. A. *Vicem assignatum*.

VB. *Verba*, *Vobiscum*. V. B. *Vir bonus*.

V. C. *Vir consularis*, or *Clarus*.

V. CC. *Volsunt consules*.

V. C. C. F. *Vale Coniux Clarissima Feliciter*.

V. D. *Vrui dedit*. V. D. A. *Vale, dulcis Amice*.

V. DD. *Vrui dedicatus*, V. L. *Vir Iustus*, or *Illustris*.

V. D. N. U. *Vale decus Nostra Urbis*.

V. E. *Verum etiam*, *Vir Egregius*.

VM. *Vestrum*, *Verum*.

V. M. M. *Votum Merito Minerva*.

V. S. L. M. *Votum Solutum Lubens Merito*.

W IS two V's conjoyned.

A. W. is born in base by the State of *Wildberg* in *Germany*: viz. party per fesse Argent and Gules, bordered in chief Sable, and a Roman W. in base of the first.

O. an Eagle disp. with 2 heads, S. on an Escochion.

B. a Roman W. born by the State of *Schwabisch-murth*.

A. an Eagle disp. S. on an Escochion, G. a Roman W. born by the Town or State of *Wangen* in *Germany*.

O. a W. is quartered by the Town of *Breslaw*.

X The Twenty second Letter in the Alphabet, and is composed of two V's inverted, which is two fives, making the X. a numeral Letter, and to stand for Ten: With the Romans in their Ensigns, this was called *Crux decussata*, a Crofs cut in the form of an X. which

is commonly called Saint *Andrew's* Crofs. This Letter hath had the honor to Tipifie our blessed Lord and Saviour in a Mystical Symbole, as you shall see a little after.

A. 3 X. is born by *Essexall*. ats *Exall*.

X. Decem. *Christus*

XC. *Novaginta*.

XL. *Quadraginta*.

XPS. *Decussatur populum Salvare. Christus populi Saluator*.

Y The Twenty third Letter in the Roman Alphabet, which in part hath the resemblance of the Crofs, which was always in use by the *Egyptians*, and was after the manner of an *Andrew* or *Burgundian* Crofs, Signing and Anointing their Priests with this like Character.

A. on a pale, S. a Roman Y. O. by the name of *Clark*.

Z The Twenty fourth and last Letter in the Alphabet.

G. a Roman Z. Argent, by the name of *Soterne*.

S. the like, A. born by *De Komantzky* of *Silicia*.

From single Letters, we come now to double Symbolical Characters, such as in one letter express and signifie to us a whole word, and sometimes a Sentence as these Examples following.

&. this is the Roman Character for the word *et*, or *and*, and is much in use in all parts where the Roman letters are in use, let the Language be what it will; either *English*, *French*, *Spanish*, or *Italian*, &c. In all petty Schools it is taught little Children to pronounce it (A per C and) or \$ per Cand.

A. a Cheveron, S. betw. 3 Roman &. by the name of *Last*.

G. a Roman &. Argent, by the name of *And*.

Or, & a P and X conjoyned, Sable, by the name of *Darware*: Some term this an X surmounted of the foot, or lower part of the P. others the Sybolical Character, PX. in one; signifying thereby Christ and his People, which are made one, according to his own words, *I am in you, and you in me, for Christ, and the People of his Catholick Church are but one body*, John 14. 20. Eph. 5. 30. Some term this the Symbolical Characters of Christs name, being the two first letters thereof conjoyned; but I rather take it to be *Christus & Populi*, Christ and his Church in one Body as aforesaid.

R. Gules on a chief Argent, two Roman R's endorsed and conjoyned, by the name of *Ruall*; this is another Symbole of Christs regality, where (as it were) in one Character, is expressed the words REX REGVM, King of Kings, and Lord of Lords; as having a Supremacy over all Earthly potentates, for by him alone all Kings Reign; he raised them up, and put them down according to his own will.

G. the like A. born by *Die Langen-Mantel*, in *Saxony*.

IHS, and XPS. I have explained in the noted letters of Antiquity, which I have also seen born in Arms, as it is mentioned formerly, *Lih. 2. Cap. 1. Numb. 2. 7*.

Besides

Besides particular Letters born in Coats, you shall often find Arms having Words and Sentences contained in them as parts or branches thereof.

The City of Oxford beareth Azure, a Book open, proper, with seven Deas between three Crowns Or; on the Leaves is written these two words. SAPIENTIA FELICITAS.

Emmanuel Collidge in Cambridge beareth Argent, a Lion Rampant Azure, holding in his Paw a Triumphant Crown of Lawrel, and an Escrole proceeding from his Mouth, and turned over his Head Or; with the word EMANUEL written therein.

S. on a Fels A. in Text Letters this word LIEB. O. is quartered by Van Startzbarsen of Bavaria.

On a Wreath or Torce of his Colours, a Stags Head couped with an Escrowl from his mouth Argent; having this Motto in it. LIVE TO LIVE, is the Crest of Whitley of Aston, in the County of Flint.

On a Torce an Armed Head, the Bever open, from whose mouth proceeds an Escrowl with this Motto in it; A fano Durr a Deruydd; which is the Crest of Edwards of Chirke, in Denbighshire.

Having now done with the Roman Letters, whereof they framed words to interpret their minds each to other: I shall now shew you how they numbred and cast up their Accounts, which way of Reckoning is not unnecessary to be known of all Historians, Antiquaries and Heralds; and their way was thus.

I. One.	XI. Eleven.
II. Two.	XII. Twelve.
III. Three.	XIII. Thirteen.
IIII. IV. Four.	XIV. XIII. Fourteen.
V. Five.	XV. Fifteen.
VI. Six.	XVI. Sixteen.
VII. Seven.	XVII. Seventeen.
VIII. IIX. Eight.	XIIX. XVIII. Eighteen.
IX. Nine.	XIX. Nineteen.
X. Ten.	XX. Twenty.

Thus much for their smaller Numbers, where you are to note, that it was their manner, that when they set a Letter of a smaller number, before one signifying a greater number; it is to give us to understand, that there is a deduction out of its full number, even as much as the lesser number stands for; which I shall farther signify; as for Example I before a V thus IV, shews that One is taken out of Five, so then it must be the number Four. Again in the same manner I before X thus IX.

IX. is one out of Ten, which makes the number Nine. IIX. hath two taken out of Ten, which makes this number Eight.

XIX. Hath the first Letter its full number, which is Ten, but the second following being less than the next after, doth deduct so much out as it is, which is one from Ten making it Nine; so that the first Ten and this Nine, make Nineteen, the just number this stands for: And this Rule is to be observed in all Numeral Letters of what number soever, that when smaller are set before the greater, then there must be so much de-

ducted from the greater number as the lesser signifieth, and that stands for such a Number; example hercof you will see following.

XX. Twenty.	CCC. three Hundred.
XXX. Thirty.	CCCC. four Hundred.
XL. Forty.	D. IJ. Five Hundred. Dis
L. Fifty.	<i>Deni um Mille.</i>

2. **T**his is the form of the Letters or Characters used by the Ancient Saxons and Angles within Germany and Brittain; which by old writings, Printed Books, and Monuments of the dead, are yet extant; and in some parts are yet used amongst us to this day.

I do only give you the Alphabet, to which in particular I shall say but little, more than give you (as from the Romans, so from these our Ancestors) there way of writing with such Abbreviations as I have observed in Manuscripts, Deeds, Evidences, and Records of Antiquity,

used peculiarly amongst us; the knowledge whereof is very necessary for lovers of Antiquity, Heraldry, and Keepers of Offices of Record; especially that great Record called Dooms day, alias *Domus Dei* Book.

Amongst Coats of Arms, I find these Coats adorned with Letters of the Saxon Alphabet, viz.

Argent on a Cross Gules, a Saxon Q Or. by the name *Holyman*.

Azure, a fesse between 3 Saxon Q's. Argent by the name of *Coclacoe*.

Argent, 3 Saxon Q's. Sable, by the name of *Elrond*.

Argent, a Cheveron betw. 3 Saxon H's. Sable, by the name of *Higbill*.

Azure, a Castle with two Towers Argent, in chief a Mullet of six points, and in base a Saxon M, Or. born by the City or States of *Monsterberg* in Germany.

Azure, a Saxon H with a Crown over it (or Crowned) Or. by the name *Gessen*, or *Giesfen*.

G. a Saxon G. A. born by the Town of *Glogam*.

G. 2 Wheels, and 2 Saxon M. A. contrary poled by the Town of *Miltunberg*.

A. on fesse, S. 3 Saxon F's A. born by *Voblin*.

he be desirous, he may peruse these following Authors, where he may find multitudes of such short writing.

Saint *Jeroms* Bible in a MS. and other old Bibles, which are extant in Written hand before Printing was found out.

Valerius Probus, set forth with Annotations, by *Erasmus*, and *Tiliobraga*.

Paulus Diacanus.

Aldus Manutius, Junior.

Franciscus Holtomanus.

Fredericus Limembrogius.

Michael Mimeras.

Thomas Reinejus.

Johannes Mabillon de re diplomatice Lutetiae, Parisiorum printed, 1681.

Sextorius Uratus, a modern learned Antiquary of *Padua*, who hath Published a small Volumn Book of that subject; and is sometimes bound up with the Book Entituled, *Monumenta Patavina*, set forth by him.

Claudius Hantquejus, in his Learned work *De Orthographia*, hath given very useful Instructions for the Reading of Ancient writings in the Latin Tongue and how to judge of the Antiquity of them and guess at the age wherein they were writ.

Traite des Inscriptions fausses & Reconnuissances d'Escriture & Signatures, published by a famous Writing-Master of *Paris*, 1666.

Threor de l'Histoire des Langues de le Vniuers, in Quarto. published by a learned President of one of the Parliaments in *France*, Anno 1619. wherein he gives the Alphabet of the most general known Languages, with Discourses upon the same.

But of latter years, our *English* Nation hath wholly lost both their Ancestors Letter, and way of short Writing for publick concerns and make use of the *Roman*, *English*, and *Italick*, in all sorts of Printing: But for Writing Hands, Scriveners, Clerks, and Lawyers, make use of these several sorts of Letters, viz. Secretary or Mixt hand; Chancery or Set hand and Court hand: Which are those set down in the beginning of the following Engraven Plate.

To those are added two sorts of Hand writing more, which have the name and shew of *Roman* and *Italian*, as they are Printed, yet are of a different cut, as those Examples will manifest. These are usually taught Women for their Writing.

The names of which Letters, we *English-men* do thus pronounce.

A. a.	J. je.	S. es.
B. bee.	K. ca.	T. tee. cee.
C. cee. kee. ch. ca.	L. el.	U.
D. dee.	M. em.	V. ve. ife. eef.
E. ee.	N. en.	W. oo.
F. ef.	O. oo.	X. ex.
G. gee. jee. gu. gin.	P. pe. ph. ef. eef.	Y. yi. ooi.
H. ache. he.	Q. cu.	Z. zed. uffed. ef.
I. i.	R. ar.	&c. A per se and.

*

Now the usual Breviated words used in our *English* way of writing, are only these few; some standing for words, others for parts of words, and others for double Letters, as Mr. *Baile* in his *English Grammer*, informeth us more fully, &c.

th t n e t m y
W. W. W. Y. Y. Y. Y.

ð th. ð th. ı 7 ih. € ch. G gh. P ph, or f. 2 sh.
W wh. K kh. f sh. E ee. which are called Aspirats.

III. These are the form of the Letters or Alphabet, Characters used by the *Germans*; and are termed the Text Hand Letters; many whereof I have seen used both in and for Coats of Arms.

Argent, three Text R's Sable, born by the name of *Pate of Leicester*.

Gules, three Text S's. Or, born by the name of *Keber More*.

Argent, a Chevron betw. three Text C's, Sable, born by the name of *Toft*, of *Toft* in *Cheshire*.

In the *German* or *High Dutch*, they are thus pronounced.

A au.	I ee.	R r ?
B ba.	K ka.	S s s s
C c.	L la.	T t t t
D de.	M ma.	U u u u
E e.	N na.	V v v v
F f.	O o.	W w w w
G ge.	P pa.	X x x x
H hau.	Q quibo.	Y y y y

In the *Nether Dutch* Language they are thus pronounced.

A ah.	I ee.	R cr.
B bea.	K ka.	S ef. sch. sk.
C ce sea.	L el.	T te.
D dea.	M em.	U ou.
E ea.	N en.	V ow.
F ef.	O o.	X er.
G ge sea.	P pea.	Y ij.
H ha.	Q qu. cu.	Z ze.

Diphthongs.			Triphthongs.
ae	ei ey	oe ou ow	aeu
ai ay	eu	oey	ieu
au	eeu	oy ooy	oey
aeu	euy	ou	uae
aeuw	ieu	ue	ueu
ee	ieuw	uy uu	

The *Polanders* use a Character much like the *Germans*, being a kind of Text Letter, or between a Text and Secretary Hand Writing; only this they make b for f or Consonant v; and ez for ch; and i for ll; and n for gn; and ı for sh; and rz for th.

The *Swedes* use also a kind of Secretary Character, and in their words make use of these double Letters gh ab th ch sk.

Secretaire	Chancery	Court	Roman	Italian
A. a. a.	A. a. a.	A A a	A A a	A a

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z
 a b c d e f g h i k l m n o p q r s t u v w x y z
 Th Their

Their ancient figures for numeration were these.

1. 2. 3. 4. 5. 6. 7. 8. 9. 10

But the *Brittaines* or *Welsh* have now lost their ancient Characters and do altogether use the *Roman* Letters, yet keep their old pronounciation of them, especially of their double Consonants, which are these, and thus expressed in sound.

ch *egh*. dd *eibe*. ff *ive*. gh
gn *gin*. ll *ethl* or *lh*. ng *ung*. ph *eve*
th *eth*.

2. **S** EING We have entered a discourse of these Ancient and Forraine Characters, It may not be amiss, and hope not troublesome to the Courteous Reader to take a short view of some other National, Provincial, and Monarchicall Letters, used in the severall parts of this Sublunary Globe of the Earth: Such Letters I meane whose form and shape are contrary to the *Romans*, *Greeks* and *Hebreus*. And as in letters, so they differ in their Names, Pronounciations, Vowels, Diphthongs, and Abbreviations. As the Instructions following will make more manifest.

Now for the better findeing out of these following Characters according to their names, I have in the first Columb set the figure against it in the engraven Plate, from which striking over into the said Letter Columb after mentioned, you will there se the Character which is here so named, of such or such a people; as for example.

The Goths Letters.

A. Hath under it columb, the ancient *Goths* letters a people Inhabiting between *Swethland* and *Normay* called *Scandia* (of some taken to be the *Scythians*) and were first invented by *Uphilas* their first Bishop, upon their receiving of the Faith. Their letters were named after the *Latines* as a b c d &c. Which were afterward as is supposed to be altered by those that went into *Italy*, and made a conquest of that Countrey. For I finde two alphabets of their Characters. In this columb after Z followeth their (&c) as also all their Diphthongs expressed by contrary characters to the alphabet, which from the figure 24. downwards signifie &c au eu ei oi oe ae and so much for their Letters.

The Celts and Normans Letters

B. Hath under its Columb, the ancient *Celts* and *Norman* Characters; a people of the northern parts, who first came into *France* and seated in *Neustria* and *Armorica*, from whom the place took the name of *Normania*, or *Normandy*. Their letters were called like to our alphabet a b c d &c. to the letter K. which is the tenth, from which they doubled their letters to express the remainder, as Ka, for their L. Kb for M. Kc for N. &c. to the letter V. which is a single letter and stands also for the number 20. which being also doubled as Va stands for their X. Vb for Y. Vc for Z. and Vd for &c.

The Franks Letters

C. Hath under it the columb of the ancient *Franks*, or *French* letters. A people of *Franconia* in *Germany*, who at the declining of the *Roman* Monarchy possessed themselves of it, calling themselves, *Franks*, to shew that they were free from that Yoak and Slavery which the *Romans* would have imposed on them. Their letters were different from the *Almans*, or *Germans*, yet went alphabetically according to the *Greek*, as Alpha, Beta, Gamma, Delta, Epsilon, &c. of which you may se the order in numb. 4. though now they have wholly lost them, and make use of the *Roman* letters as is before said in numb. 3.

The Irish and Manks Letters.

D. Columb hath under it the *Irish* and *Manks* alphabet, these were a people descended of the ancient *Brittaines*, whose Language was originally *Brittish*, or a Dialect of it; But in after ages, through their intermixing with *Norwegians*, *Danes*, *Easterlings* and *English Saxons*, hath now but little affinity with the *Welsh*, but use a Language of their own, yet speak it so, as a *South Wales* man understands several hundreds of their words, also they do the same, in *Manks* or the *Ile of Man*, in the west of *Scotland*, and the *Hibredes*. The same form of character to the *Saxons* is used by them, in which I finde little or no difference, and go alphabetically as theirs do, as a b c d e &c. But how they pronounce them single, by being double, or by the accenting of them; I cannot yet Learne, though I have made diligent enquiry, especially their Vowels, which are set down under their Alphabet with their accents, and the Diphthongs in the three last lines.

The Phœnician Letters.

E. In this Columb you are presented with two Alphabets of the *Phœnicians*, the first the more ancient, the other now in use. These people were originally *Canaanites*, but called by the *Greeks*, *Phœnice*, from the abundance of *Palme trees* growing therein: It is a Countrey lying on the north of *Arabea*. Their alphabet runs literally with ours as a b c d &c. but are thus named

1. Aluz.	7. Githi.	13. Nichom.	19. Totil.
2. Ben.	8. Huth.	14. Oliph.	20. Vr.
3. Cem.	9. Iothim.	15. Phisai.	21. Xith.
4. Dimi.	10. Kaurum.	16. Quenu.	22. Yn.
5. Ethimi.	11. Lathim.	17. Rophi.	23. Ziph.
6. Fesim.	12. Momi.	18. Stih.	

The Egyptian Letters

F. Under this Lettered columb, is three of the *Egyptian* Alphabets, those of antiquity is in the first row downwards, the other now in use. It is reported of them that they were the first Inventers of Letters, and that they taught the use of them to their neighbours the *Phœnicians*.

Dedmi cistele .H. Dedicat .E.

and they to the *Greeks*. But this is most certaine that at first, to expresse their minds, and conception of words, they did it by the shapes of Things, both in Heaven, the Earth, and Waters. Which they termed *Pictoroglyphicks*. These people have their letters Alphabetically in the same order to ours. viz: a b c d &c. and are named according to the *Phenicians* aforesaid. In the bottom of the column there are three characters which stand for double letters, viz: Th. Gh. Pf.

The Tuskish Letters.

G. This Column hath the *Tuscan* alphabet, a people of *Tuscania* a great Province in *Italy*: of some Authors called the great Dukedom of *Turkey*, or *Florence*, they were formerly called *Hetruria*. Their characters run in the same order to the *Italians*, or *Latins*, as a b c d &c. though the were of a contrary shape; but how pronounced I am yet to be a learner. The two last letters stand for Ch. and If.

The Ancient Greek Letters.

K. Hath under it in one Column, three sorts of the *Greek* characters used by them of old; all which are in some part contrary to the Modern Alphabet now in use, as you may see if you compare them with those set down in numb. 4. yet their pronouncing of them both old and new, are after one and the same way or maner. and therefore I shall say noe more of them.

The Maronian Letters.

L. In the column, soe marked, is the *Maronits*, or the *Maronians* alphabet, a people inhabiting a countrey in *Syria*, it is a *Chaldee* letter, used by them when converted and in league with the *Greeks*, because they are called after the names of the *Greekish* letters, as Alpha Beta Gamma Delta &c. Which makes me Iudge that they were used by the *Greeks* also in their commerce with these kind of people, and read to the right hand as all the *West* parts doe.

The Ethiopian and Phrygian Letters.

M. Under this letter is placed the Characters of the *Ethiopic* Language, the first rowe downwards in the column, is the letters now in use with them, and all School-ans which desire to read or learn that tongue use them. The other is the more ancient character, both consists of 26 letters, each also being a numerall and stands for a certaine number in *Arithmatick* as the name of each letter doth manifest.

Hoi 1.	Kaf 8.	Wawe 15.	Paic 22.
Law 2.	Bet 9.	Ain 16.	Nadai 23.
Haut 3.	Tawi 10.	Zai 17.	Zappa 24.
Maj 4.	Harm 11.	Iaman 18.	Af 25.
Saut 5.	Nahas 12.	Dent 19.	Pfa 26.
Ryys 6.	Alph 13.	Gemul 20.	
Sat 7.	Kaf 14.	Tair 21.	

The other alphabet runs thus, each having its figure

*

for which it is used in numeration.

A 13.	Hbath 3.	Sa 15.	Ta 10.
Ba 9.	Tha 11.	A 16.	Guo 23.
Ga 20.	Iud 18.	Pa 21.	Huo 24.
Da 19.	Ka 8.	Tza 22.	Kuo 25.
Ha 1.	La 2.	Cha 14.	Chuo 26.
Va 5.	Ma 4.	Ra 6.	
Za 17.	Na 12.	Sha 7.	

Besides these they use certaine characters, much resembling the *Greeks* first 10 letters, making dashes over & under them; with the which, by double and trebling of them (after our way of *Arithmatick*) they can set down any number whatsoever.

Their Vowels are Seven, viz: ä u i ä e y o they are noted or expressed by certain marks or characters ioyned to the top, sides, or bottom of the precedent letter.

Also five Diphthongs which are these va ui ua ue uy which by characters are so marked. All which you may in the bottom of the column at numb. 27. 28. 29 &c.

The *Phrygians* a people inhabiting that large country of *Phrygia* (and in part Bordering on *Ethiopia*) which for its greatness is divided into two parts, one *Phrygia Major*, the other *Phrygia Minor*. They are said to use the same characters, but set them after the *Greek* order.

The Georgianian Letters.

N. Under this Capital is the *Georgianians* characters, They are a people dwelling in *Iberia* in *Asia*, of whom the name of the countrey is termed *Georgiana*, from St. George of *Cappisocia*; whom they have in great Honor, as their Countrey Patron, or titular Saint. Their alphabet consists of 31 letters, which they thus pronounce.

1 Alpha.	9 Theta.	17 Pi.	25 Omega.
2 Veda.	10 Toda.	18 Rou.	26 Schi.
3 Gamma.	11 Cabda.	19 Sigma.	27 Vue.
4 Delda.	12 Lamda.	20 Ta.	28 Comi.
5 E.	13 My.	21 Hie.	29 Or. r.
6 Fzo. sti.	14 Ny.	22 Phi.	30 Gimfa.
7 Zieta.	14 Lxi.	23 Chi.	31 Tee.
8 Elomi.	16 O.	24 Ipsi.	

The Iacobites & Cophtites Letters.

O. Under this title or Letter, is the column of the *Iacobites*, and the *Cophtites*; neere borderers as it should seem at their first beginning, by the letters names: for although their characters be something different, yet their naming them is one and the same. The *Iacobites* are a people dwelling in *Babylonia* and *Mesopotamia*, which took their name from *Iacob Syrus*, for maintaining a certaine Heresie in the Christian faith. The *Cophtites* were the names of the Christians of *Egypt*, who there in an abundant maner, as they increased so used that character (as is in the second rowe of the column downwards) as it were amongst themselves. They were 35 in number & were thus alphabetically named.

1 Alpha.	5 E.	9 Theda.	13 Me.
2 Weda.	6 Zlo.	10 Ioda.	14 Nyn.
3 Gamma.	7 Syera.	11 Caba.	15 Axi.
4 Delta.	8 Heda.	12 Lauda.	16 Off.

G g g

17. N

17 Pi.	22 Phi.	27 Vey.	32 Sima.
18 Ru.	23 Chi.	28 Cha.	33 Dy.
19 Sigma.	24 Epsi.	29 Chy.	
20 Taffi.	25 O.	30 Hori.	
21 He.	26 Schey.	31 Gausa.	

The Illyrick & Slavonian Letters

P. In this column is the *Illyrick* or *Slavonian* characters, a country of a great extent: The *Slavonian* language, being a Universal *Lingua* in those East and West parts (anciently called the *Sarmatian* tongue) for it is generally spoken in the Empire of *Russia*, *Livonia*, *Poland*, *Silefia*, *Bohemia*, *Maxavia*, part of *Hungaria*, *Dacia*, *Histria*, and *Epirus*: Also *Georgia*, and *Mengrelia*, both in *Asia*. And by all the Captains Officers, and the Soldiers of the *Turkish* Empire. *Illyrick* or *Slavonia*, for so they are indifferently called, contained 18 of the *Roman* Provinces. They have amongst them two alphabets, the first called the *Illyrick*; The second called the *Slavonian* alphabet: they are set in order downwards after the *Roman* letters, as a b c d e f &c. But how they are pronounced according to that order, or whither after the *Greek*, or *Hebrew*, is yet by me to receive Instructions.

The *Illyrick* use no y. but in the lines 24 25. have two characters by which they express *Sh*. and *Sp*. And the *Slavonians* have for double letters, in line 25 *thar* as *stanch* for *Sp*. in line 26 for *Gh*. 27 *Ch*. or *Sch*. 28 *Th*. This is all I can inform the courteous Reader of them.

The Croatick & Dalmatian Letters.

Q. Hath under it the *Croatick* and *Dalmatia* characters, them of *Croatia*, or *Croatian* people, are all those that inhabit the Inland or middle parts of the great Country of *Illyricum*, and are mentioned in our modern Histories by the name of the *Crabats*. And *Dalmatia* being also an other Province in *Slavonia*, and is of a large extent. these are said to use a contrary character to them of *Slavonia*, which are set down in the column, in the alphabet order of a b c d e f &c. but how pronounced it is left to others to inform. They use only three double letters, as their *T* also for *Th*. And their *X* for *Sh*. &c. their *Q* for *Ch*. as is shewed in the three last lines in the Column above said, to which I refer the Reader.

Thus much for such as writ from the left hand to the right. Now for such characters as are written by the left handed men from the right to the left hand;

The Israelites Letters.

Z. In this column is presented to your view two sorts of characters used by the *Israelites* and *Jews* of old: The first being the most ancient; The other was used by the *Jews* at the tyme of the *Babylonish* Captivity, or thereabout. The were thus of old pronounced.

1 Aleph	5 He.
2 Beth	6 Vau. Vuaff.
3 Ghimel. Gomel.	7 Zain. Zoy.
4 Daleth. Dolath.	* 8 Cheth. Hheth. Heth.

9 Teth.	17 Pe. ffa. Phe.
10 Iod. Ioch.	18 Yfadc. Zfadc. Tfadai.
11 Caph. Kaph.	Zadai. and Sade
12 Lamed. Lamech.	19 Coph. Koff. Quoph.
13 Mem. Mym.	20 Res. Reth.
14 Nun.	21 Shin. Syn. Zin.
15 Samech. Zamicar.	22 Tau. Chaf. Thau.
16 Ain. Oin. He. Aghin.	

To which second alphabet, they used five litteral vowels, which are set down in the foot of the column, and express the vowels a e i o and uo.

There are also other sorts of characters anciently used by the *Israelites*, and the *Judaians* or *Jews*; as two invented and used by King *Solomon*: A third by *Esdra*s, or *Iesus* the son of *Syrach*, which is the common *Hebrew* letters (or very nigh them) which we now use. Besides the *Celestial* Characters (as they called them, because delivered by an *Angel*) used by them before, and in the tyme of the Law. All which I could set down, but I forbore them, as but little to our purpose.

The Samaritan Letters.

V. The alphabet of *Samaria* is set down in this column they were a mixt people brought into that country, after the leading away Captive the Kings of *Israel*: as it is mentioned 2 *king* 17 23 24 &c. These were contrary to the *Jews*, they having no commerce one with the other; they had also a different character from the *Hebrews* yet were called by the *Hebrew* Names, as Aleph, Beth Gemal Daleth He &c. being 22 in number, and read to the left hand, with pricks or marks over and under the letters for vowels. They had also an other kind of Alphabet, which I suppose they might bring with them out of *Assur*, *Babilon*, *Cuthah*, *Ara*, *Hamath*, or *Sephervaim*, places from whence they came to inhabit the Country of *Samaria*.

The Chaldean Letters.

W. In this column are the two alphabets used by the *Chaldeans*, a people that inhabit a part of *Asia*. *Chaldea* being anciently called *Chasaim*, from *Chesed* fourth son of *Nachor* the Brother of *Abraham*. It was afterwards called *Babilonia*, from *Babylon*, the chief City of it. It hath in it the Countreys of *Assyria* and *Mesopotamia*. Their Language and Letters were different from the *Hebrews* in their primitive purity, that the generallity of the *Jews* did not understand it, till Sanctified by the Holy Ghost, some Chapters of *Daniels* Prophecy was written in it: They used two forms of Letters, the first while they were conversant with the *Medes* and *Persians*, the other now in use by all those that Learn and Study that Language in its Antiquity, though now they use the *Hebrew* Alphabet with some small difference therein at this day. They name their Letters of old and now, thus

1. Olaph.	5. He.
2. Beth.	6. Vau.
3. Gomal.	7. Zain.
4. Dolath.	8. Hheth.
	9. Teth.

9. Teth.	16. Sanchath.
10. Jtd.	17. Ain.
11. Coph.	18. Phe.
12. Lomad.	19. Zzode.
13. Lomad.	20. Quoph.
14. Mim.	21. Ris.
15. Nun.	22. Scin.
	23. Thau.

They used also another Alphabet, which they read after the manner of the Greek, and to the right hand, like that of the *Maronites*, mentioned in the Column L.

The Syriack Letters.

X. Under this Letter is the *Syriack* or *Syria* Characters, whose Original was the *Chaldee* both in Language and Letters; but afterwards when the *Jews* in their Captivity came to live amongst them, out of the long Commerce they had with them, both Nations lost their proper Language, and fell upon a third, made out of both which was called the *Syriack*. Anciently in the Scripture this Country was called *Aram*, and the people *Aramites*. The first row downwards in this Column is their Character Letters, as they are modernly used, the other Letters after them being more antiently used of those people, being threefold, or of three sorts of Characters: They are named thus, with the number fixed to each Letter, as it is a number in Arithmetick; and also how each Letter answereth to the sound of our English Alphabet.

Olaph a e i o u 1	Lomad l 30.
Beth. b or v consonant 2	Mim m 40.
Gomal. g 3.	Nun n 50.
Dolath d 4.	Semchath s 60.
He h 5.	Ae a e i o u 70.
Vau u w 6.	Phe ph 80.
Zain z ds 7.	Zzode zz or ts 90.
Cheth ch 8.	Quoph q and k 100.
Teth t 9.	Risch r 200.
Jud j consonant 10.	Schin sh sch 300.
Coph c or k 20.	Thau th 400.

They have no Vowels, but have them expressed two ways, first by certain pricks, the other by marks or characters placed over or under the foregoing Letter, as the bottom lines of the Column sheweth. Line 23 the Vowel a. 24 c. 25 i. 26 o. 27 u.

The Indian Letters.

Y. in this Column, and the next adjoining to it, are the *Indian* Characters, the first used by them of *India* within *Ganges*, and the other *India* without *Ganges*, so named as being situated on the other side, or else on this side of *Ganges*. This Countrey is conceived to be the largest of any of one name in the World, except *China* and *Tartaria*: It hath five sorts of People inhabiting it, viz. the Original Natives, the *Moors*, or *Arabs*, *Jews* scattered and dispersed into all parts of it, and *Portuguese*, who have many Colonies and Factories in the Ports and Islands. But notwithstanding, considering that the natural *Indians* are by far the greater

number, we must have relation only to their Characters, which are thus nominated.

Alepha	Zain	Memin	Cophu
Bethu	Hethu	Nun	Refu
Gamelie	Tethu	Sachmucheth	Sahnun
Denleztine	Jodo	E	Thauvuo
He	Caphu	Pfe	
Vuauf	Lamedu	Zacde	

which may be judged they learned from the *Jews*, because they follow the Order of that Alphabet, though they may pronounce them in their own Dialect.

But for the *Indians* more remote, and without the River *Ganges*, which lying on the further side of *Ganges*, not so well known to the *Jews*, they have a Character of their own, whose Alphabet consists of forty and seven Letters, whose Order and names are these following.

a	dah	he	la	thu	efu
le	le	thu	me	me	re
phu	zthu	the	du	mum	fu
beth	he	thu	do	e	fach
beth	virta	io	nun	pfe	num
ga	muf	du	fach	zah	tha
me	za	ka	mum	de	vuuu
lie	ju	phu	the	co	

The Sarfinians Letters.

Z. Within the Verge of this Column, is the *Sarfinians* Alphabetical Characters, by which in Writing, they express their minds one to another; a people which though they have their Letters named Alphabet like with the *Romans*, as a, b, c, d, &c. yet they read and writ to the left hand, as all the Eastern people do, and name them according to the Etymology of their own Language, as thus

Alemoxi or Alomon.	Nabelot.	Nabeloti
Bendi.	Oithi.	
Cati.	Cathi.	Perfeth. Porzeth
Delphin		Quittoath. Quitolath
Efothi.	Epdoti	Rati. Ratich.
Foithi.	Foiti	Salary
Gaipoi		Tothin. Tothimus
Hetivi.	Hethim	Vzototh. Vathlith
Iolithi.		Xircon. Xiroam
Karthi.	Kithi	Yronothi. Yaronith
Lechimi.	Lechim	Zozim. Zocium
Melatil		

The Arminian Letters.

AA. The people of *Arminia*, a Country divided into two parts, called *Armenia Major* and *Armenia Minor*; the greater and lesser Countreys of *Armenia*; the greater borders on the lesser; and was so called to distinguish them asunder, but it is now called *Turcomania*, as being the first seat in which the *Turcomans*, or *Turks* did fix themselves, after their eruption out of *Seythia*, and from hence made their first Expedition for the Conquest of *Persia*. The lesser is separated from it by the River *Euphrates*, and is situated in the great Country of *Anatolia*, or *Asia* the less; they have two sorts of Characters,

acters, one is said to be invented by *St. Chrysostom*, which is still in use amongst them; the other I suppose more Ancient; however in the two different Characters they had two different ways of reading, for the first downright Row, which runs after the order of the Hebrew, as Aleph, Beth, Gimel, Daleth, &c. they both writ and read to the left hand; and the second row downwards, they writ and read to the right hand; but how they nominate either, whether after the Greek or Hebrew, or how else, I am not yet thoroughly informed.

The Arabick Letters.

AB. Under this Column is the *Arabian* Characters, a Country of a vast Circuit, inasmuch that it is subdivided into three parts, as *Arabia Deserta*, *Arabia Petrea*, and *Arabia Felix*, the two first so named from the vast Deserts and Wildernesses, and Rock and Stonyness of the Soil in them: These were the places in which the *Israelites* wandered so long, little of them beautified with Grass, or adorned with Trees, except the Palm, nor furnished with Water but by Rain or Miracle; but the latter more pleasant and fruitful, not behind any Country in those parts of *Asia*, rich in Corn and plenty in Cattel, &c. Their Language and Letters are *Arabick*, so called from its Country, and not spoken and written here only, but in all places where *Mohometanism* hath got any footing, the *Alcoran* and the publick Offices and Prayers of their Religion being writ in it; nay it is made the natural Language of *Syria*, *Palestine*, *Mesopotamia*, *Arabia*, *Egypt*, and all *Barbary* except *Morocco*. They use 22 Letters, which run Alphabetically like the Hebrew.

3. **H**AVING now done with Letters and Learning, we shall now proceed to the Operations and works of it, for there is no Faculty but they must (in some measure) more or less be cadued with it, else they are but Novices in their pretended Arts.

Now next to Divinity, there is none more required to be Scholars than *Physicians*, *Chyrurgians* and *Apothecaries*; for as the Minister studyes for the good of Souls, so these ought to be knowing for the good of Bodies: I shall therefore in the next place give you the form and use of such Instruments as are used by such Sciences, and who doth bear such for their Coat Armour.

Chirurgions Instruments.

VII. He beareth Sable, a *Physicians Bath*, Or; the *Pan* Argent. This is nothing else but a Close-stool made with a Back and sides like a Chair, under which is placed a Pan or Stool pan, with a long Pipe at it, whose use is for such as are Blooded in their Fundaments to sit on, with their Posterior parts bare, to which their cometh a hot Steam from the heat of the Water put into the Pan, that it causeth Blood to proceed from

the Orifice made either by Leeches, or a sharp Instrument: Now as the Water in the Pan cools, it is drawn out at the short Pipe, and hotter put in again by the long Pipe with a Filling Dish as the Figure sheweth.

VIII. He beareth Gules, a *Chyrurgions Scarificator*, Or.

IX. He beareth Sable, a *Drawing Goose-Bill*, and a *Dilator*, Argent. These are two useful Instruments for Chyrurgions, of which in particular.

First for the *Drawing Goose-Bill Instrument*, called in Latine *Rostrum Extrahens*, the Drawing Bill; it is for the drawing out of Bullets shot into any part of Mans Body that is gross and fleshy.

Secondly, the *Dilator*, is an Instrument to open or stretch out a thing to its breadth.

X. He beareth Azure, a *Catheter* and a *Cerebellum*, Argent. These are Instruments of Chyrurgery, of which *Ambroise Parry* in his rules of Surgery gives this description.

The *Catheter*, of some termed a *Cataput*, and *Cataputia*; it is an Instrument long, narrow, and round, save on one side a little hollow, spoon like, it is to search a deep wound, and also by the help of its hollow, to pour or squirt in liquid Oynments and Salves to the farthest part of a Wound.

The *Cerebellum*, which in English may be termed the *Chyrurgions little Piercer*; it being an Instrument to take up broken or bruised Skulls.

In the Dexter Base is a *Bed-Pan*, it is used about Sick, Weak, and Infirm people, that cannot rise out of their Beds to ease Nature, out of which it may be cast forth without any trouble; and taken therefrom by means of an Handle screwed to it which is hollow.

B. 3 such, handles rected O. born by *Pan*.

XI. He beareth Gules, a *Speculum Oris*, with a *Screw*, Argent. This kind of *Speculum Oris* (for there are several sorts and forms, every Chyrurgion pleasing himself with what he best liketh) is by *A. Parry* much approved of before others, either with or without Screws: It is an Instrument to thrust between the Teeth of such as are in a Swoon, or have their Teeth set so close, by reason of some distemper upon them, that they cannot be opened. It is also termed a *Spathomela*, and a *Speculum Latum*, which is an Instrument for the opening or extending of parts that are closed, that the Surgeon may apply remedies. See chap. 11. numb. 26.

XII. The Field is Sable, a *Table covered* with a white Cloth, whereon is set variety of things belonging to Physick and Surgery, all proper. This belongs to the name of *Surgeon*.

The like Table with 3 Bottles upon it proper, in a Field Gules, is born by the name of *Boteller*.

This

This for brevity sake is termed a **Surgeons Table**, or a Table furnished with **Apothecaries Drugs**.

XIII. He beareth Argent, a **Close Stool**, Sable. Of some termed a **Physical Stool**, or a **Doctors Close Stool**: It is used in Purging of Sick and Infirm Bodies.

XIV. Here in this division is presented to your view in the Fess part, an Instrument used by Midwives and Chyrurgion, that follow the Occupation of Midwifery. It is termed a **Giffons Foot** in *English*, but according to the terms of Art, Blazoned **Pedes Gypsi**. It is to draw out false Conceptions out of the Wombs of Women. See *numb. 15*.

The other two in the chief, belong to the **Perawick makers**. First the **Curling Pipe**, is that in the dexter chief, which is only a rowl of Tobacco Pipe Clay burnt hard, or a turned piece of Wood, for Want broken Tobacco Pipes stand in the like stead, which are for no other use, than turning the hair of a Perawick upon, while it is either Boyling or Baking, to put it into a Curl.

The other is a **Curling Stick**, which is only a handfom Turned Stick Taperwise, about which the hair is set in its orderly Curls, when it is finished up.

That in the Sinister Base, is termed a **Perawick Chimble**, which is no other than an Iron Hoop to put on the Finger, having a piece of Iron coming out from it, with the which Iron striking between the Threads of the Waft, the Hair is woven close and strongly together.

The other two long Instruments lying in the Base, the uppermost with an handle, is termed a **Fontanel**, or a small **Pipe Fontanell**.

That under is an **Iron to Burn a Fontanel**; it is made to go through the hole of the abovefaid Pipe. Some Surgeons have it made streight, not thus bending, with a Screw in the end to put into a handle.

XV. He beareth Gules, a **Pedes Gypsi** with two Hooks Argent. This is another sort of the Instrument called a **Giffons Foot**, of some termed a **Just**; of this and that before mentioned *numb. 14*. there is of them made, which have 2, 3, and 4 hooks. It is much used in such desperate cases, to pull dead Infants out of the

Womb, when there is neither strength or power to deliver them.

The two Instruments in chief and base, are termed an **Ozaena** and its **Stile**, these are to burn infected places. That in base is the **Ozaena**, which is an hollow Iron with a Screw on the side to put a handle on; it is named so from the Disease it helpeth to cure by Burning, which is a stinking Disease in the Nose.

The other is the **Stile**, which is a round Iron to be set in an handle, to be made hot and so thrust into the Ozaena.

XVI. He beareth Argent, a **Doctors Tub**, (otherwise called a **Cleansing Tub**.) Sable, Hooped, Or. In this Pockified and such Diseased Persons, are for a certain time put into, to Stew, not to Boyl up to an height, but to Par-boyl; from which Diseases of *Morbis Gallicus*, *Noli me tangere*, *Miserere mei*, &c. and from such a **Purgatory**, *Libera nos Domine*; let it be the Prayers of all good people to be delivered from such a **Powdering Tub**.

The **Inlessus** is a Bath wherein the Patient lies up to the Navel, which is proper only for Diseases in the Belly and lower parts; and is for easing of pain, softning of parts, dispelling flatulent matters, and frequently for exciting of Womens Courses: It is also termed a **Semicupium** and **Dissessus**.

The **Lotio**, is a particular Bath, wherein the Head, Arm-pits, Hands, Feet, and natural parts are washed, and that with Physical Decoctions.

The **Laconicum**, **Caldarium**, and **Alia**, or **Balneum Creum**, was formerly a Cellar without any Water, made to provoke Sweat, which was done by an hot Vapour, or a dry Heat included therein. A **Stove** or **Hot House**. **Balaneum**.

The **Psammismus**, is a Bath of dry and warm Sand, wherewith the Feet of Men in a Dropsie are dried.

Therma, are natural Baths, either hot or cold.

Vaporarium, is a kind of Sweating or Bathing, when the Patient doth not sit in Liquor, but receives Vapours through an hole, under which there is placed a Pot full of apposite and boyling hot Ingredients, which growing cold, hot matter is added, to continue the heat.

T O

The Worshipful

Sir THOMAS POWELL of HORSLEY, Baronet;

And to

FRANCIS POWELL of BIRKENHEAD, Esq; his Grand-Child, Son and Heir of Thomas Powel, Esq; late Deceased.

SIR,

IN a Subject so multiform as this, where so many Varieties are aimed to be treated off, no wonder if in some the Author hath not hit the Mark; But wheresoever there is Appearance of Omissions, let him beseech you to pass it over in Silence, and impute it to want of Information, more then want of Will, which he doth most Humbly Dedicate to your Serious Thoughts, accounting himself,

Your endebedted Servant,

Randle Holme.

C H A P. XI.

I. HE beareth Gules, a Still Argent, fired upon it's Bottom, Sable, by the name of Still.

The like to this is the Crest of *Wilmington* in *Cheshire*.

This is termed the Common, or only Still for the drawing of Waters from Flowers, Leaves, and Herbs, by heat of Fire.

II. He beareth Argent, a Strong-water Still, with its Tub, and Receiver, all proper; by the knowledge of this in a Sign, you may easily smell out a Strong-water-man, or his Shop.

The Refrigeratorium, is the wooden vessel full of water, with a Streight or Spiral pipe in it of tyn or lead, which the distilled water is to flow through to keep it cool.

O T

The Reberberium, or a Reberberatory; Is a

*

Chymical Furnace, or Oven, wherein bodies that are to be burned, or distilled; are first Calcined.

In the dexter chief of this Square, is another form of a Still, of Distillatory Intermittent, having a Spire, or Spire like Head, fixed on its Bottom, contrary to that in *Num. I.* which may thus be distinguished, the first with a round Head and Receiver; this with a Spire. G. 3 fuch. A. is born by the name of Still.

III. He beareth Azure, a Limbeck Argent, by the name of Limbeck.

This is an other sort of Strong-water Still, by which the Spirituall many Waters are drawn out into waters, being a Still only for small quantities, as the other is for great.

IV. He beareth Sable, the Head of a Distillatory, with 3 pipes; having as many Receivers, or Bottles for to

Donum Tho: Davenport Cuius Cesi: Chirurgi: Adam: Pictorum: 1707 fecit

to them. This is another kind of way of Distilling Waters, by heat of Fire.

V. He beareth Gules (a *Stew*, or *Stove*, or) a *Stew pot covered*. Or. by the name of *Stovore*. This is a Vessel made of either Iron, Brass, or Copper, with high Feet and Rings on the sides, by which it is removed, or carried from place to place; in which a Fire is put, either of Coal or Charcoal, and then covered with a close cover, having some few Air holes on the top: this is a thing by which Rooms are made warm, for Sick and Crazy Bodies, which cannot approach near a Fire.

VI. He beareth Azure, a *Distillatory narrow necked body*, Argent; this is also termed by the Distillers of Waters, and other Chymical preparations, a *narrow necked Infuser*, or a body with a long neck to distill withal: it is generally of Glass. See Chap. 9. Numb. 173. *Distilla* is the mouth or open of any Vessel.

He beareth Vert, a *Urinal* Argent, by the name of *Uriner*; see the Figure, Chap. 4. Numb. 48. It is in shape like the fore said Narrow necked body, having a *Rime* about the hole or mouth of the neck.

O. on a bend G. cotized. S. 3 *Urinals* A. by the name of *Phial*. This is a Glass Vessel fit for two uses; the one Distillation, the other casting of the water of Sick, and Distempered Bodies. Mr. Boswell pag. 131. calls it a *Uial* and *Phial*.

VII. He beareth Gules, an *Head of a Distillatory*, (or the *Head of a Limbeck*) and a *Receiver*, Argent. This bottom Glass, which is called a Receiver, is set at the end of the other Glass head, to receive the Water, or Oyl that is Distilled from the higher Glass; some call it a *Urinal*, and a *Cucurbita*, and a *Uial*, and a *Cupping glass*, having the form and shape of them all. It is sometime taken for the *Cucurbitula*.

The *Dish*, is a vessel that surrounds a thing, its inferior part is made like a *Cupping glass*, upon which an *Alembeck* is put, wherein there is a Channel at the top, which serves to pour liquor in; besides it hath two crooked noses conveniently placed (and two ears which environ both) (they set on the sides) which convey the condensed Humour or liquor from the head of the instrument into the *Cucurbita*.

VIII. He beareth Sable, the *Head of a Distillatory reversed*, Argent, by the name of *Head*. This is the same kind of Glass Instrument for Distilling as the aforesaid, save it is turned upside down, or the Mouth upward.

IX. He beareth Argent, a *Distillers Bladder*, Gules. This is an Instrument, or Vessel rather, made of Potters Earth, or Clay well Lured and Burnt: It is much used for Distilling, and receiving of Liquors proceeding from the Pipes of *Stills*. This is by the Latins termed *Melica*, and by the name *Melica Distillatoria*, is meant any kind of Bladder or Copper vessel, which contains any thing that is to be Distilled.

X. He beareth Sable, a *Stillers Retort*, or a *Re-*

tor Glass, Argent. This is much used for Distillations, being filled with Liquors, and set in Sand with a Fire under, will Distill through its crooked neck, into the Mouth of a *Receiver*, or any other *Bottle* put unto it. This kind of Distillation is by Artists termed, a *Distilling in Balmio*; that is by heat, the Fire not touching the Retort. In Latine it is called *Retorta*, being made of glass, Stone, Iron, or copper; it is of a Round figure, to the side thereof there is fastened a bended, retorted, and hollow beak, or nose; whereby the things that are to be distilled, are put in and out.

XI. He beareth Vert, a *Tunning dish* Or: between two *Funnel dishes*, or *Funels*, Argent. These are the sorts of Funels, as I have seen used, the large one being made of Wood, with an Iron, or Copper Pipe at the bottom; which being put into the Bung, or hole of great Vessels, as Barrels, Hogheads, and Tuns: Having Liquor poured into the Bowl, or Dish, it is conveyed into the Vessel without spilling, or running beside the Vessel.

The *Smaller Funnels*, are made of Tin, or Glass, and are for the same use in filling small Vessels, and Bottles.

XII. He beareth Sable, a *Salt Basket*, or *Salt Purger*, Argent: by the name of *Salter*.

G. 3 such *Salt purgers* in poynt, A. is the coat of Arms for the town of *Midlemitch* in *Cheshire*.

In the Sinister base, is an earthen vessel of most termed a *Jare*, or *Oyle Vessel* with an *Handle*, (or *Bond* to carry by) this is much in use by *Oyle*-men and such as trade in those kind of liquors. A. 3 such B. is born by *Holtzheim* of *Bavaria*.

He beareth Azure, a *Whiter*, or *filter* hanging upon a *Rasse* in cheife, Or: distilling into a *Pottenger*, or *Pipkin* with a *Bound Care*, Argent. Some blazon this an *Hippocresse Bag*, in the Latine *Filicium*, or *Mamica Hippocratis*. This is termed a distillation by Filter, and a *Distilling bag*: which is made of wollen for some kind of Operation, and of Canvas, or Linnen for other sorts: Its wide at the top and open, being kept so by an hoop or girth fast about it, but narrow and close at the bottom ending in a point. By this the mixture of any thick thing is drawn out. S. such a Bag A. is born by *Wien*.

The *Marracum*, is a little Sack, or Bag wherein is steept Tartar, or such like: and is pricked here and there, for the emission of Liquor.

The *Modus*, or *Modulus*, is a Bag of Ingredients (such as the disease requires) put into Beer, Ale, or wine, the mixture whereof the Patient is to drink. This is called a *Diet drink Bag*.

The *Petta*, is a kind of Stuff that certaine Physicians Bags are made off.

There are two sorts of *Pipkins*, that which is for this use, and for the ordering of Sauces by Cooks. The other

other the **Fire Pipkin**, used only to boile things in; it having such a mouth, a short streight handle, and three short feet, with a round flattish bottom. Some call them the one a **Sauce Pan**, and the other a **Fire Pan**.

B. 3 such Pipkins O. born by the name of **Pipkin**.

XIV. He beareth Argent, a **Cold Press** set on 4 feet with its **Spout**, and the **Receiver** under it, all Gules. This is an hand-Press being double Screwed, the **Nuts** thereof being to be turned with the Hands; whereas the following Press is to be turned about with an Iron Bar. This is to draw liquor out of any kind of moist Ingredient, by pressing it onely.

XV. He beareth Azure, an **Oyle Press**, with its **Spout**, and **Receiver**, Or. This is a Press that goeth with one Screw, and is for the drawing of Oyles by pressure, out of any sort of Ingredient through heat, or by the means of hot Plates.

XVI. He beareth Gules, a **Distillers Pellicanus**, or **Pelliscane**, Argent. By the name of **Pelleyard** This is a Glas vessel which serveth the Distiller for no other use than Circulating of the Quintessence of Things. There are but these ways of drawing and distilling of Liquors, viz: by Vessels, by Presses, and by Stills, which are of most use; what other things are employed about Distillings, are for the same purpose, and uses, as these aforesaid are. This is of some termed a **Circulatorium**, from the ascending and descending of the Liquor about it, as if it were in a circle.

The **Diploe**, or **Diploma**, is a kind of double vessel used by Chymists.

The terms of drawing forth of Oyls & Waters

By **Expression**, that is by pressing the Ingredients from whence a Liquor is drawn in Presses

By **Impression**, by drawing it out through heat, in pressing it between hot Plates.

By **Distillation**, or **Solution**, is an extracting of Liquors by force of heat.

By **Ascension**, is to raise the Vapours on high by the force of qualified heats.

By **Descension**, is to cause the Vapours to fall downwards.

By **Infusion**, is the extracting of the Quintessence, or Virtue of Flowers, and Herbs, and draw them into a water or wine.

By **Filtration**, is to Separate the Cleare from Grois and muddy water.

By **Purgation**, or **Deliquium**, is a purging or draining by fire, or a melting of Calx into Lixivious Humour.

Which Operations are performed by a **Retort**, the **Balneo Mariæ**, **Sand**, **Vapours**, **Dung**, **Sun**, or a **Reverberatory**.

XVII. He beareth Gules, a **Wine Press**, Or. This is one of the sorts, or maner of Presses, by which the Liquor, or Blood of the Grape is Squeezed out; and that is

by Trading. Such Presses are mentioned by *Job* and *Nehemia*; and the People blamed, because they Trod in them on the Sabbath day. *neh. 13 15. job. 24 11.* for which they had a curse of thirst, as a punishment layd upon them. A. the like G. is born by *Anhalt*.

XVIII. He beareth Azure, on a Mount in base, a **Wine Press** fixed upon five **Standards**, or **Beaters**, Or; with a **Rowling Stone** therein, Gules: the **Liquor Distilling** into **Cisterns**, or **Receivers**, of the Second. This is termed also, the **Mill-Press**, the **Grape-Mill**, or **Rowling Wine press**, because the liquor of the Grape, Apples, or Peares, are Squeezed out by means of a weighty Stone rowled over them. This is in blazon called a **Cyber** or **Perry mill**, a **Marges** or **Crab mill**.

There is an other kind of Mill which I have seen, for the crushing of all sorts of Fruit, to get out the juice: it is made after the maner of a **Tanners mill**, having a great round Stone (like a Mil-stone) turning round, in a wooden Trough: having Spouts in the sides, out off which the liquor runs into vessels set to receive it.

He beareth Sable, a **Quart** Argent. By the name of *Littlegood*. This is a vessel by which all liquid things are measured, which according to it Size, hath a several denomination: the least is an **Half Gill**, for

2 Half Gills makes a **Gill**, or **Quadrant**.

2 Gills makes an **Half Pint**.

2 Half Pints makes a **Pint**.

2 Pints makes a **Quart**.

2 Quarts makes a **Pottle**.

2 Pottles makes a **Gallon**.

By these measures, Wine, Water, Ale, and Beer, are measured; yet with this difference, that the Barrell of Beer is 36 gallons, all other Liquors, but 32 gallons.

B. 3 Quarts A. is born by *Hernack*. The same with their Lids or Covers open. is born by *Seater*

XX. He beareth in cheif a **Levitor** with an **Handle**, and in base a **Collella**, or **Puller**. These are two Chirurgical Instruments and of great use.

The **Levitor**, it is used to take up depressed Skulls, or to raise the Skull impressed. Imitating Coopers, who are wont to reduce the boards of their wine vessels that are crushed in, with the like Instrument: It is called in Latine **Elevator**, or **Elevatorium**.

The **Collella**, or **Puller**, or **Tweezers**, it is an Instrument for manual operation; it hath double teeth at the end of it, by which they take forth a pece of a bone which is corrupt and moveable; also Darts, Bullets, and the fragments of them: and all tents and hairs, with all other extraneous things of that kind, which are found in wounds: are by the toothed part of this Instrument taken forth. By this also women pull out hairs by the roots in their eye-brows, and from other parts of the body, if superfluous. The broader end of this will serve to spread Plasters on linnen cloth, or leather, for want of a **Spatula**. see numb 28 & chap 12, numb 10. It is also written **Collella**, which is the Chyrurgions Little Tongs, and are made of different shapes according to the diversity of their use.

XXI. He

XXI. He beareth Gules, a **Dismembering Knife**, and an **Incision Knife**, the Points Counterposed, Argent; **Hasts Or.** Born by the name of *Blood*.

The **Dismembering Knife**, is a crooked Blade, especially towards the point; it is to cut the flesh so far as the bone when a part is to be Sawed off: and is necessary before the amputation of the Leg or Arm. Some Chyrurgions have the blade of this kind of Knife almost of a Semicircle form, or **Sickle** like.

The **Scolopoma-chæriton**, is a Chyrurgions knife with which wounds in the Thorax are widened; tis also used in the opening of larg Swellings; as also the opening of the Abdomen.

The **Incision Knife**, the Latin name it **Scalpellum**, it is a small Pen knife with a bending point, and some are streight pointed, slender, and narrow bladed, from whence they are termed **Woodcocks bill knives**. With these Incision knives wounds are opened, and such as are too narrow are dilated. And also great Impostumations are cut, and Lanced.

The **Syringomata** are Chyrurgions knives which they open Fistula's withall.

The **Scalpellum Umbilicarium**, is the Navell-knife, where with Midwives do cut the Navell strings of new born children.

The third sort of knife is termed the **Myrtle Leaf pointed knife**, these are double knives, sharp on both sides, which at the end resemble the fashion of a Myrtle leaf, it is used to cut off Wens, and Womens breasts as are Cancerated. see chap. 12 numb. 25.

B. 3 such in pale A. hats O. born by *Elbing*.

The **Amphismela**, is a kind of an Anatomical knife, or Instrument; usefull in the Dissection of Bodyes.

The **Provacula**, is a Chyrurgions knife, the shape thereof differs according to the difference of the Operation, and therefore can hardly be described.

XXII. In this quarter are two other Instruments that belong to a Chyrurgion, The first is the **Dismembering Chisell**, which is used to cut of Toes and fingers, and also the tops of the Arm, and of the Radius.

The second is the **Probe**, the Latine from its office term it **Uulnerum Exploratorium**, which is a long slender Instrument round, with a kind of knob, or button at one end, and eye like to a Needle at the other. Yet in stead of an eye, some have a round flat end (a little turning) after the manner of a **Spatula**. Some make them bending at both ends, others have them streight all along. It is for that end generally made of Silver, that it may be bended upon necessary occasions, the round end is used to search out the state of wounds, and Fistula's, and also with Lint rowled about the end, to cleanse wounds from matter and corruption drawn out by Plasters. The broad end is called, the **Probe towards you**, and is used to apply powder, and plagers annointed with ointments, to wounds. see chap. 12 numb. 12.

XXIII. He beareth Sable, a **Dismembering Saw** Argent, **Handle, Or.** born by *Nimicane*. also by *Sable*.

This is in forme and fashion like the loyners **Tenant Saw**, onely this hath the handle and the back all made of Iron worke: with this bones are Sawed asunder, when either a Leg, or Arme is to be taken off. By the benefite of a Screw, the Saw plate is made either strait, or more loose, in the iron frame.

B. the like A. is born by *Membraine*.

In the dexter chief is the **Barbers Chaffer**, (or as in our refined speech some call it a **Chaffern**, and a **Cal daster**, from the latine *Calda ferens*) wherein is carried hot water, for the trimming and shaving of such as desire to go according to the mode. And such is born by the name of *Grimold*. viz. S. the **Chaffer A**.

XXIV. He beareth Sable, a Chyrurgions **Forceps**, Argent. by the name of *Forces*. these born in Arms are ever extended. having the points erected, or dejected, which is to be mentioned. This is an Instrument like to **Cizers**, save the cutting part is flat, and fall one to another, the backs being round; or to say more properly a paire of **Pincers**, which are used by the Thumb, and Fore or middle Finger, to take off a plaster; or used for severall other operations. They are of severall shaps and sizes as long, crooked, with teeth, with beaks, in fashion of an half moon, which according to their different shaps have different names.

XXV. In this Square you are presented with two sorts of **Spatula's**. The first hath only the simple name of a **Spatula**, whose use is to mix and temper Salves of several sorts upon the ball of the hand, to prepare the same for **Cents** to put in deep, and **Lints** (which are termed **Diagets**) to lay upon ebb wounds. As also to spread plasters either on cloth or leather. Some term them a **Spatula**, or **Splatter**. see numb. 45.

The Second is the **Spatula Linguae**, or a Tongue **Spatula**; it is principally used to hold down the tongue, when the mouth is to be looked into, in case of forces, or other distempers arising from upward causes. See an other kind of them in *numb. 44*.

S. a fesse betw: 3 such A. is born by *Spatulace*.

XXVI. He beareth Gules, a **Speculum Oris** in fesse between a **Great** or **Strong Levitor**, and a **Uvula Spoon**, Argent. but of them in particulare.

The **Speculum Oris**, is an Instrument for the opening of the mouth when the teeth are so strongly set together, that noe ordinary means will open them, see *chap. 11*. For distinction sake this may be termed the **Printer-like Speculum Oris**. There is also another kind of them in this new Square, *numb. 46*.

The **Great or Strong Levitor**, It is an Instrument by which depressed Skulls are raised, and in both its office with more force than the **Uvula Spoon**. see *chap. 12. numb. 3*. Because it hath not only the firmness of it in the hand of him that raisech it, but also in the head of the Patient.

The **Uvula Spoon**, is an Instrument made of Laine or Silver, and is applied to the Uvula that is fallen; being

ing a small Spoon, whose handle is hollow, and about 8 or 9 inches long, and is joyned to the lower part of the Spoon; this Spoon being filled with Pouders that are drying and digesting, and put under the Uvula relaxed, the Surgeon takes the lower end of the Pipe in his mouth, and by blowing, scatters the powder all about upon the Uvula, and the Palate.

XXVII. He beareth Sable, a *Spatulum Oris* with a *Screw*, Argent. This is another kind of Instrument to open the mouth wide with a Screw, when the Teeth are fastned and joined forcibly together, yet by the help hereof they are drawn asunder, that Meat or other Remedies may be applyed to Sick persons that they perish not. This is an Instrument highly commended by *Amb. Parey*, and others, for that use.

XXVIII. He beareth in this quarter two necessary Instruments used by Doctors and Chirurgions. The first is termed a *Syringe*, or *Clyster Syringe*; a *Mouth* or *Ear Syringe*; so called, because used chiefly about those parts: It is made of Pewter or Silver, and serveth to draw out any Liquid matter, or to squirt in any thing to the Organs of Hearing, or to the Larinx in the Throat, to cleanse and heal Swellings and Ulcers in those parts: It hath several names, as *Symphon*, *Syringa*, and *Enterenchyta*. Sometimes the streight Pipe is taken off, and a *Crooked Pipe* screwed in its place, which is used in some cases when the streight Pipe is not convenient to draw forth, or cast in any Liquor. See *chap. 12. numb. 33.*

V.a Cheveron betw. 3 such erected A. born by *Gaucer*.

The *Enchyta*, is an Instrument wherewith Liquids are infilled into the Eyes, Nostrils or Ears, called also *Entenchyta* and *Degin*.

The *Rhinenchytes*, is a little Syringe to inject Medicines into the Nostrils.

The second Instrument is called a *Twitcher*, or *Twitchers*; by them Hair superfluously growing in any part is pulled up by the Roots, especially on the Eye-Brows, Eye-Lids, and the Nose; the other end serveth for a small *Spatula*; see *numb. 20.*

XXIX. These Instruments are called *Draughts*, or *Pincers* for the Teeth; with them are drawn all sorts of Teeth, whether Dog, or Gum Teeth; but more particularly. The first is termed *Draughts* for the Teeth, or *Teeth Pincers*, which hold a Tooth fast between them, and by a sudden Wrench or Twitch, takes the Root and all together away with it. Some term this the *Pacis* or *Foxer*, or *Odontagga*.

The next as lyeth under it, is termed a *Forcer*, or a *Toothed Pincer*, whose use is to pull out Teeth, which neither the *Pellican* or *Common Draughts* can draw forth. See another *chap. 9. numb. 179.*

The third is termed a *Tooth Levitor*; some have them with three Teeth, but most use them of two Teeth; with the help of this Instrument, the roots and pieces of Rotten Teeth are prised out of the Gums

*

Some give these kind of Instruments the name of *Punchers* or *Forcers*; see *chap. 12. numb. 23.*

A. 3 such in Fels S. over all a Bar Gemell of the second, is born by the name of *Calverin*, of the *Nether Rhine*.

XXX. Here are two sorts of *Flegmes*, which some term *Fleams*, or *Tooth Rippers* and *Tooth Pickers*; with these the Gums are separated from the Teeth, that they may be pulled out with less danger and trouble. They are made after several fashions, and called by the Learned *Phlebotomus*, or *Phebotomus*, which is also a Blood Letter.

Argent a Cheveron between 3 such Fleams Sable, is a part of the Barber Chirurgians Coat of Arms.

B. one in Bend A. born by *Bayrn Van Caldif*, of *Thoreile*.

G. 3 such A. born by *Van Galen*. Also O. and them G. by the same name.

O. 3 such S. is born by *Schelen*.

XXXI. In this Square is a Pair of *Dismembering pincers*, between two *Flegmes*. For the first, which is the *Dismembering Rippers*, as some term them, are things like *Pincers* with sharp edges at the closing place; they are used for Amputation chiefly, and are appointed to the cutting off of the Fingers and Toes, as greater Instruments are used for the dismembering of the Armes, and Leggs.

In the chief and base, is set down two other forms of *Flegmes* for the riping of the Gums: the first having a flat edge at the contrary end, to cleanse the teeth from Scales. And the other, hath a sharp point to pick the teeth. Some draw the *Flegmes* with a plaine Shank with out any work upon it; and so do the *French & Germans*.

And as these *Flegmes* are the vulgar, or common way of making them; yet some have a sharp pointed hooke at one end, and flat at the other, for the scraping and cleansing of teeth from scales, and other hard substances which useth to fix themselves to the teeth. And others make the *Phlegmes* crooked at both ends. Others one end crooked, and hook like; and the other flat, yet ending in a sharp point, after the form of a leaf: and are termed *Gravers*, or *Flegmes* with *Gravers*, which are for the same use as the flat end *Flegmes*. The crooked end being made sharp doth serve not only for tooth drawing, but also to Launch and cut the Gums, to let them blood, or to cut oftentimes the superfluous flesh away, which over groweth the teeth. From whence many call them *Launcets*, or *Teeth Lancets*.

The *Cyclisti*, are Chyrurgions Instruments wherewith they scrape away corrupt flesh, or the like; they are made in the form of an half moon. See *numb. 33.*

XXXII. He beareth Sable, an *Eare picker*, or an *Eare pick*, Argent. By the name of *Yarnicke*. The use of this Instrument is to cleanse the eares from waxe, which often causeth a Deafness in the party: the other end is used to cleanse the teeth. See *numb. 46.*

S. 3 such A. is born by *Gangray*.

H h h 2

B.

B. 3 in fesse O. is born by *Gibbert*.

XXXIII He beareth a **Cerebellum**, betw. a **Scraping Spatula**, and a **Levator**. But of these severally.

The **Cerebellum**, or **Cerebellum** with a **Screw**, is an hollow pipe, with a square shouldering and two handles like to the **forceps**, through which Pipe goeth a long **Piercer**, with a most sharp **Worm**, or **Screw** at the end, which being conveyed into a wound made by a Gun-shot by the help of the Pipe in which it is hidden, when the Bullet is felt in the wounds, then the Piercer is Screwed out of the Pipe into the Bullet, by which means it is drawn out, and the wound healed.

The **Scraping Spatula**, so termed because the one end is made with a **Scraping hook** to cleanse wounds, and take of Splinters from Bones: and the other end having the forme of a **Spatula**, it is used for the spreading of **Plasters**, and taking out of **Unguent**s, to mix and temper them, and to put them on **Lint**. a **Cyclist**, see *numb. 31*.

The **Levator**, or **Levatorie**, some write it **Leviter**, it is an Instrument by which a depressed or bruised Skull is elevated or raised up. There are several forms of this Instrument, as *numb. 26 29 & chap. 12 numb. 3 23*. The lesser sorts are termed **Levers**.

O. the like in bend B. is born by *Goffe*.

G. 3 such A. is born by *Leviter*, or *Levator*.

XXXIV. There are two sorts of **Trepans**, or **Head Saws**, the one is the **Male Trepan**, the other the **Female**, now all the difference in them, is that one hath a **Pin** in the middle, the other hath not. They are fixed either in a **Brace** made of Iron fit for its use; or else in an **Handle**, or thing to turn it by after the manner of an **Auger**, or **Carpenters Dger**. So that this Trepan being thus furnished for use, is termed a **Trepan fitted in its Brace**: whose operation is to cut away a part of the Skull that is broken or bruised down into the head, but it is seldome used, and the less the better, seeing other Instruments will perform it work with less danger, when there are fractures in the Cranium.

A. a Trepan in a Brace B. is born by *Trepan*.

O. on a bend B. 3 Female Trepans A. by *Van Haken* a Dutch family

The Instrument under the Trepan is called a **Lancet**, it is a sharp pointed and slender blade made of **Razor mettle**, and sharp in both edges; fixt in a **Cortoise case**, or such like, to preserve it point, and keep it cleane. Its use is to make an **Orifice** in a **Vein** for blood letting: as also to cut the **Vessels**, and open **Impostumations** in the **Skin**, and other incisions more in the **flesh** as need requir-eth. It is in latin *Lanceta*, and *Scalprum Chyrurgicum*.

The **Pyulcus**, is such a kinde of Instrument, where with **Pus**, or other corrupted matter, is evacuated, or let forth from a sore part.

XXXV. This is the other form of the **Male Trepan** set in it **Handle**, or hold no turn it by. Of its use I have said some thing before, it being only to take up

broken and bruised Skulls. see *chap. 12 numb. 4 5*.

Mr. Woodall in his **Surgeons Mate**, called this a **Tre- fine**, a *tribus finibus*, from its three ends, the one performing the office of the **Trepan**, the **Handle** being at one end toothed serves for the **Levator**; and the other smooth, for a **Smooth Levator**. see *cha. 12 numb. 7*.

G. the like A. handle B. is born by *St. Iohne*.

The Instrument called a **Lentell**, or a **Lenticular**, in *English* a **Cleaner**, or **Smother**: this is an other kinde of **Trepan** which is put into the **Handle** aforesaid when it is to be used, in which there is a square hole so made in it, by means whereof the end of the Trepan being wrapt about with **Cotton**, is easily put in, and taken out, as need requireth the change of these round Saws. It is used to cleanse away all small shivers and raspings of bones, proceeding from the operation of excision; as also for the removing of what wilbe offensive to the *Dura Mater*, or hinder the healing of the wound, as those very little small Erosions, Scrapings, dust, or Spills of bones are very apt to do.

XXXVI. He beareth **Azure**, a **Paire of Plain Pellicans**, these being toothed at the ends are made fit by a small boulder to fit it to the tooth, will by the wrench or turnt of a strong and nimble hand (not by pulling) raise and force up out of the Gums, any tooth it can take hold on; and that with much ease to the Patient. see *chap 12 numb 16*. an other kinde of **Pellican**.

XXXVII This is the right or **Streight Pincers** for the **Polipus**, being for no other use, the same is of Steele, and is in the tentative part, or **Mark** that holdeth, made outwardly **convex**, but inwardly **concave**, having an **edge** inwardly bent backwards. So that it can cut nothing but the **Polipus**, which it layeth hold on. see the Crooked one, *chap 12 numb 15*.

In the base of this Square, is that which is called a **Cuping Glass**, by the Chyrurgions term'd **Cientofa**. It is a round Glass, bottle like, but without a neck. It is applied to the body with Scarification, or without it; to draw out the blood, and stantulent matter, or to divert it into other parts. It is also called a **Cucurbita Caca**, or **Cucurbitula**. Some are made of Brass, Tin, or Horn, &c.

XXXVIII This is the **Toothed Crane bill Pin- cers**, by some Chyrurgions the Beakes are made bending, as in these; yet others make them **streight beaked**, the bent being only in the ioynt, or reveting part, directed to an obtuse angle: thereby fit to take any thing that is smal out of wounds, and to draw them forth.

The under Instrument in this quarter is a **Razor** in it **hast**, this is very sharp in the edge, with a broad and thick back, by which means it is fastned in a bone, horn or tortice shell hast, like a **fouling knife**. Its use is well known to most, which is chiefly to shave away haire where and when necessity requireth, which is the Barbers office. But the Surgion useth it very often about his im- ploy, especially when there is no feare of hurting the parts un-

under the place where Incisions and Scarifications are to be made, or such like operations wrought.

XXXIX. Here in this Square, in the dexter corner is set a **Barbers Chasseing dish**, or a **Fire pan**, or **pot**, with a **Turning handle**. This is much used by Barbers in the winter tyme, especially in those Shops that have no fire places: It may by the handle be transported from place to ylace, but generally it is set under a Brass or Copper Bason with a flat and broad bottom, which is called the **-----** on which if their linen clothes be rubbed, or let thereon ly, in a little tyme it will make them hot, or warme for their use.

S. such a Chasseing dish A. is born by *De la Toure*.

B. 3 such O. is born by *Barber*.

The **Furnus**, or **Furnace**, is the Oven or place that a fire is conveniently kept in for Chymicall uses; and it is either open or covered. a **kiln**, or **still hole**.

The other Instrument is a **Razour**, raised out of the **hast**, and **tipped** with Silver; that is, Silver plates engraven are fixed upon each end of the hast, to make the same look more gent and rich: as it is very oft done by yong proud Artists who adorne their Instruments with Silver Shrines: more then setting themselves forth by the glory that attends their Art; or praise obtained by Skill.

XL. This is a **Speculum Ani**, to be opened by the thrusting of the ends together with the hand: of some it is termed a **Speculum Patricis**, which is the same for the effects; for both names declare its use, which is to open the Fundament, or Matrix, as occasion shalbe offered upon any grief, or disease happening therein: neither can the grief in those parts be well seen without it. It is also called a **Dilatorium**, because it dilates or opens such parts. And also **Dioptra**, that through the enlarging of the Matrix a dead *Fetus* may be extracted out of the womb.

The Instrument above it, is called a **Scraping tool**, with an **Handle**. Of these there are diverse sorts, as some are only bent in the end and flat, but sharp in the edge: others three parts round; some round in the bent; some long; others pointed. &c. Whole use is generally for the Scraping away the fissures of the Skull, as smal as hairs, or Scales of rotten and decayed bones. Some of the Learned term them **Raspatorium**, Rasping hookes; or **Scalprum Rasorium**, Pareing Tools, Scraping Instruments. to shave and scrape filthy and scaly bones. Its called also **Epster**. See *numb. 31*.

XLI. This Instrument is termed a **Seton**, or **Seton pincers**, or Pincers to burn a Seton in the neck. see *cha. 12 numb. 8 10*. other forms of them. With these is the skin and flesh in any part of the body taken up, so as an hole (which the Artists term a Seton) may be burned through, and the other parts adioyning shall receive no hurt, or be inflamed. It opens & shuts like the **Forceps**

In the chief of this square, is an other forme of a **Needle**, with a broad and flat point, like to a Willow leaf; which Surgions use in some kinde of operations.

XLII. In this quarter is a **streight Needle**, between a **Catheter**, and a **Syringe pipe**. Of the use of these in peticular, take as followeth.

First the **Needle**, it is long and streight, and called by the Artists a **stitching needle**, because with it, and the **stitching quill**, wide and gaping wounds, or cuts are sowed or drawn together, which they term (Stitching up of a wound) it serves also for the sowing of Rollers of cloth together; for making the readier, and more convenient **Ligatures** in wounds and ulcers, as occasion is.

Celsus informs us that the Ancients used for this operation an Instrument called **Fibula**, or **Sutures**, which was no other then a Needle full of soft untwisted Silk or Thread; wherewith they sowed the Gaping Lipps of a wound together. Some call it **Acia**, or this needle full of thread they term **Anculum**, **Ligatura**, **Colligatio**, **Obligatio**, or **Ligamentum**, all which signifieth a tying or binding. See *Rhodius* in his discourse about the word **Acia**.

The **Catheter**, or **Urine probe**, as some term it, is a long pipe with some few holes at one end, the other wide and open; into which pipe is put a Pin called the **Itinerarium**, having a turned or hooped head to hold it by, when it is taken out, or put in. The Instrument is Made of silver, that it may be bent as occasion is. If this be thrust into the passage of a mans yard, and into the bladder, it removeth the Stone that lyeth in the neck thereof and giveth liberty to Urine upon the **Itinerarium**, or Pin drawing back. Now the pin is for no other use in the Pipe, but to keep the Urine that it do not presently run forth till the Cutter of the Stone, or Phisitian have found how the Stone lyeth. This is of some termed a **Fissulus Instrument**.

The **Itinerarium**, or Pin which is thrust into the cavity of the Pipe, being fixt in the Urinary passage, shews the neck of the Sphincter of the Bladder, that an Incision may be more surely made to find out the Stone.

The **Syringe pipe**, or more properly a **Glistre pipe** though it will serve for either uses: It for to Syring the mouth, throat, or any deep wound, it is then Screwed on the end of a Syring (as mentioned *numb. 28.*) for the pipe is to be put on and taken off at pleasure; besides the pipes are diversly made, some hollow streight through, for to force or squirt a liquor forwards; others with severall holes in the end (as in this) to Squirt round about, for the cleansing and washing of deep sores. see *ch. 12 n. 33*.

If for the **Clyster** or **Glistre pipe**, as vulgarly called, then it is fixed into the mouth or bottom of a bladder (wherein Glistre ingredients are tyed up) and so thrust up the Fundament to inject the same into the Bowells.

That which stops the Glistre Pipe that the medicine runs not forth, is termed the **Endiaecum**. Which is no other thing else but a cloth or cork hung in a thread, & put into the pipe; by which thread the same is drawn out, when the pipe is put into the fundament.

XLIII. Here you are presented with three Instruments more belonging to Chyrurgicall operations. a **Speculum Patricis** having a **screw**, between a **Bookin**, or **Needle** for a **seton**, and a **Spatula oculi**. Of all which

which take this short description.

First for the **Speculum Patricis**, or **Screw'd Speculum Ani**, this is an inspecting Instrument, yet contrary to that mentioned *numb. 40.* but for the same uses to that, though it be of an other forme or shape: This being opened and shut with a Screw, having four pointed Plates with cavities, to dilate or open that part into which it is put, as the thing it selfe doth more plainly manifest, then by words can be described.

The second is a **Bodkin**, or a long and sharp Needle set in an **Haft**, or **Handle** to hold it by: the Artists call it a **Seton Needle**, or Needle to burn a Seton. Which is done by help of the **Pincers** mentioned in *numb. 41.* and *chap. 12 numb. 8. 10.* And this Needle being made answerable to the holes in the said Pincers, and heated red hot, is thrust through the said holes the Skin and flesh held in them, it passeth most nimbly, and makes a Seton, or perforates the flesh almost paineles.

The third is a **Spatula Oculi**, which is an Instrument like a Ring fixed on the end of a **pin**, or strong silver **wyer**; Oculists use to put it over the Ball of the eye to keep both the eye and the lids stiddy, and firm from motion, while the Haw, or Cataract, or the like, is cutting of the sight of the eye; and also for other operations to be performed on the same. Some Chyrurgions have the Ring open above, like the figure in *numb. 28.*

XLIV. The first of these Instruments is termed the **Speculum oris**, or rather the pincer-like **Spatula Linguae**: with it the Tongue and lower Chap is pressed down, by taking hold on the Tongue, and under the Chin at once: And is very necessary to hold open the Mouth for the better applying of medicines to the Roofe, and Throat: And also that the diseases of the Mouth may be seen exactly, and handled with convenient Instruments. But it was chiefly made to preserve the teeth of Furious, and Astonished men, when drawn asunder; untill such tymes as they have swallowed down meate and drink Sufficient.

The second Instrument is called a **Crane Bill Pincers** with a **Spring**, this is an other way of making them, which is contrary to that before mentioned, being much shorter and rounder in the Beak, whose operation and the use hereof see *numb. 38.*

XLV. These are several sorts of **Cauteres**, that is to say **Cautering Irons**, or **Searing Irons**, with which persons are burned behind in the Neck, when there is in them any tokens of an Apoplexy, Epilepsy, or Vertigo; that is the Dead Palsy, the Falling Sickness, and the Giddiness or turning in the Head: Also they are often used to Cauterize any Vein or Artery in strong Fluxes of Blood, which cannot otherwise be staid; and to Burn the whole end of the stump of an Arm or Leg when cut off. They are in Latine called *Cauterium*, and *Escharoticum*. *

The first a **square Cautery**, of which they have several sizes, and round.

The second a **round Cautery**; of them there is diverse proportions.

The third a **hook end Cautery**; there is also of them in the form of an Heart, and like Plummers and Glasiers Soddering Iron Heads, set thus in **Hasts** or **Handles**.

That in the Sinister Base, is the form of another hook end, of such kind of Irons to Cauterize withal.

O. 3 Hook end Cauterys S. debrased with 2 Barrulets B. is born by the name of *Balvernberg*.

XLVI. Is a **Spatula** with an **Ear-pick** at the end of it. Of the double use of this Instrument; see in *numb. 32.* how it is used to cleanse the Ears; and in *numb. 25.* how used for the mixing of Salves.

S. 3 such in Pale A. is born by *Gill*, or *Gillon*.

The second is an **Head Saw** set in an **Handle**; it resembles a double edged Axe or Hatchet, one fixed to the head of the other, and set in a round handle, save the edges are toothed like a Saw. Its use is to cut the Skull in case of Fractures, and for divers other Operations where small Saws are to be used.

G. the like erected A. Handle O. is born by *Lansfield*.

XLVII. Are the two **Pipes** of the Instrument, called **Enema Fumosum**, or **Fistula Fumosa**; the **Fumous Clyster pipe**, with which a Clyster is given by Smoak, or of Smoak; the **Stopples** thereof (as to its parts) are seven in number, all screwed one into another; then the same is set in the hole of the **Clyster pipe**, the bigness whereof ought to be of ordinary length, or according to Art, either bigger or lesser, as the present occasion may urge.

The **Stopples** (which is the higher Figure) hath a **large Head**, which contains the fumous Medicine, and hath a cover screwed upon it full of holes for the better inflation or blowing of the Smoak down the Pipe, and so through the **Clyster Pipe** placed in the Fundament, as in the manner of other Clysters.

XLVIII. Is the Figure of a **Trefine**, or a **three-fold Crepan**, of some termed a **three formed Crepan**. It is an Instrument made of Iron, which hath three diverse sorts of **Crepan**s; the use whereof is necessary in the pricking of the Skull, that doth not penetrate both the Tables; that with them the print made upon the Skull may be taken away. The Triangular part of this Instrument may also be used for the **small Crepan**, with which the first Table of the Skull is almost perforated or pierced, before the **Triploides** with a **Screw** be applied to his Operation. See *chap. 12. numb. 6. 7.*

T O
The Right Worshipful

Sir **RICHARD MIDDLETON**, of *Chirk Castle*, Baronet.

SIR,

When Work-men are to raise a piece of Work, they generally consult their own Geni-
nus, and ponder their Brains; not only so, but they ask Counsel of the Dead,
viz. Books, whereunto access may be had at all times without much Cost or Trouble:
But in this Work (especially in the raising of the Third Story, a Work never before
seen) the Living were only to be Treated, and the Choicest amongst Professions, and
Arts were to be advised withal, whereof some were far distant, others seldom at home or
at leisure, some unwilling to communicate their knowledge, others not at all affable, as fear-
ing to have their Mystery discovered; however through Labour that is obtained, which is
presented to your Noble Consideration, and Bounteous Acceptance, from him that you may
Command whilst on Earth.

Randle Holme.

C H A P. XII.

IN this Chapter is the continuance of such Instru-
ments as were omitted in the precedent Chap-
ters: and are herein farther illustrated, and set
forth in their due shapes, and described as to
their peculiar uses.

I. Is the Instrument called a **Capsula**, or a **Little Chest**, or **Coffer**, for so it signifieth in *English*, being a round Box with a round foot, and a Lid with a handle on the top, to take it off and put it on; in which is put a hot Iron to burn Fontanels in any part of the Head, or Body: that is, by making an issue through heat and fire, to divert a humour from the place afflicted; and is the only Instrument (being Artist like applyed) for that purpose; and the most absolute in all respects to avoid these three inconveniences, viz. Heat, Pain, and Sight of the Fire, which fearful Men, Women and Children are afraid off; for it hides the actual Cautery, or hot Iron; and being applyed to the place, suddenly causeth an Elcar, before the Patient can perceive it, or feel any pain through Burning about or underneath, by

reason the end of the Box or Case, doth secure all the parts near unto it.

II. This is the form of the **Capsula**, as I have seen it drawn in Heraldry, and so it is born in Coats of Arms, viz. Azure, a Chevron between three such Capsula's, Or. By the name of *Chavner*.

B. on a Chevron A. 3 Roses, between as many such Capsula's Or. is the Arms of the Company of *Wax Chandlers of London*.

III. The first and highmost, is an Instrument called a **Spatha**, namely a **double folding Knife**, sharp on the edge and broad on the back, ending in a point, the use whereof is to dilate Wounds on the head cross-wise, or triangularly, as occasion requires; and with it the Paracentesis, or an Incision is safely made in the Thorax for the letting forth of Dropical humours. See chap. II. numb. 21.

The **Spatha**, is also an oblong Instrument, made of Silver or Iron, broad at the lower end: It is used by Con-

Donum Dñi Roberti Morrey De Civit: Cestre: Aldermanni et Iusticia Pacis
 Major eiusdem Anno: 1669

Confect' oners to take up Conservees and Eleſtuaries, without fouling of the hands. A **Slize**, to ſpread platters withall. Or a **Spatula**, ſee chap. 11 num. 25 31 46.

The Inſtrument in baſe is termed a **Lenticular**, or a **Scraping Levitor**, as being compounded of a Scraping Tool, and a Levitor. Therefore ſerveth for two uſes: The **Levitor**, at the end of the Perforation of the Skull, is thruſt in between the lipps of the bone cut forth, to move the ſame up and down. that it may grow looſe, and may be taken forth with the toothed part of the Pincers (mentioned numb. 10) alſo it is uſed to raiſe mean depreſſions of the Skull. The **Lentel**, or **Scraping part**, fixt at the head of the Inſtrument, ſerves to take away all roughneſs, and to ſcrape it off, and to make it ſmooth, after the cutting forth of the bone removed. See other ſorts of Lavators, chap. 11 numb. 26 29 33.

IV. This is the **Male Trepan**, or a **Modiolus**, of ſome Authors called an **Abaptiſta**, or **Anabaptiſton**, an Inſtrument made hollow and round, and at the utmoſt brims nicked like a ſaw; and it hath four ſhoulders on that part of the **Trepan** that muſt be turned about the bone: It hath alſo a **pin** in the middle, that when it begineth firſt to be turned, it may ſtand faſt on the Cranium or bare Skull, and that the parts about it (which are moſt Senſible) may be preſerved the more ſafe from hurt. For if the **Trepan** to be firſt uſed have no **Pin**, at the beginning of it work the trepaning of the Skull would be performed with the greateſt danger, and with vehement pain.

The **Decuſſorium**, is a Chyrurgions Inſtrument wherewith the Dura Mater being preſſed, which is moſt acurately ioyned to the Scull; then the Puſs or Snotty matter gathered between the ſaid Scull and Skin, is evacuated by a hole made with the ſaid **Trepan**.

V. This is the **Female Trepan**, now there is no difference between the male and female **Trepan**, but for the **Pin** in the middle which the female wants, and for that cauſe called **Females**. there is ever made ſome print upon the Skull by the male **Trepan**, that the female may ſtand the faſter upon it. The uſe of them is as I ſaid before in chap. 11 numb. 34 35. to Saw out round peeces of the Skull, where it is broken or bruſed into the head; and cannot otherwiſe be raiſed up by Inſtruments. Theſe are in Latine called **Trepannum**.

VI. This is the Inſtrument called a **Trefine**, or a **Threefold Trepan**, or **Triangular Trepan**. Of its uſe I have ſpoken before chap. 11 numb. 48. This Inſtrument and the two firſt mentioned in this chapter numbers 9 10 are ſet here againe upon an overſight, the which were before chap. 11 numb. 20.

In the dexter baſe is an **Hollow open Cauterizing Iron**, having a ſhoulder at the top to keep it that it do go no further into the hole where it is put. And in the ſiniſter baſe is the **Fundal Caſe** having an hole in the upper ſide, and Barrs of Steel round, and a tang at the bottom to ſcrew an **handle** on to hold it by; the Iron being made hot, is put into the ſaid Fundall hole and ſo apply-

ed. Whole uſe and operation is in a maner the ſame to that **pipe** and its **ſtile**, mentioned numb. 24.

VII. This is **Woodalls Trefine**, I give it that name to diſtinguiſh it from the other **Trefine** beforeſaid, it was an Inſtrument much uſed and approved off by Mr. **John Woodall** and preſcribed in his **Surgeons Mate**. Of which I have ſpoken before chap. 11 numb. 35

The Inſtrument in the chief, is the **Trepan end** of the ſaid **Trefine**, which is uſed in the place of a **Trepan** being fixed in an **handle**, as is deſcribed before.

The thing in baſe; is called a **Tunnell**, being made either of Horn, or other mettle, beſides Silver; which the moſt ableſt Chyrurgions, uſually have it made off. It is to convey drink, or other liquid medicines into the Throat of ſuch whole teeth are ſett, and cannot be opened; The narrow end of the **Tunnell** or **pipe** of Silver being thruſt between the outmoſt Gnm of the Patient.

VIII. This is a Paire of **Seton pincers**, having holes through the **Chops** of them, each againſt the other; ſo that being cloſed, an iron pin may be thruſt through both together. With this Inſtrument they take hold off leane peoples necks untill there be made a **Seton**, or the Skin perforated with a red hot iron as ſharp as a needle, delivered to the Chyrurgion by his ſervent. All which is done by runing it through the holes in the **Chops** of the Pincers. See an other ſort of Pincer ca. 11 n. 41.

G. the like erected &c extended A. is born by **Haraul**

IX. The Inſtrument in the chief is a **Levitor** with an **handle**, if whole uſe I have ſaid ſomething before, ſee chap. 11 num. 20. only this is truer drawn than that.

In the baſe is a **ſhort Saw** with an **handle**, which Surgeons uſe to cut away the diſtances between the holes made in the Skull with the **Trepan**. And alſo to aboliſh Raiſs like hairees that do not penetrate, and to ſcrape away the rottedneſs of the Cranium. This is alſo called a **ſtreight Hand Saw**, and is ſomeſtyme ſet in an iron frame after the maner of a **Diſmembering Saw**.

X. This Inſtrument in chief is a **Goffella**, or **puller**, which ſhould not have bine here, becauſe I have treated of its uſe chap. 11 num. 20. This is called by ſome latin Authors an **Acantabolus**.

In the baſe is an other kinde of **Seton**, or **Burning pincers**, by meanes whereof Setons without pain, or danger are burnt in the nape of peoples necks, when occaſion requireth. This Inſtrument neere to the holding or pinching part (in which are two holes like the Pincers in numb. 8) hath in the ſhanks a wide and circular cavity, and an **Iron ring**, or **socket**, which being thruſt forwards on the ſhanks binds faſt the Pincers with the fleſhy part of the neck between the **chops**. Theſe Pincers are only neceſſary when the Chyrurgion hath no ſervant to deliver him the needle, or bodkin very red hot, to make a **Seton**, but he muſt fetch it from the fire himſelfe.

There is an other ſort of **ſtreight**, or **Seton pincers**, like

like these in the Chaps, and circular cavity; but for the want of a ring to hold it fast together, hath round handles like to the **Forceps**, to put the fingers and thumb therein, to hold them close. These are generally used when that part behind the neck (which is to be perforated) is very fleshy and fat; by which the Skin laid hold on, when it is thick, goeth within the circle, that it cannot slip away.

In the fesse part between the two foresaid Instruments, is the **Seton needle**, of which I have spoken before chap. II numb. 43. but this is of an other fashion and made much longer.

XI. In the chief of this Square, is an Instrument called a Paire of **Crooked Forceps**, it is to pull forth, or thrust down, smal bones or any thing else, that chanceth to stick in the Throat. They are smal slender Pincers bended into a Semicircle with teeth, and a little Button at the points; the handles like a paire of Barbers **Cizars**. Some term them **Forceps Thoracis**, or the **Thorax pincers**.

That in the base is termed, a **Goose bill Pincers**, or **Bullet Forceps**, and of some a **Pair of pincers with Goose beaks**, with these a Bullet is taken out of a deep wound.

There is an other sort of these **Goose bills**, which have a **Screw** above the **Rebit**, which is to screw the Beaks close together, and so hold them when the bullet is in the concaves of them; and so is taken forth without danger of falling out. Others have these **Screwed Goose bills** with one straight handle, with a button at it end; and the other bent to put either the finger or thumb into, as the **Forceps**.

The **Stone Forceps**, they are made of Steele, and very strong, that they may pull a Stone out off the bladder; are like these kinde of Instruments.

XII. In this Quarter are severall things usefull for Surgeons. The first is the **Straight Probe** with a **needle Eye**, this is much used as namely, it hath dry Lint wrapped about the **button end**, which keeps it from slipping off; which is by the Artist termed, **Armed with dry Lint**, or **Arm the Probe**, by which the wound is mundified and cleansed from matter and filth. And being so Armed with Lint, and dipt in some Lotion, oyle or other Liquor; doth Bach or Drench, Corrode or Supple a wound, to heale and assuage it paine. Also by it is enquired the depth of a wound, fistula, or Ulcer: there by to apply Tents, and Medicaments accordingly. See chap. II numb. 22.

The Instrument in the fesse or middle part of the field, is called the **Crooked Probe**, or **Spatula Probe**, being broadish at one end, whose use is for the Searching of wounds; and the other end to put powders on wounds, and anoynt Plagues with oynments.

The Probe hath severall denominations, of some termed a **Tenta**, others a **Specillum**, the vulgar call it **Tenta**, a Tent, from trying. It is made for the most part of Silver or Ivory, and that to Probe Ulcers, or to

draw the Stone out of the Yard &c. They are of different shapes according as they are diversly used.

That in the dexter base, is termed a **Swathe Band** **wrapt up**, or Rowled at both ends. Of some called a **Rowller**, or a Linnen Rowller. These serve only to bind about a wound, or broken bone, or loynt. Some call it a **Fascia**, they are made diversly; as long, or short, others broad or narrow.

The **Funda Galeni**, is a Swathe divided into four parts, usefull in accidents that happen about the Jaws.

The **Laqueus**, is a Swathe or Band so tyed, that if it be attracted, or pressed with weight, it shuts up close: Its use is to extend broken and disjoynted bones, to keep them in their places when set, and to bind the parts close and firmly together.

The **Bitella**, is a Swathe, or Scarf to hold up, or to carry the Arme in, that is hurt or wounded, shot or otherwise broken.

A **Platisma**, is a broad linnen cloth layd on Sores.

The **Plenia**, or **plumaceolus**, or **plegula**; are Bolders of linnen 3 or 4 or 5. tymes double, even to the thickness of the Spleen; they are used upon wounds, Ulcers, and Fractures. We call it in *English* a **plagister**.

The **Stupa**, or **stupea**, a Stupe is a peece of linnen cloth dipt in a liquor, and applied to bath and supple a place grieved.

A **Pittacium**, is a linnen cloth spred with a medicine, to be applied to the part afflicted or diseased. We call it a **Plaster**.

The **Sparadrapum**, is a peece of linnen Ting'd or touched on both sides with either a thick oyntment, or Plaster; by dipping it in the medicament masted, then extended to coole, and kept for use. a **Seare cloth**.

The **Ferulas**, are little light Chips, or Splents, or the like; made of different matter according as the nature of the thing requireth, as Barks of trees, Firr, Paper glewed together, Leather, Whale bone, &c. And are bound about with a Rowller to bones that are loosened, or disjoynted, after they be set. Some call them an **Amula medica**, a Physicians Chip or Lath.

That in this square between them afore said, is called a **Cent**, it is made of old linnen cloth scraped woolly, called **Lint**; which is rowled gently up like a naille, and the end being dipt in Salve furable for the Sore: It is thrust into a deep wound, or Ulcer, to cleanse and heale it within. Of the learned it is termed **Carpia**, **Centa**, or **Turunda**, and **Turundula**.

A **Motos**, is a peece of linnen cloth reezed like wool, or fine flax, which is put into Ulcers, and stops a flux of blood, or running Sores.

XIII. This is a Paire of **Cissers**, or **Barbers Scizars**, or **Scissors**, Extended Salterwise. The Scissers as they are diversly written for the use by the Barber-Chyrurgions, as namely for cutting of haire, Emplasters, loose Skins &c.

S. the like betw. 4 Roles A. is born by *Codegrane*.

XIV. This is a **Remora**, which is an Instrument used for the helping of a dislocated Shoulder; or that is

out

out of Joynt, by putting it under the Arm-pit, that the knot of the Shoulder may be answerable to the head; the Instrument being made fast by the bottom Screw. Although I have much commended this Instrument, for the benefit of the patient, yet others affirm, that the laxation of the Shoulder is far more happily reduced by the *Opatha of Hippocrates*, if in case it cannot be set with the hand.

XV. This is the Bowed or Crooked Instrument used for the Polypus, called the *Polypus pincers*, where with the Polypus a diseased part of a fleshy substance, and like the Sea Polypus, is cut away and drawn forth, which otherwise by the holes of the nostrils hangs in the Palate to the Throat, and there threatens to stifle and choke a man. It is used also to cut off the Clitoris. See Chap. II numb. 37.

XVI. This is an Instrument called a *Screw Pelican*, which is a kinde of pincers to draw out the gum or grinding teeth (which Mr. Woodall terms them *Pulicans*, with these kind of Draughts the teeth are drawn out with far more ease, then with any of their other Instruments. See Chap. II numb. 36.

That in the base is the *Stitching Quill*, by the help of which Instrument, and the *Needle*, and *Waxed Silk*, gashing wounds are sewed up; it is for no other use, but to keep needles in the hollow part thereof, and therefore shall say no more of it. See numb. 30 de cha. II. numb. 41 42.

XVII. This is an Instrument called a *Piercer*, which is a fit tool for the taking forth of Bullets proceeding from great or small gun shot; by Screwing the Piercer into the bullet, and so to draw it out of the wound. The Instrument consists of three parts, namely of a *piercer*, which is most sharp, and screwed at the end, and longer then the *pipes* it goeth through. The next to the piercer is an *Inward pipe*, which at the end divideth into two *Spoons* of Iron, which openeth of its one accord; over it is thrust an *Outward pipe*, which is shorter then the other, and shuts and opens the Spoon of the inner pipe, as it is drawn neere or further from them; upon the pipe within (which some term the *Stile* of the Instrument) on the head of the inner pipe, is Screwed an *Dist* and *Button*, through all which the Piercer goeth, and is turned, to be screwed into the Bullet, while the spoons with their teeth hold it, that it cannot turn or move.

S. 3 such the Piercers reversed A. is born by *Hurber*.

The other Instrument is termed an *Alphonline*, a thing made fit to take a Bullet out of a wound. It is a Paire of *Pincers* set in an *Handle*, whose opening is broad and hooked in the tips, like a *Goose bill*; consisting of three points or ends, all falling into the side teeth of one another, and opening againe as the Ring is thrust neerer or further off, from the end of the beake.

This Alphonline hath a Bullet in it. See numb. 42.

O. one such in Bend the teeth part crossed O. born by the name of *Rafter*.

B. 3 such in pale bendwise A. born by *Loraine*.

XVIII. Is called a *Syringotomus*, which is no other but a *Crooked Knife*, which on the inside is very sharp, and on the outside is blunt, and rising like the back of a *Sythe*, which at one end is sharp pointed, and will both prick and cut, the other blunt, and (as it were) broken off. With this Instrument *Fistula* having but one passage, by having a ball of white wax fastened on the point, that being put into a *Fistula* to the bottom, it doth not hurt, but the sore may be perforated, and afterwards the space between one hole and another may be cut asunder. There are the like *Pen knives* to this, which are blunt at one end, and a *Bullet* of Iron well polished at the other: with these the whole passage of deep *Fistulae* are to be cut.

In the dexter base is a *Nipple pipe*, or *Sucking bottle*, it is a hollow, long, narrow glass, having an hole or mouth at one end, which is as large as to receive the nipple of a *Womans* breast, from the bottom, or other end of the glass is a small hole with a *Long pipe* as it is with this the Patient her self (being put on her breast) may by sucking at the small pipe, draw forth her nipples thereby lesser; so that an Infant may lay hold on them with its mouth, and draw out the mothers milk.

S. 3 such A. is born by *Mac Suklow*, or *Sucklyn*.

On the sinister side is a *Breast Cap*, or *Nipple Cap*, it is made of silver in shape like an *Hat*, and full of holes on the top or head, which thing is applied to the Ulcerated nipples of a *Nurses* breast, so that they may suckle their Infants without any trouble. This *Cap* is also used for wounds in the *Thorax*: being put upon it that the matter and corruption almost every moment, may sweat through the holes of it by degrees, and without any loss of strength.

XIX. On the dexter side of this Square, is an Instrument called an *Enter-enchyta*, or a *Clister pipe*, (vulgarly a *Clister pipe*) with a lock, or screw. By means of this Crooked pipe made of *Latten*, a man, or woman (who out of modestie will not admit of others to give them *Clisters*) may inject *Clisters* into their own selves. The parts of this, is the *Pipe* to be thrust into the Fundement which hath holes at the end of it. The *Lock* and *Key*, that turns round in it, having an hole through the middle, to let the *Clister* proceed from the Bladder tyed on the mouth of the pipe (as in common *Clisters*) when the Patient pleaseth to turn the *Key*. The *Knave* with a broad *Head* which is screwed into the other end of the key, is both to hold it in the lock, and to keep that no liquor come out of the lock that way. See numb. 133.

That on the sinister side, is termed a *Fistula*, or a *Clister pipe*, of some writers *Clister pipe*. It is a Pipe by which *Clisters* are commonly given to Sick and diseased persons; that is Physicall medicines through the Fundement as is before mentioned, Chap. I numb. 42.

B. 3 such O. is born by *Fistula*.

There is also an Instrument called a *Crepoides*, from the three fold basis, or triple basis, on three feet. This is a thing by which the depression of the Skull is raised, when

it is so great, that the **Levitors** are too weak to serve the turn. That which perforates the Skull is termed the **Piercer** of the **Trepanoides**.

In the sinister chief is the **Levitor** of the **Trepanoides**, which is used by Serewing it into the **Socket** of the **Great Screw**, which if there be room enough to put it in between the depressions, it will raise the bone upright or perpendicularly, that was pressed down; but if there be no room for this **Levitor**, the middle depression must then be perforated with the straight **Piercer** in the **Trepanoides**.

XXI. In this division are three Instruments, whereof that in the middle is termed the **Parrots bill pincer**, or **Pincers** with a **Parrats beak**, upon which outward beak, towards the sinister side, is fastned a **Screw** with a broad **Head** at the end of it, which is by the said **Screw** drawn higher, or let down lower towards the end of the **Beak** as occasion requireth, which is to restrain & keep back the **Bill** that it go not so far as the **Dura Mater**. The said **Bill** hath a **Long Screw** at the end of it, which is put through a **Socket** with the other chap of the **Bill**, which coming through the **Socket** is screwed upon an **Handle** (like an **Auger handle**) which is to turn the Instrument about. This is used in Fractures of the Skull, by which any small peeces of bones in the cure of wounds of the head are taken forth, partly by breaking, and partly by cutting into them. Some say this may fitly be termed a **Baptist**.

Lying in the chief, is the Instrument called a **Spatula** with a **Gow's bill**, this is always to be ready at the hand, and provided to receive, and to take forth small bullets out of a wound.

In the base is an Instrument that consists of a **Needle** with a three square point, with a **Pipe** having a shoulder put over it; it is called **Acus Hydropsis**, and of the vulgar a **Taping pipe**. With which needle thus fitted is the navel of Hydropical persons, and the Scrotum in a watery Hernia, or Rupture are opened, to let out the water. This Instrument is thrust in as far as the **Asterism**, or beginning of the pipe, after that the needle is drawn out, and the small pipe thrust into the Orifice (as the needle made) up to the Shoulder, and so is left in the Abdomen, or Belly without feare or danger. This is by some termed the **Tapping** of the Belly to draw out Dropicall humours, from thence termed the **Tapping Needle** and **Quill**.

XXII. Within this square is the **Pincers**, called the **Aultures bill Pincers**, which **Bill** hath a **Long** and **Strong Screw** at the contrary end, so that after it is thrust through it **Pipe**, is by the helpe of an **Handle** as is fixed on the end, the beak is moved or turned about.

In the base is the **Key**, or **Handle** of the foresaid Instrument, whereby both it, and others of the same nature are turned about. Also severall Instruments are divided into their parts, and put together againe with the helpe hereof. They generally term it, a **Key** for a **Screw Head**.

A. 3 such in pale S. isborn by **Odoacre**, or **Odosre**.

XXIII. On the dexter side is a three **Toothed Levitor**, or a **Levitor** divided into three parts, with this commonly is thrust forwards, and taken out, the cutting teeth and the dog teeth, which are fastned in the holes of the gums with one root or tang only. See more chap. 11 numb. 29.

B. 3 such A. handles O. is born by **Larytoure**.

In the chief bending to the sinister side, is the Instrument called a **Throat pipe**, It is a **Silver pipe**, made crooked that it may be put into the throat, and is as thick as a Swans quill, and a foot and halfe long, or there about: it is full of holes, and at the end of it is made fast a peeces of Spong, as big as a final nut. This is used to draw Thornes, or Bones out of the middle of the **Weland pipe**, or any thing that sticks in the throat.

In the base part of this square, is the **Incision Ring**, which is a small crooked blade of a **Pen knife** set in a **Ring**, to rise and fall according to pleasure, so that the patient cannot perceive it. With this **Impostomas** are cut in the face, of cheeks of children, and in the breasts of amorous women; lest seeing the knife they should be affrighted, and so not suffer such **Impostomas** to be opened.

XXIV. This is an Instrument with its **Handle** to be screwed upon it, called a **Fundament pipe**, which is to burn an **Ulcer**. It is a long hollow pipe, close or shut up at the bottom with an hole on the side (according to the situation of the **Callous**, or deep **Ulcer**, which will not yield to topicall medicaments) having an **handle** screwed to it for to guid it accordingly. This Instrument is thrust into the **Fundament** to the shoulders, into which is thrust a red hot iron to burn the said distemper, the pipe securing the sound parts from the touch of the hot iron, that being only opposite to the hole, which is the **Ulcered part**, which is touched twice or thrice with the fire, and no other place.

There are also **Solid pipes**, having no hole in the side and close at the further end, and shouldred; in all respects answering this figure, which is used after the same maner, having an hot iron thrust up it. Which is to dry up the internal **Emroids** and **Piles**, of those that are swoln, or do superficially exulcerate the intestine parts.

The Iron that is to be heated hot for the foresaid Pipe, is termed the **Stile**, which is a round long iron made fit to go into the **Pipe**, which is set in an **hast**, or wooden **handle**, the better to hold and use it.

XXV. This is the shape of their **Dismembering Chissell**, and **Mallet**. But of the **Chissell** I have said something before chap. 11 numb. 22. This being only an other mode of making them.

The **Mallet** is ever used with the **Chissell**, and is for to force the same by great and weighty strokes, to cut through the member it is set upon. For that end it is made of the hardest and heavyest wood, that may be had, and to make it the heavier it is often bound, or Lead put into it. Some term it a **Surgions hammer**.

V. a Mallet O. and a Chissel A. is born by *Monmale*.

XXVI. Is the *Mirtle Leaf Pen-Knife*, it is a Pen-Knife with two edges, resembling a Mirtle Leaf, or rather a *Javeline head*, with this Instrument a Seton is cut in the Neck; the Pincers wherewith this Knife is used, is described elsewhere *numb. 8. 10. and chap. 11. numb. 41.*

B. 3 such A. Hafs O. born by *Mallard*.

A *Capula* for a broken or disjointed Leg or Thigh; it is a hollow *Trunk* of Wood, wherein the Leg or Thigh being broken or dislocated, is laid, being filled with Tow-hairs, the hole in the bottom is to receive the heel, and at the end a long *Board* for the sole of the foot to rest against.

XXVII. This is a *Chyrurgions Ladder*, whose uppermost round *Staff* hath a round *Body* or *Ball*, of some hard substance fixt on the middle of it, it ought to have six or seven *Staves*, and the sides inward, at each end hath a *Pulley*; with this a dislocated Shoulder is put into its right place: As thus, the Arm-pit resteth on the Ball, then the Chyrurgion draws the Arm downward on one side of the Ladder, and another his Body down on the other side, and a third layeth hold of his Neck and top of his Shoulder, drawing that way till it be found that the Ball striketh the Bone into its right place.

Such a Ladder is also used for the reducing of the Thigh out of Joynt, or the Hip; upon which the Party must sit astride, with one Leg and Thigh which is whole, lightly tyed to the Staves, and the other hanging down loose with a great weight hung at it.

Scammum Hypocratis, *Hypocrates Bench*, is an Instrument of 6 Ells long, which is used in setting of Bones.

XXVIII. This is a Drawing Instrument called a *Plinthum Milei*; it is made after the pattern of those which are called long and square *Wind-latts*: It is four hand breadths long, and the *transoms* one hands breadth, in the which is holes for the Cords to go through, and the sides have holes for the *Axle-tree* to pass; it hath also 4 *Iron Rings* fastned to the corners at the sides with *Leather Strings* to fasten it withal. With this Instrument an Arm out of Joynt is extended and drawn out, when it cannot be reduced either by a *Band*, or other *Linnen Cloaths* put under the Arm-pit.

There is a sort of a *Cord* or *Halter* used by Chyrurgions, to bind Bodyes or Members withal, called *Brachi*.

XXIX. The *Drawing Girdle*, it is a little Girdle, wherewith the Arm is compassed in about the Wrist, or the Thigh above the Knee, and Leg above the Ankle, having two *Iron hooks* thereat, to which Cords are fastned when the Arm or Leg is to be drawn out, that the dislocated Bones may be set in their right places. See the Instrument at large *numb. 32.*

Amma, or *Brachetium*, is a sort of Girdle useful

to those who are troubled with a Rupture or Bursting of the Belly, wherewith the Privy parts are closely connected or tyed to the Ribs and Loyns, lest the Intestines should fall out. Some call it *Brachile*, or *Brachiale*, or *Rebrachiaforum*.

XXX. In the chief of this Square, is a long strong *Needle*, with a square sharp point, something bending; with this the Breasts of Women, which are corrupted, are pierced through at the bottom or root, thereby to cut them off.

There is a like Instrument without an *Eye*, having the like point, with a double edge, which is used by *Abaters of Courage*, alias *Sow-Gelders*, in taking away the Testicles: Also the same is used for the cure of the *Hermias*, of swelling of the Cords, by the perforating of the Wound, that the corrupt matter may issue forth.

This is an Instrument with a handle and two short *Chains*, having each an *hook* at the end, wherewith a Dead Child is drawn forth of the Womb, either whole, or cut in peeces. The Learned term it an *Ungula*, saying it is an Hooked Instrument to draw a dead *Fetus* out of the Womb.

XXXI. He beareth Argent, a *Barbers Case* of Instruments closed Gules, Garnished and Lock and Handle, Or. By the name of *Trim*. Of this I shall speak further in *numb. 35**. to which I shall refer you.

XXXI. This an Instrument termed an *Ambi*, or *Spatha*, for the reducing of a Shoulder fallen below the Arm-pit, which is divided into these parts; the foot wheteon it stands, the pillar, which holds the turning *Ambi* or *Spatha*; the pin on which it turns; and the *Ambi*, being long and round at one end, and square at the other, and about a yard or less in length; the Operation is thus, the end of the *Spatha* is set under the Arm-pit of the Shoulder out of Joynt, and the Arm tyed all along on the Plank, at the Shoulder, Elbow, and Wrist; so the Surgeon with the Plank pulling the Arm downwards, and his Man at his Neck and Shoulders pulls him the other way, then the end of the Plank being round, moves the head of the Shoulder Bone to its proper place. In Latine it is called *Ambe* or *Ambo*.

XXXII. Is the form of the Instrument called a *Glossocoman*, which is made of Wood Planks in manner of a *Crough* open at both ends, near to which is an *Axis* at one end, to which is tyed the Strings that extend diverse ways; those Strings that are below, turn upon the Axle-tree immediately, but the Strings for the higher draught, proceed from the out ends of the Axis, and so go through the holes perforated in the higher end of the *Glossocoman* upon pulleys, where they are fastned to a Girdle described *numb. 29.* which two little Girdles fixed about the Thigh and under the Knee, one turning the Axis, it will equally extend both Strings, that downward which is bound to the lower part of the broken Bone, but the other upwards, so the Thigh and the Leg, notwithstanding its Fractures, are kept fast held together. It is called in Latine *Glossocoman*, from the

the shape of a Merchants little Casket, which was formerly carried upon the Back.

XXXIII. The first of these in the dexter chief place, is a Barbers Washing Bason, or Crimining Bason. Such a like Bason, as this, Valiant Don Quixott took from a Bloody Enchanting Barber, which he fancied to be a Golden Head-piece. These sorts of Basons generally have rounds cut in the rim of edge thereof, to compass about a Mans Throat or Neck.

The second in the sinister chief, a Blood Porten-ner. These are small little things, that will hold about an ounce, some two, of Blood, by which the Chirurgion gueth what quantity of Blood (at one Breathing of a Vein) he taketh from his Patient.

The third Instrument is, called a *Hetrrenchyta*, or *Hetrrenchytant*, or a Springe-pipe for the Pa-trix. This is a crooked Pipe made of Pewter or Silver, to be setewed on the Squirt end of the Springe, which is full of small holes at the contrary end; where-with Women that will not easily give way to others, for shame, to cast a Clyster into their Matrix, conveniently use this Instrument, by which they can easily inject di-vers Liquors to cure divers afflictions in the Womb, and take away the causes thereof. See Chap. II. numb. 42.

XXXIV. In chief lieth a pair of *Crisping* or *Curling Irons*, some term them *Crisping Tongs*; In former times these were much used to Curl the side Locks of a Mans head, but now wholly cast aside as useles. It openeth and shutteth like the *Forceps*, on-ly the ends are broad and square, being cut within the mouth with Teeth, curled and crisped, one tooth fit-ting between another.

In the Base lieth the Surgeons *Salvator*, or *Salba-tory*, or his *Box of Unguents*; It is a Box with a Lid made generally of Latin or Tin, some more Rich have them of Silver, but that is for few, more than good Profit; it hath fix or more several divisions in it, which are furnished with so many several Unguents, which though each hold but a small quantity, yet it is sufficient for the present use, which are generally these.

Unguentum Linimentum Arcei.

Unguentum Basilicon.

Unguentum Apostolorum.

Unguentum Aureum.

Unguentum Diapompholigos.

Unguentum Dialthes.

Unguentum Populeon.

Unguentum Album.

XXXV. Is a *Chirurgions Plaster Box* with the Lid shut Azure, Garnished and Lock and Hinges, Argent. This Box consists of three parts.

1. The *Box* it self, in which lieth such Instruments as serve for present use, which are small ones only, as followeth.

The *Spatula*.

The *Spatula Linguae*.

The *Probe* of several sorts.

The *Stitching Needle* and *Quill*.

The *Flegme*.

The *Directorie*.

The *Scissars*.

The *Forceps*.

The *Spatula*.

The *Box*.

The *Box* Lid, in which there is placed a loose Lid or cover, under which in the said place is kept the Lint, which Surgeons use both for the cleaning of Wounds, as also to make Tens and Plagers, to lay in or upon deep Sores, before the Plaster is put on.

2. The *Drawer* at the bottom of the Box, in which are kept all the Plasters ready made, and are for any sudden occasion; now these Emplasters which this lower Box or Drawer doth contain, are at the least three or more several kinds, as

Emplastrum Stipticum P. Valsell.

Emplastrum Diachalcitheos.

Emplastrum de Lapide Calaminari.

Emplastrum de Manna.

XXXV. Is the *Barbers Instrument Case*, with the cover open, in the which is kept and preserved all the Instruments for Barbing, Shaving, and Polling or Cutting of Hair; now the things of use kept therein, are generally these.

Razors 3 or 4.

Scissars 2 or 3 pair.

Combs 3 or 4.

Comb Brush.

Ear-picker.

Twitcher.

Curling Irons.

Looking Glass.

I find a Chyrurgical Instrument called a *Phacotos*, but what it is I have no exact description.

Sweet Water in Bottles.

Turning Instruments and Sponge.

Powder Bottle, or Puff Bag.

Mullet or

Gravers and Scrapers, or Tooth-

picker.

Flegme.

Paring Knives.

Names of Medicines.

I HAVE In the 17 Chapter of the 2 Book of this my *Academy of Armory and Blazon*, Set down the In-ward and Outward Diseases and Distempers Incident to us Human and Mortall Creatures; and having now in these Chapters occasion to treat of Instruments, and other things belonging to Physick, Chyrurgery, Chymistry, & Druggists, as they are used and pertain to Arms. I hope the Courteous Reader will not be offended, though I go a little astray out of the rules of Heraldry, and inform you with the terms of Art used by the foresaid Art, (which is that promised in the Title Page of the Book) and from which I cannot go back. In the first place, for the healing of those Distempers, take the names of such Medicines and Unguents, as are inwardly and outwardly applied to them for their curing, Alphabetically.

Acopium, a medicine applied by fomentation, is com-pounded of warming and molifying things.

Acostica, a med: to help the hearing.

Aeromeli, is Manna, or Aerial honey.

Alkali, Salt extracted from Ashes by boiling its *Lixivium* or *Lic*.

Alexipharmacum, or *Acid*, a med: to expel Poison.

Alexiterium, a med: to preserve the body against poison.

Alkalist, a menstrum or liquor which resolves bodies. It is taken of some to be prepared *Mercury* or *T. riv.*

Alliticum,

Alliaticum, or *Alter. mla*, a med: which by fermentation cleanseth the blood.

Alchymia, see *Chymia*. (births

Am. laica, or *Diureticks*, whores phisick to cause abortive

Ambrosia, a med: pleasant to take.

Am. lyman, a med: that defiles nothing that toucheth it.

Am. g. l. tum, Artificiall milk, an emulsion of Almonds.

Ana, a like quantity of each ingredient in the compound.

Anacathartus, a medicine to cause Vomiting, Neefing, Salivation or Spitting.

Analeptica, med: that cherish and renew strength.

An. m. s. lica, med: to restore the memory.

Anastomosis, med: to open the pores and passages.

Apodinum, a medicine to allay paine.

Antem. tica, things that hinder too much vomiting.

Antihypnotica, medicins to hinder sleep.

Anthysterica, med: against fits of the Mother.

Anacollema, a dry medicine applyed to head or nostrils to stop bleeding

Antarchiticum, a medicine for the Gout.

Antasthmatica, a medicine for the *Asthma*, that have the cough and hifling respiration.

Antepileptica, a med: against the falling sickness.

Antidotum, or *Antipharmacum*, an Antidote, or medicine against Poison.

Antin. phritica, medicines to cure the distemper in the Reines, or beginning of *Morbus Gallicus*.

Antipluriticum, any med: against the Plurisie.

Antispasmodum, a med: to hinder contraction.

Antizastum, medicines that divers distempers to other parts of the body.

Aperi. a. tica, opening medicines.

Apochyism, or *Apothermus*, or *Robur*, is a boiling of any juice with sugar & honey to a thick substance or hard.

Apomeli, or *Oxymel*, a decoction of honey & vinegar.

Apocrypticum, any thing that helps by virtue of binding, or repelling the distemper.

Apodacryticum, a medicine that provokes tears.

Apoz. ma, a decoction of roots, barks, herbs, flowers, fruits, seeds &c. which is either putgng or drying.

Arteriotomia, an artificiall opening of an arterie for the leting of blood in an inveterate head ach, madness, falling sickness &c.

Astringentia, Astringent or binding medicines.

Atrahentia, drawing things.

Attenuantia, or *Incidentia*, things that open the pores, and cut the humours.

Azoth, a universall remedy for all diseases.

Banma, is a liquor, or tincture in which any thing is tinged or moistned.

Basilicum, a rich precious medicine excellng all others.

Bechica, a medicine good against a cough.

Bolis, a med: taken inwardly as thick as honey, one dose being a mouthfull.

Bacilla, are those medicines, or plasters, which are long & round, like a stick or pillar.

Balsamus, or *Balsamum*, Ballam, it is a thick consistence like an ointment.

Cardiacum, a medicine that corroborates the heart.

Catapotum, or *Pillula*, purging pills.

Catheretica, a medicine against superfluities.

Catharma, or *Catharticum*, medicines to purge the Stomach, and the Gout.

Catholicum, a common medicine that expels all humours.

Cataplasma, is a topicall medicine of the consistence of a Pultice.

Cementum, a Powder by which Cementatory calcination is performed. a *Cement*.

Cephalica, or *Cephalartica*, med: to purge the head.

Ceratomalagma, a softning composition made of Wax and other Ingradiences.

Ceratum, or *Cereleum* a medicine made of Wax, Oyle, &c. and outwardly applyed, it is thicker then ointment, softer then a plaster.

Cerevisia medica, Phisick or Diet drink, wherein medicines proper for the disease are infused.

Chalastica, medicines of a moistning quality, which relax the parts that are hard bound.

Cholagoga, medicines that purge Sulphureous and Bilious humours.

Chymica, or *Chymicalia*, med: prepared of the Chymists.

Cicatrisantia, are such things as bind, dry up, and contract wounds, and fill up Ulcers with flesh.

Clyster, or *Clysterium*, or *Enema*, a fluid med: given inwardly, and injected into the Bowells by the fundus.

Codia, the tops of Poppies, of them Syrup is made. (ment.

Cohobatio, a distilled liquot, distilled againe.

Colletica, med: that conglutinate. From *Colla*, glue.

Collyrium an or long medicine taken from the distemper of the eyes.

Composita, are med: made up of many simple ingredients.

Conditum, a Lectuarie, or composition of consetves powders and Spices.

Coprocritica, are medicines which purge away excrements in the guts.

Cordialia, a Cordial or med: to comfort the heart.

Corrosivum, or *Corrodenia*, Corroding things which eat up excrecent flesh. *Corrosio*, the same.

Cosmetica, medicines which whiten & soften the skin.

Crama, or *Croma*, or *Chroma*, a mixture of any thing of medicines.

Cucurtha, a cover for the head made of Odoriferous and Cephalick Spices beaten to powders, and worn within a cap for a disease in the head.

Cylindrus, or *Magdalen*, is an oblong plaster.

Cyslica, med: against distempers in the Bladder.

Deleterium, a Poisonous medicine.

Diureticum, med: that part dissolve, and fund the blood.

Dracopragia, a medicine against Tumors, made of goats

Diaplasma, a med: made of dry powders. (dung.

Diaplasma, is an ointment or fomentation.

Diapysica, a medicine to ripen the Pus, or crabs inorey.

Diapalma, a white unguent for cooling an heat. (matter.

Dropacismus, an ointment to loosen and excoquate the members, which is of two sorts, Simple & compound.

Drops, the same kind of ointment.

Ecbolia a medicine to help labour in childbearing, also to cause Abortion.

Eccarthartica, or *Eccarthartica*, or *Carabartitum*.

Edema, a medicine between a Sorup and an Opptare, & applyed inwardly. It is diversly called as a *Tumour*, *Illinctus*, *Loch*, and *Locheth*.

Ephraicium,

Catharma, or *Catharticum*, medicines to purge the Stomach, and the Gout.

Catholicum, a common medicine that expels all humours.

Cataplasma, is a topicall medicine of the consistence of a Pultice.

Cementum, a Powder by which Cementatory calcination is performed. a *Cement*.

Cephalica, or *Cephalartica*, med: to purge the head.

Ceratomalagma, a softning composition made of Wax and other Ingradiences.

Ceratum, or *Cereleum* a medicine made of Wax, Oyle, &c. and outwardly applyed, it is thicker then ointment, softer then a plaster.

Cerevisia medica, Phisick or Diet drink, wherein medicines proper for the disease are infused.

Chalastica, medicines of a moistning quality, which relax the parts that are hard bound.

Cholagoga, medicines that purge Sulphureous and Bilious humours.

Chymica, or *Chymicalia*, med: prepared of the Chymists.

Cicatrisantia, are such things as bind, dry up, and contract wounds, and fill up Ulcers with flesh.

Clyster, or *Clysterium*, or *Enema*, a fluid med: given inwardly, and injected into the Bowells by the fundus.

Codia, the tops of Poppies, of them Syrup is made. (ment.

Cohobatio, a distilled liquot, distilled againe.

Colletica, med: that conglutinate. From *Colla*, glue.

Collyrium an or long medicine taken from the distemper of the eyes.

Composita, are med: made up of many simple ingredients.

Conditum, a Lectuarie, or composition of consetves powders and Spices.

Coprocritica, are medicines which purge away excrements in the guts.

Cordialia, a Cordial or med: to comfort the heart.

Corrosivum, or *Corrodenia*, Corroding things which eat up excrecent flesh. *Corrosio*, the same.

Cosmetica, medicines which whiten & soften the skin.

Crama, or *Croma*, or *Chroma*, a mixture of any thing of medicines.

Cucurtha, a cover for the head made of Odoriferous and Cephalick Spices beaten to powders, and worn within a cap for a disease in the head.

Cylindrus, or *Magdalen*, is an oblong plaster.

Cyslica, med: against distempers in the Bladder.

Deleterium, a Poisonous medicine.

Diureticum, med: that part dissolve, and fund the blood.

Dracopragia, a medicine against Tumors, made of goats

Diaplasma, a med: made of dry powders. (dung.

Diaplasma, is an ointment or fomentation.

Diapysica, a medicine to ripen the Pus, or crabs inorey.

Diapalma, a white unguent for cooling an heat. (matter.

Dropacismus, an ointment to loosen and excoquate the members, which is of two sorts, Simple & compound.

Drops, the same kind of ointment.

Ecbolia a medicine to help labour in childbearing, also to cause Abortion.

Eccarthartica, or *Eccarthartica*, or *Carabartitum*.

Edema, a medicine between a Sorup and an Opptare, & applyed inwardly. It is diversly called as a *Tumour*, *Illinctus*, *Loch*, and *Locheth*.

Ephraim, medicines against obstructions in any part, opening and cutting medicines.

Ectillica, medicines which consume callous parts, and pull out hair.

Elatium, medicines to purge the Belly.

Electuarium, an Electuary, a Confection made up of many pleasant ingredients with Syrup and hony.

Eleosaccharum, distilled oyle mixt with sugar.

Elixir, or *Tinctura*, the essence of any thing extracted with the spirit of wine.

Emetica, or *Vomitiva*, medicines to cause Vomiting, or an ejection at the mouth what offends the stomach.

Emmenogoga, medicines which excite the Courses.

Emulsion, medicines to inject into Ulcers.

Emollientia, softning medicines, which dissolve the parts, and make them loose and gentle.

Emulio, an Emulsion, or drinking Medicine that hath Seeds infused in it.

Enemon, a Medicine which stops the Blood.

Epfema, a decoction of new Wine half boiled away.

Essentia Quinta, Quintessence, a Medicine made of intire etherical ingredients.

Emplastrum, a Plaster, a Medicine applyed outwardly to the sores of the Flesh, spread upon Cloth or Leather.

Emplatomena, or *Emplastica*, are Salves that constipate and shut up the Pores of the Body, that Sulphurous vapours cannot pass.

Epicaupium, a medicine like a Plaster applied to the Wrist, to drive away intermitting Feavers.

Epicerastica, medicines which obfund and temperate sharp humours.

Epithama, a medicine applied to the noble parts of the Body, as Head, Heart, Liver.

Epomphalum, a Plaster applied to the pertuberances of the Navel.

Erodentia, medicines that gnaw and prey upon the flesh.

Errhium, or *Nasale*, a medicine made like a Pyramid, and put up the Nose to cleanse the Head.

Fecula, a powder which subsides to the bottom in certain strainings of Vegetables.

Fomentum, any thing which is applied to the body to cherish and warm it, whether wet or dry.

Frontale, a medicine applyed to the head for a heat or pain.

Galreda, or *Galatina*, a Gelly made of Calves feet, &c.

Gargarisma, a Gargarism, a liquid medicine to cleanse the mouth, any pellucid glutinous Juice.

Hepatica, medicines for the Liver.

Hermetica Medicina, a noble medicine made from Vegetables, Animals, or Minerals.

Hidrotica, things that provoke sweating.

Hiera Picra, is a bitter kind of Electuary.

Holippa, Cakes or Wafers made of Medicinal infusion.

Hydropica, medicines that expel watery Humours in Dropsies.

Hydrofaccharum, a Syrup made of Water and Sugar.

Hysterica, medicines against the Diseases of the Womb.

Hordeatum, a liquid medicine made of bearen Barley, and other Ingredients.

Humectantia, liquid or moistning medicines, such as can intinuate into the pores of the Body.

Hydragoga, medicines which by fomentations purge watery humours.

Hyroleum, a mixture of Water and Oyl.

Hydromel, Mead or Meath, a mixture of Water and Honey.

Ischama, medicines to stop the Blood, which by cooling close up the Veins.

Inceratio, is a medicine made of moist and dry things to the consistence of lost Wax.

Incrassantia, thickning things mixt with liquid Juices.

Ischurica, medicines to thicken the Blood, so that the Urine is stopped.

Julepus, a Julep, a sweet Potion, or a liquid medicine of a grateful taste made of Syrups, Sugar, &c. *Julanium*, or Juleb.

Laudanum, a medicine to allay insupportable pains and stop any Flux, called also *Opiate Laudanum*.

Laxantia, loosning medicines.

Lepturica, cutting medicines which part the gross and viscous humours.

Leucophagum, a medicine or drink for a Consumption, of Almonds macerated in Rose water, and boiled Capons, &c.

Lithonruptica, medicines to break the Stone.

Loch, *Loboch*, see *Eclegma*.

Lofenga, *Lofenges*, see *Morsuli*, *Tabella*.

Localia Medicamentum, are such things as are applied outwardly, as Plasters, Salves, Ointments.

Limentum, an Ointment thinner than an Unguent.

Magisterium, a powder prepared by Solution and Precipitation, properly called *Extract*.

Magistralia Medicamenta, medicines prescribed for several uses, called also *usualia*, common and usual, taken once a Week, or twice a month.

Malthacode, a medicine softened with Wax.

Malgma, a Pultice, see *Cataplasma*.

Malastica, see *Emollientia*.

Marmaleta, *Marmaleet*, the Pulp or Juice of Quinces or other Fruit, made into a Gelly with Sugar.

Masticatorum, a medicine of Mastick to provoke Spitting.

Meconium, Opiate, or the condensed Juice of Poppies.

Medicamentum, a Medicine, any thing whereby Diseases are repelled, and health preserved.

Medicina, a Medicine, Phisick, a remedy for Health.

Melanogoga, a medicine that expels black Choler.

Meliceratum, a drink made of Honey and Rain water.

Mirva, see *Marmaleta*.

Moretum, a sort of Drink used by Women conceived with Child, to strengthen a true Conception.

Morselli, *Morsuli*, *Tabella*, sweet Spices powdered, and Sugar dissolved mixt to a Paste; or poured on a Stone to be consolidated. See *Lofenga*.

Mucago, a viscous extraction made of Seeds, and Water. *Mucilago*.

Myrrha, a medicine against the falling off of the hair.

Myron, see *Unguentum*.

Myracopum, an ointment that takes away warts.

Nar-

Moriantia, medicines to stupify and allay pains.
Nasalia, little globular bodies, to put into the neck of the Matrix to cure a Disease. See *Pessarum*.
Nectar, a medicinal drink, of a delicious taste and smell.
Nepenthes, a remedy to expel Sorrow, and make one merry.
Opiste Laudanum, a medicine worthy of praise.
Nephritica, a medicine against a disease in the Reins.
Neurotica, a remedy against the diseases of the Nerves.
Nervitica,
Oblate Laxatives & Purgantes, purging Ingredients.
Obolus, a liquor or vehicle wherewith medicines are mixt.
Odontia, against pain in the Teeth.
Odoramentum, a medicine applied for its smell.
Oenoides, is dilated Wine, or such a kind of liquor.
Oenometus, is Wine and Honey.
Oligophoros, a small Wine, with few Spirits.
Opata, *Electuarium*, are medicines made up of bitter things.
Opiatum, an Electuary with Opium, Mithridate, or Diacordium mixt in it.
Opium, condensed Juice of Poppies.
Optica, medicines against distempers of the Eyes.
Otica, medicines against distempers of the Ears.
Oxelaurea, a mixture of Vinegar and Oyl.
Oxycratum, a mixture of Vinegar and Water, called *Pusca* or *Posca*.
Oxyderica, a medicine to quicken the Sight.
Oxymel, Vinegar and Honey made into a Syrup.
Oxyrhodium, Vinegar of Roses mixt with Rose-water.
Pachuntica, medicines of a thickning nature.
Palliatio, cura Palativa, a medicine (as much as is possible) to help incurable Diseases, by present application.
Panacea, a general sort of Physick for all Diseases.
Panchymagoga, purging medicines that expel corrupt humors.
Pandalea, a solid Electuary, taken like a Lambative, or in Morfels.
Paracelsistica Medecina, see *Hermetica*.
Pastillum, sweet Balls to smell at.
Pectoralia, Pectoral medicines, which allay Coughing.
Pepasmus, a Concoction, or fermentation, or ripening of preternatural humours.
Pepasticum, medicines to allay and digest crudities.
Perianma, a medicine tied about the Neck to expel Diseases, especially the Plague. *Periapum*.
Pessarum, *Pessus*, *Pessulus*, oblong medicines thrust up the Neck of the Womb, to cure Diseases there.
Pharmacum, any sort of medicine against a Disease.
Phlegmagoga, medicines to drive away the Flegm.
Phenigmus, a medicine that makes the Skin red.
Pilula, Pills, Balls, solid medicines made of Pouders and glutinous liquor.
Plerotica, medicines that breed flesh, and fill up Wounds.
Polygophora, Drinks or Wines full of Spirits.
Propoma, a drink made of Wine, Honey and Sugar.
Psilothron, medicines to take Hairs out of the Body.
Psilothrum.

Psorica, medicines against the Scab.
Psycica, a cooling medicine.
Ptisana, *Ptisan*, a decoction of Barly, Liquorish, and Raisins.
Pyrotica, or *Vrentia*, hot and burning medicines, which cause redness, raise Blisters, pull up hair.
Resolventia, dissolving medicines, such as dissipate and scatter Particles.
Rhodum, Rose Vinegar, or any thing made of Roses.
Rhyptica, scouring medicines which cleanse away Filth.
Succuli Medecinales, is a Bag quilted with several simples compounded and beaten together, put in and applied to the place grieved.
Sarcotica, medicines which fill up and heal Wounds.
Sclerotica, sclerotic medicines, such as heal, cool, or are astringent. *Sclerumica*.
Simplicia, are simples uncompound, or unmixt.
Sinapismus, a medicine applied to the head.
Somnifera, sleeping medicines.
Spasmodica, medicines against Convulsions.
Splanchnica, medicines for Diseases in the Intestines.
Splenica, medicines against the Spleen.
Stagma, Juices of Plants mixt together in order to distillation.
Sparadropum, a piece of Linnen Cloth dipt or drawn through a thick Ointment or Plaster, a Scar-cloth.
Suffusus, *Suffimentum*, powder of Odoriferous things, which Burnt, produce a pleasant Smell.
Sumitates, the tops of Herbs.
Supplantalia, Plasters applied to the feet.
Suppositorium, a Suppositor, a compound of Honey and pouders, and made up into a Roll to thrust up the Fundament.
Synactica, medicines that contract any part.
Syncretica, are relaxing or loosening Medicines.
Syrupus, Syrup of any thing, or Flowers extracted, and the Quintessence brought into a Liquor boiled up with Sugar.
Tabella, a solid medicine, see *Lozenga*.
Theriaca, Treacle, a Medicine to expel Poison.
Thorexis, a generous Wine that warms the Breast.
Traumatica, a potion or decoction, which fetches sharp humors out of the Body.
Trochisci, Troches, round marked things, made of Pouders into Paste. *Pastilli*.
Tetrapharmacum, a medicine consisting of 4 ingredients, as *Unguentum Basilicum*.
Thermanica, healing Medicines.
Tinctura, see *Elixir*.
Tonotica, things externally applied, and rubbed into the Limbs to strengthen the Nerves.
Topica, medicines applied outwardly, as a Plaster or Cataplasma.
Toxica, a poisonous Liquor wherein Barbarians use to dip their Arrows.
Turunda, *Turundula*, a Tent put into a Wound.
Vesicatoria, medicines which act upon and rarify the Spirits.

Vinum Cos, wine of a good colour smell and taste.

Vinum Medicatum, wine with medicines infused for sick and weak people.

Vinum Hypocraticum, wine with Sugar and Spices infused therein, a most pleasant liquor.

Unguentum, an Unguent, an Ointment thicker then a Linimentum, it is outwardly applied.

Vomitorium, a medicine to provoke Vomiting.

Visnea, a moss that groweth on bones and trees.

ALL which variety of Phisical names may be reduced into English termes, under these three heads; thereby to avoyd a multitude of unheard off words, which rather confound then give Instructions.

1. Inward Medicines to Comfort.

<i>Pectoralls.</i>	<i>Cordials.</i>	<i>Stomachicalls.</i>
<i>Hepaticalls.</i>	<i>Spleneticalls.</i>	<i>Cephalicalls.</i>
<i>Julips.</i>	<i>Syrups.</i>	<i>Electuaries.</i>
<i>Infusions.</i>	<i>Emulsions.</i>	<i>Confections.</i>
<i>Conjerves.</i>	<i>Preserveci.</i>	<i>Lofenges.</i>
<i>Pills.</i>	<i>Balls.</i>	<i>Rolls.</i>
<i>Troaches.</i>	<i>Bolus's.</i>	<i>Lozhes.</i>
<i>Potions.</i>	<i>Opiates.</i>	<i>Diet Drinks.</i>

Emetologia, a description of things that provoke vomits.
Exulceratio, a solution of continued parts proceeding from Gnawing matter.
Embrión, the rudiments of a child in the womb.
Embrocha, is a distilling of a Bath water gently and by drops upon any grieved part of the body.
En-heirests Anatomica, a readines in dissection, when the Artiste shews the parts of a Carcase dexterously.
Elaboratio, a manual operation whereby the Ignoble part is removed, for the more excellent matter.
Elevation, is when the spiritual part is drawn from the corporall, the Subtill from the gross.
Elatio, is the preparing of several Ingredients, whither it be by Powdering Calcineing or Washing.
Evaporation, see *De-vaporation*.
Expressio, is the extract of luyce out of herbs by a Press.
Extensio, the drawing out of a dislocated joynt to put it in its right place againe.
Eliquatio, a melting to mix things together.
- Facultas*, the facultie or action of a man, which is performed with the body and minde, or either.
Fasciculus, an Arme full of any sort of Herbs.
Fasciatio, the binding of Swathes about a limb that is to be cured of wounds or being broken.
Fecula, the dust or dross that subsides in the squeezing of certaine Vegetables.
Ferula, Chips or Splents made to tye about broken bones when set again in their places.
Fermentatio, a motion in the body tendling to the perfection or chang of it.
Filtratio, is the Percolateing, Straining, or runing of any liquor through a cloth to clarifie it.
Fomentatio, a Foment or Sweet smell that cherish the spirits and revives the senses.
Formula, is the Phisicians prescription, which the Apothecary prepareth accordingly.
Friccio, a rubbing or chafeing of some part of the body.
Fusio, is a melting with heat.
Fumigatio Chymici, is an Erosion of mettles by Smoak or Vapour.
Ferrumination, the ioyning together of a fracture in one and the same peece of mettles.
Fissio, see *Section*.
Fixatio, is preserv'ing volatil and Spirituall bodyes to the fire, that they endure it, and not fly away.
Fluid, Liquid moist or flowing matter for medicines.
- Fraction*, is the breaking of any thing with ones hand.
Frixio, is the quallifying of some harsh medicines with oyle Butter or wine &c.
Gradatio, is an exaltation of mettles to the height of their fineness and purity.
Granulatio, is the casting of mettles into small drops or graines, like Hail shot.
Germeia, is part of that part of Phisick which is for the preservation of health.
Hausus, a liquid thing taken inwardly.
Hedisma, any thing that gives a medicine a good scent.
Hygieia, soundness of Health.
Hydrocritica, Critical Judgings of Distempers.
Humectatio, see *Irrigation*.
Humidity, a moistness.
- Ignition*, see *Combustion*.
Illiquatio, is a commixture of Terrene Bodies with Metalline, earthy with metal.
Imbibitio, is when a liquor is forced from a Body, and not finding vent to elevate, it falls on the body again, and bellews it with drops.
Incinatio, is the reducing of the Bodies of Vegetables and Animals into Ashes by Fire.
Incorporatio, is a mixture of moist things with dry into one Body.
Indicantes Dies, are such days in which a Crisis will happen in a distemper, which usually are the 4, 11, 17, 24.
Indicatio, is that as demonstrates what is to be done in Diseases.
Infusio, is an extraction of the virtue of medicinal things with a convenient liquor.
Injectio, is a forcing of any fluid medicine into the Bowels at the Fundament. See *Clyster*.
Intercalares Dies, or *Intercidentes*, or *Provocatori* dies, those days in which through the vehemency of the Fire, the Sick expels their Excrements unseasonably.
Incisio, incision, a cutting of the skin and flesh.
Incineratio, is a mixture of liquid and dry things to the consistence of mollified Wax.
Inbimatio, is a distillatory transudation by descending of the liquor, through a circular Fire made about the Pots in which the body or matter is put to be distilled.
Insolation, is a preparing of Simples or Compounds in the heat of the Sun in Summer.
Irrigation, is an aspersion of moisture on things to be dissolved, to make them more liquid.
- Laquens*, Bands or Tyes to bind up broken Bones.
Lexigatio, is the reduction of hard and ponderous things by beating, into fine powder.
Limation, the Dust or Filings of Metals.
Liquatio, is that which being in one Body is dissolved, that it can flow abroad like water.
Liquefactio, is the dissolution of Metal by gentle fire.
Lotion, a preparation of Medicaments by Water or other liquor, to remove some hurtful thing in them.
Loimographia, is a description of Contagious Diseases.
Lutatio, Luration, a Cementing of Chymical Vessels.

- Luxatio*, a disjoining, or a Bone going out of its place.
Icteria, a sign of the loosening of a great Disease.
Lithotomus, a Chyrurgion who is skillful in cutting out the Stone.
Libra Medica, a Physicians pound, which is 12 ounces.
Manupulus, an handful of any sort of Herbs.
Mans Christi, a sort of fine refined Sugar put into Cordials for very weak people.
Mastication, the action of chewing Meat.
Maceratio, a preparation of things by infusion or steeping in Liquor for a certain time.
Maturatio, is of a rude and crude substance, to exalt it to a mature and perfect Body.
Meconologia, a description of Opium.
Medicus, a Physician, a Man practising Physick.
Medicinalis Dies, see *Crisis Dies*, are the vacant days between the Crisis fit to administer Medicaments.
Menstruum, a liquor that dissolves Metal or Stone, or the dregs after distillation.
Magma, dregs left after the straining of Juices.
Metasynerisis, the operation of a Medicine externally to fetch out humours.
Metallurgus, or *Metallicus*, a Chymist, or one that searcheth after Metals.
Metaptosis, is the degenerating of one Disease into another.
Methodus, the method or rules whereby Physick and Medicines are found out for preservation of Health.
Metastasis, is the removing of a Disease out of one part into another.
Mitella, a swathe that holds up the Arm when it is hurt or wounded.
Mission, a composition of Bodies, as in *Incineration*, *Incorporation*, *Collicution* and *Contusion*.
Mineralogia, a description of Metals.
Mixtura, is a solid or liquid substance of several Medicines mixed together.
Morbus, a Disease, such a Constitution of Body, as renders it unapt to perform any action.
Mollitio, is the beginning of bringing matter to a Li-
 quation.
Mollification, a softning of any thing.
Mundification, the purging of any thing from that which is sordid and vicious.
Mutilated, a wounded part by putrifying.
Myologia, a description of the Muscles.
Myopola, one that sells ointments.
Naturalis facultas, natural endowments of the mind.
Natura, the natural inclination of a man to any thing.
Noctambulo, *Noctambulus*, one that walks abroad in his Sleep.
Nosologia, see *Pathologia*.
Nutrimētum, Nutriment, nourishment through good digestion.
Nutritio, is a permission of moist matters by little and little to alter the quality of the Medicament.
Obstructio, is a shutting up of the passages of any part of the body.
Oligotrophia, a decrease of Nutrition.
Oligotrophus, meat that affords little nourishment.
Opiologia, a description of Opium.
Orexis, a natural appetite to meat.
Organum, or *Organ*, is a part that performs a right action to its constitution, and according to its office.
Oxyregmia, is an acid sour Belch from the Stomach.
Panicus, is a sudden fear or consternation.
Pathologia, that part of Physick that teacheth the constitution of Mans Body.
Pepansis, a rectifying or bringing to order corrupt humours.
Politrophus, meat that affords much nourishment.
Pepasmus, a concoction or fermentation, or ripening of preternatural humours.
Pepsis, a concoction or fermentation of Humours and Meat in a mans natural Constitution; a good digestion.
Periodus Morborum, the space between the coming of Fits in intermitting Sickneses or Diseases.
Periodus Sanguinis, a continued Circulation of the blood through the whole body.
Pharmacia, the Art of an Apothecary in compounding of medicines.
Pharmacopaeus, the Doctrine or description of Physick and operative medicaments.
Phlegmatici, those much troubled with Phlegme.
Phthisicus, a man in a Consumption.
Physiognomica, signes whereby things are conjectured by the countenance of a person.
Physiognomia, the Art of knowing natures by the face.
Physiologia, or *Phytologia*, that part of Physick which teacheth the nature and constitution of persons.
Plastica Virtus, that which can form and fashion any thing. That which could not be explained, the Ancients called a *Plastick Virtue*.
Pollutio Nocturna, Nocturnal pollution, an ejection in the night through Lecherous dreams.
Potio, a Potion, any liquid medicine taken inwardly.
Porus, *Poros*, little unperceivable holes in the skin.
Præservatoria Iudicii, a way to prevent diseases.
Prognosis, or *Signa Prognostica*, Signes whereby it is known what will become of the Patient.
Præmensura, is an antecedent internall cause of a disease, occasioned by an other.
Prophasia, a fore knowledge of diseases.
Pugillus, a handful of any herbs, or as much as three fingers can hold.
Prophylacticus, or *Prophylacticus*, that part of Physick that respects the preservation of health.
Provocativus Dies, see *Crisis Dies*.
Pulpa, the pulp or substance of fruit or roots boiled and strained from its grosser parts.
Purgatio, *Purgare*, an extraordinary and quick motion and frequent sending forth Excrements out of the body.
Pyretologia, a description of Fevers.
Plagula, a Plagiet. see *Spleen*.
Pulsus, see *Spectes*.
Phantasia, or *Phantasma*, Fancy, an internal sense or Imagination, whereby a thing is represented to the mind, as if the thing were really true.
Phlegma, or *Pituita*, *Phlogis*, or those clouds issuing from the Lungs, which appeareth our distilled waters, or other kinds of liquors.

Pulsus, the Pulse, the beating or motion of the heart.
Percolation, a straining through either a cloth or Sive.
Precipitation, is when bodyes corroded and dissolved in to water are reverberated into calx.
Probation, is the proof of things, and to discerne what is good what is bad.
Projection, is giving mettle an other tincture by casting a medicine on it.
Prolestation, an extraction by parts, by which a rarified nature may be altered from the grosser.
Purgation, is a separation of the pure liquor from thick Sediments or Spume.
Purification, is the resolution of a naturall Putritude, to make it more excellent.
Permition, an equall and even mixture of things.
Pollinctor, or *Pollidor*, an embalmer of dead bodyes.

Quartation, is the separation of Silver and Gold mixt.
Quinta Essentia, a pure and well digested medicine drawn from any Substance.
Qualitas, quality disposition or contexture of particles according to qualities whereof our bodyes are denominated or known to partake thereof.
Quid pro quo, is when a medicine of one nature is altered and changed into an another.

Rarefacientia, Ratifying medicines.
Recidivus morbus, a relapse into a disease.
Rectificatio, a repeated distillation of liquors, to make them more pure. a double distilling.
Remissio Febrilis, a remitting of fevers.
Repellentia, stopping or driving Humours another way.
Reverberatio Chymica, the Calcining or burning of bodyes or things by fire in a furnace.
Respiratio, a breathing, a dilatation and contraction of the Chest or breast.
Revulsoria, is the drawing of blood to a convenient place, that gushes out in an other, which is by opening a vein.
Ructatio, or *Ructus*, a Belching, or depraved motion of the Stomach.
Rhegma, is a breaking or bursting of any part.
Rhodinum, Rose viniger, any thing made of Roses.
Ryas, is a too plentiful and preternatural falling of teares.
Rasum, is the Scraping or pareing of a thing.
Reduction, a restoring of a thing to its former condition.
Repurgatio, whereby any thing is purged and cleansed from superfluities.
Resolution, is when things mixt, part one with another.
Restriction, is a Gradation, whereby mettle Candified by fire, are drawn into a liquor of exaltation, and the more excellent by the Tincture or Clois set on them.

Scarificatio, the cutting or incision of the skin with a Pen-knife, or such like Instrument.
Sedementa, a Sedement, or a thick settling of dreggs in the bottom of any liquor.
Semeiotica, that part of Physick which treats of Health and of Sickneses.
Signum morbi, the signes and Symptomes of a disease.
Solutio Chymica, a resolving any body into its Chymical Principles, which are Spirit, Salt, Sulpher, water, earth.
Species, the powders, or those simples, designed to make compounded medicines off.

Spasmodologia, a Treatise of Convulsions.
Spasmus, is any Convulsion motion.
Sphygmica, that part of Physick which treats of Pulses.
Splena, or *Plagula*, are bolsters made of linnen 3 or 4 double to be laid on wounds Ulcers or Fractures.
Sputum, a liquor thicker than ordinary Spittle.
Stalagma, is that which is distilled from the Juyce of many herbs mixed together.
Sternutation, a Sneezing, or driving out of the head some sharp matter that disturbs it.
Stigma, a Scar, Stigmatize, or set a marke on a person.
Stratificatio, a Corroding or eating of mettle by Corrosive powders.
Superfetation, a double conception with Child.
Subsidentia, see *Sedementa*.
Stupor, Numness, a lack of sense or feeling.
Stymma, the thick mass or dross as remains after the pressing out of Juice or Oyle.
Sublimatio, is an extract, or moisture raised up above the drossy mass of things, and sticks to the sides or necks of the distilling vessels.
Symptoma, a Symptome, it is a preternaturall disposition of the body occasioned by some disease. Or a signe and token of such an approaching thing.
Syncope, a sudden depravation of sense and motion.
Syndromie, is a concurrence of severall Symptomes in the same disease.
Synergetica, that part of Physick which gives Rules to preserve health.
Setaceum, a Seton, a hole made in the skin of the neck, and a Silk tyed therein, for ill humours to vent out.
Setio Casarea, the cutting of a child out of the womb.
Setim, is the cutting of great things into lesser parts.
Segregation, the solution of that which was whole and perfect; divided into parts.
Separation, whereby things distracted and not agreeing are separated one from another.
Siccation, is the drying up of excrementall moistures in bodyes, either in the Sun or before the fire.
Subluction, is a drawing of Juyces, Oyles, or other Liquors downwards, by percolation, filtration &c.
Sphacelus, the effect of a part or member already utterly corrupt and putrified.
Subtiliation, is dissolution, a separating the Subtill part from that which is gross.
Stratification, or *Stratum super Stratum*, is a Cementing by strewing Corroding powders on plates of Metall by Course or degrees.
Spume, the Froth or Scume of any boyled liquor.
Tetmaris, a conjecture of diseases.
Temperamentum, the Temper of the body.
Terra Morina, is the earthy body that remains after the Elixivation, or essence thereof is taken away. A thing good for nothing.
Theorema, *Theoria*, *Theoretica*, the Speculative part of Physick, or Chyrurgery.
Therma, a naturall Bath.
Tregema, *Tregea*, things not beaten so small as powder, yet differs not much from Pulverizing.
Trituration, a powdering of things thereby the better to mixe them up into one body.
Thrombus, *Thrombus*, a coagulation of milk and blood in

Man humane bodyes.

Tatum, a thin sort of matter that comes from a wound.

Therapeuticke, is that part of Physick which delivers the method of healing.

Tromfection, is drying a thing speedily; Parching or roasting it over the fire.

Transmutation, is the changing of the colour, quality & substance of a thing.

Transudation, is the discenary distillation, the essence drop by drop falling into the Receiver.

Paras dies, those Dayes wherein an imperfect or ill *Crisis* frequently happens, and those are the 6 8 10 12 16 18 to which some adde 22 23 25 29 30 32 33 35 38 39 called medicinal dayes, being fit to be given in *Valeto*, either a good or ill disposition of body.

Vene Sectio, the opening or breathing of a Vein.

Vesica Distillatoria, any vessel of Brasse or Copper that liquor is distilled into.

Virtus Ratio, a way of living whereby health is preserved.

Vitalis Facultas, the vitall faculty, is the Action by which man liveth, which is Respiration, and Motion of the Heart. &c.

Vitalis Indicatio, a way whereby Vigor and strength is renewed and preserved.

Vomitus, a Vomiting, a violent sending out at the mouth what is in the Stomach.

Urocrisium, *Urocritica*, or *Uromantia*, is Iudgment or signes observed from Urine.

Uroscopia, the Inspection of Urine.

Ulcera, see *Exulceratio*.

Urina, *Uron*, *Lotium*, Urine, or Piss.

Usnea, moss that groweth on Bones and Trees.

Ulamelia, is a Soundnes of the whole Body.

Vitrification, is converting Calx and Cineres into transparent Glasse like Christall.

Ullion, is a preparation of things for powdering, by the burning of them in a Crucible.

Volatill, Spirits that will fly away, airy, & vanishing.

Xerotes, a dry disposition of Body.

Zootomia, an Artificial dissection of Animals.

Zoogonia, a generation of perfect Animals born alive.

Zymoma, the Ferment or watery Juice in the mouth or in the Stomach.

Leger De Main Implements.

2 THE Art of Leger De Main, or Juggling, otherwise called *Hocus Pocus*. Was a thing first by certaine Egyptians brought into this Kingdom, that were transported hither; Who dispersed themselves through most parts thereof, and being most Dexterous and expert in this Art, and *Palmestrie*, couzened the people in all places wherefoever they came. To whom diverse Vagrant English joyned in Society and in tyme learnt their Language and Couzening delusions, whereby they were at length discovered, and a Law enacted against such Idle Rogues and Vagabonds.

It is an Operation by which one may seem to work wonders, Impossible and Incredible things, and all by the agility and nimbleness and slight of the Hand. The Parts of this Art are principally two, The one in conveyance of Balls, Cards, Dice, Money &c. The other in Confederacie; yet neither can be well done without the help of Instruments leading therunto.

For the Operator must have his Implements made of purpose to play withall, as Brasse or Tin Cups, a long round Stick about a foot, small Balls of Cork, and great ones of Leather; Cards, Dice wooden Boxes, Knives, & Bodkins, Piles of Counters, Rings, Locks, Pulling dith &c. Of which I shall give you an example of some, for the rest I referre you to *Hocus Pocus Junior*, Printed by him in the year 1634.

XXXVI. Within this Square is three Instruments used by Jugglers, a Science much practized amongst a pack of wandering Rogues and Knaves, who delight in nothing more then to Colen and Cheat money out of the purses of harmless and simple people, who think that what they do is by the helpe of the Devils; or through Conjurati-on and Witchcraft; when there is no such thing, only a *Deceptio visus*, deceiving the eyes, by the quick and cunning motion of the hand.

The first is a Juggling Bodkin, by the helpe of this Instrument they will seem to thrust a Bodkin throwe their Arm, as if it were really so; whereas there is nothing of hurt, for the haft is on one side the Arm, and the point on the other, which are held close to the Arm by the arched peece coming from them, which is hid under the Jugglers sleeve.

A. 3 such in pale, points to the sinister S. by Juggler.

The Second is a Juggling Knife, by which they do seem to run a Knife through the Arm, or Legg, but it is don with the like fallacy as aforesaid in the Bodkin.

The Third is an other sort of Cheating Knife, by which they seem to strik or cut a deep slash in the Arm, or to cut off halfe the Nose, whereas the semicircle in the blade of the Knife being set on the Arm, or Nose, shews it to be but a deceipt of sight, through a want in the knife blad.

B. 3 such in pale to the sinister pointed, A. hafis O. born by the name of *Procade*.

XXXVII This is a Juggling Cup, or Box, with which by the dexterity of the hands, Balls are conveyed under, and from under them, at pleasure; also from place to place invisibly, which causeth much admiration and wonder. These cups are made of Brasse or Tyn, the Bottom whereof must be set a little within the Cup, and made taper from the open to the said bottom, which in the figure is turned upside down, for so they are generally played withall in shewing their activity.

S. 3 such A. in chief an *hic veribus* stick O. born by the name of *Sucob*.

The Juggling Pudding, is a thing made of Tin, consisting of diverse little Pooops made taperwise, so as they may almost fall one through an other, having a ring at the wide end thereof, that it may be the better held

hold in the teeth. This being conveyed into the mouth, upon the holding down the head, will fall out to a great length to admiration; which with the palme of the hand may several times be struck up into the mouth againe, see the shape of it *cha. 16 numb. 72.* in the base point.

The **Juggling pile of Counters and Cover**, are diversie Brasse Counters glued together, so many as will make a pile, each having a square hole cut therein as to containe a Die, then a whole Counter is glued on the top, then they have a Box made of thin Latin or a round Cover of cloth to put easily over them. Then they will cast a Die on the table, and cover it with the box or cloth cover having the pile of Counters therein, which will fall on the Die and cover it, take of the cover there appears the Counters, cover them againe, and take it off againe pressing the sides of it, and it will keep the pile from falling one; so there will be nothing to be seen but the Die. Which to them as know not the fallacy, it will cause admiration. see the figure in the sinister base of *numb. 36.*

The **Juggling Ring**, made to hang in a bodys nose, or through the mouth and cheek, is made with a noth, or cut through in one place of it, which being clapt into the mouth will stick to one side of the Cheek, as if it were put through it. Now to do this nimbly, there must be (as in other such like tricks) two rings, one whole to shew, the other cut to do the trick withall. see the figure *numb. 36.*

After the same manner a **Juggling Pad Lock** is hung upon ones mouth; the one halfe of the Bow is made immovable, the other half movable, and made in such a manner that by the meanes of a spring within the Lock part, that movable part will open wider, or be closer as the spring is pressed: this is a trick must be done also with two locks one to shew the people, the other to work by. See the form of it *cha. 16 numb. 72.*

B. such a like A. is born by *Fallock.*

G. 3 such A. is born by *Locker or Looker.*

The trick called the **Nuntius Invisibilis**, or **Bonus Genius**, which is to convey a figure of a man cut in wood invisibly away, and none can imagin how: the figure is to be about the bigness of ones little finger, the head is to be taken off and put on by a wyer. Also they have a cloth Cap with a little hole in the Crown of it, which has a little bag within it, to convey the head into, which is to be neatly made that it be not perceived when the Cap is turned. Now here lyeth the Art, first in shewing the figure, then in putting the same under the Cap and shewing the head only through the hole, then to convey the body away and the head into the bag, which being done and the Cap turned inside out, all is gon: which upon the right turning of the Cap, with a whistle or call, the head is taken out of the bag, and appears through the Crown hole againe, to admiration. See *c. 16 n. 57 62.*

G. the like out of a Cap betw: 2 pillars A. is born by *Billerbiet of Germanie.*

Such an Head out of a Cap G. is *Egilsperg's Crest.*

the like the Cap S. is the crest of *Van Mergetheim.*

the Cap G. is the crest of *Van Buren.* also of *Teuffel.*

By the same Fallacy three Cards shewed to one, shall by turning them, be three contrary Cards, or be changed into Flowers, Birds, Beasts Men or Womens faces &c. all which is done by making the three Cards from corner to corner longways, one half like a Card with 5 6 or 7 Hearts or Spades; and the other half with what devises best pleaseeth. As it is further shewed *cha. 16 numb. 64.* how they are held to be seen. And *numb. 65.* how deceitfully made; that being turned upside down and opened are another thing, to admiration of the ignorant.

And to drink any liquor out of a **Tunnell** in sight of others, and yet after to make it seem to com out of an eyes, ears, or mouth, and run through the Tunnell on the ground. Which is performed by a **Tunnell** made of **Cyn** with a **double** side, as the figure in *ca. 16 n. 73.* The inward part filled up to the brim, fills the false bottom; so the hole in the top of the brim being stoped with the finger end, it will not run out. So that the inner part may be drunk off, and the Tunnell shewed to be empty though the double part remaine still full; which may be let forth upon any fancy as aforesaid.

These and some scores more of Juggling feats there are which be able to beguile not only the simple but the wise, inso much that I have heard some discrete persons (upon seeing off their tricks) affirm that such things were impossible to be don, except it were by Conjuratiō, or some other unlawfull assistance: when as in truth it is nothing but by the nimbleness of the hand, and the deceit of the things they use. I could produce their fallacies in variety of other tricks, done by foulding of Papers, tying of Knots, that will loose of themselves; or cutting of a Rubie in two, and peeing it againe; making a six pence goe through a Table, or to melt it in ones hand; to swallow a Knife, or thrust a Boekin into ones Forehead; to breathe out fire and smoak, to vomit or to pull many round Copper Plates out of ones mouth; to draw severall colours of Rubie out of ones mouth by yards; to cause Balls put in each hand come into one; to make two or three Eggs go up and down a Staffe; put a Ring or Beadstone on a staffe or cord and strik them off, others holding the ends of the staffe or cord; &c. which as they pertaine nothing to our purpose, I pass them over: wishing such as desire further knowledg herein, to finde out such Authors as treat thereof.

3 **AMONGST** The Sundry Works of the aforesaid Artizans, We shall now have occasion to speak of such as are fixed and permanent, as **Buildings**; either Prophane, for ordinary use of dwelling: as **Halls, Houses, Manors, &c.** or Sacred, as **Temples, Churches, &c.** for Gods service: and some others which are moveable, as **Tents, Tabernacles, &c.** Examples of all which we will now produce in this and in the Succeeding Chapter.

Houses' Temples, Tabernacles.

XXXVIII. He beareth Argent, an Umbrella in chief.

chief Azure, the **Staffe** or **Stay**, Sable. This is borne by the name of *Vmbrell*. This is a thing much used in hot Countreys where the Sun is Scorching; the people to preserve themselves from such heat, use this to shadow them from the Sun. It is termed an *Vmbrella* a little Shadow, or any other thing to shelter one from heat or raine, of *Vmbra* a Shadow. Some call it a *Skotte*, which Gentlewomen, or their servants beare up in their hands to keep and shadow them from heat.

In the sinister base is a **Fane** **Pendant**, some terme it a **Fane** of three points, or ends pendant: this is a thing fixed upon an Iron **ROD**, and set on high, as on **Towers**, **Steeple**s, &c. to shew by it turning about, in what Ever, or part of the Heavens the wind bloweth: see other fashions of drawing these **Fanes**, for each Countrey hath its pericular way *chap. 13 numb 20 21 22 30.*

O. the like G. is the town Arms of *Tubingen*.

The contrary in colours & mettle, is the Town Arms of *Herlenberg*, both in *Germanie*.

A. the like G. is borne by *Montfort*.

XXXIX. He beareth Azure, an **Butt**, or **Souldiers Tent**, or **Cabine**. This hath severall denominations, as **Sutlers Cabine**, or **Booth**, which is nothing else but foure Pikes set a Cross in maner of two Salters, and there bound; having a fift Pike laid overthwart the same: over which is cast a **Cilt**, or **Booth**, or **Tent Cloth**, which is to preserve both the Souldiers, and all under the said Cloth, from the violence of the weather, whether raine or wind.

If it be a **Tent** in which the Ensigne of a Foot Company lodgeth, then the Ensignes Colours is hung forth in the Front of it. In which respect it is termed in Armory an **Ensignes Tent**.

XL. He beareth Or, a **Pavilion**, or **Tent Royall**, **Gules**, **Lined**, **fringed**, and **Faned**, Argent. By the name of *Porter*. This is also called a **Princes Pavilion**, or **Papilion**, from the Latine *Papilio* a Butterflie, shewing that it is framed of Stretched out Clothes, or Curtaines; like the opening of the Wings of a Butterflie. Some term it a **Sanctuary**, a place of Refuge.

S. on a **Chevron** O. 3 **Roses** G. born 3 such A. fringed O. is the Company of *Upholders*, or *Upholders* Coat of Arms.

A. 3 such G. lined fringed & faned O. is the Arms of the Company of *Tentmakers*. Of this Society was *St. Paul* as we may read *Act. 18. 3.*

XLI. He beareth Argent, a **Tent**, or **Cabernacle**, (or **Moving House**) **Gules**, **Lined**, **fringed**, and **Pinnacled**, Or. Born by the name of *Tendelle*.

The like between two **Parliament Robes**, in a field Argent, on a Chief Azure, a **Lion** of England, is borne by the worshipfull Company of *Mancham Taylors* of the City of *London*.

S. 3 **Tents** Er. armed with B. & G. on a **Holy Lamb** couchant A. on a **Cushion** called O. over his back a **Cross** patee fished G. This was anciently the Arms of the *Upholders* of the City of *London*. This in the Past

or Grant of the Coat to that Society by *William Mareschall* *Chap. 5. E. 4.* It is thus blazoned, the field Sable, three **Sperbers** Ermin, a **Lamb** Silver couchant, and, on a **pillion** of Gold. Blazoning was then bide in its Infancie.

S. 3 such A. Lined Er. was of old the *Upholders*, or *Upholders* Arms of *Chester*.

B. such a **Tent** A. Lined O. with the *Virgin Mary* and the *Babe* in her Arms therein, of the Second; Fringed of the Third, Covered G. is the Town Arms of *Oetting* in *Germanie*.

This is of some termed also a **Tent Royall**; yet it is necessary that *Heralds* should make a distinction between the one, and the other: For the **Pavilion**, or **Princes Tent**, or **Cabernacle**, are all said to be of a Square form, from the example of the **Cabernacle** of the **Congregation**, in and upon which the **LOD** of *Israel* did so often appeare to his people, and to *Moses* & *Aron*. which was Square as we may read *Exo. 26. 1. 2. 3. &c.* and *36. 23. 24. &c.* All the rest of the Peoples being Round, whose Setting up of their Tents, is termed, the **Pitching the Tent**, or **Camping**. And the taking them up to march, the **Hexing the Tents**, or **Raising the Campe**. And the entrance, is called the **Tent Dore**, or **Curtaines**.

The severall names given to these Moving Houses.

A Tabernacle .	A Sanctuary .
A Pavilion , or	A Papilion .
A Tent , or	A Sperber .
A Butt .	A Booth .
A Cabine , or	A Kitt .
A Shade , or	An Umbrell .
A Hobell .	A Sentry house .

Such as are drawn or born

A Coach .	A Chariot .
A Wagggon .	A Litter .
A Close carriage .	A Shallown .
A Sedan .	A Kallash .

XLII. He beareth Argent, a **Dove house** **Gules**, **Covered** or **Chatchell**, Or. by the name of *Columbell*. This was the old way of depicting a Dove, or Pigeon house; but of later times, the tops of them are covered, which is termed the **Roof** of the Pigeon house, by which they fly in and out.

Some have the **Dove house** **Square**, others with four **Sable** ends, with a **Cross** **Ridge**, having a **Loder** on the top of the **Roof**.

A. the like G. cover & dore B. born by *Dorchester*.

XLIII. He beareth Argent, a **Tower** **Arched** on the top, with a **Fane**, **Gules**. Born by *Tower*.

There are also born in Arms: **Towers** with **Battlements** **Arched**, which are so distinguished from this in the Plate. See *chap. 9 numb. 185.* O. a **Tower** **Battled** and **Arched** G. born by *Cam*. S. the like A. **Arched** & **Faned** O. born by *Tower*.

XLIV. He beareth Argent, a Dwelling house, Gules; Covered, Tyled, Slated, or Roofed, Azure having a Chimney in the middle. born by *Housley*.

This is likewise termed an House of one Bay, or a Countrey house, or a Farmers house, or a Dairy house, or a Cottage, because it stands of it self without any other housling joyned to it.

Several pieces of Timber belonging to a Wood House.

The Sels, or Groundsels, or Ground plate.

The Posts, or Corner posts, Standards, principal posts, Main pieces, are all the upright strong pieces.

Threshold or Dow Sel.

Dow Checks, the Jaums of the Door.

Lintel, or Transom, the top of the Door Frame, or Window, the Door head.

Props, Stays, Shores, Underlets.

Pillars,

Wall Plates.

Transomes, or Side Posts.

Beams, Girders.

Summers, Myer Trees, Bessummer, the great pieces on which the Floors ly in every Story.

Side Raisers.

Rests for Beams.

Laces, or binding Beams.

Purlaces.

Doors.

Maincot.

Folding Doors.

Stieling Timber.

First pieces, the highest pieces on the Roof.

Window Stools, Introducers.

Window Posts, Pick Posts, the sides of the Window.

Joyce, pieces on which the Boards of a Floor is Nailed.

Spars, Banfries, Hongells, of which the Roof is made.

Floors, Boords,

Laths or Latts.

Boces or Strutts, short pieces that bind the upright Posts.

Roof Beam, or Girder to the Gable Flow, the Summer on which the Gable end is raised.

Rafters, or principal Rafters, those pieces that run up the sides of the Dormant or Gable end.

Kings piece, Crown post, or Toggie piece, that which stands upright in the middle of the Gable end.

Struts, or Bunsparcs, pieces that go from either side the Kings piece to the Rafter of the Gable end to support them, they are made like a Chevron reversed.

Knees of the principal Rafters, pieces set from the Roof Beams to the lower end of the said Rafters, which make a kind of Triangle.

Collar Beam, Strout Beam, Cop Beam, or Wind Beam, is the over cross pieces on the top of the Gable End.

Sleepers, the two out pieces of the Dormant, which

carrieth the Roof to overfeil the Gable end, to secure it from Weather.

Bun-spars, the short pieces that hold the Rafters and Sleepers at distance.

XLV. He beareth Azure, a Stable, with each side a Shouring, Argent; Covered or Thatched, Or; Ridged, Vert. By the name of Stables.

Some term it a Stable or Dre-house, or a Cow House, with two Cotes or Calf Kids on the sides. Others Blazon it a Barn with its Out-Lets or Side Cotes.

XLVI. He beareth Azure, three Cottages set in triangle, Argent, covered, Or; with an Estoil in Base. Others term it a Tower in chief, between two Cottages in Fels (in manner of a triangle) in Base an Estoil. By the name of Coats or Cottrel.

B. 3 such A. in Base an Escochion O. a Lion rampant holding a Tower between his Paws G. on a Chief B. 3 Marygolds slipped issuant, is the Town Arms of *Lithenham* in the Netherlands.

B. a covered or Roofed Tower with two Houses on each side conjoined, between 2 such sans Houses A. is the Coat Armour of the Town of *Homburg*. Some have it with a Lion rampant to the Sinister O.

XLVII. He beareth Argent, a Cart House fixed upon an Hill or Mount issuing out of Base, all proper. By the name of Carthouse.

B. on the like Hill V. the Supporters or corner posts G. covering O. is the Coat and Crest of *Van Lesebize*.

This is a kind of open House, having nothing else but a cover, made either of Straw, Rushes, or Gorse; And is for no other use, then for Husband men, and other Countrey men to put their Cereals in which belong to Husbandry; as Carts, Tumbrils, Plows, Harrows, and the like; to keep them from the foulness of the weather. Some term it a Sheep-Cote, into which they will fly in Tempestuous and Stormy times to secure themselves.

XLVIII. He beareth Azure, a Theater issuant in Base, Argent. Born by the name of Player or Pliers.

This is a place built round like a Tower, but every Story is a degree less than that it stands on or is mounted upon; on the top whereof there is a Lanthorn which giveth Light to the Foundation. In the time of the Roman Empire it was their general place of meeting, to consult the good of the Government; and to choose Officers of State. But in these our days it is looked upon to be no other than a Play House, a place for people to go to hear Acts, and to see Stage Plays and Interludes, and to spend their precious Time in Vanity and Idleness.

XLIX. He beareth Argent, a Garden in Prospect, proceeding from Base to the Fels, bordered and Paled Quadrangular, with a Garden House or Tower at the further side, all proper. Things proper for Gardens are Maze, Labyrinth, Beds, Borders, Walks, Alleys, Arbours.

L. He

L. He beareth the inward prospect of a Room extended all over the field, the sides Argent, the ground Tiled Gules; and the Roof or Ceiling, Or.

The several Rooms in the inside of an House.

Entry.	Hall.	Parlar.
Buttery.	Seller.	Pantry.
Stove.	Wash house.	Larder.
Pastery.	Skullery.	Brew house.

Above Stairs.

Street Room.	Dining Room.	Drawing Room.
Chambers.	Bed Chambers.	Lodging Rooms.
Dressing Room.	Closets.	Nursery.
Stairs case.	Galleries.	Garrats.
Sallars.	Roof Rooms.	Store Chambers.
Lofts.	Cock lofts.	Lantern. &c.

LI. He beareth Or, the Pedestall of a Pillar, with its Plinth, and lower Basis, Illuant; whereon is fixed an **Hexagon Pyramed**, betweene two Square Pillars Spired, with **Crosses** thereon, Gules. By the name of **Pedestall**. Thus it is termed by most, yet the Artists Blazon it, a **Dado** (Dye, or Square Pedestall) fixt on it **Lower Plinth**, in Base; with it **higher Plinth Beuile**, both **Bottomed**: on the **Focco** (or Plaine thereof) is placed an **Hexagon**, betweene two **Square Pillars**, their tops **Pyramed** and **Crossed**.

This is a contrary beareing to what I formerly shewed you *chap. 9 num. 188*. That being a Wall before 3 Towers; this being a kinde of Tomb Stone, or a large Pedestall of a Pillar with three pillars set upon it, as if it were erected for some kinde of Monument. And therefore in short, it may not unfitly, or improperly be Blazoned, on a **Tomb-stone** 3 **Pillars** erected: or else erecter on a **Tomb-stone**, a **Pyramed** betweene two **Pillars**.

LII. He beareth Argent, on a **Square Tower** issuant out of the Base, Surmounted by an **Open Port** or **Arch** joynted to two **Towers**, Gules: the **Roof** quadrangular, or Divided into four **Gable ends**, or **Dorments**, Azure. Born by *Bridgehouse*. And therefore from the Bearer, it may better be termed a **Bridge** in Base, with one **Arch**; thereon an **House** with two **Towers**, **Turretted**. For it must be presupposed, as no House is built upon a **Bridge**, but it hath a large and Spacious **Gate Arched**, for the benefite of transportation of Goods through.

LIII. He beareth Vert, on the **Capital**, or head of a **Corinthian Pillar**, a **Wall** with a **Port**, betweene two **Towers**, Argent. This is the Coat and Crest of *Don Popon of Spaine*.

A. the like G. or on the **Battlement** of a **Tower**, two **Turrets**. is born by the name *Bebenburg of Franckford*.

LIV. Is wanting being overlipped in the figuring.

LV. He beareth Argent, out of a **Square Tower** issuant, a **Round Turret**, **Spired**, Gules. This is also termed; the **Tower** of a Church, **Towered** and **Spired**, or a **Steeple Towed** and **Spired**. This is born by the name of *Halkes*.

LVI. He beareth Argent, a **Bridge** in Bend sinister of three **Arches**, **Imbattered**, at each end a **Tower** Coniuncted to the sides of the **Elcock**, with an **House** in the middle, Gules; and through each **Arch** runs a **Stream** or **Current** of **Water**. This is a long Blazon; but it is according to the *Duch way*; otherwise you may term it, On a **Bridge** of three **Arches**, an **House** between two **Towers**, with three **Streams** of **Water** flowing into the **Base**; all **Proper**. see *chap. 9 num. 191*. This Coat is born by the name of *Towerbridge*.

LVII. He beareth Argent, an **Hall**, or **Hanston** house, or a **Hannour House**, with a **Gate house** and **Walled** about, Gules; the **Roof** Leaded, or **Covered**, Azure; with a **Lantern** on the top **Proper**. This is born by the name of *Manhar*.

The out sides of an House.

The Draught or	Model.
The Basis or	Foundation.
The Front or	Forefront.
The Court or	Entrance.
The Staires or	Greeces.
The Porch or	Portall.
The Gate. Doore. or	Wicket.
The Walls or	Bank.
The Juttings out or	Over Seelings.
The Water Tables &c	Butterfles.
The Quins &c	Conspires.
The Dormants or	Gable Ends.
The Finshings or	Pincles.
The Fractables &c	Corbells.
The Arches or	Vaults.
The Roof or	Covering.
The Eaves or	Easings.
The Gutters or	Water Spouts.
The Pavement &c	Posts with Rails. Pales.
The Belcony &c	Tarps Walk.
The Turrets &c	Chimneys.
The Lantern &c	Windows. Casements.
The Pillars or	Columns.
The Barrs &c	Lances. Graves.

LVIII. He beareth Argent, a **Walled City**, or **Towne**, Illuant and **Extended** through the Field, all **Proper**. Some term it the **Prospect** of a **City**, or **Walled Towne**; because it is not to be looked upon as a **City**, if without Walls; And it is but a **Prospect**, by reason the **Tops** of the **Houses**, and the **Steeple** are only to be seen.

Principal

Principal Edifices or Buildings for the Commonalty are these.

A **City**, *Metropolis*, the Chief or Mother City in a Kingdom or Nation.

A **City**, *Urbs*, a Walled Town, or a place for defence of a Countrey, fortified with a Castle, Towers, Gates and Bars.

A **City**, *Civitas*, a place with or without Walls, being Franchised and Inhabited by an Assembly of People; the See of a Bishop, and a Cathedral.

The **Suburbs**, the Houses built on the out-sides of a Walled City, or near to it.

A **Town**, *Oppidum*, a Walled Town, such as for its strength of Walls and largeness may be reputed a City, but hath not the Franchises or Freedoms and Priviledges belonging to it.

A **Town or Borough**, *Municipium*, a place of Freedom like to a City, an Incorporation of Mayors and Bailiffs.

A **Barony**, *Baronia*, a place of Priviledg, having many Towns within the Circuit thereof.

A **Lordship**, *Pagus*, a Countrey Town wherein is a Court Leet, having divers Hamlets and Demain Houses in its Bounds.

A **Demaine**, *Dominicium*, Houses belonging to a peculiar person as Lord thereof.

A **Colony**, a City or Town where people are sent to dwell or inhabit, purposely to people or plant a place.

A **Cittadel**, a place Built for the Defence of a City, Town or Country.

A **Village**, *Villa*, a Town with many Houses joined together.

A **Little Village**, *Villula*, a place wherein is a few scattering Houses.

A **Hamlet**, *Hamletta*, a little Hamme or Home, or Town within the boundary of a greater Town.

A **Countrey**, *Rus*, a place where Husbandry is exercised.

A **Street**, *Publicum*, the common way, or publick Street in a City; Houses being Built on each side. *Urbis Via*.

A **Great Street**, *Platea*, a large broad Street, or way between Houses.

A **Short or Little Street**, *Viculus*, a Street quickly turning into another Lane.

A **Street in a Town**, *Vicus*, *Vicinium*, the joining of Houses one to another.

A **Lane**, *Angiportus*, a little narrow Street, which generally hath many windings or turnings.

A **By-Lane**, *Deverticulum*, a Turning way, or by-side, which cuts off much in the common ways or passages.

A **Court**, or inward part of a Street or Lane, where Houses are Built round about, either in a Quadrant or oblong Figure, or otherwise; a place that is neither Lane or Street in a Town.

An **Alley**, *Ambulacrum*, a narrow passage, through which it is hard to carry any Burthen, a place only to walk in.

In-land Towns, such as have no considerable River flowing near them.

Publick places within Cities and great Towns.

A **Court** or **Pallace**, for the King, Senate, Bishop or chief Magistrate.

A **Town Hall**, **Guild-hall**, or **Shut-hall**, for Trial of all Law Cases.

A **Goal**, or Prison House for Debtors.

A **House of Correction**, to punish Vagabonds.

A **Treasury**, to keep the publick Stock.

An **Armory**, to keep Arms in for the defence of the place.

A **Library**, a place to keep Books in for such as desire to Read.

An **Exchange**, for Merchants and Trades-men to make their Bargains in.

A **Cathedral**, and other Congregational Churches for the people to meet at.

Walls, **Gates**, and **Bars**, for the defence of it.

Baths, **Hot Houses**, to cleanse the Body from Sweat and Filth.

Alms-Houses, for poor decayed persons.

Hospitals, for Sick, Diseased and Wounded Persons.

Inns, or **Guest Houses**, to entertain Strangers.

Meat-houses, places to Buy Meats and Drink ready for the Belly.

Caverns and **Ale-Houses**, to bring up young Drunkards before the old ones Die.

Market-place, where all sorts of Goods for Back and Belly, for pleasure or profit are sold.

Shambles, where Butchers sell their Meats.

Shops, where Tradesmen sell all sorts of Wares.

Conduits, or **Conduits**, Wells, Fountains, for to serve the place with Water.

River, **Rivulet**, **Beck** or **Rill**, **Brook** or **Pond**, to supply the place with Water, but especially to carry Commodities to the place, as generally for that purpose all great Towns are seated by great Rivers.

Takes, or **Privy Houses**, Houses of Office.

Skaven places, there where the Dirt and Filth of the place is laid together.

Principal Edifices for peculiar persons, are these.

Court, or Kings Houses; for wheresoever the King doth reside, that place is called the Court. And it is generally termed **Up to the Court**, not Down to the Court.

Pallaces, or Bishops dwellings, are the names or titles given those places where their Diocesis is.

Council or **Court** or **Common Halls**, Places of Judicature, there where the *Preteur* or Judge sitteth to give Judgment. And is generally the place which *pro tempore* they lodge in.

Castles, **Stone Houses**, Places of Strength, Fortified with Walls, High Towers, Battlements, Barbicans, Portcullaces, Gates and Bars, Compasised with deep Trenches, or built on Steep Hills.

Halls,

Halls, Large and vast Buildings with a Court in the middle, Lords and Noble Mens dwelling houses.

Mansions, Houses of the Gentry, and not inferior to Halls in some Places; Yet the are generally taken to be Large houses without the Walls of a City; or the chief House of the Lord of a Town, in that Town.

Mansion Houses, the chief Houses belonging to the Nobility and Gentry, or others, which they dwell in, or inhabite to tarry.

Summer Houses, **Bowers**, Places to which the Gentry resort, and abide there during the Summer season, for their Recreation and pastime.

Lodges, Houses built in Forests Chases and Parks, for preservation of the Deere; Also for recreation, and to see the game hunted.

Messuages, Countrey Houses, Freeholders, and Farmers dwelling places.

Farmes, Houses that have Lands, and Possessions annexed to them.

Cottages, or **Cotes**, Small little low Houses, in which the Vulgar and Common people dwell.

Edifices for Pleasure or Profit are these.

Bowers, **Booths**, **Tents**, **Hutts**, Places to take the Summers pleasure and recreation.

Banqueting Houses, Places to Eat and Drink, to Feast and rejoyce in.

Garden Houses, Places to preserve Fruit and Flowers therein.

Towers, or **Watch Towers**, Places to look about, and see things afar off.

Theaters, Places where Interludes or Playes are acted, being built half round, that people there assembled may the more conveniently behold what is done.

Amphitheaters, or Play Houses, as a Cock Pit, a Tennice Court, a Billiard Table, a Bowling House, &c all other sorts of Gameing Places.

Cloysters, are Walks within Cathedrals, or Abby Churches, Arched over; for Monks and Friars to take their pleasure and repass.

Rows, **Galleries**, or **Walks**, Places to stand in and look about; or to exercise ones feet therein.

Edifices or Buildings appendant to great Houses.

Dairy Houses.	Bake Houses.	Brewhouses.
Water Houses.	Fountaines.	Barnes.
Stables.	Granaries.	Dog Kennells.
Cow Houses.	Oxse Stalls.	Calf Kitts.
Foulds. or	Sheep Cotes.	Cart Houses.
Kills. or	Malt Houses.	Swin Styes.
Water Mills.	Wind Mills.	Horse Mills.
Pigeon or	Dove Houses.	Horvells, or Sheads.
Houses of Office, or Easement. &c.		

All which are so commonly known what they are, that they need no further Explanation.

TO
The Right Worshipful

Sir PHILIP EGERTON, of Orkton, Knight,

And to JOHN EGERTON, Esq; his Son and Heir,

IN the Erecting of such a large, spacious, and glorious Edifice, the Spectators at first View, will hardly conceive how much pains was bestowed first in Digging the Foundation, preparing the Materials, contriving the Architecture, raising the Scaffolds, and in removing the Rubbish, with Twenty things more; besides the greatest of all, which is Coin to pay off the Labourers, might cause one to stand in a Maze; however through the Great Providers help, it hath all along been carried on: Wherein if you reap in few Hours the fruit of many years Labour, and receive Content thereby, the Author will be much satisfied and encouraged through your Bounty to Subscribe himself

Your Worships most Obligated Servant

Randle Holme.

C H A P. XIII.

THIS Chapter is a prosecution of the latter end of the foregoing; for as that in part treated of Houses, Cottages, Towns and Cities; so this will set forth to us all sorts and forms of Castles, with the parts and members thereof, as they are born in part or in whole, in Coats of Arms. Also of all manner of Churches, Chappels and Cathedrals; with all the Parts, Utensils, and Sacred Goods Dedicated, and of Holy Use thereunto belonging.

I. He beareth Argent, a Tower Sable with a Scaling Ladder raised against it, *Baron of Orkton*. This is the Coat of Cadivar ap Dinwall, Lord of Aberystwyth in South Wales.

A. the Tower G. and Ladder S. is born by *Seaford*. Mr. Legh, in his *Accidence of Armory*, will have it that if there be more than one of these Towers in a Coat of Arms, then they are termed Towers; else one is ever

to be called a Castle: But by his favour, these following examples will shew there is a vast difference between a Castle and a Tower.

G. a Tower A. is the States or Town of *Bietickhains* coat in the *Netherlands*.

G. on a Hill V. a Tower A. belongs to *Waldthurn* of *Bavaria*.

A. He beareth Argent, a Tower Triple Tower. Gules. By the name of *Torrall*. Some term this Tower with three Currets.

A. such a Tower S. charged Transverse the Port O. born by the name of *Old castle*.

G. such a Tower A. on an Hill in Base V. with an Embochion before the Gate or Port O. charged with a Lion rampant, is the Coat of the State or Town of *Frankenhaus*.

S. a Place between 3 such Towers A. is born by *Carleton*.

III. He

Donum Caroli Wilson de Knutesfordiâ in Com: Geslir: Gen:

III. He beareth Argent, on a **Hill** in base, Verr; a **Tower** with the **Port** open, Gules: having a Boare issuing out of it, Or. others more shorter do blazon it, a **Boar** issuing out of the **port** of a **Tower**, set upon an **Hill**. As this hath a Boar, so in other bearings you will find other Creatures to proceed from, or issue forth off the gate of the Tower. This (the Tower A. & Boar S.) is the Crest of *Chauntrell* of the *Bach* near to the City of *Chester*. The same being triple Towered, is the Crest of *Chauntrell* of *Chauntrell Balkin*.

Mr *Boswell* in his *Armory of Honor*, saith it is very necessary in the blazoning of such Towers, to name how many peeces the Battlements are made off; then according to his rule, you must say, **Imbattelled** with two peeces and as many halves. But this no other Blazoner ever observed, it being left to the Workmans discretion how many Battlements he will make, whither more or less for number.

IV. He beareth Argent, on an **Hill** issuing out of base, Verr; a **Tower** Gules: a **Dragon** having his Head above the Battlements, and his Tail out of the port, Or. This is a whole Dragon, whose body you must suppose to be in the Tower, and nothing seen but the head and tail. Now after this manner you shall often find both Coats and Crests, having other Creatures Heads and half their Bodies, to be issuant from the tops of Towers, as this doth.

On such a Tower B. 2 Penons contrary Disvelloped the one A. the other O. is the Crest of *Van Eyckman*.

Out of a Tower B. a demy Lion O. Crowned G. holding between his Paws a fire Ball. is the Crest of the Right Honorable, the Earl of *Chesterfield*. by the name of *Stanbroke*.

V. He beareth Gules, a **Port** between two Towers, Argent. Others term it a **Wall** with a **Battlement** and a **Gate**, Conjoynd to two Towers, Yet others more short, blazon it, two Towers **walled**. I think it is best termed a **Castle Gate Towered** (or fortified with a Tower) on each side.

B. the like A. with an Eagle displaid over the Gate is the Coat of the Town of *Telchen*.

G. on a hill in base, with a passage, way, or foot path to the gate, V. the like Gate Towered A. is the Arms of the Town or Star of *Befichheim*.

A. on an hill V. the like B. is born by the family of *Burgomer* of *Barbaria*.

O. the like Gate Towered, wit' an higher watch Tower over the gate G. is the coat of *Neuwetter* of *Alsacia*.

VI. He beareth Argent, a **Circle** Imbroned with a **Round Wall**, Gules. by the name of *Burgum*. Yet most blazon it only (Imbroned with a Wall) but the Imbroning may be as well Square or Six Cornered, as Round; and therefore ought to be mentioned; Except the Round Wall (as in Round Towers) shall pass without any mention made of it, and all other cornered Walls to be named how they are, as in the next.

VII. He beareth Gules, a **fit Square Tower**, be-

tween two Square ones, Imbroned with an **Hexagone Wall**, the port having a **Chamber** over it, Argent: all **Covered** (or leaved) Azure. This is the Arms of the City or Town of *Salzburg* in the Empire of *Germanie*.

B. the like with **Gallaries** about the middle of the Towers A. is the States Arms of *Antorf* in *Holland*.

VIII. He beareth Gules, a **French Tower**, Or. by the name of *Burganny*. This I have caused to be set in this place to shew how the *French* and *Dutch* do generally make their Round Towers, either straight up, or **Battering**, as this doth: and not with any **Water table**, as we usually draw our Towers, as the examples afore said doth sufficiently shew.

G. such a Tower A. is born by *Van Caslemour* of *Switzerland*.

On the dexter side is engraven a **Fane**, a thing made either of Brass Copper or Iron; and fixed so with Sockets upon an Iron **Rod**, that being set on the top of a Tower, or any other high place, it will turn about: and thereby shew in what part the wind bloweth. It is termed a **weather Fane**, or **weather Cock**, of the *French* a **Safonon**.

But because there is so many varieties of **Fanes** born in coats of Arms, as in the examples following will shew, *numb. 21 22 30*. That except a Square Fane should pass without any further addition, and the others named; I think it would not be amiss to term it a **Square Fane**, **Roded**, and **headed**. But, yet ever note this, that they are generally made into **ends**, either square, or **waved**, and **pointed**; only some few I have found in Arms both round, square, and with one point; as you may see *num. 20 21 28 & the 12 num. 38*.

B. the like in Bend, quarterly G. & A. is the coat of the City or State of *Wurtzburg* in *Germanie*. The like also is born for the Bishoprick of that same place.

IX. He beareth Argent, a **Castle** with four Towers, Gules. Otherwise termed, a **Square Castle Towered**, or a Square Castle fortified with four Towers, or a Tower at each Corner. This is the Coat Armour of *Castleton*.

Per fesse Undee S. & B. the like Castle A. was born by one *Ransan* a Kt. of the Order of *St. Ia.* of *Jerusalem*.

X. He beareth Verr, a **Square Fort**, or **Cittadel** Gules. By the name of *Fortresse*. This is by most of our Heralds called a **Castle**, or a **Square Castle**, or **Tower**. But I cannot see how it may be termed a **Castle**, by reason it hath no Towers to fortifie it, there being no Castle without them.

XI. He beareth Or, a **Castle Wall** extending it selfe through the field, the **Gates** open (or the **Port** displaid) being triple Towered, Gules. born by *Van Pogrel*. There is a dispute amongst Heralds how rightly to term this. Some would have it when the Architecture, or Masonry extendeth it selfe all over the field, out of the base, and one side to the other; then it must be named a **Castle**. Others will have it called a **Tower** triple Towered, or with so many **Turrets**.

But

But when what arms they would give to the foregoing examples, I shall leave to such to determine.

G. Note that when the Gates are open or displaid, it must be received that the field must be transparent, so as it may manifestly shew itself through the same: so that all the port is to be Or, if the conceived shadow representing the thickness of the Wall, did not extenuate a part of the same.

G. the like **A.** with an Escuchion on the Port charged with 3 Nails between a smahy Mulberry leaves all meeting in Point. belongs to the City of *Hamburg*.

A. the like wall (Sans port) with one Tower betw 3 Roses **G.** is the Arms of the Town of *Cronsch*.

A. the like wall (Sans port and towers) **G.** with an Eagle issuant **S.** is the coat of the Town of *Isenheim*.

B. on the top of a wall so extended **O.** a demy man with an hatchet or polax in his right hand, & the other on his side **P.** clothed **O.** born by *Voyten of Aspurg*.

XII. He beareth Argent, a **Castle Wall**, with a port or Gate in the same Gules; having a Portcullis over it Sable. Born by the name of *Wall*. This cannot properly be called a Castle (though of old it hath bine so) by reason there is not any fides, Ends, Towers, or the like, Visible; which are incident to Castles, and without the which they cannot be Castles: but are taken for *Forts, Holds, or Cittadels*. &c.

Walls how several ways made.

Walls of Castles, Churches, Houses, or Forts, both now and in former ages have bine made these ways.

1. That way called **Reticulare**, or **Net Worke**, walls made Net-ways or Lofeng wise, whose Foundation, Coignes, and Cornices, were Square Stone.

2. A **Quadrell Wall**, that is a wall of Artificiall Stone, as Brick, Tyle, &c. And it is made either a **Single wall**, that is of a Brick length. or a **Double wall**, which is of a Brick and an half in length. or a **Dogged wall**, being only of a Brick breadth.

3. A **Cement Wall**, that is a wall made of River Pebbles, or Marble Stones Split in the middle, that side Smooth being layd outward, makes even walls; Of this kind of work a part of *White Hall* in *London* built by Cardinal *Wolsey*, with other ancient Fabricks, are made. Whose Foundation, Coignes, and Cornices, generally are Free Stone, Greet Stone, or Brick.

4. A **Rough Wall**, that is a wall made of Irregular stones, Rubish stones, and Stones never hewed, or made even. Such kind of walls are much used for the fence of Gardens Orchards &c. being pointed, and made even with Cement, Morter, or Clay.

5. A **Square Wall**, is a Stone wall made of squared stone, hewed wrought and smoothed. Of these square stones is made the **Rustick wall**, of which there are two sorts, as **Revealed rustick**, that is when the edges of the Stones are ciphered off, or worked Beville. Or a **Rabbat rustick**, that is when there is a **Rigget** or a **Channel** in every joynt of the square Stones. A **per-pin wall**, is a Single stone wall.

6. A **Rampier Wall**, of some called a **Riempiut**

Wall, or **Coffer worke**; this is made of Planks set edgewayes the thickness of the wall, and so bound up with pieces of Timber, then filled with Morter and Stones of all sorts mixt together, and so on from Course to course, till it be made the height agreed upon. After this manner are walls made of only Earth, or Sodds, or else Clay and Straw mixt; commonly called **Mud walls**. So **Baskets** filled with earth, are good defence in tymes of warre and hostility.

XIII. He beareth Or, a **Triangle Castle**, or **three square Castle** at each Corner a **Tower**, the **Port open**, Gules. is the Arms of the City or State of *Mosburg*. Thus you have the blazon which I found with it, Yet on the other hand it may as fitly be termed a **Castle with three Towers**, the **Port open**, (or the leaves of the **Gates displaid**) having a **Penon**, or **Stramer** fixed in the middle Tower watching or waied. **A.** the like **G.** is born by the name of *Treastile*.

XIV. He beareth Argent, a **Turret**, or top of a **Tower**, Gules. by the name of *Troville*. When this is born in a coat of Arms it is so termed; but in Crests & Cognizence belonging to Arms, it is generally called a **Crown Murall**, as you may see *chap. I. num. 25.* as out of a **Crown Murall** such or such a thing.

B. 3 such **O.** born by the name of *Turret*.

XV. He beareth Vert, the **Turret** or **Cop** of a **Tower Reversed**, Argent; with a demy **Lion Issuant**, Or. born by the name of *Procade*.

XVI. He beareth Gules, out of a **Crown Murall**, or the **Turret** of a **Tower**, Or; a **Square tower** (or a **Square One**) Argent. born by the name of *Towering*.

B. 3 such **O.** by the name of *VanDerostheim*.

XVII. He beareth Azure, a **Portcullis**, Or; **Chained** (or with **Chaines Pendant**) Argent. born by *Porcull*. Some term this a **Portcullis** of 9 pieces, but to number the Squares of things of this nature it is needless; for they may as well mention the number of the Links in the Chain. See *n. 102.* and *104.* other kind of **Portcullis**'s.

G. 3 **Portcullis**'s chained **O.** is born by the name of *Macfast* an *Irish* Family.

XVIII. He beareth Argent, an **Arch** of a **Gate**, or a **Gate**, Gules; the **Leaves open**, or **Gate displaid**, Or. Some term it, the **Gate opened with Leaves**; for a **Gate** when it openeth double after this maner, is by Workmen called **Leaves**, each side being a **Leave** of a **Gate** or **Doore**, which thing is a very common term amongst us to all double, or foulding **Doors**.

XIX. He beareth Or, a **Portal** with the **Leaves**, or **Double Doors** Displaid, or **Opened**; fixed or **Mounted** on three **Degrees**, or **Grices**, and adorned with a **Pedement** and **Capitals**, Gules. This is taken to be no other then the adornment of a **Door** that leadeth into some principal **Room** in a noble mans house, which are generally called **Portals**, or **little porches**.

M m m

For

For as the great and wide Porch is at the entrance into the Hall, or Mansion house; so the Portall is the outward entrance into the principall Rooms. Therefore in short to term it a **Portall**, is sufficient, the other adornments being dependant thereunto.

Perry per fesse G. & A. in each part such a Portall counterchanged, is the coat of *Van Der Port*.

A. the like Sans Pedement S. which is by the French blazoned, the Porch or **Portall** of *St. Vincent's church*. Born by *George King of Russia and Muscovia*, whose daughter *Anna* married *Henry* the first king of *France*.

XX. He beareth Or, on a Bridge of three Arches extending it selfe throughout the field (or to the sides of the Esccheon) Gules **Bazoned**, Sable, the **Streams Transluent**, Proper, 2 Fane Argent. This I have seen blazoned a fesse in form of a **Bridge**. This is born by the name of *Fanrige*.

The like is born by *Stonbridge*, having the water running in three Courses, or Streams.

Also *Tranbridge* of *Tronbridge* beares the same coat.

XXI. He beareth Azure, a Fane of three points, **inaded**, Or, the **Rod** or **Stem** garnished Argent. This is also termed a Fane of three pennons, or a **Banner** of three pennons, or with so many ends. It is born by the name of *Fane*, or *Vanen*.

The other Fane set on the sinister side of this quarter is termed a **Fane**, or **Gausanon**, or (after some Authors) a **Conferon**, or a **Suydon**, rounded in the corners, and **Pendant**; but more short blazon it, a **Round Fane**, pendant.

When they are **Pendant**, or hanging down, it is always supposed to be without a **Rod** or **Stem** in the **Sockets**: But to be the Fane it selfe; without any other thing belonging to it. see num. 22. and c. 12. n. 38.

B. such a Fane O. is the Town Arms of *Keyserberg* in *Germanie*.

XXII. He beareth Gules, a **Dutch Fane**, Argent, born by the name or family of *Die Maleit Van Heytzenstein* in *Bavaria*. This I term a **Duch Fane**, because the *Heralds* in those parts do ever draw them after this maner, which may firly be blazoned a **Fane pointed & square**, as being a pertaker of both. Some term it a **Bandart**, or a **Pennon Banner**.

Seaven such, the half *Endorsing*, or set *Contrary* to the others *Azure*; *Stems*, Or. Being the *Crest* or *Van Bemdorf* in *Germanie*.

Out of a *Coronett* 2 such *endorfed* with a *Peacocks* *Taile* between: is the *Crest* of the Count *Starkenberg*.

In the base of this quarer is placed an other fashioned **Fane**, having neither *Sockets* for to turn upon a *Rod*, or regular ends; but *Beviled* of from the *Square* on both sides, by reason whereof the two out points or ends, are much shorter then the *middlemost*, which is made sharp through the *Beviling* of the lower corners or angles.

This Fane thus made is blazoned, a **Plain Fane** of three ends **pendant**, and **Rebated** on each side per *beville*. or the points *Beville*-wise. or the middle point **pointed**, and the outwards **counter beviled**.

G. the like A. is born by *Die Eberhardt* of *Switzerland*

A. the like Fane with 3 *Sockets* G. is the Arms of the Town of *Balingen*.

XXIII. He beareth Azure, a **Castle Wall** with an **Open Arch** **Battled** **Imbattled**, a **Trefoile** on the top **Battlement**, Argent; **Bazoned** Sable. Born by the name of *Wallach*. This is also blazoned in short, an **Arched Wall** **double Imbattled**; or **Battlement** raised into *Grices*. &c.

It there be more *Arches* then one in a *Wall*, it is termed a **Wall** **double** or **trible Arched** &c.

S. a *Wall* extending it selfe throughout the fesse and base part of the field, **double Battled**, & in chief 3 *flowers de lis* A. is born by *Die Kallner* of *Frankenford*.

XXIV. He beareth Argent, a **Bridge** of 3 *Arches*, extended to two *Towers*, fixed to the *dexter* & *sinister* sides of the *Esccheon*, Gules. born by the name of *Towerbridge* or *Turbridge* of *Ruthyn* in *Wales*. This is also blazoned a **Bridge** with 3 *Arches* in fesse, **conjoined** to 2 *Towers* extending to the out sides of the field. But others more short, a **Bridge** with 2 *Towers* **Canopy roofed**, extended through the middle of the *Shield*. Yet the *Welsh* Bards term it no other wise then a **Bridge Tower'd** at the ends.

XXV. He beareth Vert, a **Square Tower** with a **Bridge** of three *Arches* extending to the sinister side, Argent; with a **Stream** of water palewayes, issuing through the same, Proper. The *Welsh* blazon it thus and not improperly, Vert, a **Watery Pale**, with a **Bridge** **treble Arched** extended over it, & a **Tower** at the end, (or at the dexter end) Gules. This is the coat of *Towerbridge* of *Caerwalen* in *Northwales*.

XXVI. He beareth Argent, an **Arch** of a **Bridge** extended, and **triple Towered**, Gules; in base, **Water** with three *Ships* therein, all Proper. Born by the name of *Bridge water*.

G. a **Bridge** of 3 *Arches* extendant, **triple Tower'd** A. having so many *Streams* proceeding, and running into the base, **Bendwise**, Proper. This is the quartered coat belonging to the Town or State of *Zwickau*.

XXVII. He beareth Air and **Water**, a **Bridge** of three *Arches* extendant in fesse, Gules. The *German* Blazon it *Azure* a **Bridge** of 3 *Arches* with **Water** **transluent** into all parts of the base, Proper. And is the coat Armour belonging to the Town of *Kitzing* in the Empire of *Germanie*.

XXVIII. He beareth Azure, over a **Water** in base, a **Planked** or **Wooden Bridge** extendant in fesse, in the middle thereof a **Draw Bridge** a part drawn, or a little lifted up, Or. And is born by the family of *Angermund Van Bruck*. Some term this no more then a **Draw Bridge** over a **Water**.

XXIX. He beareth Gules a **Pillar** **Fusilee**, Argent. of some termed, a **Column** **Fule** or **Fusile**; so are they blazoned by Mr. *Boswell* pag. 116. Who saith that such *Pillars* were erected by *Charles* the Great in his *Palace* of *Ingelheim*; which were removed by the Prince *Pa*.

Palatinate to his Castle in Heidelberg, as testifies *Mun-
ster*; which were erected by them, *In perpetuum Artis
Vulsi*. In perpetual remembrance of the
Spinners craft. Some call them *Fusile Pillars*.

In the dexter base is set another kind of stone *Fusile
Pillars* of Stone, which I find born in Arms; viz. Sable
three *Fusils* in fesse Quarterly Squared, Argent;
a Bordure Or, is born by the name of *Van Bansteten* of
Switzerland. Some call this a *Square Fusile*, or a
Stone *Fusile*, or *Pillar fusile* 4 square.

In the sinister base is set another sort of a *Stone
Fusile*, or rather the *Basis* or Foot of a *Square
Pillar*, which Workmen call the *pedestal* of a *Pillar*,
or the *Plinth*, or *Plinthus*, of a *Pillar*: that is the ne-
ther part of a *Pillars* foote, beareing the form of a four
square Stone.

A. the *Plinth*, *Pedestall*, or Foot of a square *Pillar* B.
is the coat & crest of *Enningen* in the *Netherlands*.

XXX. He beareth Or, a *Column*, or Round *Pillar*
with a *Chapiter*, Azure. This is born by the name
of *Columelle*. The *Column* or *Pillar* is often born with
and without it *Chapiter*, and as often without its *Pede-
stall*. Of each I shall give some examples. as

B. a *Pillar* on the further side of an *Horse Currant* to
the sinister A. born by *Van Konige of Thuringians*.

G. a Boys face Couped below the Shoulders, between
2 *Demy Pillars* A. born by the name of *Billeriet* of
Frenbern in *Germany*.

S. 3 *Pillars* in fesse, the middle Crowned O. by the
name of *Van Ezell* in *Silicia*.

A. a *Column* in Bend S. born by *Van Kutzleben*.

The Parts of a Pillar.

The *Pedestall*, that is the Foot or Bottom of a *Pillar*,
whither it be round or Square.

The *Pillar*, is the Body or middle part between the
Head and Foot, be it round or Square.

The *Capitall*, is the Top of the *Pillar*, or Head, on
which the round Ball stands.

The *Chapiter*, is the Ball or any other kind of work
that is made to adorne the *Capitall*, is a *Chapiter* of
such and such a thing.

There are other terms used for the severall Mouldings
about *Pillars*, *Columns*, and *Pillasters*; which I shall in
numb. 66 67. at the end of this Plate shew and further
describe unto you

In the sinister side is an other sort of Fane, called only
(a *Fane*) as having neither Points, or Waves, but is
Square. G. 3 such in bend A. is the Quartered coat
of *Raidenbucker* of *Bavaria*.

XXXI. He beareth Or, a *Pillar*, Sable, Entwap-
ed with an *Adder*, Argent. By the name of *Mynture*.
After this manner *Pillars* are Enwrapped with *Bran-
ches*, having *Flowers*, and *Fruit*, hanging thereat.

A. a *Pillar* enwrap with a *Vine Branch*, Fructed, P.
born by the name of *Vinyard*.

Lunet of Italy, beareth B. the *Column* A. the *Pede-
stall* & *Chapiter*, O. enwrapped with a *Serpent*. G.

XXXII. He beareth Sable, a *Pillar* mounted on
Trices, or *Steps*, and Crowned, Or, born by the
name of *Joab*. The *Pillar* is often Crowned, and not
set on *Steps*, but standeth upon its owne *Pedestall*. as
S. a *Pillar* Crowned A. by the name of *Kilburg*, ali-
as *Kilburg* of *Bavaria*.

G. the like A. born by *Heumenberg*.

The use of Pillars.

PILLARS Are the Hieroglyphicks of *Forti-
tude* and *Constancy*, and were erected for di-
verse ends and purposes; Some tymes to Limit out the
Bound, and the Possessions of People that Bordered one
upon an other *pro. 22 28*.

Some tymes for *Memory* of *Howes* made; as
that which was erected by *Jacob* at *Rebel* *gen. 28 18*.

Some tymes for *Ornament*, as those of the *Temple*,
1 *king 7 15* And of *Kings Houses*, as those of the *For-
rest* of *Lebanon*. *ver 2 3*.

Some tymes for *Testimony* of *Covenants*, as that
which was erected by *Jacob*, for a Memoriall between
him and *Laban*. *gen 31 44 45*.

Some tymes for *Monuments* to extoll the *Valour*,
Worth, and *Merits* of well deserveing Men; as those
that were decreed by the *SENATE* and *People* of *Rome*
to Men of *Special* desert, and approved *Virtue*. See
numb. 191.

Some times set on the *Sepulchres*, or *Graves* of
dead Relations; and so *Symon* the High Priest built 7
Pillars on the *Tombs* of his *Father*, *Mother*, and foure
Brethren. 1 *macc 13 27 28 &c*.

Sometimes they were set up for *Preservation* of the
names of *Families* from *Oblivion*, of which sort was
A Jolons, mentioned 2 *sam 18 18*.

Some time for a *Mark* of *Rebellion*, or *Disobe-
dience*, and a Memoriall for *Offenders*. Witness the
Pillar of *Salt* *gen 19 26 wisdom 10 7 8 &c* 1 *macc 15
33* And *Hannons* high exalted one. *ester 7 9*.

On the dexter side is the *Capitall* of a *pillar*, and is
the Crest of *Reimsdyck*, in the *Nether Palatinate* of the
Rhyne, it being adorned with a *Chapiter* of a *Plume*
of 5 *Feathers* G. & O. enterchangably.

XXXIII. He beareth Gules, a *Broken Pillar*, or
Column, Argent. Others term it the *Pedestall* with
the *Pillar* broken, or *Shaver* in the middle. Or
an *Half Pillar* set on its *Basis*, or *Pedestall*. This is born
by the name of *Lackirk* of *Poland*.

XXXIV. He beareth Vert, a *Pillar*, or *Column*
of the *Compositive Order*. Or a *Pillar* *Compo-
sed* in the *Capital* part, after the form of a *Demy-
Woman*. Or, a four square *Pillar* set on its *Pe-
destal*, whose head resembles a *demy Woman*. These
are kind of *Pillasters* and *Pillars*, which work men
usually adorn *Portals*, *Jaums*, and *Bancle Chim-
ney peeces*, more than *Pillars* for *Support*; though in
M m m 2 noble

uoble and rich carved Buildings, they are sometimes used for that purpose. See *numb.* 100.

XXXV. He beareth Argent, an Arch, Gules. This is born by the name of *Craber van Hulstet* of *Bavaria*. The Arch is ever to stand upon two Pillars either round or square, whose particular parts (if of contrary colours) are thus Blazoned; two Pillars, or two square Pillars Sable, Arched Gules, Capitals and Pedestals, Or.

G. 3 single Arches (as some term them) O. by the name of *Archer*.

XXXVI. He beareth Or, a double Arch, Gules. By the name of *Mesamick*, a *Poland* Family.

This is termed a double Arch (as the former example) a single Arch; but here is no consideration of what kind of Pillars the Arches are framed with.

For it is ever a term amongst Work-men of the Free Masons Science, to put a difference between that which is called a Column, and that which they name a Pillar; For a Column is ever round, and the Capital and Pedestal answerable thereunto.

The Pillar with its Capital and Pedestal square.

Therefore though this be all of one colour, yet for distinction sake there ought to be some mention of the Columns or Pillars on which the Arches are raised; so then I should hold this to be best Blazoned *Three Pillars Arched*; by reason they are square; and *Three Columns Arched*, if round.

Now as you see this is double Arched, so you may sometime meet with Coats with Triple Arches, &c.

XXXVII. He beareth Argent, the Grieses, or Degrees, or Steps by which we ascend to the Cross, Gules. Thus it is Blazoned by some; yet others term it three Grieses on the Top, the Foot or Basis of a Pillar. See *lib.* 1. *cap.* 5. *numb.* 45. 46. 47. This is born by the name of *Grice*.

B. a Wall in Base having two Grieses A. Masoned S. is the Coat of *Riehen* of *Switzerland*. Though this might be Blazoned a Wall with one Battlement Imbattelled.

XXXVIII. He beareth the Prospect of the inner part of a Church or Cathedral, extended all over the Field, Argent; the Ground or Ile, contrary Tiled or Flagged, Sable and Gules. This is born by the name of *Altery* an *Italian*.

XXXIX. He beareth Azure, the front of a Temple, or a Temple Porch. Others term it a Porch supported by six Pillars, Argent. In some rare Structures the Pillars are Carved, and wrought into the shapes and forms of diverse sorts of Creatures, as I give an example, *numb.* 34. This may fitly be termed *Solomons Porch*, raised upon 3 Grieses. See *chap.* 20. *numb.* 42.

XL. He beareth Vert, a Pyramid, Or. This is also Blazoned a Pyramid of Egypt, because it is said that the Kings of Egypt set the Children of Israel at work in the making and Building of these, and such other

needless works, to keep them under, and hold them in Bondage.

B. on a Mount in Base A. a Pyramid O. born by the name of *Die Rolandt* in the *Palatinate* of *Rhine*.

XLI. He beareth Azure, a Steeple Spired, (or a square Tower with a Spire) Or. Born by the name of *Saxton*.

As the Tower or Steeple is either round, square, six or eight cornered; so is the Spire after the same form, as you may see in the next Beating.

XLII. He beareth Gules, a Tower or Steeple of six Cantons or six square, Spired Argent. Some term it an *Hexagon* or *Octagon* Tower, that is six or eight cornered; but Master Masons generally term it six or eight Cantons or Corners.

XLIII. He beareth Argent, a Church, or Mother Church, with a square Tower, or Steeple, Gules, with a Porch at the side; and a Chancel at the East end, Leaved, Azure. Born by the name of *Churchman*. The Steeples to Churches and Chappels are often drawn and made after the form of the foregoing Steeple, with Spires and Cantons, which ought to be taken notice of in the Blazoning, as *numb.* 83.

The several parts of a Church.

The Church Yard.	The Middle Iles.
The Turn Gate or Stile.	The Cross Ile.
The Walls of the Yard.	The Reading place or Desk.
The Church Body.	The Chief Seats.
The Bellfree.	The Pews.
The Clock house.	The Galleries.
The Chime Loft.	The Pulpit.
The Porch and Door.	The Organ Loft.
The Steeple.	The Screen.
The Turning Stairs.	The Chancel.
The Roof and Leads.	The Vestry.
The Windows East, West, North and South.	The Altar or Communion Table.
The Side Doors.	The Rails.
The Iles.	The Tabernacles.
The Side Iles.	The Turn or folding Seats.

In the chief of this square is set a Biere, a thing by which Dead Bodies are carried to their Sepulchers, Graves, or Burial places. That such are born in Arms, I have formerly shewed, *lib.* 2. *cap.* 17. *numb.* 68.

A. a Biere between 3 Skulls S. is born by the name of *Didmane*.

XLIV He beareth Vert, a Chappel, or Chappel of Ease Argent, Seiled or Tiled, Gules. Born by the name of *Chapler*.

A. the like G. Covered or Roofed B. born by *Coluva*, a *Polander*.

The Steeples of Churches and Chappels (if they have Steeples) are ever set on the dexter side of the Escocion,

cochion, and there the Church or Chappel is joined to it, so as but one half of the end of the Church, &c. can be visible, the other being hid by the Steeple; and thus they are always drawn except a Church be adorned and beautified with 2 Steeples, then they are set each side the end of the Church, and so the East end comes to be seen, as *numb. 45.* and *chap. 20. numb. 40.*

The difference between a Church and a Chappel of Ease.

There are three sorts of Chappels, the principal is a **Parochial Chappel**, which is endued with a certain Revenue by the Founder thereof; it is Consecrated by the Bishop of the Diocess as a place for Gods Service, where Reading, Praying and Preaching is exercised, and the Sacraments Administred, the Dead solemnly Interred; where no Duty is given to the Mother Church, the Parson or Minister, farther than payment of Tyths, in lieu whereof there is a yearly Salary or Stipend, (as his Curate) offered to the Chappel Priest.

The next is a **Chappel of Ease**, which is a Chappel that hath no Endowment but from the Benevolence of the people, and a Stipend yearly from the Mother Church under whom it is; in these Chappels they have nothing but Reading, Praying and Preaching, there being no Administration of the Sacraments or Burials, so consequently not Consecrated: These Chappels are built purposely by adjacent Towns, and habitations for the peoples ease, being at a great distance from the Mother Church, and where Parishes are wide and large, therefore called Chappels of Ease.

The last is a **Domestick Chappel**, which is a Chappel, or other Room set apart by great persons, either in or near their Mansion Houses or Halls, for Reading, Praying, and Preaching, for the ease and benefit of his own Household Servants, and such as are Neighbours; these are rarely Endowed or Consecrated, seeing the Chaplains ever stand to the Benevolence of the Lords: And therefore by some are termed rather **Oratories** or School-houses than Churches or Chappels.

XLV. He beareth Azure, a Church with two Steeples Argent; East end seen, Covered or Lead-ed, proper; mounted upon Grieces or Steps, Gules. This is the Coat Armour of the City of *Munster*, in *St. Georgenthall*.

A. on Grieces or Steps, a Church with two Steeples, G. Windows, Doors and Covering proper. This is the Arms of the Town of *Kirchen am Necker*.

Note that in Churches and Chappels, the Steeples are ever fixed at the West end; so that by the Steeple standing to the right side of the Escocchion, we must suppose it to be the West part; and then the foresaid Coats may be Blazoned, Church or Chappel with Steeples at the West end; or Churches, &c. with either round, square, or Cant Steeples, Spired (if Spired) else not.

XLVI. He beareth Ait and Earth, a Chappel with a square Steeple, or Spire Steeple on the middle

of the Roof, seated in the middle of **Prw Trees**, proper, having a way or path from the Door to the Base. This is the Coat belonging to *Wakicapell*, a Town in *Germany*. And but for the name it belongs unto, I should rather have termed it a **Collegiate Church** than a Chappel, by reason the Steeple stands in the middle of the Fabrick, as it doth in all **Cathedral, Minsters, Collegiate Churches and Chappels**; and not at the end like **Parochial Chappels**, or at the West end on the Roof, as most Chappels of **Ease and Oratories** have them, where they are made of Timber and Boards, after the manner of **Lan-thorns or Halls**, or **Lovers on Dove Houses**, in which the Bell or Bells are hung to be rung when the people are to meet together; or on a Frame of Wood, or in an Arch of Stone, as is shewed *numb. 48.*

XLVII. He beareth Argent, a Minister or a Cathedral, with a round Steeple, (Tower or Lanthorn) Spired, Gules; Windows or Lights, Doors and Covering, proper. This is the Coat of *Hollyston*, of *Hollyston*.

Some term this a Cathedral Church.

XLVIII. He beareth Argent, a Bell Azure, hanging by its Headstock and Guggions in an Arch, or a frame of Wood and Faned Sable; Fixed on a mount in Base, Vert. This is the Crest of the family of *Porter*. After this manner Bells are hung in little Churches and Chappels in the Wall, or Arch in the wall, on the West end thereof; either under the Roofe, or above the roofe, on the top of the Gable end; after this example.

XLIX. He beareth Argent, a Bell, or a Campan, Azure, Garnished and Imbossed, Or. by the name of *Campane*. This is termed a Campan, or Campan, from the French word, *Campaine*; or *Latine*, *Campana*, a Bell.

S. a Cheveron betw: 2 Spur Rowells & a Bell, O. by the name of *Die Rosenhart*.

S. a Saint Bell, or hand Bell, A. born by the name of *Die Freyteg*. This is called a St. Bell, because it hath not Canons on the head to fasten it to the stock; but one only Ring, by which it is held in a mans hand, and soe rung, the bearer going on.

The like A. Garnished O. is the Crest of *Indenkirch* in the Palatinate of *Rhine*.

Bells in these later ages have bine made of severall vast weights, and many hung together in one Tower or Steeple, which we term a Ring of Bells, in some is 2 3 4 5 6 7 or 8 few places exceeding the last number, for more cannot be for Round ringing, except they be rung in Changes.

There are in *England* Bells of a great and vast weight as the Great Bell, or Tom of *Tonge* in *Shropshire*; which requires 10 or 12 men to ring it, so as to make it strike on both sides, or half raise it; its weight is computed to be about 7000 pound weight.

The Great Tom of *Lincoln*, is judged to be 9500 weight or upwards.

THE

The **Great Com** of *Westminster*, whose weight is a bovt 3300 pounds; it is not to be rung, but hangs in a Tower alone, for the **Hammer** of a Clock to strike the hours upon.

The **Great Com** of *Oxford*, it is the largest Bell we have in our Kingdoms; its weight is 16400 pounds, or much there about; its Diameter in the Skirt is 7 foot and 9 Inches.

Yet these are far exceeded by the **Great Bell** of *Rouen* in *France*, whose Circumference is so larg (as travellers who have seen it, did informe me) that 50 men & upwards are able to stand together within the same as it hangeth up.

But the **Greatest Bell** (without doubt in the Christian world) is in the Great City of *Moscow* in the Empire of *Russia*, or *Moscovia*. It is hung in a great and wide Tower, it weighs three hundred ninety & foure thousand pounds; and the Clapper, Ten thousand pounds, the Diameter thereof is twenty three foot, and two foot solid mettles. It is as much as fifty men can move, and that only so as may be perceived. It is seldom rung, and that only on great festival dayes, or when any forreign Prince or Minister of State requireth it. When they intend to ring it, they make proclamation through the City, by which warning they rake down all their Glasses and Earthen ware, for it maketh all to tremble and Shake.

The severall Parts of a Bell.

The **Cannons**, those by which the Bell hangeth.

The **Crown**, the round top of the Bell.

The **Rings**, or **fillets**, are the curious molten work and Garnish cast on the out side the Bell, some tymes names and sentences are cast between the fillets.

The **Sound Bow**, the inner part of the Bell, from the lower ring to the top.

The **Skirt**, the bottom of the Bell.

The **Crown Stable**, that to which the Clapper is hung.

The **Baudrick**, that as tyeth the Clapper to the Stable.

The **Clapper**, that as makes the Bell sound, which hath in it these parts.

The **Eye**, that as the Clapper is hung by.

The **Shank**, the length of it to the Ball.

The **Leggs**, are peeces of wood bound about the Clapper to keep it from rowling.

The **Ball**, the round Bob at the Clapper.

The **Flight**, that from the Ball to the Clapper end.

Things for Hanging of a Bell.

The **Frame**, is that in which the Bell hangeth, it is made of strong Timber, fastned together with Mortelles and Tenents, Pins, Cramps, Bolts and Nails. &c.

The **Head Stock**, a great Square pece of Timber to which the Bell Cannons are fastned.

The **Guggions**, great Iron pins put in the Head Stock, for the Bell to turn with.

The **Brasses**, which are square with an hollow in the middle, and fastned in the Frame, for the Guggions to play in.

The **Bolts**, that goe through the Stock.

The **Cramps**, Irons that Clip the out side the Stock.

The **Cottreels**, and **Fithers**, are the Rings and tender Bolts to bend any way, thereby to keep the great Bolts and Cramps fast in their places.

The **Wheel**, by the help thereof the Bell is easily rung. There are three kinds of them; the **Whole Wheel**, which is direct round.

The **Three Quarter wheel**, is three parts round.

The **Half Wheel**, is only two parts of a round. In a Wheel there is these terms;

The **Rim**, that as the Rope turns in.

The **Staves**, the cross peices that supports the Rim.

The **Rowler**, which guideth the Rope to the Rim.

The severall wayes of Ringing Bells.

1. Is the **Under Salley**, that is when the Bells are raised but Frame high, so as the Clapper strikes on both sides the Bell.

2. Is the **Hand Salley**, when they are rung almost up, and one hand is put to the Rope to raise it.

3. Is **Round Ringing**, when the Bells are up at set, that is with their mouths upright, both in the Fore stroak and Back stroak, and so ring 1 2 3 4 5.

4. Is Ringing in **Set Changes**, that is, the Bells being set, they order which Bell shall lead away & what to follow, as thus, 1 2 3 5 4. Or 1 2 5 3 4. Or 1 5 2 3 4. &c. as they please.

5. Is in **Changes**, or **Tunes**, when they are rung to immitate the airy sound of a Psalm, or Song.

6. In **Chimes**, when the Bells Strik, or are stricken on one side only, either in Times or Round.

Note there are two sorts of Changes, as the **single Change**, is when all the Bells ring, and one is changed only from round Ringing, as 2 1 3 4 5 &c.

The **double Change**, is when two Bells are rung out of the order of round Ringing; as 2 1 3 5 4 &c.

Note also that Three Bells will make 6 Changes.

Four Bells makes 4 tymes asmany, viz. 24. changes.

Five Bells makes 5 tymes asmany viz; 120.

Six Bells makes 6 times asmany changes viz; 720.

Seaven Bells makes 7 times asmany viz; 4040.

Eight Bells makes 8 times asmany viz; 3220 &c.

A **Round Peale**, is to ring the Bells what space of the Ringers please.

A **Peale in Changes**, is to ring the three Bells the six Changes over. Or the foure Bells, the 24 Changes over. and so of the other Bells.

The First or **Treble Bell**, it is termed the **Hunt**, and the Second Bell, the **half Hunt**, because they run from the round Ringing, through all the change of Bells backwards and forwards, before they come to round Ringing againe.

The Great Bell, is termed the **Tenour**; the others, the Second, Third, Fourth Bell, &c.

L. He beareth Azure, an Altar (or a Jewish Altar, a Levitical Altar, or an Altar for burnt Offerings, with its Bars and Staves, Or. This was the form of the Altar which the *Israelites* used in their passage, or Travelling through the Wilderness towards the

the Land of Canaan. But when they were Inhabiters of that Land, King Solomon had Built a Temple, we hear of no further use of this, for then an Altar of Stone was made with Steps fixed to the side thereof to ascend to it, as is mentioned *Ezek. 43. 13. &c.*

The Description of the Jews Altar for Burnt Offerings.

The Altar for the Burnt Offerings or Sacrifices was made of Shittim Wood, and hollow between the Boards, it was five Cubits long, and five broad, and three Cubits high, it had Horns of the same Wood, made at the four corners, and was all covered with Brass: It had also a Grate, like Net-work of Brass made unto it, which had four Brass Rings at the corners, this was put under the compass of the Altar beneath, that the Grate might be in the midst of the Altar, through the Rings of the said Grate were put 2 Bars of Shittim Staves covered with Brass, which remained by the sides of the Altar to bear it by, as you may read *Exod. 38. 1. &c.*

LI. He beareth Gules, the Ark of the Covenant, or the Ark of God, or the Jews Ark, with its Staves or Bars, having the Mercy Seat fixed upon it, Or.

The Description of the Jews Ark of the Covenant.

The Ark was made of Shittim Wood, 2 Cubits and an half long, and a Cubit and an half broad, and a Cubit and an half high, and was overlaid with pure Gold both within and without, it had a Crown, or a Circle and a Border of Gold round about, with four Gold Rings in the four corners thereof, having Bars of Shittim Wood overlaid with Gold, put into them, which were not to be taken away from the sides of the Ark, but to bear the Ark by them.

Upon this said Ark was placed a Mercy Seat, it was of pure Gold, two Cubits and an half long, and a Cubit and half broad, that was as a Covering for the Ark, on which was placed two Cherubims (all of pure Gold, of work beaten out with the Hammer) at the two ends of the Mercy Seat, with their Faces one towards another, and their Wings stretched out on high to cover therewith the Mercy Seat. In this Ark was only laid up, for a perpetual Testimony and Remembrance, the Tables of Stone with the Law written upon them, Arom Rod, and a Pot of Manna; of which you may read further, *Exod. 25. 10. 11, &c.* Therefore it was called the Ark of the Testimony, because it kept the Law in it, *Exod. 26. 33. 34.*

LII. He beareth Vert, a Table Or, whereon is placed 2 Dishes, each having Twelve Cakes or Loaves of Shew Bread, covered with Goblets or Incense Cups, proper. In brief it is termed the Table of Shew Bread. It was used in the Jewish Ceremonies of their Religion, and according to the Almighty's appointment, it was made of Shittim Wood, two Cubits long,

a Cubit broad, and a Cubit and an half high, it was overlaid with fine Gold, and had a Crown of Gold round about, with a Border under the Crown as wide as breadth all of pure Gold: Also it had 4 Rings of Gold fixed to the feet under the Border, through which were put Bars of Shittim wood, overlaid with Gold, to bear the Table.

All the Instruments for the Table were of pure Gold, as the Dishes on which the Shew Bread was set; and the Goblets and Incense Cups which covered the Bread, were all of Gold, as you may read *Exod. 37. 10. 11, &c.*

LIII. He beareth Sable, a Candlestick of seven Shafts or Branches, with Lamps fixed thereon Or. this was a Candlestick of Gold with the Lamps thereof, which was to burn continually in the Tabernacle of the Congregation of Israel. It was set without the Vail on the South side, over against the Table of Shew Bread, which stood upon the North side.

This Candlestick was of pure Gold, of work beaten out with the Hammer; the Shaft and the Branches, the Bowls, Knops and Flowers were all of one piece, six Branches came out of the sides of the Shaft, three on one side, and three on the other, each Branch having 3 Bowls like Almonds, a knop and a flower; and upon the Candlestick shaft were 4 Bowls like Almonds with knops and flowers, that is, under every two Branches a knop: Also the Lamps for the Branches were made of pure Gold, with the Snuffers and Snuff Dishes belonging therunto. The foot of the Candlestick branched out four ways, being all of Gold, garnished with Imbossed work of knops and flowers, as you may see *Exod. 37. 17 and 25. 31, 32. &c.* This they termed the Golden Candlestick with its seven Lamps.

Per Fels G. and B. a Candlestick of three Branches O. in each Socket a Banner of two points A. is born by the name of Van Orge.

LIV. He beareth Gules, the Altar for Sweet Incense, or Sweet Perfume, having the Intense pot burning thereon, Or. This Perfume Altar was made of Shittim Wood, the length and breadth alike, a Cubit square, the height two Cubits, the horns of the same Wood, all overlaid with Gold, both the top and sides thereof round about, having a Crown of Gold round about, and Rings on the sides, that they may be as places for the Bars to bear it withal, which were made of Shittim wood and covered with Gold. This Altar and the other beforementioned, *Numb. 50.* were in Solomons time, made all of pure Gold, without any thing of Wood, as we read *1 Kings. 7. 48. 49.* This Altar was set before the Vail of the Tabernacle, or in the Sanctuary (over against the Mercy Seat,) but not in the most Holyest of all.

LV. He beareth Vert, a Roman Column Altar, Argent, with a Flame upon it. The ancient Romans had two kinds of Altars, the one round, the other square, and therefore to distinguish it from the common Altar, which was usually made square, I could not give it a better Title than a Column Altar, or a Caesars Altar, because when they dedicated any Effigies, or set up any Statue of their Emperours, whither in whole

whole, or in part, they generally fixed the same upon such a round kind of Basis as this is.

A. the like G. Fire proper, is born by *Polata*, an *Hungarian*.

A. 3 such G. is born by *Mandalio*, of *Poland*.

He beareth Or, a *Roman Altar*, Gules. The concave in the middle of this Altar, shews that it was erected for the burning of Incense, and Sweet Odours therein, as their manner was; for Frankincense was much used in those times of Idolatry.

Such an Altar as this was in the year 1653. found upon the occasion of digging a Sellar under an house in the *Foregate Street* in the City of *Chester*; having an hollow on the top, and a double *Caterfoile* on one side, and a *Sacrificing Vessel*, like a *Jugg*, or *Cruller*, on the other side (as the figure represents) having this Inscription on the face side, that opposite having nothing thereon: so that I judge it to have stood to a wall. It is about a foot Square, and a Yard high.

I. O. M. TANARO. T. ELVPIVS. GALER.
PRAESENS. GVNA. PRI. LEG. XXV. V.
COMODO. ET. LATERANO. COS.
V. S. L. M.

Which may Questionably be read thus.

Fori Optimo Maximo Tanaro. Titus Elapius Galerius Praefens Gvna (i) Gubernator) Primus Pilus Legionis Vicefime Valentis Victrix. Commodi et Laterano Consulibus. Votum Solvit Luceus Merito.

Which may be thus Englished.

To Jupiter the Best and Greatest, the Thunderer. Titus Elapius Galerius the present Governour (of the Roman Garrison here) and first Leading Captaine of the Twentieth Legion called Valens Victrix, in the year as Commodus and Lateranus are the Roman Consuls, he doth willingly pay his Vow to him, who hath deserved it at his hands.

For it was an usuall Custom among the Romans, for Persons of greater quality, when they undertook any great enterprise, or what was difficult and dangerous; or were pressed with some extraordinary evil: To make a Solemn Vow to *Jupiter*, that if he would give good Success to their Attempts: Or deliver them from their Peril and Pressure they were under, they would in token of Gratitude erect an Altar to him for a perpetual remembrance of the Divine benefit received.

In the foresaid Inscription the late Dr *Usher* Archbishop of *Armagh* takes the word GVNA to stand for *Gubernator*, (i) the present Governour here. And so we read in *Herodian lib. 3.* That *Brittaine* was divided in duas *Praefecturas* sive *Gubernatores*, into two Governments.

Upon which place of *Herodian* a late Writer both in Learning and of much reading, affirmeth: the one Governour to have been placed at *York* in the *Lower Brittain*, with the Sixt Legion: and the other Governour to have been placed at *Chester* in the *Higher Brittain* with the Twentieth Legion, which had the titles of *Victrix & Valens*.

Then the letters LEG. XXV. V. as it is upon the Stone might seem to contradict, and import the Twenty fifth Legion called *Victrix* to have lay'n here: But doubtless by oversight of the unlearned Graver, the former V. is writ too near the XX. and a prick omitted, which should have been betwixt them. For it doth not certainly appear, that ever there was any Legion called the Five and Twentieth; especially in the time of the Emperour *Antoninus Pius*, under whom this Inscription was made.

For if we consult that accurate Catalogue of the Roman Legions, which *Dion Cassius* reciteth of the *Roman History* pag. 564. As also in those severall Catalogues of the Legions, both which were under *Augustus*, and which were added by the following Emperours, out of sundry Authours: And out of that Marble Pillar as was kept at *Rome* in the Capitol. all recited by *Panciroli*, in *Comment. in Notitiam Dignitatum utriusq. Imperij.* pag. 61 62 63. there is no mention at all made of any Legion called the Five & Twentieth. *Protonie* also who lived and writ in the very time of *Antoninus Pius*, affirmeth plainly, that three Legions only came for *Brittain*. viz: the Sixt Legion, the Twentieth Legion, and the Second Legion, called *Augusta*.

Also *Panciroli* asserteth the same pag. 142. And our Learned *C Camden* speaking of the City of *Chester*, hath these words: That the twentieth Legion called *Valens & Victrix* resided in this City. And an ancient piece of Coin of *Septimius Geta*, doth prove that *Chester* was a Roman Colonie, on one side it hath this Inscription,

COL. DIVANA. LEG. XX. VICTRIX.

And also not many yeares since (even in my time) upon opening the ground of a Back side in the *Bridgestreet* in *Chester*, a Vault was discovered, from whence was digged up certaine goodly Tile stones, having on them, this Inscription in full words.

LEGIO VIGESIMA VICTRIX.

others more short thus.

LEG. XX. V. V. & LEG. XXV. V.

Where we see the two V's in some at a distance from the XX's and in others joyned to them. Hence it was that this City was called *Caer-Leon*, that is the City of Legions: and *Cestria* from *Castra*, by reason the Romans Camped there.

This Inscription was Engraven upon this Stone in the seventeenth year of *Antoninus Pius*, in which year *Lucius Aelius Commodus*, and *Sextilius Lateranus* are Registered to be Consuls; which according to the best Historians is said to be 154 yeares after the Birth of Christ, which shew our City to be of no small Age and Account in those days, having the 20 Legion quartered in and about the same.

LVII. He beareth Azure, a *Roman Sacrificing Altar*, with a Flame thereon. This Altar was much larger than the former, being made long and high, of many Stones, that it might be able to contain the thing Sacrificed, to be Burnt thereon, whether Sheep or Oxe: on the sides of their Altars, they used to Engrave the names of those Gods to whom it was Dedicated, as appeareth from *Afts* 17. 23. and that abovesaid name.

I.VIII. He

LVIII. He beareth Sable, a **Laver**, or a **Brazen Laver**, or the **Jets Laver** of the **Tabernacle** or **Temple**. This was set in the Tabernacle of the Congregation between the Altar and the Door, and afterwards set in the Temple, with water put therein; which was for the High Priest and his Sons to wash their hands and feet, before they went to burn the Sweet perfume, or did minister in the Holy Place. This answereth to our **Font** under the New Testament, wherewith Children are washed, by **Dipping** or **Sprinkling**, before they are admitted into the Christian Church.

G. the like O. is born by **Laver**.

LVIII. He beareth Gules, a **Brazen** or **Molten Sea** of the **Temple**, Or. Else according to it form you may term it, a **Sea**, or **Caldron**, set upon the backs of **Twelve Bulls**. This was set in the Temple Court on the right side, Eastward toward the South. It was called a **Sea**, from the great quantity of water as it holdeth; for it was ten Cubits wide from Brim to Brim, and five Cubits high: Under the Brim was rows of knobs like wild Cucumbers, round about. At which part by reason of its declining narrower from the Brim, a line of 30 Cubits did compass it about. It was an hands breadth thick (or a Span as some say) and the Brim was wrought with Flowers of Lillies, it contained two thousand Baths of water; each Bath being as much as ten Pottles of our measure. See 1. k. 7. 23. &c.

It was set upon twelve **Braze Bulls**, three towards the North, 3 towards the South, 3 towards the East, & 3 towards the West, and their hinder parts were inward. This Sea was for the Priests to wash themselves in. 2. Chr. 4. 6. &c.

LIX. He beareth Azure, a **Caldron** set upon its **Base**, Or; the **Wheels**, Argent. These were for the service of King **Solomon's** Temple, and were set 5 on the right hand, and 5 on the left hand of the Temple Court, for the Priests and Levites to wash in them, and to cleanse in them that which appertained to the Eunt of serings. The fashion of them was thus, the Caldrons were round like somany hollow Basons, four Cubits over, they held 40 Baths apiece, which was set upon a four Square Base; that is, one Caldron on a Base.

The work of the Bases was on this manner, The had Borders between the Ledges, which were carved with Lions, Bulls, and Cherubims, and every Base under the Borders had four Wheels, and the Axle trees of the wheels joynted to the Base, and the height of a Wheel a Cubit and an half, their fashion was like a **Chariot Wheel**, their **Axle trees**, their **Haves**, **Felloes**, & **Spokes**, were all of Molten Brasse. And four **Under-letters** were upon the corners of one Base, which upheld the Caldron on the Base, on whose top there was a round Compass of half a Cubit high round about, which was called the **Pillar**, or **Chapiter**, or **Small base** of the Caldron.

LX. He beareth Gules, the **Dosh**, or **Dosh Cup**, **Covered**, Or. This is a rich Chased, and Imbossed Golden Cup, with Spirall tops, wrought on the Cover thereof, with figures of Saints, and Crucifixes round about, very richly made. In which the Popish Priests

in great Cathedrals administer the Sacrament of *Christs* Blood: Which they carry also in great state in their Processions: Also with the same they go to give the Sacrament to any that is sick or diseased.

This blazoned as abovesaid, is born by the name of *Hofell*. The same also by *Don Cazaro*, a *Spaniard*.

G. 3 such A. born by *Alberine* of *Italy*.

LXI. He beareth Gules, a **Cup** Argent. Born by the name of *Cup*. This as it is set amongst the Utensils of the Church, may be termed, a **Communion**, or a **Sacrament Cup**.

S. 3 *Cups* A. is born by the name of *Cupler*.

A *Demy* man holding a Cup in one hand, and an Arrow with the Head or point erected P. Clothed B. is the Crest of *Schencken* of *Bavaria*.

LXII. He beareth Sable, a **Font** set upon its **Basin** with **Grieces**, and **Covered**, Argent. Born by the name of *Fontall*. This is by some only termed a **Covered Font**, and no more.

The **Font** Uncovered set upon a **Pillar**, or **Pedestal**, fix on three **Grieces**, or **Staires**, Or; in a field Azure. is born by *Fontley*.

LXIII. He beareth Azure, a **Popish Altar**, or an **high Altar**. But to name the particular, say, an **Altar**, or **Table Covered** with an **Altar cloth**, whereon is placed a **Crucifix** between two **Candlesticks** with **Wax Lights** or **Candles** burning, all Proper.

It it wene a **Table Covered** with a **Dish** Cup and **Flagon** on it, it is termed a **Communion Table**.

Things pertaining to an Altar.

The **Linnen**, is that with which the Altar is covered.

The **Crucifix**, is the Image of Christ on the Cross, & other Saints pictures, and their holy reliques, hung on the back and over the Altar.

The **Capers**, are wax Candles set in Silver or Gold Sticks, to burn daily thereon.

The **Patina**, the Dish for the making of the body of Christ, or Plate on which the Wafers are put.

The **Corporal**, the Linnen, or Napkin to cover it from dust.

The **Chalice**, a Cup for the blood of Christ, or Sacramental Wine.

The **Pix**, of some called the **Ciborium**, or **Eucharistial**, is a Box wherein Christ's body in form of wafers is kept, as in a Sepulchre.

The **Capsae**, are Coffers or Chests in which the Bones of Saints are kept; and other Reliques of theirs which are laid under the Altar.

The **Censer**, and **Incense**, are Pots in which perfumes are burnt.

The **Cross**, the figure of Christ's Passion.

The **Basin**, the **holy Water**, and holy water **Sprinkle**, that as holds the water, and also that with which the people are sprinkled.

The **Flap**, or **Fan**, to drive away Flies from the Chalice.

The **Rasles**, to inclose the Altar.

Non

Uch

Particuls of a Romish Church.

Reliques, are Bones or Gifts of Saints departed, placed in some part of the Church; especially neere those Altars dedicated to them.

Images, Pictures of God the Father represented as an old man, with a triple Crown on his head, because Daniel calls him the Ancient of dayes.

Pictures, as Christ either at his Birth, on his Travails, with his Apostles, in his Preachings, or Disputes, in his Agony, or Passion, his Crucifying, Death, and Buriall, also his Resurrection, and his Ascension. All which the Walls and Windows are adorned with, to adorne the Simple, and the Ignorant to Adore.

Holy Ghost, set forth in the figure of a Dove with a glory about it.

Statues, Figures of Saints, and Angels, set within and without the Church to be Idolized.

Capers, and **Candles** in Sticks, which they burn to the honor of Angels and Saints by day.

Lamps, Lights burning to them all the night.

Doors, Beeswax burnes to expell bad vapors.

Organs, Musick to stir up, and excite the minde to quick and lively devotion.

Baptisteria, the Font of Stone which keeps water in for Baptizing Children.

Cists, or **Flagons**, for to keep Oyle and Chrisme in for Baptizing.

Aquinnaria, of some called **Amula**, or **Situla**, Holy water Pots of Stone, or Marble, to which is fastned with a chaine, the Holy water **Spung**, to Sprinkle.

Bells, to call the people together to heare Mass.

Ropes, to Ring, Toll, and Chime the Bells.

Clock, or **Diall**, to tell or show how tyme and the day passeth away.

St Bell, a little Bell rung in the Mass, to give the people notice when to bear their Breast, and make a matter with *mea Culpa* &c.

Mass Books, **Psalters**, and **Singing books**, for the Canong over of their Services, and Anthems.

Vestments, the Priests Habits, which are diverse according to their Orders in the Church, which I have shewed you before. Thick with other needles and foolish toys, in which they place much of their Religious worship, being not worth mentioning, I pass them over.

LXIV. He beareth Vert, a **Chalice**, or **Calice**, born by the name of **Calice**, or **Chalice**. This is a Common Sacrament Cup, used generally in all Popish churches, being either six or eight Squares in the Bowl part, growing smaller and smaller from the top to the bottom; the Foot is in some Square according to its top, others of a Circular form. It hath its name **Chalice**, borrowed from **Calix**, which is the Latine word for a Cup, Por, or Goblet, or such like to drink in.

B. 3 such A. is born by **Lemart**.

In the Dexter side is a **Candle Stick** with a **Candle** burning in it. Or term it a **Candle** in a **Candle stick** **Flamant**, or **Lighted**, or **Flaming**. Born by the name of **Loetza** a **Polander**. This is an Altar, Light without which the Popish Priests cannot see (who it be in the day time) to read their Masses, the Epistles

or Gospel. Such lights are also Superstitiously used in the Execrations, Curses, and Bulls of Excommunication; viz: to Curse with Bell, Book, and Candle.

S. 3 such A. Flamant Pr. born by **Lightman**.

Four Candles, the one burning the other 3 extinct, was the Devise of the great Turk **Solimannus**, to signifie that other religions were nothing light in respect of his.

LXV. This is the **Cornice** of a **Manscote** **rome**, or the **Capital** of a **Pillar**, or **Column**, the terms used by Work-men for each particular Moulding, as the are noted by the letters, take as followeth.

Terms of the parts of a Cornice, or a Capital.

a is the **Fillet**, of the **Cimatum**

b is the **Cimatum**, or **Crown** of the **Cornice**, it bends like an S.

c is the **Abacus**, or **Dado**, or **Dye** of the **Cornice**.

d is the **Chute**, or **Erinus**, it is round at the Bottom but not on the top, being half of an ball round.

e is the **Frize**, or **Soporus**, or **Hypotra-chium**, it is a moulding that swells out half round. It is called a **Swelling Frize**.

f is the **Architrave**, which is a plaine and straight thing between other mouldings.

g is the **Fillet**, or **Celluiter**, or **Leffella** of the **Architrave**. And so all the little Edges, or **Fillets** between the other mouldings are generally so called: Also this Cornice in short and general terms is called by **Architrave**, **Frize**, & **Cornice**.

as f the **Architrave**. e the **Frize**. a b or c d the **Cornice**, as the workman pleaseth to order the work.

LXVI. Now for the better understanding of all the parts of a **Pillar**, or **Column**, with the several terms, which Artists have given to the diverse Mouldings about the same; I shall in two examples, set forth all their words of Art, used about them; by which any Gentleman may be able to discourse a **Free-mason**, or other workman, in his own terms.

The Order of Columns and Pillars.

In **Architecture** work, where there are either **Columns**, or **Pillars**, or **Members**. You are to know that there are five Orders of work in them.

1. The **Custan Order**, which is the plainest of all Orders, and is to have the **Pillar** or **Column** plaine, the **Capital** and **Pedestal** without any manner of carved work, and to consist only of a **Fillet**, a **Cimatum**, or **Crown** of the **Cornice**, and an **Astragal**, or **Collarino**.

2. The **Doric Order**, in which the **Column** is divided, or wrought into many little Columns round and swelling out (as the **Pillar** of the **Ionick Order** is fluted, or cut round upwards) as the examples of this see numb 66 & 74. marked with the letters a, b, c, d, e, f, g, h, i, j, k, l, m, n, o, p, q, r, s, t, u, v, w, x, y, z. The **Capital** and **Pedestal** plaine, as above said. 3. The **Capital** of this Order is called, a **Draffias Column** or **Pillar**. see numb 82.

3. The

3. The **Ionick Order**, whose **Pillar**, or **Column** is **Fluted**, that is, cut round inward, from almost the top to almost the bottom of the column. The **Capital**, having the **Fillet** of the **Cimatum** turned into an **Elerowl**, round or a **Catulle head**, which is called an **Eustrikos Column** or **Pillar**.

4. Is the **Corinthian Order**, which is the same to the **Ionick**, only the **Capital** is **Carved**; the **Cimatum** is **Carved** into **Flowers**, **Leaves** and such like, having a **Collarino** under the said **Carved head**, or a **Frieze** between two **Astragalls** or **Collarinos**, which **Capital** is termed a **Sylilos Pillar**.

5. Is the **Composita**, or **Compositive Order**; it is a **Column** or **Pillar** with its **Capital** and **Pedestal** framed and composed from all the other Orders, according to the fancy and discretion of the Work-man, as the **Capital** of the **Corinthian** and **Ionick Orders**; the **Column** of the **Ionick** and the **Dorick Orders**; and the **Pedestal** of them all; see *num.* 34.

A **Membretto**, or a **Pillaster**, is a swelling or projecting out of a main **Wall**, with cut or carved work, after the manner of a **Pillar** or **Column**; having both **Pedestals** and **Capitals** answerable to the several Orders from whence such **Membrettos** are composed.

An **Atticurge Column**, is a square **Pillar**.

The Terms given to the Feet of Columns, or Basis of Pillars.

a is the **Body** of the **Dorick Pillar** or **Column**, cut into rounds a little above the **Basis**.

b is the upper **Corus**, being a round outward.

c is the **Scotia**, being an half round inward.

d is the lower **Corus**, swelling outwards.

e is the **Plinth** or **Socco**, being Beville, with a flat, to which place is the **Basis** of a **Dorick Column**.

f is the **Cimatia**, or **Cimatum** of the **Pedestal**, which turneth in the form of an **S**.

g is the **Dado**, **Dye**, (square or plain of the **Pedestal**) the **Stylobatum**.

h is the **Annulets** or small **Rings** between each moulding, if two together, then double **Annulets**. They are also by some Artists termed **Cimbria**, and **Listella**, and **Fillets**.

i is the **Corona** of the **Base**, being made like an **Z** wrong way.

k is the **Oro** or **Profile**, or **Plinth** of the **Base**.

The **Basis** or **Base** of the **Pillar**, is so much of it as projectures the body or thickness of the **Pillar** or **Column**, as you may see from the place marked *b* to the letter *e*.

The **Pedestal** or foot of the **Pillar**, is as much as draweth back again, and so down till it run as much out again, that is from the **Fillet** of the **Cimatia**, marked *f* to the letter *k*.

The small **Rings** (as I shewed before) between each of the mouldings are termed **Annulets** or **Fillets**, as the higher **Annulet** of the **Corus**, the lower **Annulet** of the **Corus**, or the **Scotia** with its **Annulets**, that is the **Rings** both above and below it.

LXVII. As before I have given you the Terms used by Artists for the several parts of the **Basis** and **Pedestal**; we shall now proceed to do the same, for the **Capital** or head part of the **Pillar**.

Terms used about the Capitals or Heads of Pillars and Columns.

a is the **Cima recta**, which turns after the form of an **S**.

b is the **Cima reversa**, which is streight above, but round under.

c is the **Corona**, which is first streight, then fluted or channelled under.

d is the **Cimatum** of the **Modillions**; the **Modillions** being square ends or peeces, representing the ends of **Spars** laid in the **Floors**. In this place, and in the **Cima recta**, is usually **Carved work** if the **Master** will go to the **Charge**.

e is the **Ovolo**.

f is the **Cabotto**, which is hollow inwards.

g is the **Swelling Frieze**, if it were streight, then it is termed only a **Frieze**.

h is the **Cimatum** of the **Architrave**, or **Capital** of the **Triglyph**.

i is the **Fasia**, or **Architrave**, if there be more rebates than one they are termed the **primary Fasia**, the **secondary Fasia**.

k is the **Scrool** on the **Capital** of the **Ionick Order**.

l is the **Corinthian head** with **Carved work**, both which makes the **Composita Order**, or **Roman Capital**.

m is the **Cimatum**, or **Crown** of the **Capital**. This is the head of the **Column** of the **Dorick Order**.

n are **Annulets** or small **Fillets**; termed also **Listella's** or **Cinctures**.

o is the **Frieze**, or **Hypotrachelium**, which part in **Composita work** is usually **Carved**.

p is the **Astragall** or **Collarino**, which is a round, with one or two **Annulets** under it.

q is the body of the **Corinthian Pillar**.

Note that from the Letter *a* to the foot of the Letter *i*, is in short termed **Architrave**, **Frieze** and **cornice**. These are the kind of Mouldings that are most used on the top of **Wainscot Rooms**, or on the **Heads** of **Pillars** and **Pillasters**.

Also from *k* to the Letter *n* is the **Capitals** of all the foresaid Orders of **Columns**, if to each of them (for the more grace of the work) there be added the **Astragall** or **Collarino** with its **Annulets**, mark *p*.

Those that desire farther instruction in the Theorick part of **Free Masonry**, they may peruse.

Sebastian Serley, Printed 1611.

Peter de le Muet. And

Andrew Palladio. Both Englished by *Golfriad Richards*.

Vitruvius. And others.

LXVIII. He beareth Or, on a **Staff**, or **Pin** fixed in chief, a **Lamp** fired (or **flamant**, or on a flame) hanging

N n n 2

hanging by a Chain Sable. By the name of *Lampe*. Some say thus a **Lamp fired, Chained, and hanged on a Staff Sable**. Three such A. Flames proper, in a Field S. is born by *Labec of Italy*. See *lib. 2. chap. 18. numb. 24. 25.*

LXIX. He beareth Sable, a **Chain** out of the chief, with an **hanging Candlestick** thereat, containing six **Branches, Or**; in each **Socket** a **Candle fired** or burning proper. Born by the name of *Chandler*. It is termed an **hanging Candlestick** with its **Branches, Knops and Sockets**. This is born by the name of *Cassaban*.

LXX. He beareth Argent, hanging in chief at a **Chain of three ends, an Incense Pot, Or**. This is termed a **Popish Sweet Incense, or Perfume Pot**. This is born by *Angelo* or *Angelico, an Italian*.

LXXI. He beareth Azure, a **Statue or Colosse** of the **Virgin and her Babe**, set upon a **Pedestal, mounted on Stiepes or Steps, Or**. These kind of Images or Idols are termed **Statues** from *Statuo* to stand, because they alway stand to, and keep the place to which they are Dedicated, without shew of removing. A **Statue** is a solid Body representing the Image of a person. A **Colosse** is a very high and huge Pillar or Tower, or a very great Image made for the Honour of a person; as at *Rhodes* was one set up seventy Cubits high, being termed one of the Worlds Wonders.

Of the Worlds Wonders.

First, is the Walls of *Babylon*, built by *Semiramis*, it was foursquare, and Threescore Thousand Paces about, as *Pliny* saith *l. 6. cap. 26.* two hundred foot in height, fifty foot thick, so broad that six Chariots might go abreast without offending one another. It had an hundred Gates of Metal, very admirable. She kept daily at the work three hundred thousand men, the City being so great and large, that in aftertimes when it was taken by the Enemy, they that dwelt at the one end or side of it, had no advertisement thereof till three whole days after. *Diodorus Siculus* in *lib. 3.* saith that the Compass of the Walls was 360 Stades, each Stade containing 200 Paces, and *Quintus Curtius* saith it was 100 Cubits in height.

Second is the *Colossus of the Sun*, set up at *Rhodes*, it was a Statue or Figure of a Man, all of Brass 70 Cubits in height, it was cast down by a Quaking or Trembling of the Earth, 56 years after its Erection, few Men could embrace the great Finger of this Statue, it lay ruined a very long time till *Anno 600*, at which time they carried away the Reliques of it, which Loaded 900 Camels.

Third, is the *Pyramids of Egypt*, which are Buildings of a Quadrangle form, and so raised up into a Spire or sharp point; at one whereof was daily working three hundred and threescore thousand Men for 20 whole years. *Pliny lib. 36. cap. 12.* saith, that the ground

work of this Pyramid contained 8 days Journey of ground, others seven, but most agree on six, and as many in the height, the Stones were of Marble brought out of *Arabia*, most part of them 30 foot large. Another of a lesser size *Peter Martyr* the Ambassador of *Spain* to the *Soldane of Egypt, Anno 1501.* saith that one square of it was 315 paces, and on the top was one entire Stone that 30 Men might stand upon.

Fourth, is the *Mansolea*, or the Tomb of *Mansolus* King of *Caria*, a Province in *Asia*, it was all of Marble 411 foot in circuit, and 25 cubits high; it had about it 26 Columns of admirable Stone and famous Sculpture, it was open on all sides with Arches 73 foot wide.

Fifth, is the Temple of *Diana* in the City of *Ephesus*; it was built by the Amazons, and was 425 foot long, and 220 broad, it had 107 Columns or Pillars of excellent Marble, each made by the Kings of *Asia*, for it was 220 years in perfecting; all the Coverings, Doors and Wainscot work was of Cedar Wood and Cyprus.

Sixth, is the Idol or Image of *Jupiter*, set in the Temple of *Achaia*, in the place where *Hercules* instituted the *Olympian* Pastimes of Running, Wrestling, &c. it was excellent for its greatness, being made of Porphyry, some say of Ivory, knit and united together of small pieces.

Seventh is the Tower in the Isle of *Pharos* near *Alexandria* in *Egypt*, erected by the Kings of *Egypt*, of Marble, marvelous in height and cunning workmanship, invironed with water; it cost 800 Talents, which *Budens* by computation, makes to amount to four hundred and eighty thousand Crowns. Some do not insert this as one of the Seven Wonders; but the Obelisk of *Semiramis*, which was of one entire Stone made Pyramid wise, for that is all the difference between them; a *Pyramid* is of many, but the *Obelisk* of one only Stone, of a vast and incredible bigness, brought from one place and set up in another, as this which was said to be 150 foot high and 24 foot square, and in circuit 60 foot, taken whole out of the Mountains of *Armenia*, and brought to *Babylon* of the *Chaldeans*.

Though that of *Stonehenge* in the County of *Wilt.* in our Kingdom be not reckoned as a Worlds Wonder; yet we may look upon it as a Wondrous Monument; the matter thereof are Stones of a great bigness being 28 foot and more in height and ten in breadth, these are set in the ground by 2 and 2, and a third laid Gatewise overthwart, and fastned with Tenants and Mortises wrought in the same; the form these Stones are set in, is round, and as it seemeth hath been circulated with three ranks of them, many whereof are now fallen down, and the uttermost standing containeth in compass 300 foot, they are all rough and of a grey colour, standing within a Trench that hath been much deeper: They were erected by *Aurelius Ambrosius* King of the *Britains*, in memory of the Treachery of the *Saxons* under *Fortigern* their King, who slew in a day of Parley all the Nobility and Buried them there, about *Anno 475.*

In this place also the forefaid King *Aurelius* and 2 more of the *British* Kings his Successors, have been interred, with many more of their Nobility. Now the great *Wonder* is how these Stones came thither, seeing the Country thereabout, and for many Miles distant afford none such; the Learned *Cambden* therefore thinks that they were made by Art, of pure Sand, Lime, Vitriol, and some Unctious Cement, because there was Anciently such an Art of making Stone which is now lost; but the *Britains* have a Tradition amongst them that their great Prophet (or Conjuror) *Merlin* who then lived, was assisting in the work, and by his Art it was performed. In this place under little Banks, to this day, are found by Digging, Bones of mighty Men, and Armour of large and ancient fashion.

Another remarkable work, is that high and long Wall made as a bound between *China* and the Eastern *Tartars*, built by *Tzaintzon* the 117 King of *China*, to hinder the inroads and incursions of those Enemies; its height is - - - - - and in length over Hill and Dale is extended 405 Leagues, according to the *Spanish* or *Portuguese* measure, which makes 23 Degrees and 10 Minutes, after 17 Leagues and a half to a Degree, which according to *English* measure is above 1410 miles, and this we must understand to run in a streight line; for should it be taken with all its turnings and windings of the Mountains, it would amount to above 500 *Portugal* Leagues, and so thick that several Wagons may meet and pass one by another, and the Stones so close joined together that the edge of a Knife could not be put between; within and without this great Wall are 3000 Towers or Castles, where are kept Guards and Warches all the Year long to give the Alarm so soon as an Enemy appears, having the number of 68008 Soldiers in them, as saith *F. Jo. Rodriquez*; though others say 92054, which *F. Magaillans* also testifieth in his *Hist. of China*.

Not much inferiour to this was that great and mag-

nificent performance of an Emperour of *Tartaria*, about 400 years ago, upon the Conquest of *China*, who employed Workmen without number, and at vast expences, and with an unparallel'd industry, opened a Canal 3500 *Chinese* Furlongs, or 245 *Portugal* Leagues in length, through several Provinces and through many Cities and Towns, till it come to the most famous Sea Port Town in all the Empire, thereby to convey *Vi-ctuals* and other Necessaries to his chief City of *Pekin* in *China*, where he made his principal residence.

On the dexter side of this quarter is an *Holy Water Sprinkle*; it is a thing much used in the *Romish* Church, for with it (being dipt in a Basin of Holy Water) the Priest besprinkles the people before they hear Mass, or do partake of the Church Service and Ceremonies.

B. 3 Water Sprinkles O. born by *Holyman*.

LXXII. He beareth Azure, a square Castle, the Towers and Roof Spired, between two Towers the like Or; Debused (or Out-walled) with a Wall in Base, extendant, having a Port Portcullis'd, with the Battlement over it raised Bevil ways, to a corner Argent. Others Blazon this a Wall in Base extending to the sides, with a Port and Portcullis before, or compassing of a Castle between two Towers, all Spired. The *Dutch* term it a Castle Wall in Base, raised over the Port with an Indent: But workmen term the Port with a Rise over it, or a Pedement Cap or Head with two Kneelers.

LXXIII. The Pedestal of a Pillar, of this I have spoken when I Treated on the same Subject in numb. 66. to which for the Terms of Art I refer you.

LXXIV. The Capital of a Corinthian Pillar, the terms peculiar to the Bouldings in this quarter, I have treated of numb. 67. to which place I refer you.

The Worshipful *George Booth* of *Woodford* Esq; Prothonotary for the
County Palatine of *Chester*.

Your Signal Favours upon several Occasions, cannot (without Ingratitude) but Extort from me a Return of Thanks; which he pleased to accept from these my small Labours, which are Dedicated to you, by him who shall ever Subscribe himself

Your Devoted Friend and Servant

Randle Holme.

C H A P. XIII.

2. **I**N this Plate I shall present you with some other sorts of rare pieces of Architecture, both for their form and inventions, which I have found born in Coats, together with their several terms used by those kind of Workmen, which I hope will be no less pleasing to the Fancy than to the Eye of the Beholder; and in the end shall close all such kind of Buildings, with some extravagant Bearings, in which though I have placed them in some Order, yet could not properly put them in any sort of working Instruments

LXXV. In this Square are the fashions of two sorts of Roofed or Covered Towers, which I find born in Arms.

The first is termed a **Tower covered**, or **Arched over**; which is always taken to be Round Roofed, if it be otherwise Covered then to be mentioned, whither it be **Ridge Roofed**, **Spiral Roofed**, **Square Roofed**, or **Seragon Roofed**; or else any of these sorts of coverings with **Eves**, or **Overseeling** the Tower. As you may see diverse examples in *cha. 9 numb. 184 186 190 & cha. 12 numb. 52 55 56 & this cha. 13 numb. 16 41 42 47 72 &c.*

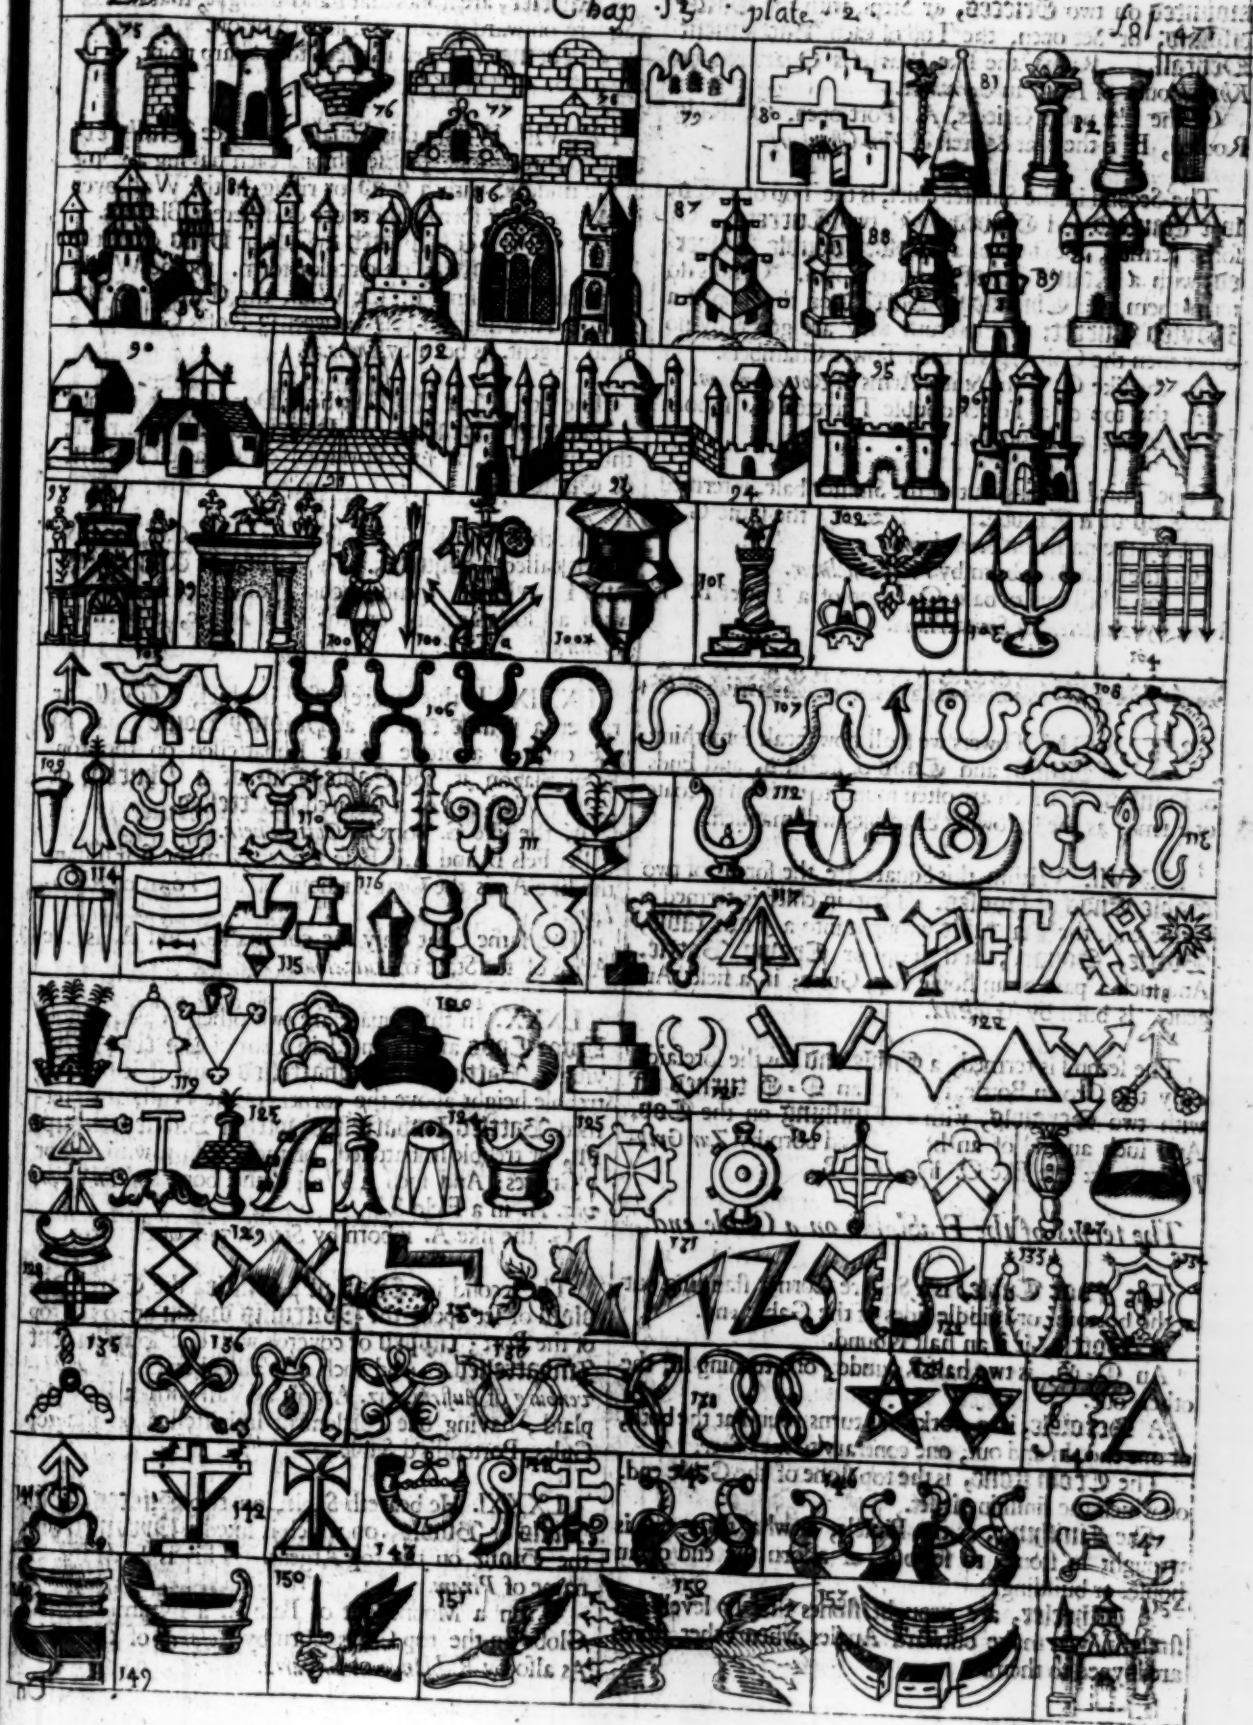

He beareth G. on a Mount a Tower A. vaulted B. with a Ball or Globe on the top Q. is born by *Van Hohenwart* of *Austria*. And out of a Coroner, the like Tower, between 2 Wings S. is his Crest. Some term this tower, **Sans Port**, or **Gate**; and so in deed it may be, for I find no such thing in the Coat, and therefore may well be termed a **Mured Tower**, or a Tower Shut, or **Closed up**.

O. a Rose betw: 2 Towers G. Spire roofed B. is the coat Armour of the Town of *Rospach*.

The second is termed a **Tower** with a plain **Battlement**; that is, the Battlement is not made with **Wheelers** and **Kneelers**, but is streight, and even in the Walk of the Wall. Yet there are some which because it wants Battlements, calls it a **Dove** or **Pigeon house**. G. the like A. is born by *Van Keenath*.

G. on a Mount out of base such a Tower sans port, A. betw: 2 Trees V. is the Town Arms of *Garttach*.

LXXVI. In this Square are the **Tops** or **Turrets** of three Sorts of Towers. The first is called a **Tower mounted**

mounted on two **Grieces**, or **Steps**, with the **Gates** displayd, or **Set open**, the **Top** of each **Battlement** **Dentail**. Ruby, the like **Pearl**, is **Quartered** by *Khun Count of Belasy in Germanie*.

G. the like upon **Grieces**, A. **Port open**, O. **Ridg** **Roofed**, B. is the coat & crest of *Van Offenburg*.

The **Second** in the **Sinister** chief, is the **Top** of a **Tower Vaulted** and **Globed**, with two **Turrets**. Of some termed, the **Top** of a **Tower double Towered**, with a **Round Roofe** between them. Others do term them two **Chimneys Battled** on the **Top** of a **Roofed Turret**: and in truth they are generally no other then the **Chimneys** of such **Tower Chambers**.

A. the like G. is the **States Arms** of *Rotenburgam*.

A. the top of a **Tower double Turreted** G. is born by *Bebenburg of Frankford*.

The **Third** issuing out of the **Sinister** base, is termed the **Top of a Tower**. *Viz* A. the same G. is born by the name of *Towheim*.

G. the like A. is born by *Van Castelmur*.

A. on a hill out of base O. a top of a **Tower** B. is born by *Alsteten of Switzerland*.

3 **FROM** **Towers** we shall now speak something of **Walls**, and **Cops** of **Walls**, and **Ends** of **Houses**, for such are often found to be born in coats of **Arms**; as the following examples will manifest.

LXXVII. Within this **Square** are the forms of two **Gable Ends** of **Houses**. That in chief is termed a **Gable end**, the **Front** wrought into a **Foot** **table**, **Bottle**, **Square**, and **Top** or **Crown Bottle**. And such a part of an **house** top, **Gules**; in a field **Argent**. Is born by *Gubend*.

The **second** is termed, a **Gable end** (as the forehead) only the **Crown Bottle**, is called an **O. G** turned off with two **Scrotoles**, with a **Finishing** on the **Top**. And such an end of an **house** I find born by *Zur Gryspeich*. viz. the like O. in a field B.

The terms of the Frontable on a Gable end.

The **Foot Table**, is a **Square Corner** standing out at the **bottom**, or **middle** sides of the **Gable end**.

A **Bottle**, it is an **half Round**.

An **O. G**, is two **half Rounde**, one turning in, the other out.

A **Scrotole**, is a work that turns round at the back, or one end; In and out, one contrary to the other.

The **Crown stone**, is the top stone of the **Gable end**, on which the **finishing** is set.

The **Finishing**, is the **Pinicle**, or what thing else is wrought in stone; to set out, or adorn the end of an **house**, or **building**.

A **Wheelier**, are wrought stones that ly level and streight, yet make outward **Angles** when other stones are ioyned to them.

A **kneeler**, are stones that stand upright, that makes a **Square** outward above, and inward below.

A **pedement**, when is riseth to a **Sharp point**. as in numb. 78.

LXXVIII. Within this **Square** are three **Walls** extended throughout the **Escachion**, each having a **Door** in the middle, with a **Cap** or **riling** in the **Wall** over it, of contrary forms, therefore of different **Blazons**.

The first is a **Wall** with a **Cap** or **brind** over the **Door**, of a **Bottle**, or circular form. Some **Workmen** call the **riling** of the **Wall**, the **Cover** of the **Door**: And such in **Fels** between 3 **Roles Gules** in a **Field Argent**, is born by *Dornall*.

The second is a **Wall**, whose **Door Cap** is termed a **pedement** head of two **kneelers**; all such **riling** thus in a point, is by **Workmen** called a **pedement** or **Gable End**.

The third is a **Wall** whose **Door** head **Cap**, or **Cover** is called a **Square**, or a **Cover** of **Wheelers** and **kneelers**, **Argent**. Such a **Wall** out of **Base Gules**, with a **Lion rampant** on the **Cap Azure**, is born by *Lionwall*.

LXXIX. In this **square** is first in chief, a **Wall**, or rather a **Gable end** of a **Masonry House** (that is) the end of a **Stone House** **Imbattelled** on the top. Some **Blazon** it, the **Gable End** of a **Church**, or **East** or **West** end of a **Church**, **Battelled**.

A. the like G. born by *Guttenheim*.
Per **Fels** B. and A. in **Base** Bar, from the **Bar** issuant the like A. is the **Coat Armour** of the **Town** of *Aldenburg*.

The same **Coat** only the colours G. and A. is the **Arms** of the **State** of *Lutzelburg*.

LXXX. In this **square** are two other **Walls**, whose **Door Caps** are mounted in form of **Grieces**, or having a **Battlement Imbattelled**; and if it be of a **treble height** above the corners of the **Wall**, then termed **Battled Imbattelled**, with a **Battlement** upon, or **treble Imbattelled**, or mounted up with 2, 3, or 4 **Grieces**: And such a **Wall** I find born by *Turheim*, viz. A. in a **Field** S.

G. the like A. is born by *Steinhausen of Bavaria*.

The second is a **Wall** of a **Castle**, the **Gates** displayd or **set open**, the **Portcullis** drawn up to the top of the **Port**; capped or covered with one **Battlement Imbattelled**. And such a **Wall** is born by *Van Hertenburg of Austria*, viz. **Argent** a **Wall** with a **Port** displayd, having one **Battlement Imbattelled** on the top **Gules**, **Portcullis'd** **Sable**.

LXXXI. He beareth **Sable**, on two **Grieces**, four **Balls** or **Bowls**, on which is fixed a **Pyramid** with the **Globe** on the top **Argent**. This is born by the name of *Piram*.

B. on a **Mount** out of **Base** A. a **Pyramid** with a **Globe** on the top O. is born by *Rolands of the Rhine*. As also by *Rublandt of Bavaria*.

On

On the dexter side of this Square is set the true form of the **Legionary Eagle**, which is an Eagle set on the top of an high Pole, which the *Romans* used in sted of a Banner or Ensign to Guide and Conduct their Souldiers; of these they had severall sorts and fashions. See *cha. 18 numb. 11 12 13.*

LXXXII. In this Square are the forms of three sorts of Pillars which I have found born in coats of Arms. The first is a **Composed Pillar**, framed of foure round pilasters; the basis, or foot thereof is fixed in base: the Capital wrought into Leaves, with a Chapter after the form of a Crown. This I confesse may well pass for Common Heraulds-Painter Blazoning; but the more knowing Artists will say as followeth. Argent out of the Base a Pillar, or Column of the **Doric Order**, & a **Corinthian Capital**, crowned; Gules. which is born by the name of *Van Genheim*.

The Second we generally call by the name of a **Column**, or **Pillar**. And the reason is, because all Pillars in coats of Arms are usually drawn by the *English* after this manner, with plain **Pedestals** and **Capitals**: But now where variety of Orders of Pillars are born, there ought a due distinction to be given, that accordingly they may be truly delineated; then each person shall have his due right.

He beareth Gules, a Pillar of the **Tuscan Order**, Or. born by the name of *Colmore*.

The third is the Top part, or **Capital** of a Pillar; or more properly the half of a Column of the **Ionick Order**, or a **Pillar fluted**, with a **Tuscan Capital**, and a **Globical Chapter**. And such a demy Pillar Sable, in a Field Argent, is born by the name of *Van Wildenberg*.

S. 3 such O. is born by *Ringerb.*

LXXXIII. He beareth Azure, a **Square Castle**, at the corner of the Wall in Base, a **Corner** with a **Port**, **double Belconed**, and over **Beeling** or **Ewe Roof**, at the Dexter and Sinister corners, the like Towers **Single Belconed**, Argent. This belongs to the States of *Anturf* in *Germany*. Some term this a **Castle**, with its corner pointing to the Chief and Base dexter and sinister sides, at each a Tower, &c. Now by reason of it thus situation there can but 3 Towers be seen, that behind being hid by the principal Tower in the Front of the Castle; which had it stood directly four square, (and not **Arras** or **Losenge wise**, or the corners upwards) then all the Towers would be seen, as *numb. 9.* or *triangle, as numb. 13.*

LXXXIV. He beareth Or, on **Spieces** three **Towers** in Fels, **Cave Roofs**, the back parts from the two outward (Towers) compassed with a **Circular Wall Battlemented**, Gules; is born by the name of *Towerwall*.

O. on **Grices** a square Tower with a Port open, and a Man standing in it, Battlemented and Ridge-roofed, between 2 round Towers, with a circular Wall behind them, Gules, is the State Arms of *Hallim Henegarve*, in *Germany*.

LXXXV. He beareth Argent, on a Mount out of Base Vert; a **double Wall** before two **Towers**, Skirt or **Cave Roofed Debussing** of two (**Serpents** or **Snakes** or) **Cocatrice Serpents**, conjoined in the back, heads **endowed**, and the Bodies turned into the form of *Roman S's* of the second. This is born by the name of *Snakenburger* of *Brunswick*. Some will also Blazon it two **Serpents** in form of an S conjoined and **endowed** surmounted by two **Towers** upon a **double plain Wall** on a **Hill** in Base; beginning first with the Serpents, because they lie next to the Field.

A. on a Mount out of the Base V. such a Wall and Towers conjoined to others, fixed to the sides G. This may also be termed a **Bevile Wall** with 2 **Turrets** or small Towers, between two high or lofty Towers, extended to the sides of the Escuchion. This is born by the name of *Sidebottom*, of *Nab-Top*, in *Marple*, in the County of *Chester*, an Antient name in that County, from whence hath Branched forth many Families into *Ireland*, and other places.

LXXXVI. Here are two things in this Square pertaining to a Church, or Temple, which I find born in Coats of Arms. As first, He beareth Argent, a **Window**, or **Church window**, Gules, Glaf a Proper. which is born by the name of *Light*, or *Lightman*.

O. 3 such G. Glafed A. Leaded S. by *Thorlight*.

Masonry terms about a Window.

The **Sole**, is the Foot or bottom of the Window.

The **Mullions**, the upright Stands of a Window, of some termed **Munions**.

The **Jaumes**, or **Peers**, the window Sides.

The **Head**, the top of the Window.

A **Clarester window**, hath no Cross bars in, having only a Sole, Mullions, and Head.

A **Transome window**, hath Cross bars in it, at the third part of it height.

The **Trasery**, is the making of the Top part of the Window into severall Forms and Fashions.

The **Clauing**, is to make the Jaumes to over sale the Mullions, and that is wrought into severall kind of Mouldings, and adorned with other worke, as the Mr. pleareth to put on.

The **Rebates**, or **Rigets**, the places cut in the sides of the Mullions to set the Glafs in.

Secondly, He beareth Argent, out of base, a **Four Square Steele**, each corner Supported with a **Buttrice**, the Top set off with **Moulded Battlements**, and the Corners with **Carbed Finishings**, or **Pointles**, with a **Spiral Roofs**, entigned with a **Cross**, all Proper. Born by the name of *Steeplehouse*. This may in short be Blazoned, a **Square Steeple**, or **Parochiall**, or **Mother Church Steeple**; all the other appurtenances usually belong to such Steeples.

LXXXVII. He beareth Argent, a **China Steeple**, Gules. All the Steeples in that Countrey are made after this form, rising one Story above another, and

O o o

each

each less then other, and this they do for many heights, which when they would shew Magnificence in their Buildings, they adorn the out sides, and tops, with a multitude of Fanes, or Square Banners.

LXXXVIII. He beareth Azure, on a Pedestall, or Water-table, or Basis of an Hexagon Square, the like Tower with an Eve, or Cant seiling Roofe; on the top whereof, is an other Tower, with the like Covering, Argent. This is the States Arms for the Town of *Nemenburg*.

A. on an Hill G. such a Round Tower, the top part with Battlements, B. is born by *Hohornarht* of *Bavaria*.

Per fesse A. & G. the like counterchanged: is born by the name of *Frolch*.

The Second Figure in this Square, is termed a Close Hexagon Tower, Eve Roofed, having a Vine Branch Enwreaped about it: and such a Tower I find born by the Town of *Marpach*. Viz: Per Pale, Or; three Staggs hornes in pale Sable: and Or, such a Tower, Azure, the Vine Proper. These I take originally to be two Coats, and therefore I give them two blazons.

LXXXIX. Within this Square I have placed three sorts of Towers, all which are used in Arms. The first is a Spiral Tower, such an one as is larger at the bottom than the top, (Built Taper, or Battering, as workmen term it) being Double Belconied, with a Battlement, and Arch Roofed, with a finishing or ball on the top. A. the like G. belconyes & roote O. is born by the name of *Belcony*.

B. the like with a belcony A. is quartered by *Griefpecken* of *Thorland*.

The Second is termed a Tower with a plaine Battlement, and a Spire, on each side the top is placed a Bastileon, or Bastil, like roofed. Some term these Barbicans, which are out Nooks in Walls or Towers, which serve for diverse uses, as to shoot out at an enemy. Some take it for a Sentinal house, or Scout house. Sir *Geffrey Chaucer* useth the word Barbican, for a Watch Tower, of the Saxon *Bar-ic-ken* (*i*) I ken or see the Borough. Some Towers have these kind of out lets for Houses of easement, and so I have seen them in several Castles and Forts. Some term them Parapets which are a kind of Jetting out walls, breast high to defend from the enemies shot.

B. on a Hill in base V. such a Tower with Barbicans, A. is born by *Van Cassell* of *Bavaria*.

G. on a Hill. O. the like A. is born by *Harstorfer*.

The third is termed a Tower (sans port) with a plaine Battlement, and three Spires. As other Towers are blazoned treble Towered; so this may be termed Triple Spired with Balls or globes on the points, and such I find born for the coat and crest of *Van Eyckholtz*. viz: O. the same G.

A. on a mount, V. the like G. triple Spired B. balls O by the name of *Triemish*.

XC. In this square is set down two sorts of Dove-houses, which are found born in coats of Arms. The

first is termed, an House, or Cote, set upon a square Pillar. In the particulars blazon it thus: Azure, on a Comb or Grave stone, a Square pillar, whereon is fixed a Cote, Barne, or Dove house, Argent. born by the name of *Romray*. This is an excellent way to secure Pigeons or Pultrey from destructive Vermine, being no way able to get into the same. Such a Building as this, a larg Barne of severall Bayes is set up neere the City of *Chester* upon stone pillars, into which neither Rott or Mouse can gett; and though they may be brought in with the Shaves out of the fields, yet they must out for water, and being out there is no returning againe to that quarters.

B. the like O. between 2 Escucheons each parted per fesse G. & O. is the Town Arms of *Butzbach* in the Empire of *Germanie*.

The Second is a Dove house of foure Cants, or Cornerd Bayes, with a Lower on the Roofe. Such a Dove house Gules, Covered with Slates Azure; in a field Argent. Is born by the name of *Cullomus* an *Italian*. This may likewise be termed, a Gentlemans house, or an Hall; a Mansion, or Banner house built in form of a Cross, with a Lanthorne in the middle of the Roofe.

A. 3 such G. is born by *Mannours*.

XCI. He beareth per Fels Air and a Grounded Floor laid with square Tiles counterpoised, Argent and Sable; a round Tower Arched, between four others Spired, two and two joined together with a Wall Battelled, Gules. Another way of Blazoning this Coat is thus, five Towers covered, in Prospect, the two dexter and the same Sinister conjoined by a Wall Battelled; the Ground Chequered according to Art, &c. This is born by the name of *Forefight*.

B. the like A. the ground A. and S. on an Escuchion of pretence B. a Lion rampant O. is the Towns coat of *Hirschfelt* in the *Low Countreys*.

XCII. He beareth Azure, out of the Base, a Tower Covered and Arched, with a Pinnacle; from each side runs a Beville Wall Battelled, to the extent of the Field, which incloseth four other Turrets or small Towers, two on the dexter side, one Spired, the other round (or Cap) Roofed, the like on the Sinister, all Gules. This with a Saxon A. in Base of the second, is the Town Arms of *Allendorf* in *Germany*.

B. the like Towers and Wall A. is the Town or State Arms of *Franckenburg*.

B. a Wall with an Arch and Cross Patee on the top, the sides extending throughout the Field Beville, enclosing two Towers A. is the Town Arms of *Gudenfperg*.

O. out of Base, a Wall the sides to the extent of the Field, each a Port or Sally Port, enclosing of a square Tower, between two round ones, Arched A. is the Town Arms of *Witzenhausen*.

B. the like Wall out of the Base, with a Tower between 2 Turrets, all Spired A. in the Gate an Escuchion O. charged with a Lion rampant, is the Town Arms of *Liebenau*.

XCIII. He

XCIII. He beareth Gules, a Wall extending itself from Base to the Fesse throughout the Field, Arched inarched, whereon is raised a Tower Battelled, with a Round of Arched Roof, between two other Towers of the same. This is born by the name of *Bringing*. This is the old way of Blazoning; it; but I should rather say thus, a Wall extended in fess Arched enarched, on the top a Tower.

G. On a Wall extended into the Fesse, 3. Towers roofed; in Base, in an Arch, Our Lady with the Babe in her Arms, crowned, her hair floatant, all proper; is the Coat Armour of the Town of *Trendelberg*. This is supposed to be but an Arch in the Wall, not through the Wall, in which the Images of the Virgin Mary and the Babe are placed; as is and might lately have been seen, in many Churches where such Images have been set up.

XCIV. He beareth Argent, a Castle Wall with a Port, the sides Beville, to the extent of the field; Involving a Tower Battelled, and Ring Roofed, between two small Turrets, with Spires Eaned, (or having Shells, or Ealing) This is born by the name of *Van Wolik*.

Per Cheveron B. and G. a Castle Wall Arched with square Redoubts before a Tower between two Turrets with Spires, A. in Base a Lion Rampant O. is the Town Arms of *Bidenapp*.

XCV. He beareth Azure, a Wall Battelled with an open Port and Portcullis pendant, conjoined to 2 Towers, each Towered and Arch Roof'd, Argent. This kind of Castle with a Mullet of six points in chief, and a Saxen M in Base, is the Town Arms of *Monstereberg*.

B. a like Wall fortified with two Towers, the Battlements Spired A. in chief an Eagle disploy'd O. is the Town of *Tschens* Arms.

Some term this a Castle with the Towers Turreted. See more numb 5.

XCVI. He beareth Argent, three Towers conjoined, the middle Towered, the Battlement Spired; the other with Square Turrets Eave Roofed, G. This is born by the name of *Tresort*.

B. a Tower between 2 square ones, each the Ports or Gates shut, and Towered with Spires A. two Escuchions between the Turrets of the second, one charged with 2 Cheverons the other with a Cross. This is the Arms of the Town of *Umbstat*.

Some Blazon this a Tower with the Gate shut, with a Wall on each side, having Battlements and Bailey Ports, standing before three Watch Towers Spired.

XCVII. He beareth Gules, an Arch with a Pedement Cap or Head, conjoined to two Towers double Battlemented, and Spire Roofs, Argent. This is the Coat and Crest of *Ravensburger* of *Austria*. This is also Blazoned, two Towers joined by a Pedement or pointed Arch.

XCVIII. He beareth Vert, a Triumphant Arch of

discrete gradual heights of Towers, with an open passage through the same, Or. Born by *Triumphe*. Such a Triumphant Arch was Consecrated to *Jupiter* in honour of the Emperour *Trajanus*, and was erected by the publick Decree of the *Roman* Senate, as the Coins of those times do make manifest. See *Jo. Hemelarius* his Table 17.

XCIX. This is another kind of Triumphant Arch, set up by the Emperour *Claudian* *Cesar*, in memory of his Conquest of *Britain*, as the foresaid Author hath set it forth in his 6 Table; with many more of the like nature, which you may see if you peruse his 3, 4, 5, 6, &c. Tables.

These kind of Triumphant Arches are much in request by our *English* Nation at the Coronation of their Kings, as those yet fresh in Memory, set up at King *James* the First, and King *Charles* the First and Second of Happy Memory, when they rode in Triumph through the City of *London*, the day before their Coronation.

C. He beareth Argent, an *Hermathena*, Or. This is a kind of Statue consisting of two sorts of Figures, the upper part representing a Man to the middle, and the lower part either a Column or a Pillar; and sometimes the Figures of two persons joined together one looking one way, the other another way; as the Image of *Minerva* and *Mercury* joined together. So *Hermheracles* is the Statue of *Mercury* with the head of *Hercules*. And *Hermaphroditus*, the Body of a young Man and a Nymph joined together: These kind of Figures are much used in the Coins of the ancient *Roman* Emperors, as an Emblem of an excellent Union, as to Affection, Interest and good Understanding, as well for the management and Conduct of Civil Affairs, as Military. See numb. 34.

C a. In the sinister side of this square, are the form and fashions of the *Roman* Trophies of their Victories, which are the Arms, Ensigns, and other Hostile Weapons set upon high Poles, or hung on the Bodies of Trees in Memory of a Victory obtained against a Potent Enemy in that place where they are set up; and not only in the place, but also on their Moneys and Medals such Trophies of Victory were generally Engraven, in Memory of such and such a Victory, over such and such Kingdoms, in this or that Emperors time, as you may see in *Hemelarius* Tables 16, 28, 47, 51, 56, &c.

C. * He beareth Gules, a Pulpit with its Cover, Or. This is born by the name of *Goisspell*. The like I find born by the name of *Vockwen*, viz. A. 2. Roses and a Pulpit covered, out of Base, G. It is also born by that name sans Cover.

CI. He beareth Vert; The Emperour *Trajan's* Column, Argent, Beautified and adorned with variety of Figures and Bouldings, Or. This I call his Column, because it was erected and set up in memory of him, in this Order as is set forth, having his Statue on the top of it, and 4 Eagles about the base of it. See *Hemelarius* Tables 17. 25. 51, where diverse sorts of Columns and Pillars are erected in memory of diverse Em-

perors, and also stamped upon their Coin and Medals. See num. 32.

III. He beareth Sable, in chief a Thunderbolt proper, placed in base the top of a Brittainish flask, and a Portcullis reversed. Or. born by the name of *Tandor*, although these be here born as one entire Coat, yet being taken asunder they are distinct bearings: as

First, the Thunderbolt after this form was born by *Marcius Antonius* the Roman Emperor, and was stamped upon his Coin, signifying thereby the undertaking of the War against the *Parthians*; that he would in that expedition make a thundering and dismal destruction of them, for their miscarriage against the *Romans*: Some Authors call this kind of Thunderbolt, a *Catapultum*.

The second is the top or head of a Brittainish flask, or *Powder flask*, this being the part by which the Charge of the Gun is rightly made; the whole Flask you may see chap. 18. num. 60. Some term them the head of a Charging flask.

S. 3. such A. is born by the name of *Flaskendorf*.

The third is called a Portcullis reversed, with a round top: others term it the head of a Dart Spear, such as they strike great Fish withal; and the same I find borne by one *Koger de Acton*, that lived in King *Henry* the Eighth's days; being A. in a Field G.

III. He beareth Gules, a Candle-stick of three Branches, Or, in each Socket a Penoncel Argent. born by the name of *Crazer*.

Per fesse. G. and B. the like, O. each Socket having a penon double pointed, B. and A. is born by *Kin Krage*.

CIV. He beareth G. a Portcullis Armed, with one Ring in the Top bar, Argent. This is born by *Heffen 2. Wipdorf* of *Hassia* in *Germany*, and G. the like O. is quartered by *Schelen* of *Westphalia*.

This may be termed a single Portcullis, because it is drawn up and let down by one Ring; whereas the great Portcullis is double ringed, and is drawn up by several persons; some call it a Sally port Portcullis, see num. 17.

4. HAVING now given you as large an account of the works of *Basantry*, with the several sorts of such bearing, as I have found in Arms. It now remains, that in the remaining part of this Plate, I give you some Examples of bearing, which indeed cannot properly be mustered under any certain Head; having neither Head nor Tail, but things of a confused confusion; many whereof I must plead ignorant in, not knowing properly what term to give them, having only seen them in *French*, *Dutch*, *German*, *Poland*, *Spanish*, and *Italian* Coats, with the bearers names, but no otherwise. Therefore I must term them *Heteroclitres*, or *Extrave-*

gant things, that are under no rule, or order; but are rules to themselves.

CV. The first bearing in this quarter, is termed an Old fashion Crepan, as I take it to be a Chirurgical instrument. See chap. 11. num. 47. and this chap. num. 122.

G. the like A. is born by *Van Buchten*, and *Van Lasso*; the like with the half round shanks, each side towards the top Nowy, is born by *Sedlmitzky*.

A. the like in bend, the dart end erect, S. is born by *Zirken-dorfer* of *Bavaria*.

The second is called a *Preach*; but the Latines name it *Sella Curulis*, which the *Italians* take to be the Ivory Chair, so often extolled in the *Roman* Medals and Coined pieces. See chap. 20. num. 50.

B. the like A. born by *Valdaro* a *Spaniard*.

G. the like, O. on the top two Popinjacs, or Parrots rampant, V. Collected, O. born by *Van Viterhsosen* of *Alsatia*.

The third is termed a *Foulding stool*, or *Seat* to sit in. This may also be termed another of the *Roman* Ivory Chairs, which is oft found stamped on the *Roman* Medals of old.

A. the like, B. is born by *Ziany*.

A. 3 such, G. is born by *Monfort*, of the *Nether-Rhine*.

CVI. The first mentioned in this quarter is blazoned, two Heel Spurs endorled, and conjoynd by the two Necks. Some call this a double Crampet.

A. the like, S. is born by *Eckenbrecht* of *Switzerland*.

B. the like, O. is born by *Vasany* an *Italian*.

The second I can term nothing nearer to it, then the Shanks of two Spurs conjoynd in one Neck: or two Spur Shanks, or Heel parts endorled and ioyned in the Neck.

A. the like, S. born by *Alcalk*.

O. the like transposed in fesse. S. is born by *Van Hatzfeldt*.

The third is two Spur Shanks, conjoynd at the Heel parts: or the Shanks, or Heel parts of two Spurs endorled and conjoynd. Some term them Horse-shoes conjoynd in the fore parts; and some calls Cramp, or Iron Cramp.

A. the like. S. is born by *Van Durckheim* of *Rainford*.

Two Cressants endorled and conjoynd. O. is the Crest of *Godemischen* of *Brunswick*.

The fourth is stiled a Cramp Iron, in form of a Circle, the ends contrary bent and double barbed.

A. the like S. is born by *Van Lobe*, in the *Palatine* of *Rhine*.

CVII. In this square on the dexter side, is first that which is called an Iron Cramp, in form of an Horse-shoe; some term it a Semi-Circle, the ends erect, or turned back again to the like Figure, and pointed.

A. Such

A. Such a like. S. is born by *Turner*.
 S. the like reversed. A. is born by *Preflich*.
 G. the like reversed with a Cross pattee, fished between the ends. A. is born by *Lestwitz*.

The second is termed, with the same Denomination, a **Semi-circle**, the ends turne again, and rebated; and after some **Semi-circle reversed**, the ends reversed and rebated.

A. the like. S. is born by *Vitger*.
 G. the like with a Cross pattee fished in the same. A. is born by *Van Wandersich*.

The third is called a **Cramp**, in form of a **Serpents tail**, the **Sting erected**, the contrary end round and peirced.

B. the like A. is born by *Tritz of Bavaria*.
 A. 3 such. S. is born by *Tratills*.

CVIII. In this Square are three other sorts of bearings; the first is called a **Cramp Iron**, the one end round and peirced.

A. the like. S. is born by *Regilly of Italy*.

The second is termed a **Round enbecked and peirced**, it hath the shape of an **Annulate enbecked** on the out side, with a **Lace** or **Rubine** proceeding from the inner side both ways after the manner of a Roman Q.

B. 3. such. O. is born by *Poliny of Italy*.

The third is Blazoned a **Roman I. double Nowy** on the sides, fixt on an **Annulate enbecked**.

A. the like. B. is born by *Aweck Desauling an Almaine*.
 G. 3 such. O. is born by *Dorgan of Rome*.

CIX. In this quarter are three other bearing, which when I know how better to term you shall have it, in the main time reit satisfied, that the first is called a **Candle Socket**, or a **loose Socket**, for a **Candle stick**, or else the wide end of a **Recorder** or **Downy**.

Three such in point. A. with tufts of Grass out of them, is the Crest of *Van Kain of Meynich*.

The second is called a **Chave**, from the name of the bearer, it is a thing representing a **Garlick head**, and the body part downwards increaseth thicker to the end which is triparted. Some term it a **Chive**, the head erected, or a **Garlick head**, the **Leaves Reversed**.

A. 3 such in Fesse. V. is born by the name of *Charves*.
 O. one such, G. with the tuft. V. born by *Cleffs*.
 G. 2 such in Salter. A. born by *Schilling*.

The third is by the *French* Heralds blazoned a **Cerquier**, or a **Cerisier Raim**: the same we may in *English* render a **Rattle** or a Childs toy to play with, or according to the latter, it is a **Dwarf Cherry tree**: But how like it is to either, I leave to the Reader to judge. I shall rather take it for an **Apple roaster**, being made of an **Hay-thorn branch** or **Iron**, with so many hooks, or forked ends, to stick into Apples and so to hang them before the fire to Roast.

O. the like. G. is born by *Crequi Earl of Bermeule* in

France. The *Marquels de Crequi* in *France*, doth bear the same Coat, save that it hath a Root proceeding from the middle of the bottom between the two stems, which makes it look there like a **Cherry tree**.

CX. The first in this quarter I find by some to be named a **pale Gringolee**: but then the pale should be plain; therefore I hold it best termed, a **Staff**, **Pillar**, or **Pale**, the ends **cornished**, and adorned with two **Wolues heads** endorfed. B. the like in bend. A. is born by *Hauseller*. B. the like in bend sinister. O. is born by *Riffa*, both in the *Nether Palatinate of Rhine*.

Bellinghuse beareth a like Coat; viz. A. a **Staff** in bend **cornished**, in the middle and both ends (of some termed **Pomettee**) **Moline**. G. others call it a bend **Cottony Moline**; but if we will go to the pure terms, according to a workman in these things: then say a **Staff** double (or treble or more) adorned with an **Astrical**, or more properly a **Collarino** which is a round swelling out, with one or two fillets on each side it.

B. 2. **Staves** in Salter, adorned with **Collarino's**, the tops floury. A. born by *Ramstein*.

The second is a bearing of the same nature, being a **Collarino molined**: but our modern Heralds according to their Art, term it, a **Pomettee Sarcelled**. It hath the resemblance of the out leaves of the **Flower de luce**, yet the head and bottom of both is wanting, which is a defect, else it were best blazoned, a **Collarino flurt**, nevertheless it is by some presumed to be a **Flower de lis**, Sans Crown or middle leaf, and stalk; or a **Flower de lis** defective, or wanting in her head and foot.

Per fesse. S. and A. the like counter-changed; is quartered by *Van Kienburg of Carinthia*, and *Bavaria*.

A. the like G. born by *Van Hoye of Westphalia*.

CXI. Three things are here also presented to the view; the first is a **Staff** **treble barbed** and **Pometty** on the top. *Weiler of Frankford*, beareth for his Crest out of 2 **Caps** reversed and turned up. G. six such staves barbed and pomelled. V.

4. Such a Crest between 2 **Peacocks tails**, is a Crest belonging to the great Duke of *Pommerna*.

The second is two **Rams Horns** conjoynd in one at the **Scalpe**, whose bottom is floury: and are generally blazoned, two **Rams**, or **Bonicons hornes** enpointed conjoynd and flurt, in the bottom.

A. the like. S. is born by *Lirheim*.

The third is called a **Chest Rook**, with a **Cypress** sprig in the hollow of it; some term it a **German Rook**.

The like, A. with a Grass tuft from the middle of it: is the Crest of *Zwicken of Bavaria*.

CXII. In this square are three other like sorts of bearings, which are of strange names, and instead of terms, the first is like the **Probofides**. **Trunkes**, or **Snouts** of **Elephants**, reflected, endorfed and conjoynd, fixed upon a **Foot** of a **Cup**: Others will have these to be **Pommes Horns** conjoynd in one at the wide ends, bowed in the form of a **Cressant**, then

then contrary reflected; take them for which you will, Spouts or Horns, thus delineated, is born by *Rouffillum* a *Polander*: viz. A. the same, S. Foot, O.

B. 2 Ox Horns, the points or tip ends rebated, fixed on a square foot. O. is born by the Earl of *Thorland*.

S. the like O. with a Rectors Staff between them A. is born by *Prissibuch* of *Aufurge*.

The second is blazoned the Fellow of a Cart wheel having one Spoke Argent, on the end of it an Escallop, Azure, on the top of it a Grass tuft. This is the Crest of *Eglingen* of *Barvaria*. The points at the ends of the Fellow, are to pin, or hold fast the Fellows together, which are in the Wheel rim, or whole compass of the Wheel.

The third is termed a Shield, in form of a Crestant, with the Pandle fretted into two Annulates: And this I take to be such a thing, because the like is named to me by our English Heralds, as you may see *chap. 17. numb. 41, 42, 43, 44*.

The like A. is the Crest of *Brackot* a *Salitian*.

G. three such Argent, is born *Shielder*.

CXIII. The first in this square is termed by the French a *Roch* or *Rock*, if for the Chest board; then it is not to be moline at both ends, but rather to call it a *Staff* *Houined* or *Sarcelled*, *Pometty* in the middle; yet in regard of the bearers name, and worth, which was *Robert Rochester* Knight of the noble Order of the Garter, in *Henry the Eighth's* Reign: I shall let it go with the French term, viz. Argent, 3 such *Roch's* *Sable*. See such a like bearing, I have mentioned before, *numb. 110*.

The second is termed a *Cooks* *Solding-Iron*, it is made of Brals or Iron, by which they Cut and Carve their Past, for to adorn their Pyes and Pasties, with variety of Leaves and Flowers.

G. 2 such in Salter, A. is born by *Gollnitz*, a *Dutch* Family.

The third I take to be a *double Hook Iron*, or an Iron with a Hook at each end contrary bowed; such as these are oft made use of to hang things on, and so to hang the opposite Hook on Pins, or in Stables.

Per pale, A. and S. two such endorled, or top Hooks contrary reflected, counterchanged, is born by *Guthen* *Van Sultz*.

A. 3 such, S. born by the name of *Hockall*.

CXIV. He beareth Gules, a *Raft* or *float* removed, (or taken out of its right place) Or, this is the French Blazoning of it; and is born by the name of *Brevill* of *Normandy*.

CXV. In this quarter are four bearings, resembling yet not like one another. The first is termed a *Quetsteen*, that is a *Wall Stone*, for so the Dutch name it.

A. 3 such in pale, G. is born by *Brickley*.

The second is a *Mill-Iron*, een *Molen-yster*, as

the Dutch term it, which we term the *Millrind*, or *Ink* of a *Mill*; which they use after this form.

G. the like *Fesse*-ways, A. born by *Eysenreich* of *Barvaria*, also by *Muleysen* of *Aufurgeay*.

G. 2 such erected, A. is born by *Letcher* of *Brumwick*.

The third is a *square Tile*, perforated, or thrust through the middle with a *Brick Ar*.

A. the like, G. is born by *Stemple*, or *Stempel* of *Westphalia*.

A. 3 such, G. born by *Stempelin*.

The fourth is called a *Turners* *Handril*, made after the old fashion; what it is, and for what use, I shall refer you to the *Turners* working Tools, *chap. 8. numb. 150, 151*.

A. 3 such, G. is born by *Van Haren* of *Westphalia*.

CXVI. Here are in this Square, four several sorts of bearings in Arms: The first is termed a *Nail* the point rebated, others the top of a *Spear head*.

The like quarterly, B. and A. is the Crest of *Van Eizdorf*. Per bend S. and A. 6. such of the first, born by *Spiznasen*.

G. 3 such between 2 bendlets, A. born by *Zwickel* of *Stenrick*.

The second is Blazoned a *Staff* in pale *Pomette* and the top *Pomet*.

G. 3 such, O. is born by *Mire*.

The third is called a *Pale* *Nowy* *couped*; and such is born by the name of *Nowel*, viz. A. the like S.

The fourth is a *Pale* *couped* *nowy*-*pierced*, ends *Pater*.

O. 3 such, G. is born by *Cullenburg*, a Count in *Germany*.

B. one such, O. is born by *Van Nempersdorf*.

CXVII. Here are also five sorts of bearings in this square which are as the Proverb saith of *Gib's* Children of *Leen*, none like an other; yet all makes Coats of Arms of like Honor.

The first may be termed a *Fesse* *couped* with one *Battlement* on the top. But in the Coat of *Newkirchen* of the *Lower Rhine*, it is best termed a *Crow-stone*, or *Should board*, who beareth Argent, a *Fesse* *Sable*, in the sinister chief the like, G.

A. 3 such, G. is born by *Cromslein*.

The second is Blazoned a *Triangel* voided each corner *Bottony*. *Van Ulerdorf* beareth Azure, the like Argent.

B. 3 such, O. is born by *Bisfrigle*, some bear the corners *Pometty* *floury*.

The third is by the French blazoned, a *Trespan*. I suppose it is ment for that Chirurgicals Instrument called a *Trepan* mentioned, in *chap. 11. numb. 48*. See *numb. 122*.

O. the like, S. is quartered by *Michael* *Ajinar de Virle*, and

and *de Orbassa*, a Noble Seignior or Lord in *France*.

The fourth is an **old British A.** or a **Cressel** on two Feet, **Argent**; the like **Sable**, is quartered by the Earl of *Amersberg* in *Germany*.

The Fifth is taken to be an **Old British B.** and three such (I once saw, and took notice of the same, entering in my Book) **Sable**; in a Field **Argent**; impaled with **Azure**, a Bend cotized between 6 Crosses Patee **Or**. but whose Coat it is, I have not yet found out.

CXVIII. Those in the beginning of this number, I take to be old Alphabet Letters, such as now are worn out of use, yet not of Memory. The first is an **Old Saxon F**; and is born in Arms, for the Bishoprick of *Chamin* in the Province of *Saxony*. Viz. **Azure**, the like **F Or**.

The second I take to be a **Roman V** reversed, (or a Greek *Lambda*) the sinister side crossed patee, and such a Bearing **Argent**, in a Field, **Gules**; belongs to *Gastinare*, a *French* Family.

A. the like B. is born by *Van Mayrhofen* of *Barvaria*.

The third is termed, an Instrument angled in form of a **A**, the dexter end quarter pierced, the other with a **Spur Rowel** of diverse points. The like A. is the Crest of *Van Obisch* of *Alsatia*.

G. on a Mount with 3 heads, or tops, out of Base **O**. a like neck of a Spur erected with a Rowel of diverse points A. is the Coat and Crest of *Raulleker* of *Barvaria*.

CXIX. The first thing in this quarter, is thus Blazoned, out of a **Lamp**, Barry of six A. and G. 3 **Grass Tufts**, in a **Crown**, **O**. which is the Crest of *Quernfort* of *Barvaria*. Some term this a **Log of Wood** out of a **Crown**, with 3 Tufts of **Grass** growing thereon.

Van Logan of *Alsatia*, hath for his Crest the like, **Paly** Bendy B. and A. on the top a Tuft between 2 Roundlets the one G. the other A.

The like Lamp Chequy G. and A. the sides adorned with 4 Feathers S. is the Crest of *Liebdaler*.

Out of a **Coronet**, one **Lamp** within another **Lozenge** **O**. and G. is the Crest of *Sanheve de Dabrigecourt*, one of the Knights of the Garter, about the first institution thereof.

The second is an **Insula** or **Copped Cap**, **Gules**, with a **Button** on each side, and top, **Casselled** or **Cufted**, **Or**. Issuant out of the bottom thereof a **Demmy plate**. This is the Crest of *Mountall* or *Mountball*, an *Italian* Family.

The third is termed a **Dutch** or a **Triangle Coulter**, **Bottony**, (or at each corner **Bottony**, as some term it) or a **Coulter**, the point reversed **Bottony**.

G. the like A. is born by *Haydenreich* of *Barvaria*.

CXX. In this square are three bearings of near resemblance, yet of different terms. For the first is by the

Dutch Blazoned a **Kramberg**; that is in English a **Crooked Hill** or **Mountain**. The *French* term it a **Chaperon Shapournet**, which is a Hood with a little Hood upon it, or a Hood with a Turn-up. Of these I have spoken elsewhere, lib. 1. chap. 9. numb. 115. but these being different to those, give me leave to tell my Judgment what I take these to be, and that by reason of their edgings with another Metal, or colour; which make them no other than **Hills over-cast** with **Dew**, **Gold Ore**, or some other **Metal** or **Mineral**, according to its colour; being cast up upon the top or surface by **Miners** and **Pioneers**, and that they are no other the example following will further manifest.

B. 3 such surmounting one another in **Pale G.** edged, (or topped, or turned up) **O**. born by *Drieberghen*; that is in English **Three Mounts**, or **Hills**.

The second is a **Mountain**, or **Mount Trebble mounted**, or a **Hill** of three ascents; and that it is so, may in some part appear from the names which own such bearings, as

A. the like S. is born by *Schwartzberg*, that is **Black-hill** in English.

O. the like S. is quartered by the Earl or Count of *Freundsberg* in *Germany*. *Freunds-Berg* is a **Friends-Hill**, or **Hills** joined in **Friendship**.

A. the like V. is born by *Van Aufstehenberg* in *Barvaria*; which name also signifieth an high rising Hill, or an ascending Hill; a **Hill upon a Hill**.

G. 10 **Mounts** gradually surmounting each other 4, 3, 2, 1, A. which is born by *Friesenberg*. See lib. 1. chap. 9. numb. 85.

The third is termed by the *Dutch* also, a **Hole-hill** on an **Hill**, or a **Cop-hill**, and are made of any Colour or Metal. See lib. 1. chap. 9. numb. 84. 116. where the *French* term it a **Shapournet Crested**.

A. the like V. on each a stream or Flame of Fire, born by *Prennberg* of *Barvaria*.

A. on a Bend Sinister G. 3 such Hills copped O. is born by *Van Horvelt*, which may be taken for a little Hill being derived from *Hugel*.

A. the like B. born of *Brincken* of *Westphalia*. And G. is born by the Count *Liebeisstein* in *Germany*.

A. the like out of Base S. born by *Aicham*.

A. a Cop Hill surmounted of the like G. born by *Mayr Van Wasenneck*.

Sometimes the 3 rounds are severed, having (as it were) a round Vally between them, which makes it shew like a **Coronet** with 3 Pearls, yet it is no other than a **Hill** or **Mount**, with three **Cops**, or with 3 **Hole Hills** on the top. And such is born by *Hornberg*, Count *Horberg*, and other *German* Families. Viz. Or 2 **Hunters Horns**, the Mouths fixed on such an Hill, the wide ends counterposed, **Sable**.

CXXI. In this square are, first three **Stieces** or **Steps**, where a place may be mounted or ascended to: Some term them **Stairs**, each diminished, one less than another from the Foundation; and that they must needs do being circular ascents.

G. the like A. is the Coat and Crest of *Steinach* in *Swabish*.

B. 3 such O. is born by *Griffhall*.

The second is termed a **Crumpett**; It is a thing on the out-side, much after the form of an Heart, but hollow within, so that it appeareth like 2 Horns conjoined.

A. 3 such G. is quartered by the Duke of *Luxemburg*. And also by the Duke of *Saxony*; which Coat I find doth belong to the name of *Bremen* of *Bavaria*.

Sometimes the points on the top are made by the Dutch so close, that by their touching, they represent an Heart, and as it were charged with a **Trefoil Leaf** reversed. And so it is born in the same colours as afore-said, by *Van Seebach* of *Tyrol*; as if the closing were a sufficient distinction (as it is) for the Coats.

The third is a **Fels coupé**, with one **Battlement** on the middle of the top, from each side proceeds a **Rod** with a **square Fan** endorsed. Some take these to be the **Minutes** or **Stops**, to the **Ballance Wheel** of a Watch or Clock.

A. the like O. is born by *Alnekhoven* of *Bavaria*.

B. two such Minute Stops or Fans in Saltier, and a Rose in chief, is born by *Van Rungen* of *Mijnian* in *Germany*.

CXXII. In this square are several sorts of **Triangles**, yet none like his fellow. The first is termed a **Quadrant**, the **Angle Curvi-Linear**, or having crooked Lines bending inwards.

A. a Fels Dauncett S. between 3 such G. is born by *Dollinger* of the *Rhine Palatinate*.

A. 3 such S. is born by *Gomer*.

The second is a **Triangle**, which being born in Arms, hath ever a point or **Angle Erect**; as Gules three such Or; is born by *Hafen*.

The like G. charged with the **Bells** of a **Curb Bit**, O. is the Crest of *Hofenhusen* of *Brunswick*.

The third, is an old fashioned **Trepan**, an Instrument belonging to Chyrurgery. Of these there hath of ancient time been several sorts and ways of making them, but now they are out of use; only kept in memory by their use in Arms: As Azure, the like, Or, is born as the coat and crest of *Van Dluhomil*, of *Saxony*. See *numb.* 105.

The fourth is another fashioned **Trepan**, two ends thereof being adorned with **Roses**. And such a like, with the piercing part erected, I find born by *Melechkker van Tschelo*, of *Silitiars*, Viz. Azure, a **Trepan** the point erected Argent, the **Roses** Gules. See *chap.* 12. *numb.* 6.

CXXIII. The first thing in this Quarter is termed the **Inside Main Posts**, or **Stays** of a **Wind-Mill**; or if it so like you, Blazon it a **Crouch Staff** out of Base, twice crossed, with **Roses** on the ends, the middle fretted with a **Triangle voided**, the Base supported with 2 **Stays** or **Laces**. This I have seen born in an **Escuchion**, viz. Azure, the like Or, **Roses** Argent; but it had no name set to it.

The second is the figure or shape of a **Crouch** or **long Cross**, or **Potonce**, the bottom thereof converted into foldage, or turned **Leaves**: Or as some term it a **Crouch Staff** with a **Vine Leaf** at the end of it, Argent; such a **Potonce** Leated, Gules; is born by *Crook Joile*.

The third is a **Pillar**, in the middle whereof is the **Roof** of an **House**, **Cited Escallop-toise**, (or with **Scallop work**) and a **Tuft of Grass** on the **Capital**. The like to this is the Crest of *Ziegler* of *Carinthia*. Viz. the **Pillar** A. **Roof** G. **Tuft** V.

The fourth is termed a **Rammer**, or an Instrument to **Drive Piles** into the Ground. Thus the Dutch make them, but the French draw them with straight bottoms.

A. the like G. is the coat of *Van Ramyn* of *Saxony*, his Crest being likewise two such endorsed, or contrary Bowed.

A. the **Rammer** part G. the pins or handles, O. is born by *Van Bredam* in *Brandenburg*.

CXXIV. The first in this square is thus Blazoned. He beareth Azure, a **Pillar triparted** in the **Base**, Argent, the **Capital**, Or; with a **Tuft of Grass** growing thereon, is the coat of *P.L. Jhe*.

B. 3 such A. Tufts O. is born by *Biscoe*.

The like A. **Capital** O. **Tuft** V. is the Crest of *Van Draschvitz* of *Mentz* in *Germany*.

The second is termed a **Tanker** or **Milk Tankard**, charged with 2 **Piles**.

The like O. charged with 2 **Piles** B. between as many **Beavers Tails** erected, of the second; is the Crest of *Symon de Beverley*, a Knight of the Garter in the time of King *Richard* the second.

The third is termed a **Chest Bishop**. This is one of those kind of **Rooks** or **Chest men** called a **Bishop**; having a kind of **Miter** on his head: This could I have told, what it had been before it was Engraven in this Plate, it should have been set amongst its Fellows, in *chap.* 16. *numb.* 31. But the **Collar** of the Order of the **Golden Fleece** in *France*, hath it composed of such things and a **Fire Stone** or **Flint Stone**; but they call them a **Ferris** or **Fire Steel**, having no ring about the bottom and top part. See *numb.* 128.

B. the like O. is born by *Schurfe* of *Tyrol*, whose Crest is the same out of a **Coronet**, with a **Plume** of **Feathers** on the point S.

Per pale A. and B. the like **Ferris** or **Fire Steel** counterchanged. Born by *Bogner* of *Alsatia*.

G. the same in Bend A. is born by *Schurffeyesen* of *Bavaria*. The like in Bend is his Crest.

CXXV. He beareth Argent, an **Octagon**, (or an eight square) each point **Pomettee**, Azure; charged with a **Cross Patee**, Or. Born by the name of *Flanken*. Some say an **Octagon Pometted**.

CXXVI. The first in this square, from the name who beareth it, I take it to be an **Hostemans Flask**, or Powder

Powder Box, wherewith Troopers charge both their Pistols and Carbines. Some have them with Feet, some without; others with 2 Loops on the sides, and others but with one, which is to hang them by their sides. See of these sorts of Flasks after the *English* mode, chap. 18. numb. 60.

A. the like Flask, or round Flask G. is both the Coat and Crest of *Flaschen* of *Brunswick*; which name in the *Low Dutch* Language signifieth a *Flask* or *Bottle-maker*.

The second is termed an *Octagon curvil-linear*, (or an eight square, the lines bending inwards) *Gilded*, over it a *Cross*, having at each end an *Austrian Feather*. This is the Crest of *Van Oester*. Viz. the Square and Cross, Or; the Feathers Argent.

On a Cap of Dignity, the like square A. with the Cross quarterly crossed G. the Feathers of a Peacock, proper, is the Crest belonging to the Archbishoprick of *Triers* in *Germany*.

The third is termed a *five Square*, the two higher *enbuckled*. Some will term it a *Witer* in full aspect or sight, the sides *invecked*. Some are charged with Crosses, Fesses, Cheverons, Roses, Branches, &c.

S. the like A. charged with a Cheveron O. is quartered by the Count or Earl of *Madrutz* in the Empire of *Germany*.

CXXVII. He beareth in this square, two sorts of things, the first is an old fashioned *Mirror*, *Flory* on the top, and *Handle* *Pomettee*.

The second is Blazoned a *Cadizon reversed*, with 2 demy *Annulets* *issuant*. Of this kind is the Coat belonging to *Sevaunce*. Viz. Azure three such Or.

S. one such O. Rings G. born by *Nottow*.

CXXVIII. He beareth a *Steel Ferris*, or *Fire Steel*. This is the true form of it, as is set forth by the *French* and *German* *Heralds*, of which I have spoken before in numb. 124.

In the Base is a *Cross pointed*, but generally termed a *Cross Urdee parted*, the middle quartered. Some of old have termed it quartered and parted Argent and Gules.

CXXIX. In this square is two bearings much alike. The first is a *Losenge* between two demy ones, conjoined in Pale. This is by most termed a *pale Losengy coupé*, but then it should have more then one *Losenge*. Argent 3 such Azure, is born by *Gabell*.

The second is a *Losenge conjoined* to two demy *Hasties* *Fesswise*. And three such in Pale are born by *Muchmall*. Viz. B. 3 such O.

CXXX. In this square are four other manner of Bearings used in Coats Armour: The first is termed a *Clenler* or *Strainer*, a *Cullender*.

B. the like O. is born by *Schaler*.

G. 3 such A. is born by *Spangler* of *Alfatta*.

The second, which is that more near the chief, is named a *Goldsmiths Tiggling Iron*, this is used by all Chafers of Plate. See chap. 20. numb. 121.

G. 2 such A. is born by *Kelderer zu Hoke* of *Barvaria*.

B. 3 such in Pale A. born by *Hobelleek*.

The third is Blazoned a *Beazont* and three *Leaves* conjoined in Triangle. Others say 3 Bay Leaves in Triangle fixed to a *Beazont*.

A. the like G. is quartered by the Count *Van der Recke* in the Empire of *Germany*.

A. 3 Olive Leaves in Triangle G. fixed to an *Annulet* O. is born by *Van Ronberg* of the *Rhine*.

The fourth is by the *French* termed an *Ancient Club* or *Spade*; but how to shape it to such a thing, I must leave it to others, for I cannot.

O. 2 such Maces in Saltire G. is born by *Giles*, or *Gille* or *Gilon* a *Senator* of *Rome*.

CXXXI. The first and second Charges in this square, I take to be one and the same, only transmutation of place, which cannot alter its essence; yet in these positions, they are born in Arms, as to the first, I find *Van Biesenfeld* of *Alfatta*, to bear Sable the like in Bend Sinister, Argent.

A. the like in Bend G. is born by *Emerckingen*.

A. the like in Bend Sinister S. is born by *Schenck van Wintersteden*.

O. the like in bend sinister, S. charged with 3 trefoils, A. is born by *Van Derf zu Vitermunden* of *Hassia*.

A. the like rebated, or the points cut off, is born by *Van Tettenborn*.

The second, which I take to be its right position, or station, is born in Arms, by diverse Gentry; and is by such termed an old, or *Ancient Flegme*, or *f. eame*, or an Instrument used by Chirurgions, for the ripping of Teeth. See chap. 11. numb. 30.

S. the like, A. is born by *Van Sotern* of *Rhine*.

A. the like to the sinister, G. a bordure, B. is born by *Schemelgen* of *Schwabisch*.

S. 3 such rebated (or points blunted, or cus off) A. is born by *Van Prabeck* of *Westphalia*.

The third is by the *French* termed an *Ancient M*, but in what Language my Author informs me not; but that *Avitus* Governor of *Gauls*, did bear Gules such an *Antique M*, Or.

CXXXII. He beareth Argent, out of the dexter base side, a *Pile flected* and *reflected* in form of a *Swans Neck*, fretted with a *pointed Nail*, proceeding from it self, Sable; is born by the name of *Bois*.

CXXXIII. He beareth Argent, two *Horns* of a *Bull*, with *Nails* or *pointed Pins* on the respecting Sable sides tips having *Balls tufted*, Or; born by *Mantzin*. Some take them to be the two sides of a *Lobsters Claw* issuing out of Base, and that the more nearly resemble then *Bulls Horns*.

The like, A. balls and tufts, B. is the Crest of *Brandenburger zu Raet* of *Swabia* in *Germany*.

The like out of a Coronet (sans Balls) A. is the Crest of *Van Tentelen* of *Tijl*.

Out of a Coronet the like dented on the inner sides, O. is the Crest of the great Prince of *Margger* and *Baden*, under the *Alman* Empire.

CXXXIV. He beareth out of a Coronet, Or; an Octagon curvilinear (or *Curbat*, or *Crooked lined*) Argent edged or bordered Gules, set in the middle (or the Center adorned with a Ruby, between 4 Diamonds, the points (or each point) set off with a Button tufted, Azure. This is the Crest of *Don Albro* of *Arragon*.

These are born also six, eight, or ten square, with the points set with Bobs, Tassels, Feathers, Slips, or Leaves and Flowers, &c. And upon the flat parts are usually made some chief or principal part of the Bearing of his Arms, who hath it for his Crest, I shall give some few examples.

An Octagon Buttoned and Tufted G. charged with a Buckle A. This is the Crest with the Arms upon it, belonging to *Grasswein* in *Switzerland*.

An Octagon with Hawks Bells, charged G. on a chief A. 3 Ravens, is the Coat upon the Crest belonging to *Bugg van Stromburg* of *Bavaria*.

An Octagon A. Flurry S. charged with a Lion rampant of the second, is the Crest of *Anerthall*.

An Hexagon pointed with Peacocks Feathers, per Pale O. and G. 3 Pends counterchanged, is the Crest with the Coat upon it belonging to *Korbler* of the *Switz* Family.

A Sexagon, or six square A. points with Bobs and Tassels O. charged with a Goat Saliant S. is the Crest of *Chur* of *Bavaria*.

3. WE shall now give some few examples of the bearing of Lines, Threads, or Laces, as they are cast into Turns, Frets, and Love Knots, of which kind of Coats Armour composed of such Devices, I have found these following.

CXXXV. He beareth Argent, three True Lobes Knots in Triangle fixed to an Annulet, Sable. This is born by the name of *Truman*.

B. the like O. is born by *Zyger* of *Salutars*.

B. the like O. one in chief, the other pendant in triangle: And for his Crest he hath 3 such Love Knots erected. Born by *Kurmsker* of *Switzerland*. Some term these 3 Cordats or Cords, cast or woven in True Love Knots.

CXXXVI. The first thing presented in this quarter is thus Blazoned, He beareth Argent, two Annulets, Gules; Fretted with a Lace or String quadrangular, having a Bob (or round turn) at each corner, and the ends Tasselled, Azure. This is born by the name of *Knott*. Others say a Rubin in Lozenge form 3 corners turned into Bows or rounds, interlacing 2 Annulets in Fess, the ends trailed extended or floatant. Some call it a True Lobes Knot fret-

ting 2 Rings in Fess. See lib. 1. chap. 6. numb. 08.

The second charge, is Blazoned Azure, a Pear or Quince, Or; surrounded with a Lace or Rubin, the ends in chief Gogged or run through an Annulet, and reverted into the Base (or pendant and tasselled) Argent. I have seen it also termed an Annulet and Pear, Or; with a Lace through the one and round the other, the ends pendant and tasselled Argent. This is born by *Tallake*.

CXXXVII. In this square are three sorts of Frettings, one contrary to the other; the first is Blazoned Argent, a Rubin fretted and crossed into 5 Bows with the ends pendant, or extended, Gules. Born by the name of *Reken* or *Recell*. This I may say is the form of the Knot, or turnings of the Rubin; but the true term for its various crossing, I judg the Artist in those kind of devices, hath other expressions, which as yet I am unacquainted with.

The second is a Lace or Rubin compassed into a Round, the ends crossed, reverting and fretting the same in chief. Others say, a Rubin in a Circle, fretted by the ends erected to the chief. And such a Bearing I find to belong to the name of *Drill*. Viz. the like Argent in a Field, Vert. Some bear this kind of Knot, with the end running in the Base. As O. the like B. born by *Gener*. In Serpents Tails this kind of turning or winding, is termed *Rowed* or *Nodee*, the ends erected or reverbed, according as the end lyeth. See lib. 2. chap. 9. numb. 73-74.

If this were drawn close together, it would be a perfect Knot; so then it may be termed a Lace in an open knot, the ends erected.

The third is a Lace or Rubin (sans ends) cast into three Bows, or pointed rounds, fretting each other. Some say 3 semi-circles, or demy annulets fretting each other and conjoined in the points. Others a Triangle fret.

Such a Fret O. in a Field G. is born by *Endless*.

CXXXVIII. He beareth Azure, two Rubins, the ends contrary posed, wreathing or twisting each other, Or. Most have it, the ends wreathed in pale; because it may as well be born with the twisting in Fess. Then I hold the properest term is to say, two Rubins contrary imbowed in Pale, the ends wreathed and extended. This as aforesaid, is born by the name of *Writball*, or *Reithall* of *Poland*.

CXXXIX. In this is the shape of 2 Mulletts, one of 5 the other 6 points, yet no such thing; for the first is Blazoned, Argent, an Ambiated Mullet, or a Mullet voided and fretted, or a Mullet parted and fretted.

G. the like A. is born by *Dezel* or *van Wangen*, a Dutch Family. The same is his Crest with a Tuft on each point.

G. the like O. born by *Staller*.

The second is two Triangles voided and fretted,

in form of a **Bullet** of **six points**. This is born by the name of *Tridolt*. *Viz.* Argent the like **Gules**. This by our Ancients hath been termed *Ternarius Sacer & Potentissimus*, the Holy and most powerful Ternari. And *Numerus Perfectus*, the perfect number of Three in One. But this Answereth not to our Method of Blazon.

CXL. In this square, in the dexter chief, is the Bearing or Charge of a Coat quartered by *Van Pelschach*, of the Dukedom of *Austria*, which is thus Blazoned. He beareth **Gules**, a **Staff** in **Fess** with a **String** at each end, that on the dexter side is cast over, with a **True Loves Knot** pendant; the other overturned, the end waved, Or. Yet the *Dutch* give it a brier cut, terming it a **Whip** with a **Lash** at each end, debussing the handle, (or turned over the handle) one cast into a **True Loves Knot**, the other pendant.

The second is a **Triangle voided**, or a **Triangle edged**, or **bordured**, if it be solid; for so I have seen them both ways born in Arms. *Viz.* Argent 3 such **Gules**. Born by *Tridolf*.

G. the like, with three **Keys fretted** by the **Bows** in **Triangle A.** born by *Beheim* of *Switzerland*.

B. a **Triangle A.** bordered O. charged with a **Rose**, is born by *Naswitz*.

CXLI. He beareth **Gules**, a **Garbow**, Argent. This I found thus drawn amongst other Old Coats in an ancient Book of Arms Collected together about the Reign of King *Henry* the Sixth, but it had no name assigned it. I gave it the name aforesaid, being it is composed of an **Arrows** in the top, with a kind of Barbed head, and the end or bottom fixed to an **Indian Bow**, the **Shaft** of the **Arrow** fretted with an **Annulet**.

CXLII. In this square is two kind of **Crosses**. The first is thus termed. He beareth **Gules**, on a **long Cross** fixed on a **Basis** issuant out of the **Base**, two **Birds**, Or; the overwart **Stem** supported from the middle of the **Standard**, with two **Laces** or **Binding pieces** tyed about with a **Rubin**, the ends extendant Argent. This is born by the name of *Bredingcoss*.

The like bearing (sans **Rubin**) is upon the Tomb of *George Chambrith*, late Lord of the Mannors of *Wretton* and *Anseley*, in the Parish Church of *Langar*, in the County of *Nottingham*.

* The second he beareth **Azure**, a **Cross Pattee** fitch and fixed in a **Basis** in **Base**, supported by two **Laces**, Or, is born by the name of *Crosby*. Such a like Bearing is in an high Window in the middle of the South Ile; and on an old Tomb in the Parish Church of *St. Marys* in *Nottingham*, but no name mentioned, which my Author thus Blazons, **Azure** a **Cross Pattee**, with a **Basis**, and supporting 2 **Laces** between 4 **Bullets** of 6 points, within a **Bordure engrailed**, Or.

CXLIII. He beareth Or, a **China Trumpet**, Sable, the Mouth piece and Garnishings Argent; the Strings in form of a **True Loves Knot**, **Gules**.

In the sinister side of this square, is a **Mand** or **Crooked Staff**, or **Stick** much used on the old Roman Coins, and was by the *Latines* termed **Lituus**, an **Augural Stick**, or an **Augurs Crooked Staff**, because they used to carry such in their hands, when they went about their Divinations. See *Hemelarius* Table 37 &c.

CXLIV. He beareth Vert, a **Long Cross** Potence **Pommel**, fixed on a **Basis**, Or; the **Standard** tyed about with a **Rubin**, the ends turned round and pendant, Argent. In the beginning of Christianity amongst the Roman Emperours, they did upon their Coin cause such kind of **Crosses** as these are to be Stamped; as may be seen on the Stamps of *Flavius Focas*, and *Flavius Heraclius*, both Roman Emperours, set forth by *Jo. Hemelarius*, in his 64 Table of their ancient Coins.

CXLV. He beareth Argent, out of **Base** the **Probesides** of two **Elephants** erected, reflected and endorsed, Sable; linked or held by 2 **Cross Links** put about the middle of them, **Gules**. Some will have these to be **Dr Hoys**, and not **Elephants** Snouts, to whom I do much incline; for the **Elephant** hath two passages in the **Snout**, but here is but one, and that round and mouthed (in the erected end) much like a **Trumpet**; so that they may be fitly termed **Jews Trumpets**, or **Trumpets** made of **Dre Hoys**. See chap. 16. numb. 17. 51. 56.

The foresaid Blazon belongs to *Van Brommagen*.

On the Crown of a Cap G. turned up Er. two such **Trumpets** of Ox horns erected, reflected and endorsed A. **Stringed** and **Garnished**, the **Bows** (or rounds) conjoined O. is the crest of *Zam Jungen* of *Frankford*.

On a **Torce** or **Wreath** O. and S. two **Hoys** of a **Bull** A. **Stringed**, the **Bows** interlaced or fretted S. which is the Crest of *Van Rotberg* of *Saxony*.

CLVI. He beareth in the dexter side of this quarter, viz. out of the **Base** 2 **Probesides**, or **Elephant Snouts**, erected, reflected, and endorsed, Or. in the middle linked with 2 round **Links** of a **Chain**, S. is the Crest of *Van Frendsberg* an Earl in *Germany*.

Now to Blazon them **Jews Trumpets** (as fitly they may be so termed) the **Strings** are then termed either **Braced**, **Imbraced**, or **Coupled**, one being within the other.

The second is out of **Base**, two **Jews Trumpets** the Mouths erected, reflected, and endorsed, fretted or embraced with a **String** plated, or **imbraced** with a **True love knot**. Here the string is not fastned to the horns, but is turned about them as the knot (which is endless) is formed in **True love**, accordingly the crossing and fretting is. This is born by the name of *Bracelet*.

Two such Horns one O. the other G. 2 **Strings** fastned from one to the other, and in the middle fretted or noted in **True love**, S. is the Crest of *Julbach* of *Bavaria*.

Two such A. the **Strings** in **True love**, B. is the Crest of *Matsch* of *Bavaria*.

Two such **Horns**, A. Strings and fretted in True love. S. is the Crest of *Weysenborn* of *Bavaria*.

Two such **Horns**, per fesse, A. and S. contrary changed one from the other: **Strings** nowed in True love, A. is the Crest of *Hoben h. men*.

CXLVII. Here is in this square, in the Chief, is a beating which goes under several denominations; as first I find it called an **Annulet crushed together** and **Wreathed twice** about; others call it the **Link of a Chain wreathed**; others a **String** or **Cord** (Saus end) **twisted** one over the other. Some will have it to be 3 Annulets conjoynd.

A. 3. such in pale, S. is born by *Trykeek*.

Per pale, O. and G. the like in pale, or crested B. is born for the Coat, and in the Crest between 2 Wings of the Field, by *Knippinck* of the *Nether-Rhine*.

The second in the base, is belonging to the Coat Armour of *Schmanjhel* of the Palatinate of *Rhine*, viz. Argent, 3 such Sable, but what to term them I know not, (except **Dutch Skits**, to Slide withal) when I can I shall, tell then rest satisfied with what you see of it; and so I shall end with these extravagant bearings.

CXLVIII. In this Square are two things much stamped upon the *Romans* Ancient Coins. The first is termed the **Prow** of a *Roman* Ship; and is also in some Coined with the rising part wrought into the form of Lions and Dolphins Heads.

The Second is the **Hollow** of the **Prow** of a Ship, as if it were so set, that a person may see into the inner side of it; these were in the Coins of *Augustus* and of *Victorious Pius Felix*, *Aug. Caesar*; and in those of *Valentinian* and *Gratian* his Brother, as *Jo. Hemelarius* hath set them down in the 345. and 58. Tables of the *Roman* monies.

CXLIX. He beareth Azure a *Roman* Hull of a Ship. Or, in those Elder days before Masts and Sails were used to Ships, they made a benefit of Oars to guide and conduct their Ships from place to place, very rarely venturing into the main Ocean, but still keeping within sight of Land, or going where they could see or perceive Land. And that was the cause of their coming into *Brittain*, because they perceived the Land from *Gauls*, now called *France*. Such a Ship is on the Coin of *Gerdianus*, the third of that name Emperor of *Rome*, and of *Valentinian*: As is described by the Author aforesaid in the 41. and 58. Tables.

CL. He beareth Gules, and Arm extended in Fesse winged at the Wrist, and Sleeve Or, the Hands hold-

ing a Sword, the Point crested proper, born by the name of *Manuel de Belmont* a *French-man*. This may in short be termed **Mercuries Arm** holding a Sword, for any thing with Wings pertaining to a man, as Head, Arms, Cap, Feet, or Shooes, are ascribed to him as being a part of his appurtenances as in the next example and chap. 1. numb. 71.

CLI. He beareth a **Calatia** or **Mercuries shooe** Sable, Winged Argent, in a Field Azure, by the name of *TILLIER*; if the Shooe and Wings had been all of one Colour or Mettel, then there had been no need of mentioning the Wings, for all things belonging to him are supposed ever to be winged.

G. 3. such, O. is born by *Messenger*.

CLII. He beareth one of **Joves double Thunderbolts**, flying in Fesse Or, in a field Sable; this I have not seen born in Arms, yet it may be a fit Coat for such an Embassador, as pronounceth War, and Terrible ruin and destruction to a people or Kingdom. It was a Trophy of some Victory obtained by *Antonius Pius*, for he Coined the like upon his Money with these words *PROVIDENTIA DEORUM*; and is by the Latine termed *Fulmen telam Jovis*, a **Dart Thunder-bolt** of *Jupiter*, which in short we may call *Jupiters Darded Bolt*.

CLIII. In this square I present you with the form of the **Romans Boats**, which they carried from place to place, to transport the Souldiers over broad and narrow Rivers, which they were in their Travels to pass: They called them, *Naves dissolubiles*, as *Fluvius Vegetius* in his book *De re Militari*, lib. 3. cap. 7. doth inform us; the like doth *Godefridus Stemechius* in his Comments upon *Vegetius* affirm, that their Boats or Ships where so contrived, that they could readily be taken into several peices and quarters for their easily land Carriage; and could in a short time be fixt together again, by Iron Hooks, Hinges, Clasps, Bolts and Staples; and so firm that they would transport great Burdens over considerable large Rivers, Or Armes of the Sea. In these two Figures you may see how they are joyned, and how separated, or taken to peices.

CLIV. He beareth Argent, a Castle-gate-house, Imbattelled with Pedement Heads, Globed: conjoynd to two Towers, spired: the Roof Pyramid with a Lanthorn, or watch Tower on it's top, Gules. born by the name of *Porthall* or *Portall*.

G. the like Gate-house Towered, A. spired and roofed, B. with an Escochion in Base quarterly, with an Escochion charged with a Lion Rampant; is the State or Town Arms of *Schmalkaldn*, in the *Netherlands*.

Things of most Note from Chapter 5. to the end of Chapter 13.
according to the Folio's.

I nstruments belonging to the House- wife, Folio 283.	Plummers Instruments, 325.	Parts of a Vice Lathe, ibid.
Packs of several denomination, 285.	Goalers Instruments, 326.	Parts of a Turning Engine, 360.

Prick, 7 96 98, and 8 45 70 85 131, and 9 142 143 151.
 Prisoners Bolts, 7 86.
 Pioners Spade, 7 102.
 Paddle, 7 102.
 Peel thod, 7 104.
 Pickel, 7 107, and 8 7, and 9 134 136.
 Pitch-fork, 7 107 146 and 8 7 10 and 9 134.
 Pareing ladder, 7 115.
 Pigger, 7 124.
 Punch, 7 126, and 8 112 114, and 9 116 142 164.
 Pareing hook, 7 136.
 Pareing knife, 7 136, and 8 128.
 Pen knife, 7 137, and 9 182, and 12 18 23.
 Plate story, 7 140.
 Pick-Hammer, 7 142, and 9 158.
 Plummers Pincers, 7 143.
 Plain, 7 145, and 8 123 132, and 9 19 20 21 154.
 Pan, 7 145, and 9 7, and 11 13 39.
 Plow Slade, 8 2 48.
 Pruning hook, 8 5 14.
 Plow, Plough, 8 18 132 164, and 9 44 137 140.
 Pole, 8 23 91 147, and 7 106, and 9 39 40.
 Pickel Grains, 8 27.
 Pin, 8 32 127 147, and 6 13, and 9 26 95 154, and 11 42 43.
 Pin Swingle Tree, 8 33.
 Pioners pick, 8 45, and 9 135.
 Paviers pick, 8 70 72 73 74, and 9 135.
 Pick Axe, 8 70, and 9 142 144.
 Paper fouled, 8 73.
 Plasterers Hatcher, 8 75.
 Plumb Rule, 8 78.
 Parallel-side Billet, 8 81.
 Pireh, 8 108.
 Peach, 13 105.
 Pinked shoe, 8 117.
 Pack Saddle, 8 95.
 Pad Saddle, *ibid.*
 Pilling knife, 8 118.
 Pilling Iron, *ibid.*
 Pooler, Poler, 8 120.
 Polisher, 8 122.
 Pareing Chiffel, 8 135, and 9 127.
 Plank, 8 139.
 Pall, 8 26.

- Plain Iron, 8 142.
 Puddles, 8 146.
 Pulley, 8 146 148, and 9 119 120, and 12 32.
 Plumb line, 8 131 148.
 Pin Mandril, 8 151.
 Pointed Grooving hook, 8 154 156.
 Post, 8 165.
 Paralaligrem, 8 169.
 Pareing knife, 7 109.
 Pit Saw, 9 2, and 8 133.
 Pallet, 9 31.
 Pair of Tents, 9 96.
 Pencills, 9 31 34.
 Priming knife, 9 33.
 Pastill, 9 34 83.
 Pairing Spade, 9 137.
 Profitable Rod, 9 48.
 Perpendicular Weather Glass, 9 50.
 Paces of a Clock, 9 53.
 Planispherical Sun-dial, 9 54.
 Perambulator, 9 60.
 Prospective Glass, 9 65.
 Planishing stake, 9 72.
 Plank, 9 80.
 Poiling Pan, 9 83.
 Pot, 6 59, and 9 34, and 11 5 39.
 Prickel, 9 89.
 Pewterers Wheel, 9 81.
 Pair of Glans, 9 95.
 Pan of Fire, 9 113.
 Pot of Fire, *ibid.*
 Point, 9 86 124 125 181, and 13 133.
 Prefs, 9 42 43 132, and 11 14 15 17 18, and 7 131.
 Pining Iron, 9 156.
 Plaster Moulds, 9 160.
 Port in a Wall, 9 192.
 Pannel Aul, 9 162.
 Pannel Bookin, *ibid.*
 Pricking Aul, *ibid.*
 Pair of Clamps, 9 77 78.
 Peging Iron, 9 164 165.
 Puller, 9 175, and 11 20, and 12 144.
 10.
 Potion Cup, 9 176.
 Preserver of the Membranes, 9 179.
 Pellican, 9 175 179, and 11 16 29, and 12 16.
 Pile, 9 185.
 Pedement Imbattelld, 9 109, and 13 144.
 19.

FINIS

TO THE
R E A D E R.

Courteous Reader,

Hitherto I have through great Pains and Charges caused to be Printed *The Academy of Armory*; the remaining part (according to the *Contents* of the Chapters mentioned in the beginning of the first Book) is all ready for the Press, and wants nothing but Encouragers for the Work; for I must acknowledg my self not at present able, or sufficient to carry on so great a Work without Assistance, for the Times are so Hard, Trading so Dead, Money scarce, Paper wanting (else at Double, if not Trebble Rates to that I first begun) Wages great, and daily Layings out so much, and above all Gentlemens Coldness of Zeal in promoting the same, that amongst the many Thousands of Noble Families, and Rich Estates in our parts of the Kingdom, viz. *Cheeshire, Lancashire*, and the Six Counties of *North Wales*, not above Twenty have advanced Money to the Work, whose Names I have Dedicated Chapters unto: Others I have mentioned, who have promised to have it when Published, but nothing to encourage it forwards; so that by reason of my own vast Layings out (above what Received, *which is above Six Hundred Pounds*) I am resolved to go no further, but send *Pen Feathered Birds* into the World, to gather *Crumbs* to Nourish and Bring up the rest, else they are like to *Die in the Nest*; which if the Gentry suffer, it will be more their *Loss* than mine; I shall say no more, but commit it to the *Censure of many*, but to be *Understood by few*, neither indeed can it be, till it arrived to its full *Plumage*; at which time I shall not care who *Censures*, but Answer such as once a Grave Senior did, *Find not Fault till thou hast done a Better*; or as a French General said to such as Envyed his Greatness, *Do as I have done and receive my Honour*. And so Farewel:

Randle Holme.
